9.173 Frequency measurements.
9.174 Power.
9.175 Types of emission.
9.176 Modulation, band width, and channel spacing.
9.177 Inspection and maintenance of tower marking and associated control equipment.

Subpart F—Miscellaneous
9.191 Station identification.
9.192 Availability for inspections.
9.193 Permissible communications.
9.194 Answers to notices of violations.
9.195 Movement of portable or mobile stations from one inspection district to another.

Subpart G—Aircraft Radio Stations
9.311 Scope of service.
9.312 Frequencies available.
9.315 Lighter-than-air craft frequencies.

Subpart H—Air Carrier Aircraft Stations
9.321 Frequencies available.

Subpart I—Private Aircraft Stations
9.331 Frequencies available.

Subpart J—Airdrome Control Stations
9.411 Frequencies available.
9.412 Scope of service.
9.413 Hours of operation.
9.414 Airdrome facilities.
9.415 Interference.
9.416 Power.

Subpart K—Aeronautical Enroute Stations
9.431 Scope of service.
9.432 Frequencies available.

Subpart L—Aeronautical Fixed Stations
9.441 Scope of service.
9.442 Emergency service.
9.443 Frequencies available.

Subpart M—Operational Fixed Stations
9.446 Scope of Service.
9.447 Frequencies available.

Subpart N—Aeronautical Utility Mobile Stations
9.451 Frequencies available.
9.452 Scope of service.
9.453 Power.
9.454 Supervision by airdrome control operator.

Subpart O—Radionavigation Stations
9.511 Frequencies available.
9.512 Scope of service.
9.513 Unattended operation of domestic radiobeacon stations.

Subpart P—Flight Test Stations
9.611 Frequencies available.
9.612 Eligibility of licensee.
9.613 Cooperative use of facilities.
9.614 Scope of service.
9.615 Power.

Subpart Q—Flying School Stations
9.711 Frequencies available.
9.712 Eligibility of licensee.
9.713 Limitations of instructional facilities.
9.714 Coordinated use of instructional facilities.
9.715 Scope of service.
9.716 Supervision by airdrome control operator.
9.717 Power.
9.718 Frequency assignments nonexclusive.
9.719 Private service prohibited.

Subpart R—Aeronautical Public Service Stations
9.811 Frequencies available.
9.812 Stations licensed for aeronautical public service.
9.813 Scope of service.
9.814 Requirement for aeronautical public service station.
9.815 Priority of communications.

Subpart S—Civil Air Patrol Stations
9.911 Eligibility for station license.
9.912 Frequencies available.
9.913 Scope of service.
9.914 Operator requirements.

Subpart T—Aeronautical Advisory Stations
9.1001 Eligibility for station license.
9.1002 Frequencies available.
9.1003 Power output.
9.1004 Scope of service.
9.1005 Operator requirements.

Subpart U—Aeronautical Metropolitan Stations
9.1101 Eligibility for station license.
9.1102 Frequencies available.
9.1103 Points of communication.
9.1104 Scope of service.
9.1105 Application for Aeronautical Metropolitan Station.

Subpart V—CONELRAD
9.1201 Scope and objective.
9.1202 General.
9.1203 Definitions.
9.1204 Alerting.
9.1205 Operation.

AUTHORITY: §§ 9.1 to 9.1205 issued under sec. 4, 48 Stat. 1066, as amended; 47 U. S. C. 154. Interpret or apply sec. 303, 48 Stat. 1082, as amended; 47 U. S. C. 303.

SUBPART A—GENERAL INFORMATION

§ 9.1 *Basis and purpose.* (a) The basis for the rules contained in this part is the Communications Act of 1934, as amended, and applicable treaties and agreements to which the United States is a party. The rules in this part are issued pursuant to the authority contained in Title III of the Communications Act of 1934, as amended, which vests authority in the Federal Communications Commission to regulate radio transmissions and to issue licenses for radio stations.

(b) The purpose of the rules in this part is to prescribe the manner and conditions under which portions of the radio spectrum may be made available for radio communication and navigation facilities to aircraft operators, aeronautical enterprises and organizations which require radio transmitting facilities for safety purposes or other necessity.

§ 9.2 *General citizenship restrictions.* A station license may not be granted to or held by:

(a) Any alien or the representative of any alien;

(b) Any foreign government or the representative thereof;

(c) Any corporation organized under the laws of any foreign government;

(d) Any corporation of which any officer or director is an alien;

(e) Any corporation of which more than one-fifth of the capital stock is

owned of record or voted by: Aliens or their representatives; a foreign government or representative thereof; or any corporation organized under the laws of a foreign country;

(f) Any corporation directly or indirectly controlled by any other corporation of which any officer or more than one-fourth of the directors are aliens, if the Commission finds that the public interest will be served by the refusal or revocation of such license; or

(g) Any corporation directly or indirectly controlled by any other corporation of which more than one-fourth of the capital stock is owned of record or voted by: Aliens or their representatives; a foreign government or representatives thereof; or any corporation organized under the laws of a foreign government, if the Commission finds that the public interest will be served by the refusal or revocation of such license.

§ 9.3 *Definition of terms.* For the purpose of this part the following definitions are applicable:

Aeronautical advisory station. An aeronautical station used for advisory and civil defense communications with private aircraft stations.

Aeronautical enroute station. An aeronautical station carrying on a service with aircraft stations, but which may also carry on a limited communication service with other aeronautical enroute stations.

Aeronautical fixed service. A fixed service intended for the transmission of information relating to air navigation, preparation for and safety of flight.

Aeronautical fixed station. A station in the aeronautical fixed service.

Aeronautical marker beacon station. A radionavigation land station in the aeronautical radionavigation service which provides a signal to designate a small area above the station.

Aeronautical metropolitan station. An aeronautical station used for communication with aircraft, including helicopters, operating between a main air terminal of a metropolitan area and subordinate landing areas.

Aeronautical mobile service. A mobile service between aircraft stations and aeronautical stations, or between aircraft stations.

Aeronautical public communication service. A communication service carried on between aircraft and land radio stations for the purpose of providing a public communication service for persons aboard aircraft.

Aeronautical public service station. A radio station, ground or aircraft, operated in the aeronautical public communication service.

Aeronautical station. A land station in the aeronautical mobile service, carrying on a service with aircraft stations. In certain instances an aeronautical station may be placed on board a ship.

Aeronautical radionavigation service. A radionavigation service intended for the benefit of aircraft.

Aeronautical utility land station. A land station located at airdrome control towers and used for control of ground vehicles and aircraft on the ground at airdromes.

Aeronautical utility mobile station. A mobile station used for communication, at airdromes, with the aeronautical utility land station, ground vehicles, and aircraft on the ground.

Aircarrier aircraft station. An aircraft station aboard an aircraft engaged in, or essential to, transportation of passengers or cargo for hire. For the purpose of these rules with the exception of § 9.1002, an aircraft weighing less than 10,000 lbs. may be considered, at the option of the applicant, as a private aircraft even though actually engaged in air carrier operations. The election by the applicant will determine the application form to be used, the equipment and frequencies to be employed and the regulations applicable to the aircraft radio station.

Aircraft station. A mobile station installed on board any type of aircraft and continuously subject to human control.

Airdrome control station. An aeronautical station providing communication between an airdrome control tower and aircraft.

Altimeter station. A radio navigation mobile station, in the aeronautical radionavigation service, the emissions of which are intended to determine the altitude of the aircraft, aboard which the altimeter station is located, above the earth's surface.

Aviation services. Aviation services are primarily for the safe, expeditious and economical operation of aircraft. They include the aeronautical fixed service, aeronautical mobile service, aeronautical radionavigation service, and secondarily, the handling of public correspondence to and from aircraft.

Civil Air Patrol Land Station. A land station used exclusively for communications of the Civil Air Patrol.

Civil Air Patrol Mobile Station. A mobile station used exclusively for communications of the Civil Air Patrol.

Fixed service. A service of radiocommunication between specified fixed points.

Fixed service. A station in the fixed service.

Flight test aircraft station. An aircraft station aboard an aircraft used for the transmission of essential communications in connection with the tests of aircraft or major components of aircraft.

Flight test station. An aeronautical station used for the transmission of essential communication in connection with the testing of aircraft or major components of aircraft.

Flying school aircraft station. An aircraft station aboard an aircraft used for communications pertaining to instructions to students or pilots while actually operating aircraft.

Flying school station. An aeronautical station used for radiocommunication pertaining to instructions to students or pilots while actually operating aircraft.

Glide path station. A directional radio beacon associated with an instrument landing system which provides guidance in the vertical plane to an aircraft for the purpose of approach in landing.

Ground radio station. Any radio station on the ground equipped or engaged in radio communication or radio transmission of energy.

Landing area. Any locality either land or water, including airports and intermediate landing fields, which is used, or intended to be used, for the landing and take-off of aircraft, whether or not facilities are provided for shelter, servicing, or repair of aircraft, or for receiving or discharging passengers or cargo.

Land station. A station in the mobile service not intended for operation while in motion.

Localizer station. A radionavigation land station in the aeronautical radionavigation service which provides signals for the lateral guidance of aircraft with respect to a runway center line.

Mobile service. A service of radiocommunication between mobile and land stations, or between mobile stations.

Mobile station. A station in a mobile service intended to be used while in motion or during halts at unspecified points.

Omni directional range station. A radionavigation land station in the aeronautical radionavigation service providing direct indication of the bearing (omni bearing) of that station from an aircraft.

Operational fixed station. A fixed station, not open to public correspondence, operated by and for the sole use of those agencies operating their own radiocommunication facilities in the Public Safety, Industrial, Land Transportation, Marine, or Aviation Service.

Private aircraft station. An aircraft station on board an aircraft not operated as an air carrier.

Radiobeacon station. A radionavigation station the emissions of which are intended to enable a mobile station to determine its bearing or its direction in relation to the radiobeacon station.

Radiolocation. Determination of a position or of a direction by means of the constant velocity or rectilinear propagation properties of Hertzian waves.

Radiolocation service. A service involving the use of radionavigation.

Radionavigation. Radiolocation intended solely for the determination of position or direction or for obstruction warning, in navigation.

Radionavigation station. A station in the radionavigation service.

Radionavigation service. A radiolocation service involving the use of radionavigation.

Radio range station. A radionavigation land station in the aeronautical radionavigation service providing radial equisignal zones.

Surveillance radar station. A radionavigation land station in the aeronautical radionavigation service employing radar to display the presence of aircraft within its range.

Telemetering. Telemetering is the automatic transmission of instrument readings.

SUBPART B—APPLICATIONS AND LICENSES

§ 9.101 *Applications made on prescribed forms.* Applications for authorizations for stations in the aviation services shall be submitted on the prescribed forms which may be obtained from the Washington, D. C. office of the Commission, or from any of its field offices.

§ 9.102 *Place of filing.* Each application for authorization for stations in the aviation services shall be filed with the Federal Communications Commission, Washington 25, D. C.

§ 9.103 *Subscription and verification of applications.* One copy of each application for authorization in the aviation services shall be personally subscribed and verified by the applicant or, if a corporation, by an authorized official of the applicant. Subscription and verification may be made by the attorney for the applicant (a) in case of physical disability of the applicant or (b) his absence from the continental United States.

§ 9.104 *Contents of applications.* Each application shall be specific and complete with regard to frequency, power, equipment, location, and other information required by the application form.

§ 9.105 *Aircraft radio station licenses*—(a) *Application for aircraft radio station license.* (1) Application for new or modified aircraft radio station license shall be submitted on FCC Form 404, Application for Aircraft Radio Station License.

(2) An air carrier, in submitting applications for aircraft radio station licenses, may specify on a single FCC Form 404, the total number of air carrier aircraft radio stations in the fleet. Such an application may include a request for a single instrument of authorization for the operation of all radio stations aboard the aircraft of the fleet. A report shall be filed annually with the Commission specifying the type and registration number of each aircraft in the fleet.

(3) Any scheduled U. S. air carrier, conducting operations pursuant to an interchange or lease agreement authorized by the Civil Aeronautics Board, may include in its application, filed in accordance with subparagraph (2) of this paragraph, a request for permission to temporarily transfer the control of any of its air carrier aircraft radio stations to another U. S. scheduled air carrier, currently licensed by the FCC with whom it has such an interchange or lease agreement, in order to enable such carrier to operate the station while the interchange or lease agreement is in effect. Such request must specify the names of the scheduled air carriers participating in the interchange or lease agreement who will operate such aircraft, including the radio station aboard.

(b) *Application for renewal of aircraft radio station license.* Application for renewal of aircraft radio station license shall be submitted on FCC Form 405–A, Application for Renewal of Radio Station License (Short Form). Unless otherwise directed by the Commission, each application for renewal of license shall be filed during the last 60 days of the license term. In any case in which the licensee has, in accordance with the Commission's rules made timely and sufficient application for renewal of license, no license with reference to any activity of a continuing nature shall expire until such application shall have been finally determined.

(c) *Temporary station license for private aircraft.* The purchaser of new aircraft with factory-installed radio equipment may operate a private aircraft radio station on the aircraft for a period of 30 days under special temporary authority evidenced by a copy of a certificate (FCC Form No. 453–B) executed by the manufacturer, dealer or distributor of such aircraft, the original of which has been mailed to the Commission with the formal application for station license.

§ 9.106 *Application for aeronautical public service aircraft station.* All applications for Aeronautical Public Service Aircraft Stations, new or modified, shall be submitted on FCC Form 404. Application for renewal of station license shall be submitted on FCC Form 405–A. Unless otherwise directed by the Commission, each application for renewal of license shall be filed during the last 60 days of the license term. In any case in which the licensee has, in accordance with the Commission's rules made timely and sufficient application for renewal of license, no license with reference to any activity of a continuing nature shall expire until such application shall have been finally determined.

§ 9.107 *Transfer and assignment of aircraft.* Upon the sale, assignment or transfer of any aircraft, a new application for license shall be submitted in accordance with § 9.105 (a) (1).

§ 9.108 *Application for ground station authorization.* Ground station authorization may be obtained as follows:

(a) An application for construction permit for each ground station, except applications for Civil Air Patrol Stations, shall be submitted on FCC Form 401. The same form shall be used to obtain authority to modify or replace equipment. All applications for new or modified Civil Air Patrol Stations shall be submitted on FCC Form 480. All applications shall be accompanied by FCC Form 401–A in triplicate, in all cases when:

(1) The antenna structures proposed to be erected will exceed an over-all height of 170 feet above ground level, except that where the antenna is mounted on top of an existing man-made structure and does not increase the over-all height of such man-made structure by more than 20 feet, no Form 401–A need be filed, or

(2) The antenna structures proposed to be erected will exceed an over-all height of 1 foot above the established airport (landing area) elevation for each 200 feet of distance, or fraction thereof, from the nearest boundary of such landing area, except that where the antenna does not exceed 20 feet above the ground or if the antenna is mounted on top of an existing man-made structure or natural formation and does not increase the over-all height of such man-made structure or natural formation by more than 20 feet, no Form 401–A need be filed.

(b) An application on FCC Form 401 may be submitted for construction permit for any number of aeronautical utility mobile stations for the same licensee at the same location.

(c) Application for station license: Upon completion of construction or installation of a station in exact accordance with the terms and conditions set forth in the construction permit, an application for license may be filed on FCC Form No. 403.

(d) Upon request of the applicant, and where it appears to the Commission that the circumstances are such that there will be no deviation from the terms of the construction permit, both construction permit and license may be granted simultaneously.

(e) Application for renewal of station license shall be submitted on FCC Form 405–A. Unless otherwise directed by the Commission, each application for renewal of license shall be filed during the last 60 days of the license term. In any case in which the licensee has, in accordance with the Commission's rules made timely and sufficient application for renewal of license, no license with reference to any activity of a continuing nature shall expire until such application shall have been finally determined.

(f) Application for transfer or assignment of a ground-station construction permit or license shall be filed on FCC Form No. 702.

§ 9.109 *Application for special temporary authorization.* (a) Special temporary authority may be granted for the operation of a station for a limited time, or in a manner and to an extent or for service other than or beyond that authorized in an existing license upon proper application therefor. No such request will be considered unless full particulars as to the purposes for which the request is made are stated and unless the request is received by the Commission at least 10 days previous to the date of proposed operation. A request received within less than 10 days may be accepted upon due showing of sufficient reasons for the delay in submitting such request.

(b) In cases of emergency found by the Commission involving danger to life or property or due to damage of equipment, temporary authorization may be granted for the construction and operation of a station for the duration of such emergency. Requests for such temporary authorization may be filed by unverified telegram or letter and shall contain the following information:

(1) Name, address and citizenship status of applicant;

(2) Statement of facts upon which the request for emergency authorization is based, including estimated duration of emergency;

(3) Class of station and nature of service;

(4) Location of station including, when appropriate, geographical coordinates;

(5) Equipment to be used, specifying manufacturer, frequencies desired, plate power input to final radio frequency stage, and type of emission.

If any of the foregoing information is presently on file with the Commission, such information may be included by reference. The applicant may be required, whenever such action may be considered necessary by the Commission,

to supplement the information enumerated above by filing as soon as practicable a formal application on the prescribed form.

§ 9.110 *Changes in antenna.* (a) Changes may be made in the antenna or antenna supporting structure of any station in the aviation services, except as provided in paragraph (b) of this section, without specific authorization from the Commission, provided that for stations other than mobile or aircraft (1) the Commission at Washington, D. C., and the Commission's engineer-in-charge of the inspection district in which the station is located are notified in advance of these changes; and (2) a description of these changes is incorporated in the next application for renewal or modification of the station license.

(b) No changes in the antenna or antenna structure for ground stations other than mobile may be made without specific authorization from the Commission if (1) such changes will make the antenna or structure higher than 170 feet above the ground level; (2) the antenna structure proposed will exceed an overall height of one foot above ground for each 200 feet of distance, or fraction thereof, from the nearest boundary of any landing area; (3) the antenna or antenna structure is presently required to be painted or lighted in accordance with Part 17 of this chapter. Requests for the changes outlined in this paragraph should be accompanied by FCC Form 401–A.

§ 9.111 *Amendments and dismissals.* Any application prior to the time it is granted or designated for hearing, may be amended by the applicant or dismissed without prejudice upon request of the applicant.

§ 9.112 *Form of amendments.* Any amendments to an application shall be subscribed, verified, and submitted in the same manner and with the same number of copies as required for the original application.

§ 9.113 *Amendments ordered.* The Commission may at any time order the applicant to amend an application so as to make it more definite and complete.

§ 9.114 *Defective application.* (a) Applications which are defective with respect to completeness of answers to required questions, execution, or other matters of a purely formal character will not be received for filing by the Commission, unless the Commission shall otherwise direct, and will be returned to the applicant with a brief statement as to the omissions.

(b) If the applicant is requested by the Commission to file any documents or information not included in the prescribed application form, a failure to comply with such request will constitute a defect in the application.

(c) Applications which are not in accordance with the Commission's rules, regulations or other requirements will be considered defective unless accompanied either (1) by a petition to amend any rule or regulation with which the application is in conflict, or (2) by a request of the applicant for waiver of, or an exception to, any rule, regulation or requirement with which the application is in conflict. Such request shall show the nature of the waiver or exception desired and set forth the reasons in support thereof.

§ 9.115 *Partial grants.* Where any application is granted in part, or with any privileges, terms, or conditions other than those requested, without a hearing thereon, such action of the Commission shall be considered acceptable and final unless the applicant shall, within 20 days from the date on which public announcement of such grant is made, or from its effective date whichever is later, file with the Commission a written request for a hearing with respect to the part, privileges, terms or conditions, not granted. Upon receipt of such request, the Commission may vacate its original action upon the application and designate the application for hearing.

§ 9.116 *License period.* For all stations in the Aviation Services, the license period shall be as follows:

(a) Each station license will be issued for a term of from one to five years from the effective date of grant, the term varying as may be necessary to permit the orderly scheduling of renewal applications.

(b) Each station license normally will be renewed, upon proper application, for a term of four years from the effective date of renewal.

§ 9.117 *Renewal of license.* Unless otherwise directed by the Commission, each application for renewal of license shall be filed at least 60 days prior to the expiration date of the license sought to be renewed.

§ 9.118 *Posting station licenses and transmitter identification cards.* (a) The current authorization for stations at fixed locations in the aviation services shall be conspicuously posted at the place where the transmitter is located. In the event an authorization covers transmitters at several locations, the authorization shall be posted at one transmitter location and a photographic copy thereof shall be posted at all other transmitter locations. The photographic copy shall bear a notation of the location of the original authorization.

(b) The current authorization for aircraft radio stations may be posted or kept at a convenient easily accessible location in the aircraft. Air carriers licensed by means of a single instrument of authorization for the operation of all fleet aircraft may post or keep in a conveniently accessible location in each aircraft a photocopy of the original authorization.

(c) The current authorization for each land mobile station shall be retained as a permanent part of the station record, but need not be posted. An executed Transmitter Identification Card (FCC Form 452–C) shall be affixed to each land mobile transmitter or associated control equipment. When the transmitter is not in view of and readily accessible to the operator, it is preferred that the identification card be affixed to the control equipment at the transmitter operating position. The following information shall be entered on the card by the permittee or licensee:

(1) Name of permittee or licensee.

(2) Station call signal assigned by the Commission.

(3) Exact location or locations of the transmitter records.

(4) Frequency or frequencies on which the transmitter to which attached is adjusted to operate; and

(5) Signature of the permittee or licensee, or a designated official thereof.

§ 9.119 *Posting operator licenses.* The original license of each station operator shall be conspicuously posted at the place he is on duty, or, in the case of mobile units either the license or verification card must be kept in his personal possession: *Provided, however,* That if the operator on duty holds a restricted radiotelephone operator permit of the card form (as distinguished from the diploma form) he shall not post that permit but shall keep it in his personal possession.

§ 9.120 *Discontinuance of operation.* The Commission and the Commission's engineer-in-charge of the district in which the station is located shall be notified upon the permanent discontinuance of any station in the aviation services except stations in aircraft licensed for other than aeronautical public service for hire.

§ 9.121 *Suspension of operation.* If, for any reason, it is necessary to suspend the operation of any airdrome control or ground aeronautical navigational radio station, notification of such suspension shall be made to the nearest communications center of the Civil Aeronautics Administration. If possible, the notice shall forecast the time of resumption of service. In any event, the same Civil Aeronautics Administration center shall be again notified of resumption of service.

SUBPART C—TESTS

§ 9.141 *Equipment and service tests.* Equipment and service tests may be conducted as prescribed below provided that the necessary precautions are taken to avoid interference.

(a) *Equipment test.* Upon completion of construction of a radio station in exact accordance with the terms of the construction permit, the technical provisions of the application therefor and the rules and regulations governing the class of station concerned and, prior to filing of application for license, the permittee may test the equipment for a period not to exceed 30 days, provided that the Commission's engineer-in-charge of the district in which the station is located is notified 2 days in advance of the beginning of tests. Upon notice from the Commission, the permittee shall cancel, suspend, or change the date of beginning or the period for such tests as directed.

(b) *Service test.* When construction and equipment tests are completed in exact accordance with the terms of the construction permit, the technical provisions of the application therefor, and the rules and regulations governing the class of station concerned, and after an application for station license has been filed with the Commission showing the transmitter to be in satisfactory operating condition, the permittee may conduct service tests in exact accordance with the terms of the construction permit until final action is taken on the application for license, provided that the Commission's engineer-in-charge of the district in which the station is located is notified 2 days in advance of the beginning of such tests. Upon notice from the Commission, the permittee shall cancel, suspend or change the date of beginning or period of such tests as directed. Service tests must be started before the expiration date of the construction permit.

§ 9.142 *Routine tests.* The licensees of all classes of stations in the aviation services are authorized to make such routine tests as may be required for the proper maintenance of the stations provided that precautions are taken to avoid interference with any station.

SUBPART D—LOGS

§ 9.151 *Information required in station logs.* (a) All stations in the aviation services except aeronautical utility mobile stations and aircraft stations other than those which may be required by law to maintain logs shall keep an adequate log showing:

(1) Hours of operation.

(2) Frequencies used.

(3) Stations with which communication was held.

(4) Signature of operator(s) on duty.

(b) The licensee of any radio station which has an antenna structure requiring illumination shall make the following entries in the station record:

(1) The time the tower lights are turned on and off each day if manually controlled.

(2) The time the daily check of proper operation of the tower lights was made.

(3) In the event of any observed or otherwise known failure of a tower light:

(i) Nature of such failure.

(ii) Date and time the failure was observed, or otherwise noted.

(iii) Date, time and nature of the adjustments, repairs or replacements were made.

(iv) Identification of Airways Communication Station (Civil Aeronautics Administration) notified of the failure of any code or rotating beacon light not corrected within thirty minutes, and the date and time such notice was given.

(v) Date and time notice was given to the Airways Communication Station (Civil Aeronautics Administration) that the required illumination, was resumed.

(4) Upon completion of the periodic inspection required at least once each three months:

(i) The date of the inspection and the condition of all tower lights and associated tower lighting control devices, indicators and alarm systems.

(ii) Any adjustments, replacements, or repairs made to insure compliance with the lighting requirements and the date such adjustments, replacements, or repairs were made.

§ 9.152 *Station records in the aeronautical public service.* All stations licensed in the aeronautical public service shall keep a file of all record communications handled and all ground stations so licensed shall keep a record of radiotelephone contacts either in the form of telephone traffic tickets or as a separate list.

§ 9.153 *Required retention period.* The logs in the aviation services may be destroyed after a period of 30 days except:

(a) That logs involving communications incident to a disaster or which include communications incident to, or involved in, an investigation by the Commission and concerning which the licensee has knowledge, shall be retained by the licensee until specifically authorized in writing by the Commission to destroy them.

(b) That logs incident to or involved in any claim or complaint of which the licensee has knowledge shall be retained by the licensee until such claim or complaint has been fully satisfied or until the same has been barred by statute limiting the time for the filing of suits upon such claims.

§ 9.154 *Logs, by whom kept.* An entry or entries in the log of each station shall be signed or initialed by a person having actual knowledge of the facts recorded.

§ 9.155 *Log form.* The logs shall be kept in an orderly manner, and in such detail that the data required are readily available. Key letters or abbreviations may be used if proper meaning or explanation is set forth in the log or in a communication manual available at the station. Recordings may be used in lieu of written logs provided there is associated with each recording a statement indicating the station and period covered over the signature of a person having knowledge of the facts recorded.

§ 9.156 *Correction of log.* No log or portion thereof shall be erased, obliterated, or willfully destroyed within the required retention period. Any necessary correction may be made only by the person originating the entry who shall indicate the erroneous portion, initial the correction made, and indicate the date of correction.

SUBPART E—TECHNICAL SPECIFICATIONS

§ 9.171 *Installation and operation of transmitting equipment.* The transmitter shall be so installed and protected that it is not accessible to other than duly authorized persons. The radiations of the transmitter shall be suspended immediately when there is a deviation from the terms of the station license.

§ 9.172 *Frequency stability.* The carrier frequency of stations in the aeronautical services shall be maintained with the following percentage of the assigned frequency. (These tolerance requirements are obviously not applicable to certain devices such as altimeters and various radar equipments. Tolerance requirements will be specified on the licenses under which such devices operate.):

(a) All aircraft stations on frequencies above 500 kc	0.01
(b) All ground stations on frequencies above 30,000 kc	0.01
(c) All stations on frequencies of 500 kc or below	0.02
(d) Aeronautical fixed stations on frequencies from 1605 to 4000 kc with power of 200 watts and below	0.01
and with power above 200 watts	0.005
(e) Aeronautical fixed stations on frequencies from 4000 to 30,000 kc with power of 500 watts and below	0.01
and with power above 500 watts	0.003
(f) All other ground stations on frequencies from 1605 to 4000 kc with power of 200 watts and below	0.01
and with power above 200 watts	0.005
(g) All other ground stations on frequencies from 4000 to 30,000 kc with power of 500 watts and below	0.01
and with power above 500 watts	0.005

§ 9.173 *Frequency measurements.* (a) The assigned frequencies of all stations in the aviation services shall be measured (1) when the transmitter is initially installed, (2) at any time the frequency determining elements are changed, and (3) at any time the licensee may have reason to believe the frequency has shifted beyond the tolerance specified by the Commission's rules.

(b) Each frequency measurement shall be recorded in the station's records by a statement signed by the person making the measurement and showing the deviation above or below the assigned frequency in cycles per second or percentage of deviation plus or minus the assigned frequency. A statement showing that an automatic frequency monitor was in service during any period shall be deemed to meet the above requirement for such period.

§ 9.174 *Power.* The power which may be authorized to a station in the aviation services shall be not more than the minimum required for satisfactory technical operation.

§ 9.175 *Types of emission.* Stations in the aviation services may be authorized to use type A1, A2, A3 and special emission as may be appropriate. The authorization to use A3 emission will be construed to include the use of tone signals or signaling devices whose sole function is to establish or maintain voice communications. Special emission includes all types not provided for by existing international regulations, such as all types of FM, pulse transmission, and frequency shift keying.

§ 9.176 *Modulation; bandwidth and channel spacing*—(a) The carrier shall be modulated to a sufficiently high degree to provide effective communication, but in no case shall modulation result in objectionable emission of energy outside the authorized communication band.

(b) Although present channel spacing in the very high frequency bands is 200 kilocycles, it is expected that this spacing will eventually be reduced to 100 kilocycles. Design of VHF equipment for future use should be made with this in mind.

§ 9.177 *Inspection and maintenance of tower marking and associated control equipment.* The licensee of any radio station which has an antenna structure required to be painted or illuminated pursuant to the provisions of section 303 (q) of the Communications Act of 1934, as amended, and/or Part 17 of this chapter, shall operate and maintain the tower marking and associated control equipment in accordance with the following:

(a) The tower lights shall be observed at least once each 24 hours, either visually or by observing an automatic and properly maintained indicator designed to register any failure of such lights, to insure that all such lights are functioning properly as required; or, alternatively, there shall be provided and properly maintained an automatic alarm system designed to detect any failure of the tower lights and to provide indication of such failure to the licensee.

(b) Any observed or otherwise known failure of a code or rotating beacon light or top light not corrected within thirty minutes, regardless of the cause of such failure, shall be reported immediately by telephone or telegraph to the nearest Airways Communication Station or office of the Civil Aeronautics Administration. Further notification by telephone or telegraph shall be given immediately upon resumption of the required illumination.

(c) All automatic or mechanical control devices, indicators, and alarm systems associated with the tower lights shall be inspected at intervals not to exceed three months, to insure that such apparatus is functioning properly.

(d) All lighting shall be exhibited from sunset to sunrise unless otherwise specified in the instrument of station authorization.

(e) A sufficient supply of spare lamps shall be maintained for immediate replacement purposes at all times.

(f) All towers shall be cleaned or repainted as often as is necessary to maintain good visibility.

SUBPART F—MISCELLANEOUS

§ 9.191 *Station identification*—(a) *Telephony.* (1) Air carrier aircraft: In lieu of radio station call letters, the official aircraft registration number, or company flight identification may be used, provided, adequate records are maintained by the air carrier to permit ready identification of individual aircraft.

(2) Private aircraft: In lieu of radio station call letters, only the official aircraft registration number may be used.

(3) When use is made of the aircraft registration number, the full number must be given upon initial call of each continuous series of communications. In other communications in each series, the last three characters may be used, provided, the practice is first inaugurated by the ground station operator.

(4) An aeronautical public service aircraft station may use the identification of the aircraft station with which it is associated or an assigned telephone number, provided that, adequate records are maintained to permit ready identification of the aircraft station.

(5) A ground station in the aviation services may use in lieu of the assigned radio call letters the name of the city, area, or airdrome which it serves, together with such additional identification as may be required.

(b) *Telegraphy.* In radiotelegraphy the complete radio station call letters shall be used at the beginning and termination of each contact. After communication has been established, continuous two-way communication may be conducted without further identification or call-up (if no mistake in identity is liable to occur) until the termination of the contact. Aeronautical enroute stations utilizing automatic keying shall transmit call letters at the end of each sequence of communications and, in any event, at least once each hour during periods of transmission.

§ 9.192 *Availability for inspections.* All classes of stations in the aviation services and the maintenance records of said stations shall be made available for inspection upon request of an authorized representative of the Commission made to the licensee or to his representative.

§ 9.193 *Permissible communications.* All ground stations in the aviation services shall transmit only communications for the safe, expeditious and economical operation of aircraft and the protection of life and property in the air: *Provided, however,* That aeronautical public service stations, and Aeronautical Advisory and Civil Air Patrol land and mobile stations may communicate in accordance with the particular section of these regulations which govern the operation of these classes of stations, and any station in the aviation services in Alaska, regardless of class in which licensed, may transmit messages concerning sickness, death, weather, ice conditions or other matters relating to safety of life and property if:

(a) There is no established means of communication between the points in question;

(b) No charge is made for the communcation service; and

(c) A copy of each message so transmitted is kept on file at the transmitting station in accordance with § 9.153.

§ 9.194 *Answers to notices of violations.* (a) Any licensee receiving official notice of a violation of the terms of the Communications Act of 1934, as amended, any legislative act, Executive order, treaty to which the United States is a party, or the rules and regulations of the Federal Communications Commission, shall, within 3 days from such receipt, send a written answer to the office of the Commission originating the official notice. If an answer cannot be sent, or an acknowledgement made within such 3-day period, by reason of illness or other unavoidable circumstances, acknowledgement and answer shall be made at the earliest practicable date with a satisfactory explanation of the delay. The answer to each notice shall be complete in itself and shall not be abbreviated by reference to other communications or answers to other notices.

(b) If the notice relates to some violation that may be due to the physical or electrical characteristics of transmitting apparatus, the answer shall state fully what steps, if any, are taken to prevent future violations, and if any new apparatus is to be installed, the date such apparatus was ordered, the name of the manufacturer, and promised date of delivery. If the installation of such apparatus requires a construction permit, the file number of the application shall be given, or if a file number has not been assigned by the Commission, such identification as will permit ready reference.

(c) If the notice of violation relates to incompetent maintenance resulting in improper operation of the transmitter, the name and license number of the operator performing the maintenance shall be given.

(d) If the notice of violation relates to some lack of attention to or improper operation of the transmitter by other employees, the reply shall set forth the steps taken to prevent a recurrence of such lack of attention or improper operation.

§ 9.195 *Movement of portable or mobile stations from one inspection district to another.* When portable or mobile ground stations in the aviation services are moved from one radio inspection district to another, for regular operation therein, the licensee shall notify the Commission's engineers-in-charge of the respective districts. These engineers-in-charge shall be notified prior to the move, if practicable, but, in any event, not later than 48 hours thereafter.

SUBPART G—AIRCRAFT RADIO STATIONS

§ 9.311 *Scope of service.* Communications by an aircraft station in the aeronautical mobile service shall be limited to the necessities of safe aircraft operation. Normally contacts with an airdrome control station shall not be attempted unless the aircraft is within the area served by the station.

§ 9.312 *Frequencies available.* The following frequencies are available to aircraft stations in the aeronautical mobile service:

(a) 375 kilocycles: International direction-finding frequency for use outside the continental United States.

(b) 457 kilocycles: Working frequency exclusively for aircraft on sea flights desiring an intermediate frequency.

(c) 500 kilocycles: International calling and distress frequency for ships and aircraft over the seas. Transmission on this frequency with the exception of urgent and safety messages and signals must cease twice each hour, for 3 minutes beginning at x:15 and x:45 o'clock GCT.

(d) [Reserved.]

(e) 8364 kilocycles: Frequency for use by lifeboats, liferafts and other survival craft for search and rescue communications with stations of the maritime mobile service.

(f) 121.7 and 121.9 megacycles: Airport utility frequencies.

(g) 121.5 megacycles: This frequency is a universal simplex channel for emergency and distress communications. It will provide a means of calling and working between the various services in connection with search and rescue operations, an emergency means for direction finding purposes and a means for establishing air to ground contact with lost aircraft. This frequency will not be assigned to aircraft unless there are also assigned and available for use other frequencies to accommodate the normal communication needs of the aircraft.

(h) These frequencies are available for air traffic control operations:

118.1 A	119.9	123.7	125.5
118.3	120.1	123.9	125.7
118.5	120.3 B	124.1	125.9
118.7	120.5	124.3	126.1 E
118.9	120.7	124.5	126.3 E
119.1	120.9	124.7	126.5
119.3	121.1	124.9	126.7 F
119.5	121.3 C	125.1	
119.7	121.7 D	125.3	

A—Primarily for international operations.
B—Primarily for communications with Air Route Traffic Control Centers.
C—For communication with low activity airdrome control stations.
D—Available on a secondary basis to its primary use as an airport utility frequency.
E—Available on a non-interference basis to government use of 126.18 Mc.
F—For communication with Interstate Airway Communication Stations.

(i) Miscellaneous maritime frequencies: Calling and working frequencies of ship stations may also be assigned to aircraft stations for the purpose of communicating with coastal stations, or ship stations, available for A1, A2, and A3 emission in conformity with Part 8 of this chapter, Stations on Shipboard in the Maritime Services, provided the Commission is satisfied in each case that undue interference will not be caused to the service of ship or coastal stations.

(j) Other frequencies which may be required for overseas and foreign operation may also be made available upon the showing that a need exists therefor.

(k) In addition to the frequencies specifically designated in this part, a licensee, when operating an aircraft station outside the United States as defined in the Communications Act of 1934, as amended, may use such frequencies as may be required to maintain communications by the authority having jurisdiction over the ground stations with which it is desired to maintain communication.

§ 9.313 *Foreign aircraft stations operating within the U. S.* (a) Aircraft of member States of the ICAO may, in or over the United States, carry radio transmitting apparatus only if a license to install and operate such apparatus has been issued by the appropriate authorities of the State in which the aircraft is registered. The use of radio transmitting apparatus in or over the United States shall be in accordance with the rules and regulations of this part.

(b) Radio transmitting apparatus on aircraft of member States of the ICAO referred to in paragraph (a) of this section may be operated only by members of the flight crew who are provided with a radio operator license of the proper class, issued or recognized by the appropriate authorities of the State in which the aircraft is registered.

§ 9.315 *Lighter-than-air craft frequencies.* The following additional frequency may be assigned to lighter-than-air craft and to aeronautical stations serving lighter-than-air craft:

3281 kc.

SUBPART H—AIR CARRIER AIRCRAFT STATIONS

§ 9.321 *Frequencies available.* The following frequencies, in addition to those listed in § 9.312 are available to air carrier aircraft stations:

(a) [Reserved.]

(b) These frequencies are available for communication to airdrome control stations:

Mc.	*Mc.*	*Mc.*
125.7	126.1	126.5
125.9	126.3	

(c) 126.7 megacycles: Air carrier aircraft to airway communication stations.

(d) The aeronautical frequencies listed under §§ 9.432 through 9.440 are also available to air carrier aircraft upon showing that agreements have been made with the licensee of appropriate ground stations.

(e) 3023.5 kilocycles is available to air carrier aircraft only where service on the appropriate very high frequency is not available or where service is suspended due to equipment failure.

SUBPART I—PRIVATE AIRCRAFT STATIONS

§ 9.331 *Frequencies available.* The following frequencies, in addition to those listed in § 9.312 are available to private aircraft stations:

(a) 3023.5 kilocycles: Aircraft calling and working frequency for use by private aircraft.

(b) 122.1 and 122.3 megacycles: Private aircraft to airway communication stations.

(c) 122.5, 122.7, and 122.9 megacycles: Private aircraft to airdrome control stations.

(d) The aeronautical frequencies listed under §§ 9.432 through 9.440 are also available to private aircraft upon showing that a need exists and that agreements have been made with the licensee of appropriate ground stations.

(e) 122.8 megacycles: Private aircraft stations to Aeronautical Advisory stations and between private aircraft stations themselves while in flight, using 6A3 emission only and a power output not to exceed 10 watts. In so far as the availability of this frequency is concerned, an air carrier aircraft weighing less than 10,000 pounds shall not be considered a private aircraft.

SUBPART J—AIRDROME CONTROL STATIONS

§ 9.411 *Frequencies available.* The following frequencies are available to airdrome control stations (In filing an application for airdrome control radio station, the applicant may leave blank section 16 (1) of FCC Form No. 401, since it will be necessary for the Commission to determine the specific frequency after coordination with the other Government agencies concerned):

(a)

118.1 A	119.7	121.3 C	124.9
118.3	119.9	121.7 D	125.1
118.5	120.1	123.7	125.3
118.7	120.3 B	123.9	125.5
118.9	120.5	124.1	125.7
119.1	120.7	124.3	125.9
119.3	120.9	124.5	126.1 E
119.5	121.1	124.7	126.3 E

A—Primarily for international operations.
B—Primarily for assignment to Air Route Traffic Control Centers.
C—For assignment to low activity airdrome control stations only.
D—Available on a secondary basis to its primary use as an airport utility frequency.
E—Available on a non-interference basis to government use of 126.18 Mc.

(b) 278 kilocycles: This frequency is available for assignment in addition to a very high frequency. Its use must be supplemented by a service on one of the very high frequencies: *Provided, however,* That until further notice of the Commission, upon application therefor, the Commission may exempt any station from the very high frequency service requirement when it appears that in the preservation of life and property in the air such service is not required at that station.

(c) 121.7 and 121.9 megacycles: These utility frequencies are available to airdrome control stations for communications with ground vehicles and aircraft on the ground at airdromes. The antenna height shall be restricted to the minimum to achieve the required service.

(d) 121.5 Mc.: This frequency is a universal simplex channel for emergency and distress communications and service on this frequency shall be provided by all airdrome control stations, on or before October 1, 1950: *Provided, however,* That upon application therefor the Commission may exempt any station from this requirement when a showing is made that such service is not required in the preservation of life and property in the air.

§ 9.412 *Scope of service.* (a) Communications of an airdrome control station shall be limited to the necessities of safe and expeditious operation of aircraft using the airdrome facilities or operating within the airdrome control area and in all cases such stations shall be in a position to render, and shall render, all necessary airdrome control service.

(b) The licensee of an airdrome control station shall without discrimination provide service for any and all aircraft. Such licensee shall maintain a continuous listening watch during its hours of operations on the following aircraft calling and working frequencies:

(1) *Very high frequencies.* (i) 122.5 Mc.;

(ii) 121.5 Mc. emergency frequency—upon application therefor the Commission may exempt any station from the emergency frequency watch requirement, when a showing is made that such service is not required in the preservation of life and property in the air;

(iii) Upon further notice a listening watch may be required on the frequencies 122.7 or 122.9 Mc.

(2) *High frequency.* (i) 3023.5 kc.

§ 9.413 *Hours of operation.* The licensee shall render a communication service 24 hours a day: *Provided, however,* That upon application therefor the Commission may exempt any station from the requirements of this provision when it appears that, in the preservation of life and property in the air, the maintenance of a continuous watch by such station is not required.

§ 9.414 *Airdrome facilities.* Only one airdrome control station will be licensed to operate at an airdrome.

§ 9.415 *Interference.* The operation of airdrome control stations in adjacent airdrome areas shall be on a non-interference basis only. In case of radio interference between adjacent airdrome control stations, the Commission will specify for its licensees, the arrangements necessary to eliminate interference.

§ 9.416 *Power.* (a) Airdrome control stations using frequencies below 400 kilocycles will not be licensed to use more than 15 watts power for type-A3 emission.

(b) The power of airdrome control stations operating on the frequencies specified in § 9.411 (a) shall be 50 watts.

SUBPART K—AERONAUTICAL ENROUTE STATIONS

§ 9.431 *Scope of service.* (a) Aeronautical enroute stations shall provide all necessary non-public service, HF and VHF, of the particular class authorized without discrimination to any aircraft station licensee who makes cooperative arrangements for the operation and maintenance of the aeronautical enroute stations which are to furnish such service and for shared liability in the operation of such stations. In case of distress, aeronautical enroute stations shall provide the above service without prior arrangements.

(b) Only one aeronautical enroute station in the Domestic Service will be authorized at any one location and only one aeronautical enroute station in the International Service will be authorized at any one location. For this purpose a "location" means an area which can be adequately served by the particular station.

§ 9.432 *Frequencies available.* (a) 121.5 megacycles. This frequency is a universal simplex channel for emergency and distress communications to provide a means of calling and working between the various services in connection with search and rescue operations, an emergency means for direction finding purposes and establishing air-ground contact.

(b) Frequencies in the bands allocated to the aeronautical mobile (R) service in accordance with the provisions of the Extraordinary Administrative Radio Conference (Geneva 1951).

(c) Frequencies allocated to the aeronautical mobile (R) service in addition to those listed in § § 9.433 through 9.439 may be assigned upon the showing that a need exists, and that such use would not result in harmful interference to other stations operating in accordance with the provisions of the EARC Agreement (Geneva, 1951).

(d) Applications for the use of frequencies allocated to the aeronautical mobile (R) service, not in accordance with §§ 9.433 through 9.439, shall be accompanied by a showing that a need exists and that such use would not result in harmful interference to other stations operating in accordance with the EARC Agreement (Geneva 1951).

(e) Frequencies in the band 126.8–132.0 Mc. Although present channel spacing is 200 kc, additional intermediate frequencies at 100 or 50 kc spacing may be authorized upon a showing that harmful interference will not be caused to aeronautical enroute stations operating on VHF frequencies listed in §§ 9.433 through 9.436 and § 9.440.

§ 9.433 *Continental U. S.* Frequencies available for assignment to serve domestic routes in the continental U. S. are as follows:

(a)

kc	kc	kc	kc
2854	3453.5	5634	6657
2896	3495.5	5656.5	6672

127.1	128.5	129.7	130.7
127.3	129.1	130.1	131.1

(6) *Common frequencies.*

126.9 Mc. (for use by aeronautical enroute stations serving international operations).

129.5 Mc. (for use on all chains).

§ 9.434 *Territory of Alaska.* (a) The following frequencies are available for assignment to aeronautical enroute stations in the Territory of Alaska. The provisions of § 9.431 (b) do not apply to stations operating on frequencies in accordance with this paragraph.

3411.5 kc 4668.5 kc

(b) The following frequencies are available for assignment to aeronautical enroute stations in Alaska only when serving scheduled certificated air carriers as defined by the Civil Aeronautics Board. In filing an application for the use of these frequencies, the applicant must show that in addition to complying with the provisions of § 9.431 the station will service such scheduled certificated air carriers. A copy of the contractual arrangements made with each of the air carriers to be served must be submitted with the application.

(1) *Alaska Aleutian chain and feeders.* The following frequencies are available for assignment:

2945 kc 6567 kc 11328 kc

(2) *Central Alaska chain and feeders (west of 141° west longitude).* The following frequencies are available for assignment:

2945 kc 5611.5 kc

(3) *Southeastern Alaska chain and feeders (east of 141° west longitude).* The following frequencies are available for assignment (power on the frequency 2910 kc in Alaska is limited to 325 watts; however, powers in excess of 325 watts may be authorized provided that an adequate showing is made that such additional power is required and that harmful interference will not be caused to any service or any station which in the discretion of the Commission may be entitled to protection):

2910 kc 6567 kc

(c) The following frequencies are shared with the Civil Aeronautics Administration and are available for licensing by the Commission subject to the provisions of paragraph (b) of this section at those locations where an applicant justifies the need for service and the Government is not prepared to render this service (the frequencies 1674, 2912, 2946, 3082.5, 5037.5 and 5672.5 kc are available for assignment on an interim basis only until the frequencies listed in this paragraph are activated for Alaskan chain and feeder operations):

2931 kc 5544 kc

(d) The following frequencies are available for assignment to aeronautical enroute stations in Alaska:

Mc.	Mc.	Mc.
127.1	127.5	129.3
127.3	127.9	129.9

§ 9.435 *Territory of Hawaii.* Frequencies available for assignment to serve domestic routes in the Territory of Hawaii are as follows:

2966	5506.5	8956	13334.5	17926.5

§ 9.438 *Caribbean Area.* Frequencies available for assignment to serve international air routes in the Caribbean area.

kc	kc	kc	kc
2875	5566.5	8837	13294.5
2952	5619	8871	13344.5
2966	6537	10021	17936.5
5499			

§ 9.439 *U. S.-Alaska, via Canada.* Frequencies available for assignment to serve the U. S.-Alaska, via Canada, air routes.

kc	kc	kc	kc
2973	5499	8871	11356.5

§ 9.440 *International very high frequency service.* The frequency 126.9 Mc is available for use by aeronautical enroute stations serving international operations.

SUBPART L—AERONAUTICAL FIXED STATIONS

§ 9.441 *Scope of service.* Aeronautical fixed stations are authorized primarily for the handling of communications in connection with and relating solely to the actual aviation needs of the licensees. Aeronautical fixed stations will not be authorized where land line facilities adequate for the service required are available.

§ 9.442 *Emergency service.* The licensee of an aeronautical fixed station shall be required to transmit, without charge or discrimination, all necessary messages in times of public emergency which involve the safety of life or property.

§ 9.443 *Assignment of frequencies.* Effective December 1, 1954, except for aeronautical fixed stations in the Territory of Alaska, only those frequencies which are in accordance with § 2.104 (a) of this chapter may be authorized for use by aeronautical fixed stations. The applicant shall request specific frequencies within such bands when making an application for an aeronautical fixed station. The availability for assignment of such frequencies will be determined in the Commission by study of the probabilities of interference to and from existing services assigned on the same or adjacent frequencies and, if necessary, by appropriate coordination with other agencies. All new assignments of frequencies will be subject to such conditions as may be required to minimize the possibility of harmful interference to existing services.

SUBPART M—OPERATIONAL FIXED STATIONS

§ 9.446 *Service authorized.* Operational fixed stations in the aeronautical fixed service are authorized for link or control circuits or other aeronautical fixed operations.

§ 9.447 *Frequencies available.* Operational fixed stations in the aeronautical fixed service will share the frequency bands allocated to operational fixed stations with other services as follows:

(a) The frequencies listed in this paragraph may be assigned under the conditions set forth in subparagraphs (1) through (6) of this paragraph. (The frequency 75 Mc is designated for aeronautical marker beacons. In Region 2 the guard band is ±0.4 Mc.)

72.02	72.82	73.62	74.42
72.06	72.86	73.66	74.46
72.10	72.90	73.70	74.50
72.14	72.94	73.74	74.54
72.18	72.98	73.78	74.58
72.22	73.02	73.82	75.42
72.26	73.06	73.86	75.46
72.30	73.10	73.90	75.50
72.34	73.14	73.94	75.54
72.38	73.18	73.98	75.58
72.42	73.22	74.02	75.62
72.46	73.26	74.06	75.66
72.50	73.30	74.10	75.70
72.54	73.34	74.14	75.74
72.58	73.38	74.18	75.78
72.62	73.42	74.22	75.82
72.66	73.46	74.26	75.86
72.70	73.50	74.30	75.90
72.74	73.54	74.34	75.94
72.78	73.58	74.38	75.98

(1) In any area in the continental United States, a maximum of four of the frequencies listed in this paragraph may be assigned to aeronautical operational fixed stations.

(2) All authorizations are subject to the condition that no harmful interference will be caused to television reception on Channels 4 and 5.

(3) The applicant agrees to eliminate any harmful interference caused by his operation to TV reception on either Channel 4 or 5 that might develop by whatever means are found necessary within 90 days of the time knowledge of said interference is first brought to his attention by the Commission. If said interference is not cleared up within the 90-day period, operation of the fixed station will be discontinued.

(4) Vertical polarization is used.

(5) Whenever it is proposed to locate a 72–76 Mc fixed station less than 80, but more than 10 miles from the site of a TV transmitter operating on either Channel 4 or 5, or from the post office of a community in which such channels are assigned but are not in operation, the fixed station shall be authorized only if there are fewer than 100 family dwelling units, as defined by the U. S. Bureau of Census, located within a circle centered at the location of the proposed fixed station (family dwelling units 70 or more miles distant from the TV antenna site are not to be counted), the radius of which shall be determined by use of the appropriate chart entitled, "Chart for Determining Radius From Fixed Station in 72–76 Mc Band to Interference Contour Along Which 10 Percent of Service From Adjacent Channel Television Station Would Be Destroyed"; two charts are provided, one for Channel 4 and one for Channel 5. The Commission may, however, in a particular case, authorize the location of a fixed station within a circle as determined above containing 100 or more family dwelling units upon a showing that:

(i) The proposed site is the only suitable location.

(ii) It is not feasible, technically or otherwise, to use other available frequencies.

(iii) The applicant has a plan to control any interference that might develop to TV reception from his operations.

(iv) The applicant is financially able and agrees to make such adjustments in

the TV receivers affected as may be necessary to eliminate interference caused by his operations.

(6) All applications seeking authority to operate with a separation of less than 10 miles will be returned without action.

(b) Band 952–960 Mc.
(c) Band 1850–1990 Mc.
(d) Band 2110–2200 Mc.
(e) Band 2500–2700 Mc.
(f) Band 6575–6875 Mc.
(g) Band 12,200–12,700 Mc.

(h) In filing an application for an operational fixed station in the aeronautical fixed service, the applicant may leave blank section 1¢ (1) of FCC Form 401, since it will be necessary for the Commission to determine the specific frequency being assigned.

SUBPART N—AERONAUTICAL UTILITY MOBILE STATIONS

§ 9.451 *Frequencies available.* The frequencies 121.7 and 121.9 megacycles are available for aeronautical utility mobile stations.

§ 9.452 *Scope of service.* Communications by a utility station shall be limited to the necessities of ground traffic control at an airdrome and may be used for essential communications with the control towers, ground vehicles and aircraft on the ground.

§ 9.453 *Power.* Power and antenna height shall be restricted to the minimum to achieve the required service.

§ 9.454 *Supervision by airdrome control operator.* At any airdrome at which an airdrome control tower is in operation, transmission by the utility station shall be subject to the control of the airdrome control station and shall be discontinued immediately when so requested by the control station. The utility station shall guard the utility frequency during periods of operation.

SUBPART O—RADIONAVIGATION STATIONS

§ 9.511 *Frequencies available.* In filing an application for a radio navigation station, the applicant may leave blank sec. 16 (1) of FCC Form 401, since it will be necessary for the Commission to determine the specific frequency after coordination with the other Government agencies concerned.

(a) Localizer station with simultaneous radiotelephone channel. The frequencies:

108.1	109.1	110.1	111.1
108.3	109.3	110.3	111.3
108.5	109.5	110.5	111.5
108.7	109.7	110.7	111.7
108.9	109.9	110.9	111.9

(b) Glide path station: The band 328.6 to 335.4 megacycles.

(c) Aeronautical marker beacon station: 75 megacycles.

(d) Radio Range stations: 112.1 megacycles through 117.9 megacycles and the following frequencies in the 108–112 megacycles band:

108.2	109.2	110.2	111.2
108.4	109.4	110.4	111.4
108.6	109.6	110.6	111.6
108.8	109.8	110.8	111.8
109.0	110.0	111.0	112.0

(e) Radiobeacon stations: 200–400 kilocycles.

§ 9.512 *Scope of service.* Air navigation aid facilities are usually operated by the Civil Aeronautics Administration. However, the frequencies which these facilities employ are available for licensing by the Commission at those locations where an applicant justifies the need for such service and the Government is not prepared to render this service. Air navigation service will be authorized only where the applicant meets all requirements specified by the Federal Communications Commission after consultation with the Civil Aeronautics Administration.

§ 9.513 *Unattended operation of domestic radiobeacon stations.* (a) Authority may be granted to operate, during the course of normal rendition of service, radiobeacon stations which are located within the United States, its territories or possessions without attendance of any person, in those cases where an adequate showing has been made to the Commission with respect to all of the following seven conditions:

(1) The transmitter is crystal controlled and specifically designed for radiobeacon service and capable of transmitting by self-actuating means;

(2) The emissions of the transmitter shall be continuously monitored by a licensed operator; or by means of a direct positive automatic monitor, supplemented by aural monitoring at suitable intervals;

(3) If as a result of aural monitoring, it is determined that a deviation from the terms of the station license has occurred, a properly authorized person will be dispatched immediately to the transmitter site and place the transmitter in an inoperative condition. If automatic monitoring is used, the monitor shall insure that the operation of the station is in accordance with the terms of the station license, or shall place the transmitter in an inoperative condition;

(4) The time, carefully estimated, required to dispatch a properly authorized person to the transmitter site and to place the transmitter in an inoperative condition;

(5) Inspection of the equipment shall be conducted at suitable intervals determined by the performance record of the equipment and maintenance experience, but in any event, an inspection shall be conducted at least every 60 days. A record of the results of an inspection shall be kept in the maintenance records of the station;

(6) The transmitter is so installed and protected that it is not accessible to, and may not be placed in operation by, other than duly authorized persons;

(7) The location of the transmitter is such that it is impracticable to require an operator to be on duty at the transmitter or other point at which the operation of the transmitter could be directly controlled.

(b) Authority for unattended operation shall be expressly stated in the station authorization before such operation may be commenced.

(c) In any case in which authority for unattended operation has been granted the Commission may at any time, for purposes of national defense, without the necessity of any hearing, cancel the authority or modify it in such a manner as to require the provision of adequate means to permit the station to be placed in an inoperative condition promptly whenever notice to that effect is given.

SUBPART P—FLIGHT TEST STATIONS

§ 9.611 *Frequencies available.* (a) The frequencies 3281 kilocycles, 123.1, 123.3 and 123.5 megacycles are available tions (the very high frequencies are shared with flying school stations on a noninterference basis).

(b) The following frequencies are available to flight test stations for telemetering activities.

Mc.	Mc.	Mc.	Mc.
217.425	217.575	219.375	219.525
217.475	217.625	219.425	219.575
217.525	217.675	219.450	
217.550	219.325	219.475	

§ 9.612 *Eligibility of licensee.* A flight test station license may be granted only for use by either;

(a) Manufacturers of aircraft or major aircraft components, or

(b) A parent corporation or its subsidiary if either corporation is a manufacturer of aircraft or major aircraft components.

§ 9.613 *Cooperative use of facilities.* (a) Only one flight test station for operation on the ground will be licensed to serve an airdrome and such station will be required to provide service without discrimination, but on a cooperative maintenance basis, to all manufacturers eligible for a license for flight test station.

(b) Where licensees desire to conduct flight tests in adjacent airdrome control areas, or where radio interference may result from simultaneous operation of stations at nearby airdromes, they shall arrange for a satisfactory time division by mutual agreement. If such an agreement cannot be reached the Commission will determine and specify the time division upon request of either licensee.

§ 9.614 *Scope of service.* The use of these stations will be restricted to the transmission of necessary information or instructions relating directly to tests of aircraft or components thereof.

§ 9.615 *Power.* The power output of flight test stations designated for operation on board aircraft shall be limited to 10 watts and ground stations shall be limited to 50 watts.

SUBPART Q—FLYING SCHOOL STATIONS

§ 9.711 *Frequencies available.* The frequencies 123.1, 123.3 and 123.5 megacycles are available for ground and aircraft flying school stations (shared with flight test stations on a noninterference basis).

§ 9.712 *Eligibility of licensee.* A flying school station license will be granted only to flying schools and soaring societies.

§ 9.713 *Limitations of instructional facilities.* Assignments will be limited to one station to an airdrome location for one or more flying schools.

§ 9.714 *Coordinated use of instructional facilities.* Where more than one flying school operates from an airdrome location, coordinated use of a single instructional frequency shall be arranged, placed in the form of a signed agreement and filed with the Commission. In case of disagreement, the Commission will specify the arrangement to be followed.

§ 9.715 *Scope of service.* Communications for instructional flying under the direction of a flying school station in the vicinity of an airdrome shall be transmitted only on the flying school frequency assigned to that station.

§ 9.716 *Supervision by airdrome control operator.* At any airdrome at which an airdrome control station or control tower is in operation, the airdrome control operator must be given a remote microphone connection to the transmitter operating on the flying school frequency for the transmission of orders or instruction to students in flight.

§ 9.717 *Power.* The power output of flying school stations shall not be more than 50 watts for land stations and not more than 10 watts for aircraft stations.

§ 9.718 *Frequency assignments nonexclusive.* No frequency available to a station engaged in instructional flying will be assigned exclusively to any applicant. All stations in this service are required to coordinate operation so as to avoid interference and make the most effective use of assignments.

§ 9.719 *Private service prohibited.* The use of flying school frequencies for other than instruction purposes and promotion of safety of life and property is prohibited.

SUBPART R—AERONAUTICAL PUBLIC SERVICE STATIONS

§ 9.811 *Frequencies available.* The frequencies available to ship telegraph and ship telephone stations are available to aeronautical public service aircraft stations for the handling of public correspondence in the same manner and to the same extent that they are available to ships of the United States and under restrictions hereinafter provided. These frequencies are assigned on the express condition that no interference is caused to marine operations. The general mobile service, as proposed, may also be available for use aboard aircraft.

§ 9.812 *Stations licensed for aeronautical public service.* Only those stations in the aviation services licensed for aeronautical public service may carry on public communication service. Coastal or ship stations licensed to carry on public communication service may provide such service to or from aeronautical public service aircraft stations. No aeronautical public service station shall carry on interstate or foreign public communication service for hire unless appropriate effective tariffs covering such service are on file with the Commission.

§ 9.813 *Scope of service.* (a) All stations licensed in the aeronautical public service shall intercommunicate without discrimination with any other station similarly licensed, whenever necessary for the handling of traffic.

(b) Aeronautical public service stations shall, without discrimination and on reasonable demand, be made available for the use of all persons.

§ 9.814 *Requirement for aeronautical public service station.* A license or other instrument of authorization may be issued for a station for public correspondence provided that a continuous effective listening watch is maintained on the frequency or frequencies used for the aviation safety service messages while public service messages are being handled; and that the installation and system of operation will permit instantaneous interruption of aeronautical public service communications to transmit or receive safety service messages.

§ 9.815 *Priority of communications.* (a) All communications of stations in the aeronautical mobile service are essential to the safe operation of aircraft and shall have priority over public correspondence.

(b) The radio operator in charge of the aircraft station shall suspend operation of an aeronautical public service aircraft station when such operation will delay or interfere with messages pertaining to safety of life and property or when ordered to do so by the captain of the aircraft.

(c) The operation of an aeronautical public service station shall be suspended when it interferes with the radio communications of the safety service.

SUBPART S—CIVIL AIR PATROL STATIONS

§ 9.911 *Eligibility for station license.* Authorizations for land and mobile stations of the Civil Air Patrol will be issued only to units or headquarters of the Civil Air Patrol. All applications will be supported by a confirming statement from the proper military authority.

§ 9.912 *Frequencies available.* The following frequencies have been made available by the Commission for assignment to land and mobile stations of the Civil Air Patrol.

(a) 2374 kc., A–1, A–2, A–3 emission, 400 watts maximum power.

(b) 4585 kc., A–1, A–2, A–3 emission, 400 watts maximum power.

(c) 4467.5 kc., A–1, A–2, A–3 emission, 400 watts maximum power, limited to stations in the southeast area of the United States, comprised of the District of Columbia and the following States:

Florida, Alabama, Georgia, South Carolina, North Carolina, Tennessee, Virginia, West Virginia, Maryland, Delaware.

(d) 4507.5 kc., A–1, A–2, A–3 emission, 400 watts maximum power available to all areas of the United States except those listed in paragraph (c) of this section.

(e) 148.14 Mc., A–2, A–3 emission, 50 watts maximum power.

§ 9.913 *Scope of service.* Land and mobile stations of the Civil Air Patrol may be used only for training operational and emergency activities of the Civil Air Patrol.

(a) Civil Air Patrol Land Stations may communicate with other land stations and mobile stations of the Civil Air Patrol.

(b) Civil Air Patrol Mobile Stations may communicate with other mobile stations and land stations of the Civil Air Patrol.

§ 9.914 *Operator requirements.* (a) All transmitter adjustments or tests during or coincident with the installation, servicing, or maintenance of a radio station, which may affect the proper operation of such station, shall be made by or under the immediate supervision and responsibility of a person holding a first or second class commercial radio operator license, either radiotelephone or radiotelegraph, who shall be responsible for the proper functioning of the station equipment: *Provided, however,* That only persons holding a first or second class commercial radiotelegraph operator license shall perform such functions at radiotelegraph stations transmitting by any type of the Morse Code.

(b) A station during the course of normal rendition of service when transmitting radiotelegraphy by any type of the Morse Code shall be operated by a person holding a commercial radiotelegraph operator license or permit of any class issued by the Commission, except that aircraft radio stations while employing radiotelegraphy may not be operated by holders of restricted radiotelegraph operator permits.

(c) Aircraft radio stations: Aircraft radio stations using radiotelephony shall be operated by persons holding any class of commercial radio operator license or permit or an aircraft radiotelephone operator authorization.

(d) Ground radio stations: Each transmitter shall be operated in the manner prescribed in this paragraph:

(1) Except under the circumstances specified in paragraphs (a) and (b) of this section, and subject to the provisions of subparagraphs (4), (5), and (6) of this paragraph, an unlicensed person may operate a land mobile station during the course of normal rendition of service when transmitting on frequencies above 25 Mc after being authorized to do so by the station licensee.

(2) Except under the circumstances specified in paragraphs (a) and (b) of this section, and subject to the provisions of subparagraphs (4), (5), (6) and (7) of this paragraph, only a person holding a commercial radio operator license or permit of any class issued by the Commission shall operate a land mobile station during the course of normal rendition of service when transmitting on frequencies below 25 Mc: *Provided, however,* That an unlicensed person, after being authorized to do so by the station licensee, may operate such a land mobile station during the course of normal rendition of service when transmitting on frequencies below 25 Mc while it is associated with and under the operational control of a base station of the same station licensee.

(3) Except under the circumstances specified in paragraphs (a) and (b) of this section, and subject to the provisions of subparagraphs (4), (5), (6) and (7) of this paragraph, land stations shall be operated when transmitting during the course of normal rendition of service by a person holding a commercial radio op-

erator license or permit of any class, which licensed operator may permit other persons to transmit or to communicate over the facilities of the station in accordance with the term of the station license: *Provided*, That the licensed operator shall remain in full control of and shall be fully responsible for the emission of that station and shall suspend the radiation of the transmitter immediately when there is a deviation from the terms of the station license: *And provided further*, That the person manipulating the telegraph key for the transmission by manual or semiautomatic means of telegraphy by any type of the Morse Code by such station shall hold a class of radiotelegraph operator's license which is valid for the operation of that station.

(4) The provisions of this paragraph authorizing certain unlicensed persons to operate certain stations when transmitting during the course of normal rendition of service, shall be applicable only to stations in the domestic service. For the purposes of this section, a station in the domestic service is one which is located within the United States, its territories or possessions and which, when communicating with other stations is in communication exclusively with one or more other United States stations which are also located in the United States, its territories or possessions; a station in the international service is one which is not in the domestic service as just defined.

(5) The provisions of this paragraph authorizing certain unlicensed persons to operate land mobile stations shall not be construed to change or diminish in any respect the responsibility of station licensees to have and to maintain control over the stations licensed to them (including all transmitter units thereof), or for the proper functioning and operation of those stations (including all transmitter units thereof) in accordance with the terms of the licenses of those stations.

(6) Not withstanding any other provisions of this paragraph, unless the transmitter is so designed that none of the operations necessary to be performed during the course of normal rendition of service may cause off-frequency operation or result in any unauthorized radiation, such transmitter shall be operated by a person holding a first or second class commercial radio operator license (either radiotelephone or radiotelegraph as may be appropriate for the type of emission being used) issued by the Commission.

(7) Any reference in this paragraph to a commercial radio operator license or permit of any class issued by the Commission shall not be construed to include Aircraft Radiotelephone Operator Authorizations.

SUBPART T—AERONAUTICAL ADVISORY STATIONS

§ 9.1001 *Eligibility for station license.* (a) Authorizations for aeronautical advisory stations will be issued only to the owner or operator of a landing area, not served by an airdrome control station.

(b) Only one aeronautical advisory station will be authorized at a landing area.

§ 9.1002 *Frequencies available.* 122.8 megacycles, 6A3 emission: For communications with private aircraft stations. In so far as the availability of this frequency is concerned, an air carrier aircraft weighing less than 10,000 pounds shall not be considered a private aircraft.

§ 9.1003 *Power output.* The power output of Aeronautical Advisory stations shall not exceed 10 watts.

§ 9.1004 *Scope of service.* Aeronautical advisory stations shall not be used for air traffic control. Such stations, for the purpose of communicating with aircraft engaged in civil defense activities, may be moved from place to place and operated at unspecified locations, except at landing areas served by airdrome control stations or other aeronautical advisory stations. Permissible communications of an aeronautical advisory station are as follows:

(a) *Advisory.* Communications shall be limited to the necessities of safe and expeditious operation of aircraft, pertaining to the conditions of runways, types of fuel available, wind conditions, available weather information or other information necessary for aircraft operations.

(b) *Civil defense.* (1) The frequency 122.8 Mc. may be used in addition to its normal purposes for communications with private aircraft engaged in organized civil defense activities in time of enemy attack or immediately thereafter.

(2) These communications also may be handled on a secondary basis to provide communication with private aircraft engaged in organized civil defense activities in preparation for anticipated enemy attack.

NOTE: "Civil defense" is defined, for this purpose, in accordance with section 3 (b) of the Federal Civil Defense Act of 1950, Public Law 920, 81st Congress as follows:

The term "civil defense" means all those activities and measures designed or undertaken (1) to minimize the effects upon the civilian population caused or which would be caused by an attack upon the United States, (2) to deal with the immediate emergency conditions which would be created by any such attack, and (3) to effectuate emergency repairs to, or the emergency restoration of, vital utilities and facilities destroyed or damaged by any such attack. Such term shall include, but shall not be limited to, (a) measures to be taken in preparation for anticipated attack (including the establishment of appropriate organizations, operational plans, and supporting agreements; the recruitment and training of personnel; the conduct of research; the procurement and stockpiling of necessary materials and supplies; the provision of suitable warning systems; the construction or preparation of shelters, shelter areas, and control centers; and when appropriate, the non-military evacuation of civil population), (b) measures to be taken during attack (including the enforcement of passive defense regulations prescribed by duly established military or civil authorities; the evacuation of personnel to shelter areas; the control of traffic and panic; and the control and use of lighting and civil communications); and (c) measures to be taken following attack (including activities for fire fighting; rescue, emergency medical, health and sanitation services; monitoring for specific hazards of special weapons; unexploded bomb reconnaissance; essential debris clearance; emergency welfare measures; and immediately essential emergency repair or restoration of damaged vital facilities).

§ 9.1005 *Operator requirements.* (a) An Aeronautical Advisory station shall be operated, when transmittting during the normal rendition of service, by a person holding a commercial radio operator license or permit of any class except an aircraft radiotelephone operator authorization.

(b) Aircraft radio stations using radiotelephony, when transmitting during the normal rendition of service, shall be operated by persons holding any class of commercial radio operator license or permit or an aircraft radiotelephone operator authorization.

(c) All transmitter adjustments or tests during or coincident with the installation, servicing, or maintenance of a radio station, which may affect the proper operation of such station, shall be made by or under the immediate supervision and responsibility of a person holding a first or second class commercial radio operator license, either radiotelephone or radiotelegraph, who shall be responsible for the proper functioning of the station equipment.

SUBPART U—AERONAUTICAL METROPOLITAN STATIONS

§ 9.1101 *Eligibility for station license.* Authorizations for Aeronautical Metropolitan Stations will be issued only to the licensee of the Aeronautical Enroute Station operating in the metropolitan area.

§ 9.1102 *Frequencies available.* The frequencies available for aeronautical enroute stations are available for assignment to aeronautical metropolitan stations.

§ 9.1103 *Points of communication.* Aeronautical Metropolitan Stations are authorized to communicate primarily with aircraft and are authorized secondarily to inter-communicate with other Aeronautical Metropolitan Stations within the same metropolitan area.

§ 9.1104 *Scope of service.* Aeronautical Metropolitan Stations shall transmit only communications for the safe, expeditious and economical operation of aircraft operating between a main air terminal of a metropolitan area and subordinate landing areas. Aeronautical Metropolitan Stations shall provide non-public service of the particular class authorized, without discrimination, to any aircraft station licensee who makes cooperative arrangements for the operation and maintenance of the Aeronautical Metropolitan Stations which are to furnish such service and for shared liability in the operation of the stations.

§ 9.1105 *Application for Aeronautical Metropolitan Station.* An application on FCC Form 401 may be submitted for construction permit for any number of Aeronautical Metropolitan Stations for the same licensee in a metropolitan area. The application shall specify the location of the station at the main air terminal and the location of each station at subordinate landing areas.

SUBPART V—CONELRAD

§ 9.1201 *Scope and objective.* (a) Sections 9.1201 to 9.1205 applies to all stations in the aviation services and is for the purpose of providing for the alerting and operation of radio stations in the aviation services during periods of air attack or imminent threat thereof.

(b) The aim of this plan is to minimize the navagational aid that may be obtained by an enemy from the signals of aviation radio stations, while simultaneously providing for continued radio service to the extent necessary for the safety or control of friendly aircraft.

§ 9.1202 *General.* All radio stations in the aviation services are required to provide for receiving the Radio Alert and to operate in accordance with §§ 9.1201 to 9.1205.

§ 9.1203 *Definitions.* (a) The term "CONELRAD" is a contraction of the words, "Control of Electromagnetic Radiation," and is the general term applied to the controlled operation of radio facilities under the authority of Executive Order 10312, dated December 10, 1951.

(b) Radio Alert is the term applied to the military warning that an air attack is probable or imminent, which automatically orders the immediate implementation of the controlled operations of all radio stations. The Radio Alert is distinct from the military or civil defense Warnings, Yellow, Red or White, but may be coincidental with such warnings.

§ 9.1204 *Alerting.* (a) All stations in the aviation services licensed by the Federal Communications Commission will be responsible for making provisions to receive the Radio Alert when such an alert is ordered by appropriate military authorities. The term "licensed by" includes all forms of authorizations under which a radio station is operated, including station licenses, STA's etc. The Radio Alert may be received by one or more of the following methods:

(1) Ground stations directly connected to and in continuous communication with a CAA Air Route Traffic Control Center (ARTCC) may receive the Alert over the ARTCC circuit.

(2) Ground stations not connected to a CAA circuit, must:

(i) Provide a connection to an accessible CAA communications circuit, or

(ii) Provide a broadcast receiver to obtain the Radio Alert from any broadcast station (standard, FM or TV) that can be heard, or

(iii) Provide a separate receiver to monitor another station in the Aviation Service which is in direct communication with a CAA Air Route Traffic Control Center, or

(iv) Provide any other suitable method which is approved by the CAA Regional Administrator and specifically authorized by the FCC.

(b) Ground stations in the aviation radio services when advised of a CONELRAD Radio Alert, are responsible for relaying the Alert to aircraft stations.

§ 9.1205 *Operation.* (a) During a period of Radio Alert all ground stations in the aviation services will maintain radio silence, unless required by appropriate CAA Air Traffic Control Center to remain on the air for the purpose of air traffic control. Such operations will be in accordance with the CAA CONELRAD Plans dated May 1, 1953, and instructions issued by the appropriate ARTCC, under the provisions of the U. S. Department of Defense "Security Control of Air Traffic during a Military Emergency" Plan, (SCAT Plan). Licensees of ground stations in the aviation services should contact the CAA Air Route Traffic Control Center, within whose flight advisory area the station is located, for the details of operation applicable to a specific station. When not required by CAA for the purposes of security control of air traffic, all ground stations in the aviation services will promptly leave the air and maintain radio silence for the duration of a Radio Alert, except as specifically authorized in the local Air Division (Defense) SCATER Plan or by an appropriate ARTCC.

(b) During a period of Radio Alert all aircraft radio stations in the aviation radio services will maintain radio silence, except for transmssions involving the national safety, or the safety of life and property in the air. Such operations will be in accordance with the CAA CONELRAD Plan dated May 1, 1953, and the instructions of the appropriate ARTCC within whose flight advisory area the aircraft may be located.

(c) None of the provisions in §§ 9.1201 to 9.1205 shall be interpreted to preclude the operation of certain stations in the aviation radio services in connection with the activities of local, Federal, or State Civil Defense organizations, provided such operations are not in conflict with operations necessary for CAA Air Route Traffic Control, and such operations are specifically authorized by the Federal Communications Commission.

TITLE 6—AGRICULTURAL CREDIT

Chapter III—Farmers Home Administration, Department of Agriculture

Subchapter B—Farm Ownership Loans

[FHA Instruction 401.2]

PART 311—BASIC REGULATIONS

SUBPART B—LOAN LIMITATIONS

TERRITORIAL SUBDIVISIONS IN PUERTO RICO

Section 311.28 of Title 6, Code of Federal Regulations (19 F. R. 1364), is amended with respect to areas designated as subdivisions in Puerto Rico by (1) revoking the designations of the subdivisions named Angeles and Utuado, and (2) designating the following identified subdivision, consisting of the entire Municipality of Utuado:

PUERTO RICO

Name of subdivision and municipalities comprising subdivision:	
Utuado:	Utuado.

(Sec. 41 (1), 60 Stat. 1066; 7 U. S. C. 1015 (1). Interpets or applies sec. 54, 60 Stat. 1071, sec. 1 (b), 61 Stat. 493; 7 U. S. C. 1028)

Dated: December 9, 1955.

[SEAL] R. B. MCLEAISH,
Administrator,
Farmers Home Administration.

TITLE 14—CIVIL AVIATION

Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 146]

PART 608—RESTRICTED AREAS

ALTERATIONS

The restricted area alterations appearing hereinafter have been coordinated with the civil operators involved, the Army, the Navy and the Air Force, through the Air Coordinating Committee, Airspace Panel, and are adopted to become effective when indicated in order to promote safety of the flying public. Since a military function of the United States is involved, compliance with the notice, procedure, and effective date, provisions of section 4 of the Administrative Procedure Act is not required.

Part 608 is amended as follows:

In § 608.18, the Miami, Florida, areas (R-169 and R-170), amended on June 29, 1955 in 20 F. R. 4586, is further amended by changing the "Time of Designation" column to read: "Daylight Only."

In § 608.11, the Fort McClellan, Alabama, area No. 2 (R-131 formerly D-131), published on June 30, 1950 in 15 F. R. 4187, is amended by changing the "Description by Geographical Coordinates" column to read: "Beginning at latitude 33°45'32", longitude 86°01'12"; East to latitude 33°45'40", longitude 85°54'00"; Southeast to latitude 33°41'55", longitude 85°52'45"; Southwest to latitude 33°40'15", longitude 85°54'00"; Northwest to latitude 33°41'00", longitude 85°55'45"; West to latitude 33°41'00", longitude 85°57'18"; North to latitude 33°41'18", longitude 85°57'18"; West to latitude 33°41'18", longitude 86°01'12"; North to point of beginning.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interpret or apply sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

This amendment shall become effective December 30, 1955.

[SEAL] F. B. LEE,
Administrator of Civil Aeronautics.

[F. R. Doc. 55-10017; Filed, Dec. 13, 1955; 8:45 a. m.]

TITLE 29—LABOR

Chapter XII—Federal Mediation and Conciliation Service

PART 1403—FUNCTIONS AND DUTIES

The regulations of the Federal Mediation and Conciliation Service are amended by adding Part 1403 as set forth below.

Sections 202 (c) and 203, Title II, of the Labor-Management Relations Act, 1947, as amended (P. L. 101, 80th Congress, 61 Stat. 153, as amended), authorize mediation and conciliation services in labor-management disputes, and suitable procedures for cooperation between the Federal Mediation and Conciliation Service (hereinafter called the Federal Service) and State and local mediation agencies.

Sec.
1403.1 Definitions.
1403.2 Policies of the Federal Mediation and Conciliation Service.
1403.3 Obtaining data on labor-management disputes.
1403.4 Assignment of mediators.
1403.5 Relations with State and local mediation agencies.

AUTHORITY: §§ 1403.1 to 1403.5 issued under sec. 202, 61 Stat. 153, as amended; 29 U. S. C. 172. Interpret or apply sec. 203, 61 Stat. 153; 29 U. S. C. 173.

§ 1403.1 *Definitions.* As used in this part, unless the context clearly indicates otherwise.

(a) The term "commerce" means trade, traffic, commerce, transportation or communication among the several States, or between the District of Columbia or any Territory of the United States and any State or other Territory, or between any foreign country and any State, Territory, or the District of Columbia, or within the District of Columbia or any Territory, or between points in the same State but through any other State or any Territory or the District of Columbia or any foreign country.

(b) The term "affecting commerce" means in commerce, or burdening or obstructing commerce or the free flow of commerce, or having led or tending to lead to a labor-management dispute burdening or obstructing commerce or the free flow of commerce.

(c) The term "labor union" or "labor organization" means any organization of any kind, or any agency or employee representation committee or plan, in which employees participate and which exists for the purpose, in whole or in part, of dealing with employers concerning grievances, labor disputes, wages, rates of pay, hours of employment, or conditions of work.

(d) The term "State or other conciliation services" means the official and accredited mediation or conciliation establishments of State and local governments, which are wholly or partially supported by public funds.

(e) The term "proffer its services," as applied to the functions and duties of the Federal Mediation and Conciliation Service, means to make mediation services and facilities available either on its own motion or upon the request of one or more of the parties to a dispute.

§ 1403.2 *Policies of the Federal Mediation and Conciliation Service.* It is the policy of the Federal Mediation and Conciliation Service:

(a) To facilitate and promote the settlement of labor-management disputes through collective bargaining by encouraging labor and management to resolve differences through their own resources.

(b) To encourage the States to provide facilities for fostering better labor-management relations and for resolving disputes.

(c) To proffer its services in labor-management disputes in any industry affecting commerce, except as to any matter which is subject to the provisions of the Railway Labor Act, as amended, either upon its own motion or upon the request of one or more of the parties to the dispute, whenever in its judgment such dispute threatens to cause a substantial interruption to commerce.

(d) To refrain from proffering its services: (1) In labor-management disputes affecting intrastate commerce exclusively, (2) in labor-management disputes having a minor effect on interstate commerce, if State or other conciliation services are available to the parties, or (3) in a labor-management dispute when a substantial question of representation has been raised, or to continue to make its facilities available when a substantial question of representation is raised during the negotiations.

(e) To proffer its services in any labor-management dispute directly involving Government procurement contracts necessary to the national defense, or in disputes which imperil or threaten to imperil the national health or safety.

(f) To proffer its services to the parties in grievance disputes arising over the application or interpretation of an existing collective-bargaining agreement only as a last resort and in exceptional cases.

§ 1403.3 *Obtaining data on labor-management disputes.* When the existence of a labor-management dispute comes to the attention of the Federal Service upon a request for mediation service from one or more parties to the dispute, through notification under the provisions of section 8 (d) (3), Title I of the Labor-Management Relations Act, 1947, or otherwise, the Federal Service will examine the information to determine if the Service should proffer its services under its policies. If sufficient data on which to base a determination is not at hand, the Federal Service will inquire into the circumstances surrounding the case. Such inquiry will be conducted for fact-finding purposes only and is not to be interpreted as the Federal Service proffering its services.

§ 1403.4 *Assignment of mediators.* The Federal Service will assign one or more mediators to each labor-management dispute in which it has been determined that its services should be proffered.

§ 1403.5 *Relations with State and local mediation agencies.* (a) If under State or local law a State or local mediation agency must offer its facilities in a labor-management dispute in which the Federal Service is proffering its services, the interests of such agencies will be recognized and their cooperation will be encouraged in order that all efforts may be made to prevent or to effectively minimize industrial strife.

(b) If, in a labor-management dispute there is reasonable doubt that the dispute threatens to cause a substantial interruption to commerce or that there is more than a minor effect upon interstate commerce, and State or other conciliation services are available to the parties, the regional director of the Federal Service will endeavor to work out suitable arrangements with the State or other conciliation or mediation agency for mediation of the dispute. Decisions in such cases will take into consideration the desires of the parties, the effectiveness and availability of the respective facilities, and the public welfare, health, and safety.

(c) If requested by a State or local mediation agency or the chief executive of a State or local government, the Federal Service may make its services available in a labor-management dispute which would have only a minor effect upon interstate commerce when, in the judgment of the Federal Service, the effect of the dispute upon commerce or the public welfare, health, or safety justifies making available its mediation facilities.

Signed at Washington, D. C., this 8th day of December 1955

JOSEPH F. FINNEGAN,
Director.

[F. R. Doc. 55-10023; Filed, Dec. 13, 1955; 8:46 a. m.]

TITLE 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

Chapter I—Veterans Administration

PART 21—VOCATIONAL REHABILITATION AND EDUCATION

REPORTS BY INSTITUTIONS

In § 21.2303, subparagraphs (1) and (4) of paragraph (c) are amended to read as follows:

§ 21.2303 *Reports by institutions.* • • •

(c) *Administrative allowance for preparation of reports and certifications.* (1) The Administrator shall pay to each educational institution which is required to submit reports and certifications to the Veterans Administration under Public Law 550, 82d Congress, an allowance at the rate of $1.50 per month for each eligible veteran enrolled in and attending such institution to assist the educational institution in defraying the expense of preparing and submitting such reports and certifications: *Provided,* That the allowance to be paid to the educational institution for reports and certifications covering attendance on and after September 1, 1953, shall be $1 per month for each eligible veteran enrolled in and attending the institution.

• • • • •

(4) Payment of the administrative allowance will be made to the institution by the regional office only upon presentation by the institution of properly prepared vouchers with the certificates of training, except that the Manager may authorize payment of the allowance when the voucher is received subsequent to receipt of the training certificates where the failure to submit the voucher and certificates simultaneously was due to (i) a clerical error, or (ii) a previous understanding between the Manager and the institution that isolated certificates need not be accompanied by voucher.

(Sec. 2, 46 Stat. 1016, sec. 7, 48 Stat. 9, sec. 2, 57 Stat. 43, as amended, sec. 400, 58 Stat. 287, as amended; 38 U. S. C. 11a, 701, 707, ch. 12A. Interprets or applies secs. 3, 4, 57 Stat. 43, as amended, secs. 300, 1500–1504, 1506, 1507, 58 Stat. 286, 300, as amended, sec. 261, 66 Stat. 663; 38 U. S. C. 693g, 697–697d, 697f, g, 971, ch. 12A)

This regulation is effective December 14, 1955.

[SEAL] J. C. PALMER,
Assistant Deputy Administrator.

[F. R. Doc. 55-10036; Filed, Dec. 13, 1955; 8:49 a. m.]

TITLE 44—PUBLIC PROPERTY AND WORKS

Chapter VII—Community Facilities Administration, Office of the Administrator, Housing and Home Finance Agency

PART 701—PROCEDURE

PART 702—ADVANCE PLANNING

MISCELLANEOUS AMENDMENTS

1. Section 701.1 is hereby amended to read as follows:

§ 701.1 *General statement.* The general course and method by which functions administered under the Community Facilities Commissioner on behalf of the Housing and Home Finance Administrator are channeled and determined are as follows: The prescribed forms for application for assistance are obtained from and filed with the Regional Office of the Housing and Home Finance Agency serving the area in which the applicant is located. The Regional Administrator of the Agency forwards the completed application and his recommendation to the Community Facilities Commissioner, Washington, D. C. Upon approval of an application by the Community Facilities Commissioner or the Housing and Home Finance Administrator as appropriate, an agreement between the Government and the applicant is executed. Further information concerning operations may be obtained from the appropriate Regional Office of the Housing and Home Finance Agency or from the Community Facilities Commissioner, Office of the Administrator, Housing and Home Finance Agency, 1626 K Street NW., Washington 25, D. C.

(Sec. 502, 62 Stat. 1283, as amended; 12 U. S. C. 1701c)

2. Section 702.1 (a) is hereby amended by adding at the end thereof the following sentence: "The authority to make new loans or advances expired on June 30, 1947, under the provisions of section 603 of the War Mobilization and Reconversion Act of 1944, 58 Stat. 792."

(Sec. 502, 62 Stat. 1283, as amended; 12 U. S. C. 1701c)

Issued as of this 14th day of December 1955.

ALBERT M. COLE,
Housing and Home Finance Administrator.

[F. R. Doc. 55-10042; Filed, Dec. 13, 1955; 8:50 a. m.]

No. 242——3

TITLE 45—PUBLIC WELFARE

Chapter II—Bureau of Public Assistance, Social Security Administration, Department of Health, Education, and Welfare

PART 201—ASSISTANCE TO STATES

Part 201 is hereby amended to read as follows:

Subpart A—Approval of State Plans for Public Assistance and Certification of Grants

Sec.
201.1 General.
201.2 Approval of State plans and amendments.
201.3 Grants.
201.4 Withholding certification.

Subpart B—Review and Audits

201.5 Continuing review of State and local administration.
201.6 Public assistance and fiscal audits.

AUTHORITY: §§ 201.1 to 201.6 issued under Titles I, IV, X, 49 Stat. 620, 627, 645, as amended, Title XIV, 64 Stat. 555; 42 U. S. C. 301–306, 601–606, 1201–1206, 1351–1355.

SUBPART A—APPROVAL OF STATE PLANS FOR PUBLIC ASSISTANCE AND CERTIFICATION OF GRANTS

§ 201.1 *General.* The State plan is a comprehensive statement prepared by the State public assistance agency describing all pertinent aspects of its operations necessary for the Social Security Administration to reach a determination as to conformity with the specific requirements stipulated in the Social Security Act. The State plan sets forth the basic State laws enabling and limiting the administration of public assistance; a description of the agency's organization and functions; its rules and regulations governing personnel administration; policies and interpretations with regard to eligibility conditions and methods of determining the amount of assistance; fiscal operations; and reporting and research activities. Detailed instructions and suggestions for the content and submittal of the documents comprising the State public assistance plan are contained in the instructions in "Submittal of State Public Assistance Plans" in the Handbook of Public Assistance Administration.

§ 201.2 *Approval of State plans and amendments.* The set of documents setting forth the State's plan may be submitted as one plan covering the four types of assistance where the programs have a common basis of administration, or a separate plan covering any one of the four assistance programs. After approval of the original plan by the Commissioner of Social Security, all relevant changes such as new statutes, rules, regulations, interpretations, and court decisions are required to be submitted currently so that the Commissioner may determine the status of State plans for purposes of certification of grants from time to time.

(a) *Submittal.* The State public assistance plan and revisions of the plan are submitted to the Bureau of Public Assistance through the regional office. The States are encouraged to obtain consultation of the regional staff when the plan is in process of preparation or revision.

(b) *Review.* The regional public assistance representatives are responsible for review of State plans, and they also initiate discussion with the State agency on clarification of significant aspects of the plan which come to their attention in the course of this review. State plan material on which the regional staff has questions concerning the application of Federal policy is referred with recommendations as required to the Washington office for decision. Comments and suggestions, including those of consultants in specified areas of public assistance administration, may be prepared by the central office for use by the regional representatives in negotiations with the State agency.

(c) *Approval.* The Bureau of Public Assistance has been delegated authority of initial approval of State plans as provided in Titles I, IV, X, and XIV of the Social Security Act and for approval of amendments of State plans; the Commissioner has final authority for approval of new plans. The Bureau advises the State public assitance agency of the approval of State plans or revisions, or the need for clarifying information.

§ 201.3 *Grants.* To States with approved plans, grants are made each quarter for assistance and administration. The determination as to the amount of a grant to be made to a State public assistance agency is based upon three documents submitted by the State containing information required under the Social Security Act and such other pertinent facts as may be found necessary.

(a) *Form and manner of submittal*—(1) *Time and place.* The estimates for public assistance grants for each quarterly period are forwarded to the regional office 45 days prior to the period of the estimate, together with a certificate of State funds available and a statement in support of the estimates. The statement of quarterly expenditures and any necessary supporting schedules are forwarded to the Department of Health, Education, and Welfare, Bureau of Public Assistance, Attention: Fiscal Branch, Washington 25, D. C., not later than 30 days after the end of the quarter.

(2) *Description of forms.* (i) "Report of Estimated Expenditures and Funds to be Available" (Forms PA–101, PA–102, PA–103, or PA–145 for old-age assistance, aid to dependent children, aid to the blind, and aid to the permanently and totally disabled, respectively) represents the State agency's estimate of the number of recipients to receive aid during each of the three months of the quarter. The forms also contain the estimated average assistance payment per recipient, and the estimated expenditures for assistance and administration, from which are computed the total funds to be advanced during the quarter. Estimated expenditures that exceed the Federal statutory maxima for payments to individuals are not to be included in computing the Federal grant and are deducted from the total estimate. In addition, the report of the estimated expenditures indicates the amount of

State and local funds appropriated and available for public assistance during the pertinent quarter.

(ii) In addition, the State agency must certify as to the amount of State funds (exclusive of any balance of assistance received from the Federal government) actually on hand and available for expenditure; this certification must be signed by the executive officer of the State agency submitting the estimate material, or a person officially designated by him, or by a fiscal officer of the State if required by State law or regulation. (Form PA-151, "Certificate of Availability of State Funds for Assistance and Administration during Quarter," is available for submitting the information but is not required to be used.) If the amount of State funds, or State and local funds if localities participate in the program, shown as available for expenditures, is not sufficient to cover the State's proportionate share of the amount estimated to be expended, the certification should contain a statement showing the source from which the amount of the deficiency is expected to be derived and the time when this amount is expected to be made available.

(iii) The third document submitted by the States is the quarterly statement of expenditures for each of the categories. This is an accounting statement of the disposition of the Federal funds granted for past periods, and reflects the adjustments necessary because the State's estimate for any prior quarter was greater or less than the amount which the State expended. The statement of expenditure also shows the share of the Federal government in any recovery of assistance from recipients and also expenditures not properly subject to Federal financial participation which are acknowledged by the State agency or have been revealed in the course of the fiscal audit.

(b) *Review.* The State's estimates are analyzed by the regional office staff and are forwarded with recommendations as required to the central office. The central office of the Bureau reviews the State's estimate, other relevant information, and any adjustments to be made for prior periods, and computes the grant.

(c) *Estimate of amount due and certification.* Upon consideration and approval of the grant request, the Commissioner of Social Security estimates the amount to be paid to the States and certifies it to the Secretary of the Treasury for the ensuing quarter. Payment to the State is made by the Secretary of the Treasury for each month of the quarter.

§ 201.4 *Withholding certification*—(a) *When withheld.* Certifications of grants to States are withheld, after reasonable notice and opportunity for hearing, in the following circumstances:

(1) When the State has changed the plan so as to impose any requirement prohibited in the Social Security Act, or when in the administration of the plan any such prohibited requirement is imposed, wth the knowledge of the State agency, in a substantial number of cases; or

(2) If in the administration of the plan there is a failure to comply substantially with any provision required by the act to be included in the plan.

(b) *Informal discussions.* Such hearings are generally not called, however, until after reasonable effort has been made by regional and central office representatives to resolve the questions involved by conference and discussion with State officials. Formal notification of the date and place of hearing does not foreclose further negotiations with State officials.

(c) *Hearings.* Hearings are held in accordance with the provisions of sections 4, 404, 1004, and 1404 of the Social Security Act. The requirements of sections 5 to 8 of the Administrative Procedure Act are observed in conducting the hearings.

(d) *Notice of non-certification.* If after such hearing it is found that funds should be withheld, the State agency is notified that further payment will not be made to the State until it is shown that such prohibited requirement is no longer imposed and that there is no longer any such failure to comply. Until then, further certification to the Secretary of the Treasury is not made with respect to such State plan. (Sections 4, 404, 1004, and 1404 of the Social Security Act.)

SUBPART B—REVIEW AND AUDITS

§ 201.5 *Continuing review of State and local administration.* (a) In order to provide a basis for determining that State welfare departments are adhering to Federal requirements and to the substantive legal and administrative provisions of their approved plans, the Bureau of Public Assistance conducts a review of State and local public assistance administration.

(b) The administrative review includes analysis of procedures and policies of State and local agencies and review of records of individual recipients. A statistically valid State-wide sample of case records of recipients is selected and reviewed at periodic intervals to determine whether eligibility has been properly established. Selected case records are also reviewed for evaluating adherence to the other Federal requirements set forth in the public assistance titles of the Social Security Act. If the review reveals cases in which there appears to have been an improper claim for Federal funds, the State agency is given an opportunity to provide information to substantiate the payment, or to make an adjustment on its expenditure report. If serious problems are revealed in respect to compliance with Federal requirements, action to adjust Federal funds in all cases affected is required of the State agency; the State agency is also required to correct its practice so that there will be no recurrence of the problem in the future.

§ 201.6 *Public assistance fiscal audits.* (a) Annually, or at other times as necessary, the State public assistance agency's claims for Federal funds and supporting records are audited by the Division of Grant-in-Aid Audits of the Office of Field Administration of the Department of Health, Education, and Welfare to determine that the agency has properly reported its accountability for grants of Federal funds for public assistance; the amounts granted for assistance payments were actually disbursed to individuals (or on behalf of individuals where medical care was concerned) who had been determined by the agency to be entitled to public assistance under the appropriate category; administrative expenditures claimed for Federal financial participation are proper under the Federal act and State plan, including State laws and regulations; amounts expended and used as the basis for claiming Federal funds under Titles I, IV, X, and XIV were not derived from other Federal sources or were not used as a basis for other Federal matching; and the share of the Federal government in any recovery was accurately and promptly adjusted.

(b) If the audit results in no exceptions, the State public assistance agency is advised by letter of this result. The general course for the disposition of exceptions resulting from audits involves the submittal of details of these exceptions to the State public assistance agency which then has an opportunity to concur in the exceptions or to assemble and submit additional facts for purposes of clearance. Provision is made for the State agency to appeal audit exceptions in which it has not concurred and which have not been deleted on the basis of clearance material. After consideration of a State agency appeal, the Commissioner advises the State agency of any expenditures in which the Federal government may not participate and requests it to include the amount as adjustments in a subsequent statement of expenditures. Expenditures in which it is found the Federal government may not participate and which are not properly adjusted through the State's claim will be deducted from subsequent grants made to the State agency.

Dated: November 28, 1955.

[SEAL] CHARLES I. SCHOTTLAND,
Commissioner of Social Security.

Approved: December 8, 1955.

M. B. FOLSOM,
Secretary of Health, Education, and Welfare.

[F. R. Doc. 55-10038; Filed, Dec. 13, 1955; 8:49 a. m.]

TITLE 49—TRANSPORTATION

Chapter I—Interstate Commerce Commission

PART 123—FEIGHT COMMODITY STATISTICS

MISCELLANEOUS AMENDMENTS

At a general session of the Interstate Commerce Commission, held at its office in Washington, D. C., on the 23d day of November A. D. 1955.

The matter of freight commodity statistics being under consideration:

It is ordered, That the order of this Commission issued under date of September 24, 1946, as amended (49 CFR

123.1–123.5, be, and it is hereby modified, effective January 1, 1956, by the cancellation of the requirements relating to reporting the classes of freight commodity statistics by Class II railroads as indicated below:

1. Cancel the text of § 123.1 *Freight commodity statistics,* and substitute the following for it:

§ 123.1 *Freight commodity statistics.* Beginning with January 1, 1947, and continuing thereafter unless otherwise ordered, carriers by railroad, other than switching and terminal companies, subject to Part I of the Interstate Commerce Act, that are or may be assigned to the classes designated as Class I and Class II, and every receiver, trustee, executor, administrator, or assignee of any such railroad, shall compile freight traffic statistics, and each of the carriers so indicated shall report such statistics annually, and each of the Class I carriers also quarterly, in duplicate, to the Commission, according to the commodity groups and classes named in Appendix I to §§ 123.1 to 123.5. Full information shall be furnished in accordance with the following outline of terms and requirements, as supplemented by formal instructions included in the appropriate report forms when supplied.

2. Cancel § 123.2 *Items to be reported,* and substitute the following for it:

§ 123.2 *Items to be reported.* (a) The following items are to be reported quarterly and annually by Class I carriers, except that the number of carloads in Class 970, "All L. C. L. Freight," shall be omitted:

(1) Average number of miles of road operated in freight service.

(2) For each commodity class:

Revenue freight originating on respondent's road:
Terminating on line:
Number of carloads.
Number of tons (2,000 pounds).
Delivered to connecting rail carriers:
Number of carloads.
Number of tons (2,000 pounds).
Revenue freight received from connecting rail carriers:
Terminating on line:
Number of carloads.
Number of tons (2,000 pounds).
Delivered to connecting rail carriers:
Number of carloads.
Number of tons (2,000 pounds).
Total revenue freight carried:
Number of carloads.
Number of tons (2,000 pounds).
Gross freight revenue.

(b) The following items are to be reported annually by the Class II carriers for the seven commodity groups:

Number of tons (2,000 pounds) of revenue freight originating on respondent's road.
Number of tons (2,000 pounds) of revenue freight received from connecting carriers.
Total revenue freight carried:
Number of tons (2,000 pounds each).
Gross freight revenue.

It is further ordered, That a copy of this order shall be served upon each class I and class II railroad other than switching and terminal companies subject to the provision of section 20 of the Interstate Commerce Act, and upon every receiver, trustee, executor, administrator, or assignee of any such railroad, and notice of this order shall be given to the general public by depositing a copy thereof in the office of the Secretary of the Commission at Washington, D. C., and by filing it with the Director of the Division of the Federal Register.

(Sec. 12, 24 Stat. 383, as amended; 49 U. S. C. 12. Interpret or apply sec. 20, 24 Stat. 386, as amended; 49 U. S. C. 20)

Objections may be filed. Any interested party may on or before 30 days after the date of this order, file with the Commission a written statement of reasons why the said modification should not become effective as provided above. Unless otherwise ordered, after consideration of such objections, the said modifications shall become effective as herein ordered.

By the Commission.

[SEAL] HAROLD D. MCCOY,
Secretary.

TITLE 50—WILDLIFE

Chapter I—Fish and Wildlife Service, Department of the Interior

Subchapter C—Management of Wildlife Conservation Areas

REVOCATION OF CERTAIN REGULATIONS

Basis and purpose. Public hunting of deer on the Hart Mountain National Antelope Refuge, Oregon, and the Charles Sheldon Antelope Range, Nevada, and the public hunting of waterfowl on the Bowdoin National Wildlife Refuge, Montana, and the Mattamuskeet National Wildlife Refuge, North Carolina, having been authorized by administrative actions pursuant to § 18.11, Title 50, CFR, the following existing regulations no longer are required and are hereby revoked upon publication of this document in the FEDERAL REGISTER:

PART 31—PACIFIC REGION

SUBPART—BOWDOIN NATIONAL WILDLIFE REFUGE, MONTANA; HUNTING

§ 31.11 *Hunting waterfowl and coots permitted.* (5 F. R. 3950)
§ 31.12 *Hunting licenses and permits.* (5 F. R. 3950)
§ 31.13 *Disorderly conduct; intoxication.* (5 F. R. 3950)
§ 31.14 *Hunting dogs.* (5 F. R. 3950)
§ 31.15 *Entry upon refuge; firearms.* (5 F. R. 3950)
§ 31.16 *Fires and camping.* (5 F. R. 3950)

SUBPART—CHARLES SHELDON ANTELOPE RANGE, NEVADA; HUNTING

§ 31.41 *Hunting permitted.* (9 F. R. 11856)
§ 31.42 *Excepted area.* (9 F. R. 11856)
§ 31.43 *Entry.* (9 F. R. 11856)
§ 31.44 *State hunting laws.* (9 F. R. 11856)
§ 31.45 *Exception.* (9 F. R. 11856)
§ 31.46 *Deer hunting permitted.* (17 F. R. 7984)

SUBPART—HART MOUNTAIN NATIONAL ANTELOPE REFUGE, OREGON; HUNTING

§ 33.131 *Hunting of deer permitted.* (9 F. R. 8189)
§ 33.132 *Area open to hunting.* (9 F. R. 8189)
§ 33.133 *Compliance with State laws and regulations.* (9 F. R. 8189)
§ 33.134 *Disorderly conduct; intoxication.* (9 F. R. 8189)
§ 33.135 *Entry upon refuge.* (9 F. R. 8189)
§ 33.136 *Limitation on hunting methods.* (17 F. R. 7905)

PART 34—SOUTHEASTERN REGION

SUBPART—MATTAMUSKEET NATIONAL WILDLIFE REFUGE, NORTH CAROLINA; HUNTING

§ 34.87 *Hunting of certain migratory game birds.* (4 F. R. 4571)
§ 34.88 *Shooting areas.* (16 F. R. 11738)
§ 34.89 *Entry upon refuge; firearms.* (4 F. R. 4571)
§ 34.90 *Shooting from blinds only.* (4 F. R. 4571)
§ 34.91 *Guides.* (4 F. R. 4571)
§ 34.92 *Limitation on hunting methods.* (4 F. R. 4571)
§ 34.93 *State cooperation in management of shooting areas.* (4 F. R. 4571)

(Sec. 10, 45 Stat. 1224, as amended; 16 U. S. C. 715i)

Dated: December 8, 1955.

DOUGLAS MCKAY,
Secretary of the Interior.

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 969]

AVOCADOS GROWN IN SOUTH FLORIDA

ADMINISTRATIVE COMMITTEE RULES AND REGULATIONS

Notice is hereby given that the Department is considering the approval of a proposed amendment, hereinafter set forth, to the rules and regulations that are currently in effect pursuant to the applicable provisions of the marketing agreement, as amended, and Order No. 69, as amended (7 CFR Part 969; 20 F. R. 4177), regulating the handling of avocados grown in south Florida, effective under the Agricultural Marketing Agreement of 1937, as amended (7 U. S. C. 601 et seq.; 68 Stat. 906, 1047). The amendment of the said rules and regulations was proposed by the Avocado Administrative Committee, established under said amended marketing agreement and order as the agency to administer the terms and provisions thereof.

The proposed amendment is as follows:

1. Immediately following paragraph (d) of § 969.110 *Exemption certificates* insert the following new section:

§ 969.115 *Nomination procedure.* (a) Any grower who desires to be represented in a nomination meeting by a duly authorized agent and to have his vote cast by such agent in the nomination and election of nominees for grower members and alternate members to fill positions on the Avocado Administartive Committee, as provided in § 969.22 (b) (2), shall submit to the Committee, not later than January 20, a written statement containing the following:

(1) Name of grower;

(2) Mailing address;

(3) Location of each avocado grove (either legal or from established landmarks);

(4) Number of avocado trees owned;

(5) Number of 55-pound units of avocados marketed to date during the current season;

(6) Name of the handler of the fruit marketed;

(7) Authorization, including the name and address, of the person who is to represent said grower at the nomination meeting.

(b) Any grower who has not filed the statement as prescribed in paragraph (a) of this section must be present at the nomination meeting to be eligible to have his vote counted in connection with the nomination and election of nominees.

(c) Any grower who, pursuant to the provisions of paragraph (a) of this section, has authorized an agent to cast such grower's vote, may rescind such authorization by appearing at the nomination meeting and exercising his right to vote in person.

All persons who desire to submit written data, views, or arguments for consideration in connection with said proposed amendment should do so by forwarding same to the Director, Fruit and Vegetable Division, Agricultural Marketing Service, U. S. Department of Agriculture, Room 2077, South Building, Washington 25, D. C., not later than the 10th day after publication of this notice in the FEDERAL REGISTER.

Dated: December 9, 1955.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[F. R. Doc. 55-10043; Filed, Dec. 13, 1955; 8:50 a. m.]

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 120]

TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

NOTICE OF FILING OF PETITION FOR ESTABLISHMENT OF TOLERANCES FOR RESIDUES OF 1,1 - DICHLORO-2,2 - BIS(*p*-ETHYLPHENYL) ETHANE

Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408 (d) (1), 68 Stat. 512; 21 U. S. C. 346a (d) (1)), the following notice is issued:

A petition has been filed by Rohm and Haas Company, Washington Square, Philadelphia 5, Pennsylvania, proposing the establishment of the following tolerances for residues of 1,1-dichloro-2,2-bis(*p*-ethylphenyl) ethane (also known as diethyl diphenyl dichloroethane) in or on the following raw agricultural commodities:

1. 25 parts per million in or on broccoli, brussels sprouts, cabbage, endive, kale, kohlrabi, lettuce, mustard greens, parsley, and spinach.

2. 15 parts per million in or on cherries (sweet and sour).

3. 0.2 part per million in milk; or, alternatively, that residues in milk from use of diethyl diphenyl dichloroethane on dairy animals be exempt from the requirement of a tolerance.

The analytical methods proposed in the petition for determining residues of diethyl diphenyl dichloroethane are as follows:

1. A spectrophotometric method is applicable for determination of diethyl diphenyl dichloroethane residues on cherries, lettuce, and milk. This method employs extraction with hexane and oxidation of the extractive to carboxylic or carbonyl compounds, which provide a basis for separation as well as suitable intermediates for intense color reactions or for conversion to compounds absorbing in the ultraviolet.

2. The second method is a modification of that described by Fairing and Warrington for methoxychlor and has been found applicable to all crops. It involves extraction with hexane and dehydrochlorination of the extracted diethyl diphenyl dichloroethane to the ethylene derivative. This is dissolved in hexane, treated with an adsorbent mixture to remove interfering materials, and then treated with concentrated sulfuric acid to develop a red color.

FEDERAL TRADE COMMISSION

[16 CFR Ch. I]

[File No. 21-464]

PROPOSED TRADE PRACTICE RULES FOR NURSERY INDUSTRY

NOTICE OF HEARING AND OF OPPORTUNITY TO PRESENT VIEWS, SUGGESTIONS, OR OBJECTIONS

Opportunity is hereby extended by the Federal Trade Commission to any and all persons, partnerships, corporations, associations, or other parties, including farm, labor, and consumer groups, affected by or having an interest in the proposed trade practice rules for the Nursery Industry, to present to the Commission such pertinent information, suggestions, or objections as they may desire to submit, and to be heard in the premises. For this purpose copies of the proposed rules may be obtained upon request to the Commission. Such views, information, suggestions, or objections may be submitted by letter, memorandum, brief, or other communication, to be filed with the Commission not later than January 19, 1956.

Opportunity to be heard orally will be afforded at the following times and places to any such persons, partnerships, corporations, associations, or other parties, who desire to appear and be heard:

Hearing beginning at 10 a. m., e. s. t., January 9, 1956, in Room 332, Federal Trade Commission Building, Pennsylvania Avenue at Sixth Street NW., Washington, D. C.; and

Hearing commencing at 10 a. m., c. s. t., January 19, 1956, in the Illinois Room of the LaSalle Hotel, 10 N. LaSalle Street at Madison, Chicago, Illinois.

After due consideration of all matters presented in writing or orally, the Commission will proceed to final action on the proposed rules.

The industry for which these rules are proposed is comprised of persons, firms, corporations, and organizations engaged in the sale, offering for sale, or distribution of trees, shrubs, vines, ornamentals, herbaceous annuals, biennials and perennials, bulbs, corms, rhizomes, and tubers, whether collected from the wild state or grown in a commercial nursery. Not included are florists' or greenhouse plants for inside culture or use, annual vegetable plants, and gladiolus bulbs or corms (gladiolus bulbs and corms being covered by trade practice rules promulgated January 17, 1952).

These proceedings were instituted pursuant to industry application and have for their purpose the establishment of a comprehensive set of trade practice rules directed to the maintenance of fair competitive conditions within the industry, as well as to protection of the purchasing public. Regional industry trade practice conferences were held in Chicago on August 11, 1954, in San Francisco on September 14, 1954, and in New York City on September 28, 1954, and these announced hearings constitute a further step in the proceedings.

Issued: December 9, 1955.

By direction of the Commission.

[SEAL] ROBERT M. PARRISH,
Secretary.

NOTICES

DEPARTMENT OF JUSTICE

Office of Alien Property

ARRIGO PAGNACCO

NOTICE OF INTENTION TO RETURN VESTED PROPERTY

Pursuant to section 32 (f) of the Trading With the Enemy Act, as amended, notice is hereby given of intention to return, on or after 30 days from the date of publication hereof, the following property located in Washington, D. C., including all royalties accrued thereunder and all damages and profits recoverable for past infringement thereof, after adequate provision for taxes and conservatory expenses:

Claimant, Claim No., and Property

Arrigo Pagnacco, Via Canova 12, Milan, Italy, Claim No. 41164, Vesting Order No. 201; property described in Vesting Order No. 201 (8 F. R. 625, January 16, 1943) relating to United States Patent No. 2,182,349; subject, however, to a royalty-free non-exclusive license agreement dated September 7, 1943 (License No. 202) by and between the Alien Property Custodian, predecessor to the Attorney General, and the Toledo Scale Company, Toledo, Ohio.

Executed at Washington, D. C., on December 7, 1955.

For the Attorney General.

[SEAL] PAUL V. MYRON,
Deputy Director, Office of Alien Property.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

COLORADO

NOTICE OF PROPOSED WITHDRAWAL AND RESERVATION OF LANDS

DECEMBER 6, 1955.

The U. S. Forest Service, Department of Agriculture, has filed an application, serial No. Colorado 012205, for the withdrawal from location and entry, under the General Mining Laws, subject to existing valid claims, of the lands described below.

The applicant desires the land for use in connection with the Elk River Recreational Area for camp grounds, summer homes, organization camp, roadside strip and stream bank strip.

For a period of 30 days from the date of publication of this notice, persons having cause may present their objections in writing to the undersigned official of the Bureau of Land Management, Department of the Interior, 357 New Custom House, Box 1018, Denver 1, Colorado.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

The lands involved in the application are:

SIXTH PRINCIPAL MERIDIAN, COLORADO

ROUTT NATIONAL FOREST

Elk River Recreation Area:
T. 9 N., R. 84 W.,
Sec. 1: Lots 5, 6, 7, 8, S½N½;
Sec. 2: Lot 5, SE¼NE¼, N½SE¼, N½SW¼;
Sec. 3: SE¼;
Sec. 7: Lot 12;
Sec. 8: Lots 7, 8, 11, 12, 13;
Tract 43;
Sec. 9: Lots 6, 7, 8, 9, NE¼SW¼;
Tract 44;
Sec. 10: Lots 1, 2, E½NW¼, NW¼NW¼NE¼;
Sec. 18: Lots 17 and 18.

Total area, 1,465.27 acres.

MAX CAPLAN,
State Supervisor.

OUTER CONTINENTAL SHELF

SUBMISSION OF NOMINATIONS OF AREAS FOR PROSPECTIVE OIL, AND GAS AND SULPHUR LEASING

DECEMBER 8, 1955.

Pursuant to authority prescribed in 43 CFR 201.20, notice is hereby given that nomination of areas for prospective oil and gas and sulphur leasing in the Outer Continental Shelf off the States of Louisiana and Texas may be submitted to the Manager, Bureau of Land Management, 608 Masonic Temple Building, 333 St. Charles Avenue, New Orleans 12, Louisiana, not later than February 10, 1956. Copies of any such nominations must be sent to the Oil and Gas Supervisor, Geological Survey, Department of the Interior, 1503 Masonic Temple Building, 333 St. Charles Avenue, New Orleans 12, Louisiana. Envelopes should be marked "Nominations for leasing in the Outer Continental Shelf."

Nominated areas must be identified by block numbers and names of areas as shown on the official leasing maps prepared by the Bureau of Land Management, including the West addition West Cameron Area and the East addition High Island Area. Properly described subdivisions of blocks may be nominated. Reduced copies of the official leasing maps assemble in separate sets, one for Louisiana and one for Texas, may be procured from the Manager of the New Orleans office mentioned above or the Director, Bureau of Land Management, Washington 25, D. C., at a cost of $1 per set.

Any areas selected to be offered for competitive bidding will be published in the FEDERAL REGISTER and other publications. The published notice of lease offer will state the conditions and terms for leasing (43 CFR 201.20) and the place, date and hour at which the bids will be opened.

EDWARD WOOZLEY,
Director.

Office of the Secretary

DESIGNATING THE EDISON HOME NATIONAL HISTORIC SITE, WEST ORANGE, NEW JERSEY

Whereas the Congress of the United States has declared it to be a national policy to preserve for the public use historic sites, buildings, and objects of national significance for the inspiration and benefit of the people of the United States; and

Whereas the Edison Home (Glenmont), located in Llewellyn Park in the Town of West Orange, County of Essex, and State of New Jersey, is recognized by the Advisory Board on National Parks, Historic Sites, Buildings, and Monuments, as possessing national significance as the home of Thomas A. Edison, noted inventor and scientist, during the years which climaxed his career; and

Whereas a cooperative agreement has been made between Thomas A. Edison, Incorporated, and the United States of America, providing for the designation, preservation, and use of the Edison Home as a national historic site:

Now, therefore, I, Douglas McKay, Secretary of the Interior, under and by virtue of the authority conferred upon the Secretary of the Interior by section 2 of the act of Congress approved August 21, 1935 (49 Stat. 666), do hereby designate the following described lands, together with related structures thereon and all appurtenances connected therewith, to be a national historic site, having the name "Edison Home National Historic Site":

All those two certain tracts or parcels of land and premises, hereinafter particularly described, situate, lying and being in the Town of West Orange, in the County of Essex and State of New Jersey:

First Parcel. Beginning on the South side of a birch tree, and in the line of Llewellyn Park, and on the South side of lands now or formerly owned by Egbert Starr; thence along said Starr's said line, and line of lands formerly owned by Llewellyn S. Haskell, South sixty-one degrees East, Eight hundred and fifty-one feet, to the middle of Glen Avenue; thence along the middle of said Glen Avenue, South, Thirty-two degrees twenty minutes West, One hundred and sixteen feet; thence along the same, South, Thirty-four degrees West, Two hundred and fifty feet; thence along the same, South, Forty degrees West, Two hundred and thirty-six feet; thence along the same, South, Forty-six degrees, forty minutes West, One hundred feet; thence along the same, South, Fifty-seven degrees twenty minutes West, Seventy-two feet and six inches, to the line of Park Way; thence, along the line of said Park Way, North, Ten degrees fifty minutes West, One hundred and fifty-one feet; thence, along the same, North, Twenty-nine degrees West, Two hundred and fifty-three feet and five inches; thence along the same, North, Forty-five degrees fifteen minutes West, One hundred and thirty-two feet; thence North, Forty-eight degrees and thirty minutes West, One hundred and twenty-five feet and four inches; thence, North, Thirty-nine degrees five minutes West, One hundred and twenty-four feet and one inch; thence, along the same, North, Seventeen degrees thirty minutes West, One hundred and thirty-six feet; thence, along the same, North, Twenty degrees and forty minutes East, Eighty-nine feet and nine inches; thence, North, Fifty-four degrees and forty minutes East, One hundred and fifty-nine feet and eight inches, and thence North, Thirty-two degrees East, Seventy-two feet, to the place of beginning. Containing Ten acres and forty-seven hundredths of an acre of land, more or less.

Second Parcel. Also, that other certain tract, or parcel of land and premises, hereinafter particularly described, situate, lying and being on "Eagle Ridge", on the First Mountain, in the Town of West Orange, beginning in the middle of Glen Avenue, at the Northwesterly corner of land formerly of Charles Harrison; thence along the middle of said Avenue, North Thirty degrees thirty-five minutes East, Seventy-three feet three inches; thence, still along the same North, Twenty-nine degrees ten minutes East, Ninety-nine feet and thirty-three hundredths of a foot; thence still along the same North, Twenty-seven degrees East, seventy-six feet and seventy-three hundredths of a foot, to the middle of a road, fifty feet wide; thence, along the middle of said road, North, Sixty-one degrees nine minutes West, Five hundred and thirty feet and ten inches, more or less, to land, now or formerly owned by Egbert Starr; thence along said Starr's line, South, Twenty-seven degrees fifty-seven minutes West, Two hundred and fifty-five feet and seventeen hundredths of a foot, to land formerly of Charles Harrison; thence along that line South, Sixty-one degrees forty-seven minutes East, Five hundred and twenty-five feet and sixty-six hundredths of a foot, more or less, to the place of beginning. Containing three acres and seven hundredths of an acre of land, more or less.

The administration, protection, and development of this national historic site shall be exercised in accordance with the provisions of the above-mentioned cooperative agreement and the act of August 21, 1935, supra.

Warning is expressly given to all unauthorized persons not to appropriate, injure, destroy, deface, or remove any feature of this historic site.

In witness whereof, I have hereunto set my hand and caused the official seal of the Department of the Interior to be affixed, in the City of Washington, this 6th day of December 1955.

[SEAL] DOUGLAS McKAY,
Secretary of the Interior.

SOUTH CAROLINA

DESIGNATION OF AREAS FOR PRODUCTION EMERGENCY LOANS

For the purpose of making loans pursuant to section 2 (a) of Public Law 38, 81st Congress (12 U. S. C. 1148a-2 (a)), certain counties in the State of South Carolina have heretofore been found to have suffered from a production disaster causing a need for agricultural credit not readily available from commercial banks, cooperative lending agencies, or other responsible sources (January 18, 1954, 19 F. R. 1444; March 10, 1954, 19 F. R. 1524; and August 31, 1954, 19 F. R. 5633). The period for making initial Production Emergency loans in said counties was on August 31, 1954, extended until December 31, 1955 (19 F. R. 5633). The period for making initial Production Emergency loans in the counties listed below is hereby extended until December 31, 1956. Thereafter in said counties, such loans will not be made except to borrowers who previously received such assistance.

DEPARTMENT OF LABOR

Wage and Hour Division

LEARNER EMPLOYMENT CERTIFICATES

ISSUANCE TO VARIOUS INDUSTRIES

Notice is hereby given that pursuant to section 14 of the Fair Labor Standards Act of 1938, as amended (52 Stat. 1068, as amended; 29 U. S. C. and Sup. 214) and Parts 522 and 527 of the regulations issued thereunder (29 CFR Parts 522 and 527), certificates authorizing the employment of learners at hourly wage rates lower than the minimum wage rates applicable under section 6 of the act have been issued to the firms listed below. The employment of learners under these certificates is limited to the terms and conditions therein contained and is subject to the provisions of Parts 522 and 527. The effective and expiration dates, occupations, wage rates, number or proportion of learners and learning periods for certificates issued under general learner regulations (§§ 522.1 to 522.12) are as indicated below; conditions provided in certificates issued under special industry regulations are as established in these regulations.

Apparel Industry Learner Regulations (29 CFR 522.20 to 522.24, as amended April 19, 1955, 20 F. R. 2304).

Carbondale Manufacturing Co., Inc., 33 South Main Street, Carbondale, Pa., effective 12-5-55 to 12-4-56; 10 learners for normal labor turnover purposes (dresses).

Day's Tailor-d Clothing, Inc., 29th and Pacific Avenue, Tacoma, Wash., effective 11-28-55 to 11-27-56; 10 percent of the total number of factory production workers for normal labor turnover purposes (men's trousers, men's and boys' jackets).

Finart Creations, Inc., Central City, Ky., effective 12-2-55 to 12-1-56; 10 learners for normal labor turnover purposes (house coats, cotton dresses, dusters).

The Hercules Trouser Co., Jackson, Ohio, effective 12-1-55 to 2-20-56; 30 learners for plant expansion purposes (men's and boys' single pants).

Hickerson & Co., Brainerd, Minn., effective 12-10-55 to 12-9-56; 10 percent of the total number of factory production workers for normal labor turnover purposes (men's and boys' woolen work and sport clothing).

Holland Manufacturers, 1218 East Marvin Street, Waxahachie, Tex., effective 12-5-55 to 12-4-56; 2 learners for normal labor turnover purposes (Learners may not be engaged at subminimum wage rates in the production of ladies' suits) (ladies' dresses and suits).

Mammoth Cave Garment Co., Cave City, Ky., effective 12-11-55 to 12-10-56; 10 learners for normal labor turnover purposes (dungarees).

Regulations Applicable to the Employment of Student-Workers (29 CFR 527.1 to 527.9, October 14, 1955, 20 F. R. 7737).

Hawaiian Mission Academy, 1438 Pensacola Street, Honolulu 9, T. H., effective 11-28-55 to 8-31-56; 5 learners to be employed in the occupations hereinafter listed; print shop; compositor, pressman, bindery worker and related skilled and semiskilled occupations, each 500 hours at 65 cents an hour and 500 hours at 70 cents an hour; 1 learner to be employed in the occupation hereinafter listed; clerical; typist, bookkeeper and related skilled and semiskilled occupations 300 hours and 65 cents an hour and 300 hours at 70 cents an hour.

Wisconsin Academy, Columbus, Wis., effective 11-28-55 to 8-31-56; 17 learners to be employed in the occupations hereinafter listed; furniture shop (outdoor redwood) assembler (furniture) woodworking machine operator, furniture finisher helper, and related skilled and semiskilled occupations, each 375 hours at 65 cents an hour and 375 hours at 70 cents an hour.

Each certificate has been issued upon the employer's representation that employment of learners at subminimum rates is necessary in order to prevent curtailment of opportunities for employment, and that experienced workers for the learner occupations are not available. The certificates may be canceled in the manner provided in the regulations and as indicated in the certificates. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof within fifteen days after publication of this notice in the FEDERAL REGISTER pursuant to the provisions of Parts 522 and 527.

Signed at Washington, D. C., this 5th day of December 1955.

MILTON BROOKE,
Authorized Representative of the Administrator.

CIVIL SERVICE COMMISSION

CERTAIN METEOROLOGIST POSITIONS IN CONTINENTAL UNITED STATES, INCLUDING ALASKA, AND FOREIGN COUNTRIES

NOTICE OF INCREASE IN MINIMUM RATES OF PAY

Under the provisions of section 803 of the Classification Act of 1949, as amended (68 Stat. 1106; 5 U. S. C. 1133), pursuant to 5 CFR 25.103, 25.105, the Commission has increased the minimum rate of pay for meteorologist positions at grade GS–5 in the Meteorology Series, GS–1340–0. The new rate has been set at the sixth step of the grade ($4,345). This increase will be effective on the first day of the first pay period which begins after December 3, 1955, and applies to these positions throughout the continental United States, including Alaska, and in foreign countries.

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] WM. C. HULL,
Executive Assistant.

CIVIL AERONAUTICS BOARD

[Docket No. 7339]

MODERN AIR TRANSPORT, INC., ET AL.

NOTICE OF POSTPONEMENT OF HEARING

Modern Air Transport, Inc., John P. Becker and Aviation Management Corporation, interlocking relationship.

Notice is hereby given pursuant to the provisions of the Civil Aeronautics Act of 1938, as amended, that hearing in the above-entitled proceeding is postponed from December 13 to December 20, 1955, at 10 a. m., e. s. t., in Room 1512 Temporary Building No. 4, 17th Street and Constitution Avenue NW., Washington, D. C., before Examiner Curtis C. Henderson.

Dated at Washington, D. C., December 9, 1955.

[SEAL] FRANCIS W. BROWN,
Chief Examiner.

[F. R. Doc. 55–10047; Filed, Dec. 13, 1955; 8:51 a. m.]

PROPOSED AIR STAR ROUTE

In accordance with Public Law 277 of the 81st Congress (approved August 30, 1949), notice is hereby given that the Civil Aeronautics Board has received a request from the Postmaster General (Docket No. 7545) for certification that the proposed air star route, hereinafter described, does not conflict with the development of air transportation as contemplated under the Civil Aeronautics Act of 1938, as amended.

The route proposed is as follows: To and from McCall and Cabin Creek Landing Field in Idaho.

Under the provisions of the said Public Law 277, the Postmaster General is required to obtain the certification of the Board prior to advertising for bids for the carriage of mail by aircraft on any star route. Any contract which may ultimately be awarded by the Postmaster General under such law will not confer authority to carry persons or property (other than mail) by air.

Prior to reaching its decision as to whether the requested certification should be issued, the Board desires to afford interested persons an opportunity to comment thereon through the submission of written data, views or arguments, in triplicate, addressed to the Secretary, Civil Aeronautics Board, Washington 25, D. C. All relevant matter in communications bearing the above docket number received on or before January 9, 1956, will be considered by the Board before taking final action on the request of the Postmaster General.

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
Secretary.

DECEMBER 9, 1955.

FEDERAL POWER COMMISSION

[Docket No. G–9622]

CITY OF CORYDON, KY.

NOTICE OF APPLICATION TO ESTABLISH PHYSICAL CONNECTION FOR DISTRIBUTION AND SALE OF NATURAL GAS

DECEMBER 8, 1955.

Take notice that the City of Corydon, Kentucky (Applicant), filed an application on November 7, 1955, for an order pursuant to section 7 (a) of the Natural Gas Act, directing Texas Gas Transmission Corporation (Texas Gas) to establish physical connection of its transportation facilities with the facilities to be constructed for and on behalf of Applicant and to sell and deliver natural gas to Applicant for distribution and sale to the Citizens of Corydon, Kentucky, and its environs.

Applicant states that it is a municipality and is a municipal corporation of the State of Kentucky, and has the legal right to construct, operate and maintain a natural gas system for its own purposes and for the use and benefits of its inhabitants, and is legally authorized to engage in the local distribution of natural gas to the public.

Applicant states that its proposed service area has a population of about 1,000 and is about 5½ miles westerly from the Texas Gas spur line running to Spencer Chemical Company and that its estimated daily demands for the first year will be approximately 110 Mcf, for the third year approximately 300 Mcf and for the fifth year approximately 400 Mcf.

Applicant alleges that the requirement that Texas Gas make available said natural gas to Applicant will not place an undue burden upon Texas Gas nor require Texas Gas to enlarge its facilities for such purposes, nor impair its ability to render adequate service to its customers.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D. C., in accordance with the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 28th day of December 1955. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
Secretary.

[Docket No. G–9648]

IRON RANGES NATURAL GAS CO.

NOTICE OF APPLICATION FOR CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

DECEMBER 8, 1955.

Take notice that Iron Ranges Natural Gas Company (Iron Ranges), a Minnesota corporation having its principal place of business at 137 East Eighth Street, St. Paul 1, Minnesota, filed on November 14, 1955, in Docket No. G–9648, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of certain transmission pipeline facilities.

Iron Ranges proposes to construct and operate approximately 68.4 miles of transmission pipeline with a system capacity of 55,000 Mcf of gas per day together with approximately 47 miles of supply laterals to various towns and cities on the Mesabi Iron Range in Minnesota. The transmission system will extend easterly and westerly from a point of connection, located about midway between the villages of Aurora and Eveleth, Minnesota, with a proposed pipe line to be constructed by Midwestern Gas Transmission Company for which application has been filed in Docket No. G–9451.

Iron Ranges proposes to furnish natural gas at wholesale to the municipally-owned systems in Virginia and Hibbing; the system of Northwest Gas and Power Company at Chisholm and Eveleth; to two main line direct industrial customers, Minnesota Power and Light Company and Erie Mining Company, and to 14 distribution systems to be constructed and operated by Iron Ranges in the cities and villages of: Aurora, Biwabik, Bovey, Buhl, Calumet, Coleraine, Cooley, Gilbert, Grant Rapids, Hoyt Lakes, Keewatin, Marble, Mountain Iron and Nashwauk. The estimated cost of the proposed facilities is $2,800,000. The proposed financing includes the issuance of bond debentures and common stock.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 27th day of December 1955. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
Secretary.

INTERSTATE COMMERCE COMMISSION

[Notice 90]

MOTOR CARRIER APPLICATIONS

DECEMBER 9, 1955.

Protests, consisting of an original and two copies to the granting of an application must be filed with the Commission within 30 days from the date of publication of this notice in the FEDERAL REGISTER and a copy of such protest served on the applicant. Each protest must clearly state the name and street number, city and state address of each protestant on behalf of whom the protest is filed (49 CFR 1.240 and 1.241). Failure to seasonably file a protest will be construed as a waiver of opposition and participation in the proceeding unless an oral hearing is held. In addition to other requirements of Rule 40 of the General Rules of Practice of the Commission (39 CFR 1.40), protests shall include a request for a public hearing, if one is desired, and shall specify with particularity the facts, matters, and things, relied upon, but shall not include issues or allegations phrased generally. Protests containing general allegations may be rejected. Requests for an oral hearing must be supported by an explanation as to why the evidence cannot be submitted in forms of affidavits. Any interested person, not a protestant, desiring to receive notice of the time and place of any hearing, pre-hearing conference, taking of depositions, or other proceeding shall notify the Commission by letter or telegram within 30 days from the date of publication of this notice in the FEDERAL REGISTER.

Except when the circumstances require immediate action, an application for approval under Section 210a (b) of the Act, of the temporary operations of Motor Carrier properties sought to be acquired in an application under Section 5 (2) will not be disposed of sooner than 10 days from the date of publication of this notice in the FEDERAL REGISTER. If a protest is received prior to action being taken, it will be considered.

APPLICATIONS OF MOTOR CARRIERS OF PROPERTY

No. MC 200 Sub 187, filed December 5, 1955, RISS & COMPANY, INC., Riss Building, 15 West 10th St., Kansas City, Mo. For authority to operate as a *common carrier*, over a regular route, transporting: *General commodities*, except those of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, between Detroit, Mich., and the Assembly Plant Site of the Ford Motor Company at intersection of Michigan Highway 218 and West Lake Drive near Wixom, Mich., over Michigan Highway 16 from Detroit to junction Michigan Highway 218, thence over Michigan Highway 218 to site of Ford Motor Company Assembly Plant, and return over the same route, serving no intermediate points. Applicant is authorized to conduct regular route operations in Colorado, Connecticut, Illinois, Indiana, Iowa, Kansas, Kentucky, Maryland, Massachusetts, Michigan, Missouri, Nebraska, New Jersey, New York, Ohio, Oklahoma, Pennsylvania, Rhode Island, Texas, Virginia, West Virginia, and the District of Columbia, and irregular route operations in Colorado, Connecticut, Illinois, Indiana, Iowa, Kansas, Kentucky, Massachusetts, Missouri, Nebraska, New Jersey, New York, Ohio, Oklahoma, Pennsylvania, Texas, West Virginia, and the District of Columbia.

No. MC 2815 Sub 15, filed November 29, 1955, PENNTRUCK COMPANY, INC., 323 West Polk Street, Chicago 7, Ill. Applicant's attorney: Robert H. Griswold, Commerce Building, P. O. Box 432, Harrisburg, Pa. For authority to operate as a *common carrier*, over a regular route, transporting: *General commodities, including commodities of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk*, and *those requiring special equipment*, between Jeffersonville, Ind., and Charlestown, Ind., from Jeffersonville over Indiana Highway 62 to Charlestown, and return over the same route, serving intermediate and off-route points which are stations of The Pennsylvania Railroad Company. Applicant is authorized to conduct common carrier operations in Illinois, Indiana, Kentucky and Michigan, irregular route contract carrier operations in Illinois, Indiana, Kentucky, Ohio, Michigan and Missouri, and is affiliated with a carrier who is authorized to conduct irregular route contract carrier operations in Connecticut, New Jersey and New York.

No. MC 4409 Sub 10, filed December 5, 1955, R. & H. CORPORATION, 1004 Stanton Avenue, New Kensington, Pa. Applicant's attorney: Harold S. Shertz, 811–819 Lewis Tower Bldg., 225 South 15th Street, Philadelphia 2, Pa. For authority to operate as a *contract carrier*, over irregular routes, transporting: *Fiberboard boxes and containers*, from Clarion, Pa., to Huntington, Charleston and Fairmont, W. Va., and Bridgeton, N. J.; and *bottle moulds*, between Clarion, Pa., on the one hand, and, on the other, Charleston, W. Va., and Bridgeton, N. J. Applicant is authorized to conduct operations in Alabama, Connecticut, Florida, Georgia, Indiana, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Vermont, Virginia, West Virginia and the District of Columbia.

No. MC 13712 Sub 8, filed November 28, 1955, LESLIE C. ROE AND IRENE G. ROE, doing business as ROE MOVERS, 15 Zimmer Avenue, Poughkeepsie, N. Y. Applicant's attorney: William F. Leahey, 4 Liberty Street, Poughkeepsie, N. Y. For authority to operate as a *common carrier*, over irregular routes, transporting: *Business machines*, uncrated, *machine models*, including *supplies, parts, tools*, and *equipment* in connection therewith, and *household goods* as defined by the Commission, between Poughkeepsie, N. Y., and points in New York within fifty (50) miles of Poughkeepsie, on the one hand, and, on the other, points in Connecticut, Georgia, Maryland, New Hampshire, New York, Rhode Island, Vermont, West Virginia, Delaware, Florida, Maine, Massachusetts, New Jersey, Pennsylvania, South Carolina, Virginia, North Carolina, and the District of Columbia.

NOTE: Applicant has authority to transport *household goods* as defined by the Commission, between Poughkeepsie, N. Y., and points in New York within 30 miles of Poughkeepsie, on the one hand, and, on the other, points as more fully described in Certificate No. MC 13712, dated July 11, 1955. Applicant states that the purpose of this application is to change the operations to read as described above.

No. MC 17226, Sub 9, filed December 2, 1955, FRUIT BELT MOTOR SERVICE, INC., 3909 W. Harrison St., Chicago 24, Ill. Applicant's attorney: Eugene L. Cohn, One North LaSalle St., Chicago 2, Ill. For authority to operate as a *contract carrier*, over irregular routes, transporting: (1) *Machinery, parts, materials* and *supplies*, used in the manufacture, shipping or operation of household laundry machines, stoves and ranges, (a) between Hamilton, Ohio, on the one hand, and, on the other, St. Joseph and Benton Harbor, Mich., and La Porte, Ind.; (b) from Chicago, Ill., to Hamilton, Ohio; and (2) *Skids, pallets, racks* and *packing containers* used in the transportation of the above-specified commodities, from the above-specified destination points to the respective origin points. Applicant is authorized to conduct operations in Illinois, Michigan, Indiana, and Ohio.

No. MC 20793 Sub 19, filed November 28, 1955, WAGNER TRUCKING CO., INC., Jobstown, N. J. Applicant's representative: G. Donald Bullock, Box 146, Wyncote, Pa. For authority to operate as a *common carrier*, over irregular routes, transporting: *Brick*, from Gloucester County, N. J., to points in Connecticut; and *empty containers or other such incidental facilities* used in transporting the commodities specified, on return movements. Applicant is authorized to conduct operations in Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont and Virginia, and the District of Columbia.

No. MC 41002 Sub 12, filed December 2, 1955, THE VICTOR TRANSIT CORPORATION, P. O. Box 115, Winton Place Station, Cincinnati 32, Ohio. Applicant's attorney: Richard H. Brandon, Hartman Building, Columbus 15, Ohio. For authority to operate as a *contract carrier*, over irregular routes, transporting: *Glass containers* and *caps, covers* and *tops* therefor, and *corrugated paperboard containers*, knocked down, from Vienna, W. Va., to points in Illinois, Indiana, Kentucky, Tennessee and Alabama. Applicant is authorized to conduct operations in Illinois, Indiana, Kentucky, Michigan, Missouri, New York, Ohio, Pennsylvania, West Virginia and Wisconsin.

No. MC 47142 Sub 58, filed December 5, 1955, C. I. WHITTEN TRANSFER COMPANY, a corporation, 200—19th St., Huntington, W. Va. Applicants' attor-

ney: Chas. I. Dodrill, West Virginia Building, Huntington, W. Va. For authority to operate as a *common carrier*, over irregular routes, transporting: *Class A, B, and C explosives, blasting supplies*, and *used empty containers* for explosives, blasting supplies and powder, between a point on Caton Farm Road at the terminal of Roy Cartage Company near Seneca, Ill. and points in Will County, Ill. within five miles of said point on Caton Farm Road, on the one hand, and, on the other, points presently authorized to be served over irregular routes in and through the states of Illinois, Indiana, Kentucky, Maryland, New Jersey, North Carolina, Ohio, Pennsylvania, Virginia, and West Virginia in the transportatin of explosives, blasting supplies, and used empty containers for explosives, blasting supplies, and powder, with service at said point on Caton Farm Road and points in Will County, Ill., within five miles thereof being restricted to interchange of traffic with other carriers. Applicant is authorized to conduct operations in Illinois, Indiana, Kentucky, Maryland, New Jersey, North Carolina, Ohio, Pennsylvania, Virginia, and West Virginia.

No. MC 59531 Sub 69, filed November 29, 1955, AUTO CONVOY CO., a corporation, 3020 S. Haskell Avenue, Dallas, Tex. Applicant's attorney: Reagan Sayers, Century Life Building, Fort Worth, Tex. For authority to operate as a *common carrier* over irregular routes, transporting: *New automobiles, new trucks* and *new chassis*, in secondary movements, by driveaway and truckaway service, (1) from Quapaw, Okla., and Texarkana, Tex., Ark., to points in New Mexico, (2) between points in New Mexico, and (3) between points in Texas and New Mexico. *Damaged shipments* of the above-specified commodities on return. Applicant is authorized to conduct operations in Louisiana, Oklahoma and Texas.

No. MC 60610 Sub 3, filed November 29, 1955, ARVILLE STONECIPHER and WILSON BRANDENBURG, doing business as STEPRO TRANSFER LINE, 102 South Mulberry St., Corydon, Ind. Applicant's attorney: Ollie L. Merchant, 712 Louisville Trust Building, Louisville 2, Ky. For authority to operate as a *common carrier*, transporting: *General Commodities*, except those of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, (1) over a regular route between Palmyra, Ind., and Corydon, Ind., over Indiana Highway 135, serving the intermediate point of Central Barren, Ind., unrestricted, and serving the termini for joinder or connecting purposes only in connection with regular route operations between (a) Corydon, Ind., and Louisville, Ky., and (b) Fredericksburg, Ind., and Louisville, Ky., and (2) over irregular routes between points in Floyd County, Ind. south of a line commencing at New Albany, Ind., thence extending over U. S. Highway 460 to junction Indiana Highway 64, and thence over Indiana Highway 64 to the Floyd-Harrison Counties, Ind. line, and those in Harrison County, Ind. south of Indiana Highway 64 (excluding Crandall, New Salisbury, and Corydon Junction, Ind., points located on the specified portions of U. S. Highway 460 and Indiana Highway 64, and those located on that portion of U. S. Highway 460 extending between the junction of U. S. Highway 460 and Indiana Highway 64, and the Harrison-Crawford Counties, Ind. line), on the one hand, and, on the other, Louisville, Ky., with service to and from those points located within 10 miles of Corydon, Ind. being restricted to the transportation of *livestock*. Applicant is authorized to conduct operations in Indiana, and Kentucky.

No. MC 61265 Sub 47, filed November 21, 1955, SOUTHEASTERN TRUCK LINES, INC., Hill Blanton Avenue, Nashville, Tenn. Applicant's attorney: Walter Harwood, 515 Nashville Trust Building, Nashville 3, Tenn. For authority to operate as a *common carrier*, over regular routes, transporting: *General commodities*, except those of unusual value, Class A and B explosives, sand, gravel, coal, livestock, automobiles, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment or refrigeration (1) between Hopkinsville, Ky., and Bowling Green, Ky., from Hopkinsville over U. S. Highway 68 to Bowling Green, and return over the same route, serving no intermediate points, as an alternate or connecting route, in connection with carrier's regular route operations between (a) Cincinnati, Ohio, and Atlanta, Ga., via Nashville, Tenn., (b) Nashville, Tenn., and Hopkinsville, Ky., which is a portion of regular route operations between Nashville, Tenn., and Evansville, Ind., and (c) Hopkinsville, Tenn., and Nashville, Tenn., and (2) between Paris, Tenn., and Bowling Green, Ky., from Paris over U. S. Highway 79 to junction U. S. Highway 68 at or near Russellville, Ky., thence over U. S. Highway 68 to Bowling Green, and return over the same route, serving no intermediate points, as an alternate or connecting route, in connection with carrier's regular route operations between (a) Cincinnati, Ohio, and Atlanta, Ga., via Nashville, Tenn., (b) Nashville, Tenn., and Huntingdon, Tenn., which is a portion of regular route operations between Nashville, Tenn., and Atwood, Tenn., (c) between Paris, Tenn., and Huntingdon, Tenn., which is a portion of regular route operations between St. Louis, Mo., and Decaturville, Tenn., subject to restriction between McKenzie and Huntingdon, Tenn., (d) Brownsville, Tenn., and Union City, Tenn., via Paris, Tenn., and (e) the applied-for route (1) hereinabove. Applicant is authorized to conduct operations in Georgia, Illinois, Indiana, Kentucky, Missouri, Ohio, and Tennessee.

No. MC 65941 Sub 16, filed November 28, 1955, TOWER LINES, INC., P. O. Box 907, North 3rd and Warwood Avenue, Wheeling, W. Va. For authority to operate as a *common carrier*, over irregular routes, transporting: *General commodities*, except those of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, from points in that part of Georgia on and north of a line beginning at Augusta and extending along U. S. Highway 1 to Louisville, thence along Georgia Highway 24 to junction Georgia Highway 22, and thence along Georgia Highway 22 through Macon to Columbus, and those in that part of North Carolina and South Carolina on, north and west of U. S. Highway 1 to Wheeling, W. Va., and points in West Virginia within 30 miles of Wheeling, Clarksburg, and Mannington, W. Va., and Martins Ferry, Ohio. Applicant is authorized to conduct operations in Georgia, North Carolina, Ohio, Pennsylvania, South Carolina, Tennessee, Virginia and West Virginia.

No. MC 66562 Sub 1257, filed November 10, 1955, (Amended), published November 23, 1955, page 8652, RAILWAY EXPRESS AGENCY, INCORPORATED, 219 East 42nd Street, New York 17, N. Y. Applicant's attorney: William H. Marx, same address as applicant. For authority to operate as a *common carrier*, over a regular route, transporting: *General commodities*, including *Class A and B explosives*, moving in express service, between Buffalo, N. Y., and Punxsutawney, Pa., from Buffalo over New York Highway 240 to junction New York Highway 39, thence over New York Highway 39 to Springville, N. Y., thence over U. S. Highway 219 to DuBois, Pa., thence over U. S. Highway 119 to Punxsutawney, and return over the same route, serving the intermediate points of Orchard Park, Jewettville, Colden, Springville, and Ellicottville, N. Y., and Bradford, Ridgway, Brockway, DuBois, and Sykesville, Pa., and the off-route points of Salamanca, N. Y., and Mount Jewett and Falls Creek, Pa. RESTRICTION: (a) The authority applied for is subject to the condition that service to be performed shall be limited to service which is auxiliary to, or supplemental of, air or railway express service; (b) Shipments transported by carrier shall be limited to those moving on a through bill of lading or express receipt, covering, in addition to the motor carrier movement by carrier, an immediately prior or immediately subsequent movement by air or rail; and (c) Such further specific conditions as the Commission in the future may find it necessary to impose in order to restrict carrier's operation to service which is auxiliary to, or supplemental of, air or railway express service. Applicant is authorized to conduct operations throughout the United States.

No. MC 66562 Sub 1258, filed November 10, 1955, (Amended) published November 23, 1955, page 8653, RAILWAY EXPRESS AGENCY, INCORPORATED, 219 East 42nd Street, New York 17, N. Y. Applicant's attorney: William H. Marx, same address as applicant. For authority to operate as a *common carrier*, transporting: *General commodities*, including *Class A and B explosives*, moving in express service, serving Evans City, Pa., as an intermediate point, and Mars, Pa., as an off-route point in connection with applicant's regular route operations between Pittsburgh, Pa., and Butler, Pa. RESTRICTION: (a) The service to be performed by carrier shall be limited to service which is auxiliary to, or supplemental of, air or railway express service; (b) Shipments transported by carrier shall be limited to those moving on a through bill of lading or express receipt covering in addition to the motor carrier movement by carrier, an immediately prior or immediately subsequent movement by air or rail; and (c) Such further specific conditions as the Commission in the future may find it necessary to impose in order to restrict carrier's operation to service which is auxiliary to, or supplemental of, air or railway express service. Applicant is authorized to conduct operations throughout the United States.

NO. MC 68078 Sub 15, filed November 7, 1955, published in the November 23, 1955 issue, on Page 8653, amended November 28, 1955, CENTRAL MOTOR EXPRESS, INC., 2909 South Hickory Street, P. O. Box 1968, Chattanooga, Tenn. Applicant's attorney: E. Blaine Buchanan, 1024 James Building, Chattanooga 2, Tenn. For authority to operate as a *common carrier*, over regular routes, transporting: *General commodities*, except those of unusual value, Class A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, (1) between Cleveland, Tenn., and Knoxville, Tenn., from Cleveland over U. S. Highway 64 to junction U. S. Highway 411, thence over U. S. Highway 411 to Maryville, Tenn., thence over Tennessee Highway 73 to Knoxville, and return over the same route, restricted against freight originating at Knoxville, Tenn., and destined to Maryville, Tenn., or intermediate points between Knoxville and Maryville and against freight originating at Maryville, Tenn., and intermediate points between Maryville and Knoxville, Tenn., to Knoxville, (2) between Athens, Tenn., and Etowah, Tenn., from Athens over Tennessee Highway 30 to Etowah, and return over the same route, (3) between Athens, Tenn., and Englewood, Tenn., from Athens over Tennessee Highway 39 to Englewood, and return over the same route, (4) between Sweetwater, Tenn., and Tellico Plains, Tenn., from Sweetwater over Tennessee Highway 68 to Tellico Plains, and return over the same route, (5) between junction U. S. Highways 129 and 411 about six miles southward of Maryville, Tenn., and the Tennessee-North Carolina State line, from junction U. S. Highways 129 and 411 over U. S. Highway 129 to the Tennessee-North Carolina State line, and return over the same route, (6) between McGhee, Tenn., and junction Tennessee Highway 72 and U. S. Highway 129, from McGhee over Tennessee Highway 72 to junction U. S. Highway 129, and return over the same route, and (7) between junction U. S. Highways 64 and 411 at or near Ocoee, Tenn., and Tennga, Ga., from junction U. S. Highways 64 and 411 at or near Ocoee, Tenn., southward over U. S. Highway 411 to Tennga, Ga., and return over the same route. Serving all intermediate points on the above-specified routes, except Benton, Tenn., on Route (1). Applicant is authorized to conduct operations in Alabama, Georgia, and Tennessee.

NOTE: Applicant states it proposes to tack the foregoing described routes to its present authority.

No. MC 87689 Sub 4, filed December 2, 1955, INTER-CITY TRUCK LINES, LIMITED, 123 Duchess Street, Toronto, Ontario, Canada. Applicant's representative: Floyd B. Piper, Franklin Street at Mohawk, Buffalo 2, N. Y. For authority to operate as a *common carrier*, over irregular routes, transporting: *General commodities*, except those of unusual value, Class A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, between Buffalo, N. Y., on the one hand, and, on the other, the port of entry on the International Boundary line between the United States and Canada at or near Buffalo. Applicant is authorized to conduct operations in Michigan and New York, over regular and irregular routes.

NOTE: Applicant is authorized to conduct the above-described operation, restricted to the transportation of shipments originating at or destined to points in Canada. Applicant states that the purpose of this application is to remove the restriction.

No. MC 105940 Sub 2 filed December 1, 1955, SAFEWAY TRUCKING CORPORATION, 84 Randolph Place, West Orange, N. J. Applicant's representative: Edward F. Bowes, 1060 Broad Street, Newark, N. J. SECURITIES AND EXCHANGE COMMISSION

[File No. 7–1771]

REYNOLDS METALS CO.

NOTICE OF APPLICATION FOR UNLISTED TRADING PRIVILEGES, AND OF OPPORTUNITY FOR HEARING

DECEMBER 8, 1955.

In the matter of application by the Boston Stock Exchange for unlisted trading privileges in Reynolds Metals Company, Common Stock, $1 Par Value.

The above named stock exchange, pursuant to section 12 (f) (2) of the Securities Exchange Act of 1934 and Rule X-12F–1 promulgated thereunder, has made application for unlisted trading privileges in the specified security, which is listed and registered on the New York Stock Exchange.

Upon receipt of a request, on or before December 23, 1955, from any interested person, the Commission will determine whether to set the matter down for hearing. Such request should state briefly the nature of the interest of the person making the request and the position he proposes to take at the hearing. In addition, any interested person may submit his views or any additional facts bearing on this application by means of a letter addressed to the Secretary of the Securities and Exchange Commission, Washington 25, D. C. If no one requests a hearing on this matter, this application will be determined by order of the Commission on the basis of the facts stated in the application and other information contained in the official file of the Commission pertaining to the matter.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 31–632]

CHESAPEAKE INDUSTRIES, INC.

NOTICE OF FILING FOR EXEMPTION

DECEMBER 8, 1955.

Notice is hereby given that Chesapeake Industries, Inc. ("Chesapeake"), a holding company, has filed with this Commission an application pursuant to section 3 (a) (1) of the Public Utility Holding Company Act of 1935 ("act") requesting an exemption for itself and for every subsidiary company thereof, as such, from the provisions of said act. Chesapeake, an Ohio corporation, has a number of subsidiary companies only one of which, The Portsmouth Gas Company ("Portsmouth"), is a public-utility company organized in Ohio. It is stated that Portsmouth is engaged solely in the distribution of natural gas at retail to approximately 11,600 consumers in the City of Portsmouth and adjacent territory and that the company is not now and never has been engaged in the purchase, transportation or sale of manufactured or natural gas outside the State of Ohio or the delivery of manufactured or natural gas at state lines. It is further stated that Portsmouth is subject to the jurisdiction of the Ohio Public Utilities Commission. Other than common stock, all of which is owned by Chesapeake, the only outstanding securities of Portsmouth are $372,000 principal amount of first mortgage 4 percent bonds. All of such bonds are held by John Hancock Life Insurance Company and, according to the application, will be purchased by Chesapeake in the event the requested exemption is granted.

It is requested that the Commission's order herein become effective upon issuance.

Notice is further given that any interested person may, not later than December 21, 1955, at 5:30 p. m., request the Commission in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law, if any, raised by said application which he desires to controvert, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D. C. At any time after said date, said application, as filed or as amended, may be granted or the Commission may take such other action as it may deem appropriate.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 70–3433]

ROBERT R. YOUNG AND ARTHUR S. KLEEMAN

NOTICE OF FILING REGARDING INDIRECT ACQUISITION OF SECURITIES OF PUBLIC-UTILITY COMPANY

DECEMBER 8, 1955.

Notice is hereby given that an application has been filed with this Commission pursuant to sections 9 (a) (2) and 10 of the Public Utility Holding Company Act of 1935 ("act") by Robert R. Young on behalf of himself and related persons and Arthur S. Kleeman on behalf of himself and related persons requesting approval of the indirect acquisition of securities of The Portsmouth Gas Company ("Portsmouth"), a public-utility company organized and doing business in Ohio.

Chesapeake Industries Inc. ("Chesapeake"), an Ohio corporation, presently has pending before the Commission an application requesting an exemption from the provisions of the act for itself and every subsidiary company thereof. (See Commission File No. 31–632.) Chesapeake has purchased all of the issued and outstanding common stock (40,000 shares) of Portsmouth under a purchase agreement dated November 1, 1955, and, in the event said exemption request is granted, intends to purchase from the John Hancock Life Insurance Company all of the other outstanding securities of Portsmouth consisting of $372,000 principal amount of first mortgage 4 percent bonds. Under the purchase agreement Chesapeake agrees to pay $2,500,000 for the common stock; such amount to be paid in installments of $700,000 on December 23, 1955, and $600,000 on November 1, 1956, 1957 and 1958 with interest at 4½ percent per annum from November 1, 1955. Chesapeake has outstanding 3,125,672 shares of voting stock consisting of 3,058,264 shares of common stock and 67,408 shares of preferred stock.

It is stated that applicants and related persons own the following shares of voting stock of Chesapeake:

Name	Common stock	Preferred stock
Robert R. Young	405,439	9,602
Anita O'K. Young (wife)	194,354	5,000
Kenneth N. Young (brother)	8,280	75
Arthur S. Kleeman	5	1
Elizabeth M. Kleeman (daughter)	44	-------
Francis A. Kleeman (daughter)	44	-------
Richard P. Kleeman (son)	22	-------
Pentson Corporation (Applicant Kleeman and wife are officers and sole stockholders)	213,178	3,970

It is further stated that none of the above-named persons is an affiliate of any public-utility holding company or public-utility company other than Chesapeake and Portsmouth, respectively. It is requested that the Commission's order herein become effective forthwith upon issuance.

Notice is further given that any interested person may, not later than December 21, 1955, at 5:30 p. m., request the Commission in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law, if any, raised by said application, which he desires to controvert, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D. C. At any time after said date said application, as filed or as it may be amended, may be granted as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may grant exemption from its rules as provided in Rules U-20 (a) and U-100, or take such other action as it may deem appropriate.

By the Commission.

[File No. 70–3429]

WHEELING ELECTRIC CO.

NOTICE OF FILING REGARDING ISSUANCE AND SALE OF PRINCIPAL AMOUNT OF NOTES TO BANKS

DECEMBER 8, 1955.

Notice is hereby given that Wheeling Electric Company ("Wheeling"), a public utility subsidiary of American Gas and Electric Company, a registered holding company, has filed a declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("act"). Declarant has designated sections 6 (a) and 7 of the act, and Rules U-42 (b) (2) and U-50 (a) (2) promulgated thereunder, as applicable to the proposed transactions.

All interested persons are referred to the declaration on file in the offices of the Commission for a statement of the transactions therein proposed, which are summarized as follows:

Wheeling proposes, pursuant to a bank loan agreement dated as of December 1, 1955, to borrow from the following banks, from time to time prior to December 31, 1956, not in excess of the amounts set forth below:

Mellon National Bank and Trust Co., Pittsburgh, Pa.	$3,000,000
Bankers Trust Co., New York, N. Y.	1,000,000
The First National City Bank of New York	1,000,000
Guaranty Trust Co. of New York	1,000,000
Manufacturers Trust Co., New York, N. Y.	1,000,000
Total	7,000,000

Each borrowing will be evidenced by a promissory note maturing December 1, 1965, with the interest rate being the prime commercial loan rate of the particular bank in effect from time to time plus ¼ of 1 percent: *Provided, however*, That such interest rate shall at no time exceed 3¾ percent or be less than 2¾ percent per annum. In addition, Wheeling will pay substitute interest at the rate of ¼ of 1 percent per annum on the daily average unused amount of the commitment of each bank for the period from December 1, 1955, through December 31, 1956.

The proposed bank loan notes may be prepaid at any time without penalty unless the prepayment is made from the proceeds of, or in anticipation of, bank borrowings at a rate of interest equal to or lower than the applicable interest rate on the notes to be prepaid. In such event, with certain exceptions, a prepayment premium shall be payable computed at the rate of ¼ of 1 percent per annum of the amount prepaid, from the date of prepayment to and including December 1, 1965.

Wheeling has outstanding $3,500,000 principal amount of 2⅝ percent notes payable to banks maturing December 31, 1955. The company has other outstanding notes payable to banks totaling $1,500,000 principal amount, issued pursuant to previously authorized bank loan agreements, and states that it may make additional borrowings under such agreements prior to December 31, 1955, in an

UNIVERSITY OF MICHIGAN

aggregate amount of $500,000. The declaration states that the proceeds from the initial borrowings under the authorization presently requested will be used to prepay all notes then outstanding, and that the remainder of the proceeds from the proposed bank borrowings will be used to pay in part for the construction of additional facilities, the cost of which is estimated at $2,900,000 for the last half of 1955 and for the year 1956.

The bank loan agreement will provide, among other things, that Wheeling will not create or permit any mortgage on its property or incur any indebtedness for borrowed money if the total principal amount of all indebtedness shall exceed the lesser of (a) 62½ percent of the company's capitalization, or (b) $12,000,000. The agreement will also provide that the company after specified notice may terminate or from time to time reduce the commitments of the banks.

The Public Utilities Commission of Ohio (in which State a portion of Wheeling's operations is conducted) has authorized the issuance and delivery of the proposed notes payable to banks in an aggregate maximum amount of $7,000,000. The declaration states that Wheeling believes that no other State commission, and no Federal commission other than this Commission, has jurisdiction over the proposed transactions.

Notice is further given that any interested person may, not later than December 23, 1955, at 5:30 p. m., e. s. t., request in writing that a hearing be held in respect of said declaration, stating the nature of his interest, the reason for such request, and the issues of fact or law raised by the declaration which he proposes to controvert, or he may request that he be notified if the Commission orders a hearing thereon. Any such request should bear the caption of this notice and should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D. C. At any time after said date, the declaration as filed or as it may hereafter be amended, may be permitted to become effective pursuant to Rule U-23 of the rules and regulations promulgated under the act, or the transactions therein proposed may be exempted as provided by Rules U-20 (a) and U-100 thereof.

By the Commission.

[File No. 70-3423]

NORTH SHORE GAS CO. AND NEW ENGLAND ELECTRIC SYSTEM

SUPPLEMENTAL ORDER WITH RESPECT TO ISSUANCE AND SALE OF BONDS

DECEMBER 8, 1955.

By order issued herein on November 23, 1955, pursuant to section 6 (b) of the Public Utility Holding Company Act of 1935 ("act") and Rule U-50 thereunder, the Commission authorized the issuance and sale by North Shore Gas Company ("North Shore"), a subsidiary of New England Electric System, a registered holding company, of $2,500,000 principal amount of Series B bonds, to be dated as of December 1, 1955, and to mature December 1, 1975. Said bonds were to be sold pursuant to competitive bidding, were to bear an interest rate not in excess of 4 percent, and were to be sold at a price not less than 100 percent nor more than 102¾ percent of the principal amount (excluding accrued interest).

North Shore has filed an amendment to its application stating that it offered said bonds at competitive bidding and that, although two bidding groups qualified, only one bid was received when the time for the submission of bids expired on December 7, 1955, as follows:

Bidder	Interest rate	Price [1]	Cost of money	Offering price to public
	Percent	*Percent*	*Percent*	*Percent*
Halsey Stuart & Co..	4	100.02	3.9985	101.875

[1] Excluding accrued interest from December 1, 1955.

North Shore further states that it has accepted the aforesaid bid and requests the Commission to grant its application as further amended to reflect the results of the bidding.

The Commission having examined the application as further amended and finding that the applicable standards of the act and the rules thereunder are satisfied and that no terms and conditions need be imposed other than those contained in Rule U-24:

It is ordered, That the application as further amended be, and it hereby is, granted forthwith, subject to the terms and conditions of Rule U-24.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

(Sec. 6, 38 Stat. 721; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 45) [Cease and desist order, Atlantic Sponge and Chamois Corporation et al., New York, N. Y., Docket 6162, November 29, 1955]

In the Matter of Atlantic Sponge and Chamois Corporation, a Corporation, and Benjamin E. Bloch and Ida Bloch, Individually

This proceeding was heard by John Lewis, hearing examiner, upon the complaint of the Commission which charged respondent sellers of leather products with labeling and branding as "Chamois", "Supreme Oil Tanned Chamois", and "Atlantic Oil Tanned Chamois" certain products which, while having the same general appearance, did not possess the softness, pliability, quick moisture absorption and moisture release and other desirable qualities possessed by genuine chamois; with making similar false statements on letterheads, postal cards, and other advertising media; and with falsely representing that they operated their own tannery.

Following respondents' answer and hearings, the hearing examiner made his initial decision, including findings, conclusions, and order to cease and desist, from which respondents appealed. The Commission, in a written opinion, denied the appeal and disposed of the matter by "Final Order" dated November 29, 1955, as follows:

This matter having been heard by the Commission upon the appeal of respondents, Atlantic Sponge and Chamois Corporation and Benjamin E. Bloch, from the hearing examiner's initial decision, and briefs and oral argument of counsel in support thereof and in opposition thereto; and

The Commission having rendered its decision denying the appeal and adopting the findings, conclusions, and order contained in the initial decision:

It is ordered, That respondents, Atlantic Sponge and Chamois Corporation and Benjamin E. Bloch, shall, within sixty (60) days after service upon them of this order file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with the order contained in said initial decision.

The order in the initial decision, thus adopted, is as follows:

It is ordered, That respondent Atlantic Sponge and Chamois Corporation, a corporation, and its officers, and respondent Benjamin E. Bloch, individually, and said respondents' representatives, agents and employees, directly or through any corporate or other device, in connection with the offering for sale, sale or distribution of leather products, do forthwith cease and desist from branding or labeling such products as "Chamois," or in any other manner representing that such products are "Chamois" or are made from "Chamois" unless such products are made (1) from the skin of the Alpine Antelope, commonly known and referred to as Chamois, or (2) from the fleshers or undersplits of sheepskin which have been tanned in oil after splitting.

It is further ordered, That the allegations of the complaint alleging that respondents have violated the Federal Trade Commission Act by representing that they own or operate a tannery be, and the same hereby are, dismissed without prejudice.

It is further ordered, That the complaint be, and the same hereby is, dis-

Chapter I—Agricultural Marketing Service (Standards, Inspections, Marketing Practices), Department of Agriculture

PART 27—COTTON CLASSIFICATION UNDER COTTON FUTURES LEGISLATION

MICRONAIRE STANDARDS AND REGULATIONS

On September 28, 1955, a notice of rule making was published in the FEDERAL REGISTER (20 F. R. 7217) regarding the proposed promulgation of new standards for fiber fineness and maturity (Micronaire determination) of American upland cotton and proposed amendments of the regulations relating to cotton classification (7 CFR Part 27, Subpart A. as amended), for the purposes of the cotton futures legislation contained in the Internal Revenue Code of 1954, pursuant to sections 4854 and 4863 of said Code (68A Stat. 580 and 582, 26 U. S. C. 1952, ed., Supp. II, 4854 and 4863).

After consideration of all relevant matters presented pursuant to the notice, it is hereby ordered as follows:

A. Pursuant to said section 4863, said regulations are amended as follows:

1. Section 27.2 is amended by inserting new paragraphs (j), (k), (l), and (m) to read:

(j) *Classification.* The determination of the grade and staple length of cotton by a cotton examiner.

(k) *Micronaire determination.* The measure of the fiber fineness and maturity of cotton, in combination, as determined by an authorized employee of the Department of Agriculture using the Micronaire instrument.

(l) *Service.* The Agricultural Marketing Service of the Department of Agriculture.

(m) *Cotton Division.* The Cotton Division of the Service.

2. The first sentence in § 27.3 is amended to read "The inspection, sampling, classification, and Micronaire determination of cotton pursuant to section 4863 of the act shall be performed as prescribed in this subpart."

3. Section 27.9 is amended to read:

§ 27.9 *Boards of cotton examiners; Appeal Board; Micronaire examiners.* Boards of cotton examiners shall be maintained at points designated for the purpose by the Administrator. The members of such boards and the chairman of each such board shall be designated by the Administrator. The Appeal Board of Review Examiners established at Memphis, Tennessee, and committees of such board authorized to serve at other points shall review the classification of any cotton in accordance with §§ 27.61 to 27.72. A Board of Supervising Cotton Examiners shall perform duties as assigned. Authorized employees of the Cotton Division shall make Micronaire determinations when such service is requested in accordance with this subpart.

4. Section 27.13 is amended to read:

§ 27.13 *Form of classification and incidental Micronaire determination requests.* Each classification request shall include (a) the lot number of the cotton involved; (b) the warehouse bale number for each sample; (c) the number of bales to be classified; (d) the location of the cotton; (e) the name of the owner of the cotton for whose account the classification is requested; and (f) such other information as may be required by the Administrator or the chairman of a board of cotton examiners. The classification request may also include a request for a Micronaire determination. The form in which such information shall be furnished may be prescribed by the Administrator or the chairman of the board of cotton examiners. The classification request shall be signed by the owner, or in his behalf by his agent. Such agent may, if authorized for the purpose, be the inspector in charge of the exchange inspection agency by or under the direction of which the cotton is inspected and sampled.

5. Section 27.14 is amended to read:

§ 27.14 *Filing of classification and Micronaire determination requests.* Requests for classification shall be filed with the chairman of the board of cotton examiners through the exchange inspection agency at the point where the cotton is sampled and shall be transmitted to the chairman by the exchange inspection agency in accordance with procedures approved by the Administrator or his representative. If there is no board of cotton examiners at the point where the cotton is sampled, requests shall be filed through a supervisor of cotton inspection or the exchange inspection agency at such point, or at some other place designated in particular cases by the Administrator. Requests for classification shall be filed within 30 days after sampling and before classification of the samples. The applicant may file a request for Micronaire determination as part of the request for classification or may file a request for such determination, in a form prescribed by the Service within 7 business days following the date of the first certification of the cotton involved, provided this service has not been previously performed on such cotton, and the request is made prior to delivery of the cotton on a section 4863 contract. Moreover, requests for Micronaire determinations for cotton classified, as tenderable, prior to January 15, 1956, may be filed with said chairman not later than January 31, 1956, in such form as the Service shall prescribe. Requests for Micronaire determinations may also be filed as provided in §§ 27.62 and 27.63.

6. Section 27.15 is amended to read:

§ 27.15 *Withdrawal or rejection of classification or Micronaire determination requests.* Any request for classification or for Micronaire determination may be withdrawn by the applicant at any time before the classification or Micronaire determination of the cotton covered thereby, subject to the payment of such fees, if any, as may be prescribed under §§ 27.80 to 27.92. Any request for classification or for Micronaire determination may be rejected for noncompliance with the act or this subpart.

7. The undesignated center head immediately preceding § 27.31 is amended to read "Classification and Micronaire Determinations."

8. Section 27.31 is amended to read:

§ 27.31 *Classification of cotton and Micronaire determinations; by whom made.* For the purposes of section 4863 of the act the classification of any cotton shall be determined only by cotton examiners designated as such by the Administrator. Official Micronaire determinations, when requested, shall be made only by authorized employees of the Cotton Division.

9. Section 27.36 is amended to read:

§ 27.36 *Classification and Micronaire determinations based on official standards.* All cotton shall be classified for grade and staple length on the basis of the official cotton standards of the United States for grade and staple length in effect at the time of such classification. Micronaire determinations for cotton, upon request under § 27.14, § 27.62, or § 27.63 shall be made according to the official cotton standards of the United States for fiber fineness and maturity in effect at the time of such determinations.

10. Section 27.39 is amended to read:

§ 27.39 *Issuance of certificates.* As soon as practicable after the classification of cotton has been completed by a board of cotton examiners the board shall issue a cotton class certificate showing the results of such classification. Each certificate shall bear the date of its issuance and the name of the chairman or acting chairman of the board that classified the cotton. The certificate shall show the identification of the cotton according to the information in the possession of the board, the classification of the cotton according to its grade and length of staple and such other facts as the Administrator may require. As soon as practicable after the Micronaire determination of cotton has been completed by an authorized employee of the Cotton Division, upon request under this subpart, the results of such determination will be certified by the board of cotton examiners or by the Appeal Board of Review Examiners on the classification certificate for the cotton, with the date of the Micronaire determination, the name of the certifying officer, and such other facts as the Administrator may require. The certificate of classification and Micronaire determination may be placed directly upon the warehouse receipt covering the cotton involved. The board of cotton examiners or the Appeal Board of Review Examiners may authorize an officer of the Service located at another point to certify the results of any classification or Micronaire determination upon the basis of information furnished by such board.

notwithstanding any other provisions of this section.

11. Section 27.40 is amended to read:

§ 27.40 *New certificates; conditions of issuance.* For the business convenience of a holder of a cotton class certificate issued under this subpart a new certificate may be issued at the request of the holder, to take the place of the former certificate without the reclassification of the cotton and without a new Micronaire determination for the cotton. In any case where a new certificate is issued in accordance with this section, the former certificate shall be surrendered for cancellation, and such new certificate shall bear a new number, the date of its issuance, and the date of original certification, and shall otherwise comply with this subpart.

12. Section 27.41 is amended to read:

§ 27.41 *Lost certificate; duplicate.* Upon the written request of the last holder of a valid cotton class certificate and a showing to the satisfaction of the chairman of the board of cotton examiners which issued such certificate, that it has been lost or destroyed, and, if lost, that diligent effort has been made to find it without success, a new certificate shall be issued without the reclassification of the cotton and without a new Micronaire determination for the cotton. Such new certificate shall bear the same number and date of issuance as the lost or destroyed certificate, and shall include a statement to the effect that it is a duplicate issued in lieu of the lost or destroyed original, as the case may be.

13. The undesignated center head immediately preceding § 27.61 is amended to read "Classification Reviews and Micronaire Determinations."

14. Section 27.61 is amended to read:

§ 27.61 *One review of classification.* One review only of the classification of the cotton covered by any cotton class certificate may be obtained as provided in §§ 27.62 to 27.72, such review to be performed by the Appeal Board of Review Examiners. Micronaire determinations are not subject to review.

15. Section 27.62 is amended to read:

§ 27.62 *Conditions for review of classification and for incidental Micronaire determination for original applicant.* The person for whom the classification of cotton covered by any certificate shall have been performed under this subpart may have a review of such classification by filing a written application therefor before the delivery of such cotton on a section 4863 contract and not later than the expiration of the seventh business day following the date of the first certification of the cotton involved. Such written application may include a request for Micronaire determination of the cotton if this service has not been previously performed.

16. Section 27.63 is amended to read:

§ 27.63 *Conditions for review of classification and for Micronaire determination for receiver.* Any receiver of cotton upon a section 4863 contract who has not re-delivered such cotton on a section 4863 contract may have a review of the classification of any cotton of which the classification has not been previously reviewed, by filing a written application within 7 business days following the date of the delivery of cotton class certificates to him in accordance with this subpart. When more than 5,000 bales of cotton shall have been delivered to the same receiver on the same date of delivery, he may, upon proper showing of the facts, be allowed 5 additional business days for filing his application for the review of the classification of any such cotton, provided written request for such extension is filed within 7 business days following the date of such delivery. In the event of the reissue of certificates to replace any certificates delivered to him, the receiver may have a review of the classification of the cotton covered by such reissued certificates, provided such review is requested within the time herein prescribed, calculated from the date of delivery of such reissued certificates. Any such receiver may also have a Micronaire determination, with or without review of classification, under these same conditions on cotton on which this service has not been previously performed under this subpart.

17. Section 27.64 is amended to read:

§ 27.64 *Application for review of classification and for Micronaire determination; filing.* (a) Every application for review of classification or for Micronaire determination under § 27.62 or § 27.63 shall be filed with the board of cotton examiners or in the absence of a board, with the supervisor of inspection at the point where the cotton was or may be delivered in settlement of a contract under the act and this subpart. The application shall in each case be in the hands of such board or supervisor within the time specified in § 27.62 or § 27.63 for applying for review: *Provided,* That any board of cotton examiners may designate any officer of the Service located at another point to receive applications, and in such cases the applications shall be in the hands of the officer so designated within the time so specified. A copy of each such application shall be mailed by the person receiving it under this section to the other party in interest. Any person making such application shall, upon call of the person with whom such application was filed under this section, surrender the cotton class certificate or certificates covering the cotton involved.

(b) Such applications shall be made on a form furnished or approved by the Service and shall contain (1) the name and address of the party, if any, from whom the cotton was received on a section 4863 contract; (2) the lot numbers of the cotton; and (3) the warehouse bale numbers.

18. Section 27.65 is amended to read:

§ 27.65 *Completion of review of classification.* In any case where an application for review of classification or an application for Micronaire determination has been filed with respect to cotton previously designated as tenderable, such review or determination may be completed notwithstanding the subsequent tender of such cotton on a section 4863 contract.

19. Section 27.67 is amended to read:

§ 27.67 *Use of new samples in reviews and Micronaire determinations.* Unless the use of new samples shall be necessary in the judgment of the chairman of the board of cotton examiners, a review classification pursuant to §§ 27.61 to 27.72, or a Micronaire determination pursuant to § 27.14, § 27.62, or § 27.63, shall be made by reference to the samples, if any, of the cotton involved in the possession of the board; but if the use of new samples is deemed necessary by the chairman of said board, or if there are no samples of the cotton in the possession of the board, or if the samples of the cotton have been in the possession of the board for more than one year, the person requesting the review classification or Micronaire determination shall cause new samples to be drawn for the purpose and submitted to the board in accordance with this subpart.

20. Section 27.76 is amended to read:

§ 27.76 *Transfer certificate; form.* Thereupon there shall be issued to the person requesting the same a transfer certificate in a form prescribed for the purpose by the Administrator, properly identifying the cotton according to such tags or seals, and the other means of identification in the possession of the Service, and showing the respective locations from which and to which the cotton is to be transferred, the classification of the cotton as previously determined, whether or not such classification has been reviewed, and the Micronaire reading (if any) of the cotton as previously determined.

21. Section 27.77 is amended to read:

§ 27.77 *New certificate without reclassification or new Micronaire determination.* When the cotton has been delivered for storage at the place of its destination and the transfer certificate has been surrendered to an authorized representative of the Service, each bale covered by such transfer certificate shall be examined and if it is found that the identity of the bales represented by the transfer certificate has been properly preserved, a cotton class certificate shall be issued for each bale so identified, valid for use at such destination without the reclassification of the cotton or a new Micronaire determination with respect to the cotton.

22. Section 27.79 is amended to read:

§ 27.79 *Supervision of transfers; transfer certificates; conditions.* Supervision of transfers in accordance with this subpart shall not be granted, nor shall any transfer certificate be issued, with respect to any bale which appears to be in such condition that its grade or staple length or fiber fineness and maturity is different from that shown by the cotton class certificate, until such bale has been reclassified and, if a Micronaire determination is shown on such certificate, until a new Micronaire determination has been made for the bale in accordance with this subpart.

23. Section 27.80 is amended to read:

§ 27.80 *Fees.* For the classification and certification of cotton pursuant to this subpart, except as otherwise hereinafter provided, whether such cotton be tenderable or not, the person requesting the classification shall pay a fee of 25 cents per bale. For Micronaire determination and certification, the person requesting the determination shall pay a fee of 10 cents per bale if (a) the request for Micronaire determination is filed at the same time as the request for the first classification of the cotton and covers all bales in the lot of cotton; or (b) the request for Micronaire determination is filed at the same time as a request for review of classification and covers all bales for which a review of classification is requested, exclusive of any bales on which a Micronaire determination has been made previously. Under all other conditions the fee for Micronaire determination and certification shall be 25 cents per bale.

24. Section 27.84 is amended to read:

§ 27.84 *Fees; supervision of transfer of cotton.* For the supervision of the transfer of cotton in accordance with §§ 27.73 to 27.79, including such new certificates incidental thereto as may be necessary for the delivery of such cotton upon a section 4863 contract without its reclassification or a new Micronaire determination, the applicant shall pay a fee of 30 cents per bale.

25. Section 27.85 is amended to read:

§ 27.85 *Fees; withdrawn requests or applications.* When the request for classification, of any cotton or the request for Micronaire determination for any cotton shall be withdrawn after the service requested has been started pursuant to such request or application, the person making such request or application shall pay the fee prescribed by § 27.80 or § 27.82 as to any service completed prior to such withdrawal.

26. Section 27.87 is amended to read:

§ 27.87 *Fees; classification and Micronaire determination information.* Whenever the person who requests the classification of, or Micronaire determination for, any cotton, or the person on whose behalf such request is made, also requests the transmission by telegraph or telephone of information concerning such classification or Micronaire determination, the person making the request for such classification or determination shall pay, in addition to the applicable costs prescribed in this subpart, the cost of tolls incurred in such transmission.

27. Section 27.89 is amended to read:

§ 27.89 *Expenses; inspection; sampling.* The expense of inspection and sampling, the preparation of the samples, and the delivery of such samples to the classification room of the board of cotton examiners, or to the place specifically designated for the purpose by the Administrator or by the chairman of such board, shall be borne by the party requesting the classification of the cotton involved. When a review of classification or a Micronaire determination is requested and samples of the cotton involved are not in possession of a board of cotton examiners, the expense of inspection, sampling, preparation of samples, and delivery of the samples to the board of cotton examiners shall be borne by the party requesting the service.

B. Pursuant to section 4854 of the Internal Revenue Code of 1954, as cited above, new standards are promulgated to appear as follows, in 7 CFR, Part 27, Subpart B:

OFFICIAL COTTON STANDARDS OF THE UNITED STATES FOR FIBER FINENESS AND MATURITY

§ 27.210 *Standards for fiber fineness and maturity of American upland cotton.* The official cotton standards of the United States for fiber fineness and maturity of American upland cotton, for the purposes of the cotton futures legislation in the Internal Revenue Code of 1954, shall be the measure of such qualities, in combination, provided by the use of the Micronaire instrument, model 60400 (or other model used by the Department of Agriculture giving the same results) in accordance with the procedure specified in § 27.212 (subject to any changes in such procedure made by amendments of § 27.212 which do not perceptibly affect the results obtained).

§ 27.211 *Terms of designation.* The fiber fineness and maturity of any American upland cotton shall be designated by the scale reading shown on the Micronaire instrument for the specimen of the cotton, as determined under § 27.212, e. g., 4.1, 4.2, 4.3, or 4.4.

§ 27.212 *Procedure for use of Micronaire instrument.* In determining in terms of Micronaire scale units, the fiber fineness and maturity, in combination, of American upland cotton, the following procedure shall apply:

(a) Facilities and equipment shall include:

(1) Laboratory controlled atmospheric conditions of 65 percent relative humidity ±2 and a temperature of 70° F. ±2.

(2) Micronaire instrument used by the Department of Agriculture, complete with accessories, including:

(i) Calibrating pressure manometer or similar device used by the Department of Agriculture.

(ii) Two calibrating orifices (one fine and one coarse).

(iii) Special scale for indicating the float position in the instrument flow tube. (Curvilinear scale for American upland cotton adopted September 1950 by the Department of Agriculture, or its equivalent.)

(iv) A continuous supply of compressed air with a minimum line pressure of 65 pounds per square inch.

(3) Scales suitable for accurately weighing 50.0 grain specimens.

(b) Calibration of the Micronaire instrument shall be performed as described in this paragraph. The instrument, which shall be set up in accordance with the manufacturer's instructions and connected to a continuous supply of compressed air with a minimum line pressure of 65 pounds per square inch, shall be checked each day before being operated, as follows:

(1) The air shall be allowed to flow through the instrument for a period of 5 minutes before calibration.

(2) The regulating valve or valves shall be adjusted to obtain proper pressures in accordance with the manufacturer's instructions.

(3) The calibration screws on the instrument shall be adjusted until the fine and coarse calibration orifices produce readings on the instrument which coinside with the lower and upper calibration lines, respectively, on the scale and at the same time maintain the proper pressure.

(c) An untreated specimen from the sample of cotton shall be tested. The specimen shall be taken from the center of both sides of each sample to be tested. The specimen shall weigh 50.0 grains, except that if the Micronaire testing is conducted under conditions other than those specified in paragraph (a) (1) of this section, the specimen shall be the equivalent in weight to a specimen weighing 50.0 grains under the conditions specified in said paragraph.

(d) Testing of the cotton specimen shall be performed as follows:

(1) The weighed specimen shall be tested in a properly calibrated instrument. (See paragraph (b) of this section on calibration.)

(2) The specimen shall be inserted into the specimen holder of the instrument so that the mass of fibers is well distributed across the area of the specimen holder.

(3) The plunger shall be pushed down on the specimen until the flange of the plunger rests against the shoulder of the specimen holder and remains in contact.

(4) The air shall then be allowed to flow through the specimen in accordance with the method of operation of the instrument.

(5) The scale reading shall be determined at the uppermost edge of the float in the flow tube when the float becomes stable.

§ 27.213 *Applicability of standards for fiber fineness and maturity of American upland cotton.* The standards provided for in § 27.210 for the fiber fineness and maturity of American upland cotton shall be official cotton standards of the United States for purposes of the cotton futures legislation in the Internal Revenue Code of 1954, but not for the purposes of the United States Cotton Standards Act, as amended (7 U. S. C. 51, 52–65).

The foregoing amendments and official cotton standards for fiber fineness and maturity shall become effective January 15, 1956.

(Secs. 4854, 4863, 68A Stat. 580, 582; 26 U. S. C. 4854, 4863)

The foregoing reporting requirements have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Done at Washington, D. C., this 12th day of December 1955.

[SEAL] ROY W. LENNARTSON,
Deputy Administrator,
Agricultural Marketing Service.

[F. R. Doc. 55–10049; Filed, Dec. 14, 1955; 8:45 a. m.]

TITLE 5—ADMINISTRATIVE PERSONNEL

Chapter I—Civil Service Commission

Subchapter B—Civil Service Regulations

PART 6—EXCEPTIONS FROM THE COMPETITIVE SERVICE

PART 21—APPOINTMENT TO POSITIONS EXCEPTED FROM THE COMPETITIVE SERVICE

PART 24—FORMAL EDUCATION REQUIREMENTS FOR APPOINTMENT TO CERTAIN SCIENTIFIC, TECHNICAL, AND PROFESSIONAL POSITIONS

PART 25—FEDERAL EMPLOYEES' PAY REGULATIONS

PART 27—EXCLUSIONS FROM PROVISIONS OF THE FEDERAL EMPLOYEES PAY ACT OF 1945, AS AMENDED, AND THE CLASSIFICATION ACT OF 1949, AS AMENDED, AND ESTABLISHMENT OF MAXIMUM STIPENDS FOR POSITIONS IN GOVERNMENT HOSPITALS FILLED BY STUDENT OR RESIDENT TRAINEES

PART 29—RETIREMENT

Effective upon publication in the FEDERAL REGISTER Parts 6, 21, 24, 25, 27, and 29 are revised and amended to read as follows:

PART 6—EXCEPTIONS FROM THE COMPETITIVE SERVICE

Sec.

6.1 Method of filling excepted positions and status of incumbents.

SCHEDULE A

6.100 Positions other than those of a confidential or policy-determining character for which it is not practicable to examine.
6.101 Entire executive civil service.
6.102 Department of State.
6.103 Treasury Department.
6.104 Department of Defense.
6.105 Department of the Army.
6.106 Department of the Navy.
6.107 Department of the Air Force.
6.108 Department of Justice.
6.109 Post Office Department.
6.110 Department of the Interior.
6.111 Department of Agriculture.
6.112 Department of Commerce.
6.113 Department of Labor.
6.114 Department of Health, Education, and Welfare.
6.116 National Security Council.
6.118 General Accounting Office.
6.119 Board of Governors, Federal Reserve System.
6.121 Office of Defense Mobilization.
6.122 Veterans' Administration.
6.123 Federal Civil Defense Administration.
6.124 United States Information Agency.
6.125 Federal Power Commission.
6.126 Securities and Exchange Commission.
6.128 Small Business Administration.
6.129 Federal Deposit Insurance Corporation.
6.131 National Capital Housing Authority.
6.132 United States Soldiers' Home.
6.133 General Services Administration.
6.134 Federal Communications Commission.
6.135 United States Tariff Commission.
6.136 Railroad Retirement Board.
6.138 National Labor Relations Board.
6.139 Government Printing Office.
6.140 Export-Import Bank of Washington.
6.141 Farm Credit Administration.
6.142 Housing and Home Finance Agency.
6.144 Selective Service System.
6.145 Civil Service Commission.
6.147 National Advisory Committee for Aeronautics.
6.148 Panama Railroad Company, New York.
6.149 Foreign Operations Administration.
6.150 Foreign Claims Settlement Commission of the United States.
6.155 President's Committee on Government Employment Policy.

SCHEDULE B

6.200 Positions other than those of a confidential or policy-determining character for which it is not practicable to hold a competitive examination.
6.202 Department of State.
6.203 Treasury Department.
6.206 Department of the Navy.
6.207 Department of the Air Force.
6.208 Department of Justice.
6.210 Department of the Interior.
6.224 United States Information Agency.
6.225 Federal Power Commission.
6.241 Farm Credit Administration.
6.242 Housing and Home Finance Agency.
6.244 Selective Service System.
6.245 Civil Service Commission.
6.256 District of Columbia Government.

SCHEDULE C

6.300 Positions of a confidential or policy-determining character.
6.302 Department of State.
6.303 Treasury Department.
6.304 Department of Defense.
6.305 Department of the Army.
6.306 Department of the Navy.
6.307 Department of the Air Force.
6.308 Department of Justice.
6.309 Post Office Department.
6.310 Department of the Interior.
6.311 Department of Agriculture.
6.312 Department of Commerce.
6.313 Department of Labor.
6.314 Department of Health, Education, and Welfare.
6.315 Executive Office of the President.
6.317 Interstate Commerce Commission.
6.318 General Accounting Office.
6.320 The Tax Court of the United States.
6.321 Office of Defense Mobilization.
6.322 Veterans' Administration.
6.323 Federal Civil Defense Administration.
6.324 United States Information Agency.
6.325 Federal Power Commission.
6.326 Securities and Exchange Commission.
6.327 National Mediation Board.
6.328 Small Business Administration.
6.330 Federal Trade Commission.
6.333 General Services Administration.
6.334 Federal Communications Commission.
6.335 United States Tariff Commission.
6.336 Railroad Retirement Board.
6.337 Civil Aeronautics Board.
6.338 National Labor Relations Board.
6.340 Export-Import Bank of Washington.
6.341 Farm Credit Administration.
6.342 Housing and Home Finance Agency.
6.343 Indian Claims Commission.
6.346 Federal Mediation and Conciliation Service.
6.349 Foreign Operations Administration.
6.350 Foreign Claims Settlement Commission of the United States.
6.351 Air Coordinating Committee.
6.352 Government Patents Board.
6.353 Subversive Activities Control Board.
6.354 Saint Lawrence Seaway Development Corporation.

AUTHORITY: §§ 6.1 to 6.354 issued under R. S. 1753, sec. 2, 22 Stat. 403, as amended; 5 U. S. C. 631, 633.

§ 6.1 *Method of filling excepted positions and status of incumbents.* (a) The Commission shall decide whether the duties of any particular position are such that it may be filled as an excepted position under Schedule A, B, or C.

(b) To the extent permitted by law and the regulations in this chapter, appointments, position changes, and removals in the excepted service shall be made in accordance with any regulations or practices that the head of the agency concerned finds necessary.

(c) Persons appointed to excepted positions shall not acquire a competitive status by reason of such appointments.

NOTE: See also Part 21 of this chapter, issued pursuant to the Veterans' Preference Act of 1944, as amended, which is applicable to appointments to excepted positions; Part 22 of this chapter which is applicable in cases of discharges, suspensions for more than thirty days, furloughs without pay for thirty days or less, or reduction in rank or compensation of employees entitled to veteran preference; Part 9 of this chapter which is applicable to removals from positions listed in Schedule B of persons who have competitive status; § 2.502 (j) of this chapter under which the Commission may authorize promotions in excepted positions in order to avoid undue hardship or inequity in individual cases of meritorious nature without regard to the restrictions of section 1310 of the Supplemental Appropriation Act, 1952 (Public Law No. 253, 82nd Congress), as amended; Part 10 of this chapter which is applicable to employment with reemployment rights; and Part 20 of this chapter which is applicable to reduction in force.

SCHEDULE A

§ 6.100 *Positions other than those of a confidential or policy-determining character for which it is not practicable to examine.* The positions enumerated in §§ 6.101 to 6.199 are positions other than those of a confidential or policy-determining character for which it is not practicable to examine and which are excepted from the competitive service and constitute Schedule A.

§ 6.101 *Entire executive civil service.* (a) Positions of Chaplain and Chaplain's Assistant.

(b) Cooks, except at fixed locations, such as, hospitals, quarantine stations, and penal institutions.

(c) Positions to which appointments are made by the President without confirmation by the Senate.

(d) Attorneys.

(e) Law clerk-trainee positions. Appointments under this paragraph shall be confined to graduates of recognized law schools or persons having equivalent experience and shall be for periods not to exceed nine months pending admission to the bar. No person shall be given more than one appointment under this paragraph.

(f) Chinese, Japanese, and Hindu interpreters.

(g) Any position in which the appointee will receive compensation aggregating not more than $1,100 a year, the duties of which are part-time or intermittent, but such appointments shall not be for job employment. In Washington, D. C., such appointments shall be subject to the prior approval of the Commission.

(h) Any position in a foreign country, or beyond the continental limits of the United States, when in the opinion of the Commission, appointment through competitive examination is impracticable, except as provided in paragraph (i) of this section, and except: Positions in Alaska, Hawaii, Puerto Rico, and the Virgin Islands; in the Immigration and Naturalization Service, all positions in Canada and Mexico, and continuing positions at GS–7 and above in Cuba; positions in the Bureau of Customs, Treasury Department, in foreign countries; General Accounting Office positions in foreign countries; positions in the International Field Offices of the Civil Aeronautics Administration, Department of Commerce; technical positions in foreign countries in the Internal Revenue Service, Treasury Department; positions in the Departments of Defense, Army, Navy, and Air Force.

NOTE: The provision for positions in the Departments of Defense, Army, Navy, and Air Force, is effective April 1, 1956.

(i) Positions on the Isthmus of Panama, except: Accountant, architect, architectural designer, bookkeeper, calculating machine operator, chemist, clerk (paying more than $175 in United States currency per month), dietitian, draftsman, employee counselor, medical technician, personnel aide, personnel assistant, pharmacist, physician, playground director, statistician, stenographer, storekeeper, surgeon, trained nurse, typist, harbor personnel of the Quartermaster Corps, Department of the Army, air traffic controller and air traffic communicator, Civil Aeronautics Administration, and Veterans' Administration Representative for the Panama Canal Zone with duty stations at Balboa, Canal Zone.

(j) Subject to prior approval by the Commission, positions in Federal mental institutions when filled by persons who have been patients of such institutions and been discharged, and are certified by the medical head thereof as recovered sufficiently to be regularly employed but it is believed desirable and in the interest of the persons and the institution that they be employed at the institution.

(k) Temporary, part-time, or intermittent employments of mechanics, skilled laborers, and tradesmen on construction or repair work in places where there is no local board of examiners of the Civil Service Commission for the employing establishment, when, in the opinion of the Commission, appointment through competitive examination is impracticable. Appointments under this provision shall not extend beyond one year, and the employment thereunder shall not exceed 180 working days within any one period of twelve months. Seasonal employments of a recurring nature are not authorized under this paragraph.

(l) Any position directly concerned with the protection of the life and safety of the President and the members of his family.

(m) Positions without compensation provided such appointments meet the requirements of applicable laws relating to compensation.

(n) Professional, scientific, and technical experts for temporary, part-time or intermittent employment for consultation purposes.

(o) Unskilled laborers at any city, locality or establishment where the Labor Regulations were not in effect on July 1, 1941. The Commission, with the concurrence of the department or agency concerned, may include within the competitive civil service unskilled laborer positions at any such city, locality, or establishment.

(p) Any local physicians, surgeon, or dentist employed under contract or on a part-time or fee basis, when, in the opinion of the Commission, appointment through competitive examination is impracticable.

(q) Positions of a scientific, professional or analytical nature when filled by bona fide members of the faculty of an accredited college or university who have special qualifications for the positions to which appointed. Employments under this provision shall not exceed 130 working days a year.

(r) Positions of a scientific, professional, or analytical nature when filled by bona fide graduate students at accredited colleges or universities provided that the work performed for the agency is to be used by the student as a basis for completing certain academic requirements toward a graduate degree. Employments under this provision may be continued only so long as the foregoing conditions are met, and the total period of such employment shall not exceed one year in any individual case: *Provided*, That such employment may, with the approval of the Commission, be extended for not to exceed an additional year.

(s) Temporary, part-time, or intermittent positions of student assistant when the appointees are to assist scientific, professional, or technical employees. Persons employed under this provision shall be bona fide students at high schools or accredited colleges or universities pursuing courses related to the field in which employed. No person shall be employed under this provision (1) in a position of a routine clerical type; or (2) in excess of 130 working days a year; or (3) at a total compensation exceeding $1,270 during such period of one year.

§ 6.102 *Department of State*—(a) *Office of the Secretary.* (1) Two Physical Science Administration Officers (Science Adviser and Deputy Science Adviser), GS–1301–16, and three Physical Science Administration Officers (Assistant Science Advisers), GS–1301–15.

(2) Six positions of Member of the Executive Secretariat.

(3) Chief, Policy Reports Staff, Executive Secretariat.

(4) Four Assistants to the Director of the Executive Secretariat.

(5) Executive Officer, Executive Secretariat.

(6) Chief, Correspondence Review Staff, Executive Secretariat.

(b) *Office of the Special Assistant, Intelligence.* (1) Not to exceed 50 professional and technical positions.

(2) Two professional positions in the Division of Intelligence Acquisition and Distribution.

(c) *International Boundary and Water Commission, United States and Mexico.* (1) Gage readers employed part-time or intermittently at isolated localities when, in the opinion of the Commission, appointment through competitive examination is impracticable.

(d) *International Boundary Commission, United States, Alaska and Canada.* (1) Temporary and intermittent field employees such as instrumentmen, foremen, recorders, packers, cooks, and axemen, for not to exceed 130 working days or six months within any one calendar year.

(e) *Operations Coordinating Board.* (1) Thirteen regular or permanent members of the staff of the Board, grades GS–14 and GS–15.

(2) One technical position, GS–9, concerned with the maintenance of telecommunication inventories and facilities available to the United States in carrying out the responsibilities assigned to the Board.

(f) *Bureau of Inspection, Security, and Consular Affairs.* (1) Positions of investigator, evaluator, and other security officers, whose incumbents are directly engaged in the performance of security functions or in the supervision of such activities.

(2) Until December 31, 1956, all positions whose incumbents are exclusively and directly engaged in the administration of the Refugee Relief Act of 1953.

(g) *Bureau of Inter-American Affairs.* (1) Executive Director.

(h) *Office of Assistant Secretary for Public Affairs.* (1) Chief, Public Studies Division.

(2) Chief, Public Services Division.

(3) Chief, Historical Division.

(4) One Information Specialist, Public Services Division.

(i) *Bureau of International Organization Affairs.* (1) One Special Assistant to the Assistant Secretary.

§ 6.103 *Treasury Department*—(a) *Bureau of Narcotics.* (1) Fifty positions of Narcotic Agent for undercover work.

(b) *Bureau of Customs.* (1) Positions in foreign countries designated as "interpreter-translator" and "special employees," when filled by appointment of persons who are not citizens of the United States; and positions in foreign countries of messenger and janitor.

(2) The positions of Collector of Customs at Puerto Rico and the Virgin Islands.

(3) Part-time, intermittent or temporary Deputy Collectors and Deputy Collectors in Charge in Alaska at a salary rate not in excess of GS–8, for not to exceed 130 working days a year.

(c) *Coast Guard.* (1) Lamplighters.

(d) *Comptroller of the Currency.* (1) Until December 31, 1955, positions of Chief National Bank Examiner, Assistant Chief National Bank Examiner, District Chief National Bank Examiner, National Bank Examiner, and Assistant National Bank Examiner, whose salaries are paid from assessments against national banks and other financial institutions.

(e) *Reconstruction Finance Corporation.* (1) Until September 30, 1956, Chief, Public Agency Division.

(2) Until September 30, 1956, five Supervisory Loan Examiners (D. C.) and eight Supervisory Field Representatives (Field).

(f) *Office of Production and Defense Lending.* (1) Until September 30, 1956, one Chief, Loan Administration Division; one Chief, Liquidation Division, and one Assistant Controller (Treasurer), Reconstruction Finance Corporation.

(g) *United States Savings Bonds Division.* (1) Positions of State Director and Deputy State Director, and Regional Director and Assistant Regional Director.

§ 6.104 *Department of Defense*—(a) *Office of the Secretary.* (1) Five Special Advisors in the immediate office of the Secretary or Deputy Secretary with responsibility for studies and recommendations in broad program areas. These positions have advisory rather than operating duties, except as operating or administrative responsibility may be exercised in connection with pilot studies.

(2) Positions assigned exclusively to Communications Intelligence Activities.

(3) Positions assigned to or in support of special classified training activities.

(b) *Office of the Assistant Secretary (Supply and Logistics).* (1) Until June 30, 1956, ten Industrial Specialists with responsibility for advisory services or studies concerned with procurement, production, distribution, transportation, storage, communications or cataloging. These positions have advisory rather than operating duties, except as operating or administrative responsibility may be exercised in connection with pilot studies.

(c) *Office of the Assistant Secretary (Properties and Installations).* (1) Until June 30, 1956, five Engineering or Industrial Specialists with responsibility for advisory services or studies concerned with construction, real estate acquisition and disposal, maintenance or real property management. These positions have advisory rather than operating duties, except as operating or administrative responsibility may be exercised in connection with pilot studies.

(d) *Office of the Assistant Secretary (Comptroller).* (1) Until June 30, 1956, five Fiscal Management Specialists with responsibility for advisory services or studies concerned with fiscal, cost or property accounting. These positions have advisory rather than operating duties, except as operating or administrative responsibility may be exercised in connection with pilot studies.

(e) *Office of the Assistant Secretary (Manpower and Personnel).* (1) Until June 30, 1956, three Manpower and Personnel Specialists with responsibility for advisory services or studies concerned with manpower supply and utilization, labor relations or personnel management. These positions have advisory rather than operating duties, except as operating or administrative responsibility may be exercised in connection with pilot studies.

(f) *Office of the Assistant Secretary (International Security Affairs).* (1) Until June 30, 1956, five Foreign Affairs Specialists with responsibility for advisory services or studies concerned with international relations. These positions have advisory rather than operating duties, except as operating or administrative responsibilities may be exercised in connection with pilot studies.

(g) *Office of the Assistant Secretary (Applications Engineering).* (1) Until June 30, 1956, five Engineering Specialists with responsibility for advisory services or studies concerned with evaluation of production programs for weapons and equipment including the design, development, production and field service phases. These positions have advisory rather than operating duties, except as operating or administrative responsibility may be exercised in connection with pilot studies.

(h) *Office of the Assistant Secretary (Research and Development).* (1) Until June 30, 1956, twenty Research and Scientific Specialists with responsibility for advisory services or studies concerned with evaluation and allocation of research and development plans in relation to over-all objectives of the defense effort. These positions have advisory rather than operating duties, except as operating or administrative responsibility may be exercised in connection with pilot studies.

(i) *Weapons Systems Evaluation Group.* (1) Until June 30, 1956, twenty Scientific Warfare Advisors with responsibility for advisory services or studies concerned with analysis and evaluation of present and future weapons systems under probable future combat conditions.

(j) *Office of Legislative Programs.* (1) Until December 31, 1955, one Director of Legislative Programs, GS–301–17.

(2) Until December 31, 1955, two Supervisory Legislative Analysts, GS–301–15.

(3) Until December 31, 1955, two Legislative Analysts, GS–301–13; two Legislative Analysts, GS–301–12; two Legislative Analysts, GS–301–11; and two Legislative Analysts, GS–301–9.

§ 6.105 *Department of the Army*—(a) *General.* (1) Positions the duties of which are of a quasi-military nature and involve the security of secret or confidential matter, when in the opinion of the Commission, appointment through competitive examination is impracticable.

(2) During the emergency declared by the President to exist on May 27, 1941, all positions in the Department of the Army on the Isthmus of Panama.

(3) Unskilled laborers and munitions handlers engaged in handling Ordnance matériel, including ammunition, where temporary or intermittent employment is necessary.

(4) Student occupational therapist positions in Army hospitals. Appointments to these positions will not extend beyond the training period applicable to each individual case, which is a minimum of three months training and a maximum of twelve months training, depending upon the individual's previous clinical training.

(5) Alien scientists employed under the program for utilization of alien scientists approved under pertinent directives administered by the Joint Chiefs of Staff of the Department of Defense.

(6) Positions assigned exclusively to Army Communications Intelligence Activities.

(b) *Transportation Corps.* (1) Longshoremen and stevedores employed at ports of embarkation in the United States; and all positions on vessels operated by the Transportation Corps.

(c) *Engineer Department.* (1) Land appraisers employed on a temporary basis for a period not to exceed one year on special projects where knowledge of local values or conditions or other specialized qualifications not possessed by appraisers regularly employed by the Department are required for successful results.

(d) *U. S. Military Academy, West Point, New York.* (1) Civilian professors, instructors, registrar, teachers (except teachers at the Children's School), hostesses, chapel organist and the choirmaster, librarian when filled by an officer of the Regular Army retired from active service, and military secretary to the Superintendent when filled by a Military Academy graduate retired as a regular commissioned officer for disability.

(e) *Special Services Division.* (1) Until December 31, 1956, positions paid from the appropriation "Welfare of Enlisted Men," which entail responsibility for the direction or supervision of voluntary educational or recreation programs and which, as an integral part of the job, require close working associations with the military personnel for whom such programs are conducted. Positions of librarian, library assistant, recreation leader, and recreation supervisor are included herein.

(f) *National War College, Washington, D. C.* (1) Civilian directors of studies for employment of not to exceed one year: *Provided,* That such employment may, with the prior approval of the Commission, be extended for not to exceed one additional year.

(g) *Joint Brazil-United States Defense Commission.* (1) One position of clerk-stenographer-translator or civilian aide requiring a knowledge of English, Portuguese, and Spanish.

(h) *Army Language School, Presidio of Monterey, California.* (1) Language instructors when the type of instruction requires a period of actual foreign residence to qualify them for the instruction.

(2) Typists of foreign language material whose duties require them to make corrections in grammar and spelling of the material typed.

(i) *Army War College, Carlisle Barracks, Pennsylvania.* (1) One position of Educational Specialist for Employment of not to exceed one year: *Provided,* That such employment may, with the prior approval of the Commission, be extended for not to exceed one additional year.

(j) *Army Signal Corps.* (1) All positions on ocean-going cable barges operated by the Army Signal Corps.

§ 6.106 *Department of the Navy*—(a) *General.* (1) Intelligence and Counter Intelligence positions assigned exclusively to Naval Intelligence Activities.

(2) Alien Scientists employed under the program for utilization of alien scientists approved under pertinent directives administered by the Joint Chiefs of Staff of the Department of Defense.

(3) Student trainees in naval shipyards, whose salaries shall not aggregate more than $1,100 a year. Only bona fide students engaged in the study of naval architecture shall be eligible for appointment under this subparagraph. Employment under this subparagraph shall not exceed 90 working days a year.

(b) *United States Naval Academy*—(1) Professors, instructors, and teachers in the United States Naval Academy, the United States Naval Post-graduate School, and the Naval War College.

(c) *United States Naval Home.* (1) Positions of orderly when filled by the appointment of beneficiaries of the Home.

(d) *Military Sea Transportation Service.* (1) All positions on vessels operated by the Military Sea Transportation Service.

(e) *Naval Research Laboratory, Washington, D. C.* (1) Scientific and professional research associate positions when filled on a temporary or intermittent basis by persons having a doctoral degree in physical science or related fields of study, for research activities of mutual interest to the appointee and the Laboratory. Total employment under this provision may not exceed 10 positions at any one time. Employment under this provision shall not exceed one year in any individual case; provided, that such employment may, with the approval of the Commission, be extended for not to exceed an additional year.

§ 6.107 *Department of the Air Force*—(a) *Office of the Secretary.* (1) Five Special Assistants in the Office of the Secretary of the Air Force. These positions have advisory rather than operating duties except as operating or administrative responsibilities may be exercised in connection with pilot studies.

(b) *Office of the Inspector General.* (1) Until December 31, 1955, in order to provide civilian personnel complementary to military personnel, five Special Agent positions in the Office of the Assistant for Security, Plans and Policy, Deputy Inspector General, the Inspector General; and a total of 100 Special Agent positions in the Directorate of Special Investigations, the United States Air Force Special Investigations School (OSI) and the District Office of the Office of Special Investigations, United States Air Force, in grades GS–11 or above.

(c) *General.* (1) During the emergency declared by the President to exist on May 27, 1941, all positions in the Department of the Air Force on the Isthmus of Panama.

(2) Alien Scientists employed under the program for utilization of alien scientists approved under pertinent directives administered by the Joint Chiefs of Staff of the Department of Defense.

(3) Until December 31, 1956, positions of librarian, recreation leader and recreation supervisor which entail responsibility for the direction or supervision of voluntary educational and recreational programs and which, as an integral part of the job, require close working associations with military personnel for whom such programs are conducted.

(4) One Cadet Hostess at the Air Force Academy in Colorado.

(d) *Lookout Mountain Laboratory, Los Angeles, California.* (1) All positions.

§ 6.108 *Department of Justice*—(a) *General.* (1) Field deputy United States marshals employed on an hourly basis for intermittent service.

(2) Positions of temporary deputy marshals in lieu of bailiff in the United States courts when employed on an intermittent basis.

(3) United States Marshal in the Virgin Islands.

(b) *Immigration and Naturalization Service.* (1) Sixteen positions of District Directors.

(2) Information Officer.

(3) Four positions of Regional Commissioner.

§ 6.109 *Post Office Department*—(a) *General.* (1) Clerks in fourth class post offices.

(2) Substitute rural carriers.

(3) Special delivery messengers in second, third, and fourth class post offices.

(4) Unskilled laborers employed as janitors and cleaners in small postal units in leased quarters at a compensation less than $2,870 per annum.

(5) Fourth class postmasters in the Hawaiian Islands.

(6) One Administrative Assistant to each Regional Office Manager (15 positions).

(7) One Administrative Assistant to the Assistant to the Regional Operations Manager (Dallas Office).

(8) One Administrative Assistant to the Assistant to the Regional Operations Manager (Cincinnati Office).

(9) Clerks employed on a part-time basis in third-class post offices in Alaska.

(b) *Office of the Postmaster General.* (1) Two information specialists.

§ 6.110 *Department of the Interior*—(a) *General.* (1) Temporary, intermittent, or seasonal positions in the field service of the Department of the Interior, when filled by the appointment of persons who are certified as maintaining a permanent and exclusive residence within, or contiguous to, a field activity or district, and as being dependent for livelihood primarily upon employment available within the field activity of the Department.

(2) All positions on Government-owned ships or vessels operated by the Department of the Interior.

(3) Temporary or seasonal caretakers at temporarily closed camps or improved areas to maintain grounds, buildings or other structures and prevent damage or theft of Government property. Such appointments shall not extend beyond 130 working days a year without the prior approval of the Commission.

(4) Temporary, intermittent or seasonal field assistants at GS–7 and below in such areas as forestry, range management, soils, engineering, fishery and wildlife management, and with surveying parties, for not to exceed 130 working days a year, whenever in the opinion of the Commission appointment through competitive examination is impracticable.

(5) Temporary emergency forest and range fire and blister rust control employees in the field service of the Department of the Interior employed for fire prevention or suppression or blister rust control for not to exceed 130 working days a year.

(6) Persons employed in field positions the work of which is financed jointly by the Interior Department and cooperating persons or organizations outside the Federal service.

(7) All positions in the Bureau of Indian Affairs and other positions in the Department of Interior directly and primarily related to the providing of services to Indians when filled by the appointment of Indians who are one-fourth or more Indian blood.

(8) Subject to prior approval of the Commission, temporary, intermittent, or seasonal positions at GS–7 and below in nonprofessional mining activities in Alaska, such as drillers, miners, caterpillar operators and samplers, not to exceed 180 working days a year, when the activity is carried on in a remote or isolated area, there is no Board of U. S. Civil Service Examiners to service the employing establishment, and there is a shortage of available candidates for the positions.

(9) Subject to prior approval of the Commission, temporary part-time, or intermittent employment of mechanics, skilled laborers, equipment operators and tradesmen on construction, repair, or maintenance work for not to exceed 180 working days a year in Alaska, when the activity is carried on in a remote or isolated area, there is no Board of U. S. Civil Service Examiners to service the employing establishment, and there is a shortage of available candidates for the positions.

(10) Seasonal airplane pilots and airplane mechanics in Alaska, not to exceed 180 working days a year.

(b) *Bureau of Indian Affairs.* (1) All positions in the Neopit Lumber Mills on the Menominee Indian Reservation in Wisconsin, until December 31, 1958.

(2) Housekeeper positions at a gross salary not in excess of the entrance rate of grade GS–4 or its equivalent when, because of isolation or lack of quarters, appointment through competitive examination is, in the opinion of the Commission, impracticable.

(3) Subject to prior approval of the Commission, assistants in Alaska native schools (not including teachers and instructors) at a salary rate not in excess of that of GS–4 or its equivalent where the schools are in isolated or remote areas or lack suitable quarters.

(c) *Indian Arts and Crafts Board.* (1) The Executive Director.

(d) *Bonneville Power Administration.* (1) Four Area Managers.

(e) *Office of Territories.* (1) Until December 31, 1955, all positions in the Alaska Railroad.

(f) *National Park Service.* (1) Temporary, intermittent or seasonal park rangers at salaries equivalent to GS–4 or below, in positions such at Naturalist, Historian, and Archeologist, for not to exceed 180 working days a year.

§ 6.111 *Department of Agriculture*—(a) *General.* (1) Agents employed in field positions the work of which is financed jointly by the Department and cooperating persons, organizations, or governmental agencies outside the Federal service.

(2) Any local veterinarian employed on a fee basis or a part-time basis.

(3) Not to exceed 25 professional, scientific, or technical positions in grade GS–7 or higher to be filled on an exchange basis by qualified employees on the rolls of State Governments, colleges, or universities, for a limited period not to exceed one year.

(4) Local Agents, except veterinarians, employed temporarily outside of Washington, in demonstrating in their respective localities the necessity of eradicating contagious or infectious animal diseases.

(5) Temporary, intermittent, part-time or seasonal employment in the field service of the Department of Agriculture at grades or personal service rates not higher than GS–5, or equivalent, as follows:

(i) Field Assistants for subprofessional services.

(ii) Clerical, crafts, protective, and custodial positions at places other than civil service regional headquarters, whenever in the opinion of the Commission appointment through competitive examinations is impracticable.

(iii) Caretakers at temporarily closed camps or improved areas.

(iv) Owner-operators of equipment who are residents in the area of employment.

(v) Field enumerators and supervisors.

(vi) Forest workers at headquarters other than in forest supervisor and regional offices unless employed primarily for fire prevention or suppression activities.

(vii) Allotment checkers of the Commodity Stabilization Service.

(viii) Collectors of the Farmers Home Administration.

Total employment under this subparagraph shall not exceed 180 working days in any period of twelve consecutive months.

(b) *Office of the Secretary.* (1) Special Livestock Loans Committeemen employed for not more than 180 working days a year, to approve and direct the servicing of emergency livestock loans.

(2) Not to exceed four positions at salaries equivalent to GS–13 or higher, for temporary appointment of not to exceed one year, to render advice or to assist in the administration of critical or emergency programs.

(c) *Rural Electrification Administration.* (1) Until June 30, 1960, not to exceed 12 positions, at grades GS–11 or higher, for employment of persons with extensive experience in the commercial or engineering phases of the telephone industry to provide specialized techniques and training in telephony. Appointments under this authority will be made only to positions of a staff, training, or advisory nature as distinguished from regular operating positions. Employment under this provision shall not exceed one year in any individual case; provided that such employment may, with the approval of the Commission, be extended for not to exceed an additional year.

(d) *Forest Service.* (1) Temporary, intermittent, or seasonal positions when filled by the appointment of persons who are certified as maintaining a permanent and exclusive residence within, or contiguous to, a national forest and as being dependent for livelihood primarily upon employment available within the national forest.

(2) Until August 1, 1956, Laborers, Boat Operators, Mechanics, Equipment Operators, and Carpenters in Alaska.

(e) *Commodity Stabilization Service.* (1) Six Area Directors at a salary equivalent to GS–15.

(2) Farmer fieldmen and farmer fieldwomen to interpret and explain and supervise farm programs.

(f) *Farmers Home Administration.* (1) State committeemen to consider, recommend, and advise with respect to the Farmers' Home Administration program.

(2) County committeemen to consider, recommend, and advise with respect to the Farmers' Home Administration program.

(3) Employees appointed for not to exceed one year to engage exclusively in the making and servicing of the following three types of emergency loans (pursuant to section 2 (a), (b), and (c) of Public Law 38, 81st Congress, as amended by Public Law 115, 83d Congress): (i) Production disaster loans required as a result of floods, freezes, storms, or other natural calamities, (ii) economic disaster loans, and, (iii) special livestock loans: *Provided*, That an appointment may, with the prior approval of the Commission, be extended for additional periods of not to exceed one year each.

(4) State Directors and not to exceed three positions of State Director-at-Large.

(g) *Agricultural Stabilization and Conservation Committees.* (1) State Administrative Officer.

(2) Members of State Committees.

(h) *Agricultural Marketing Service.* (1) Milk Market Administrators.

(2) All positions on the staffs of Milk Market Administrators.

§ 6.112 *Department of Commerce*—(a) *General.* (1) Caretakers and light attendants employed on emergency fields and other air navigation facilities, who are paid on a fee basis.

(2) Agents to take and transmit meteorological observations in connection with airways whose duties require only part of their time, and whose compensation does not exceed $190 a month; for such employment in isolated locations in Alaska the compensation may not exceed $210 a month.

(3) Employment of individuals, firms or corporations for not to exceed one year for special statistical studies and statistical compilations, other than Personal Census Records Service, the compensation for which is derived from funds deposited with the United States under the act of May 27, 1935 (49 Stat. 292): *Provided*, That such employments may, with the approval of the Commission, be extended for not to exceed an additional year.

(b) *Office of the Secretary.* (1) The positions of Security Control Officer, Deputy Security Control Officer, and Chief, Personnel Security Division.

(2) One Civil Aviation Specialist.

(c) *Coast and Geodetic Survey.* (1) All civilian positions on vessels operated by the Coast and Geodetic Survey.

(2) Temporary positions required in connection with the surveying operations of the field service of the Coast and Geodetic Survey. Appointment to such positions shall not exceed 8 months in any one calendar year.

(d) *Bureau of the Census.* (1) Supervisors, assistant supervisors and supervisor's clerks and enumerators in the field service for temporary, part-time or intermittent employment for not to exceed one year: *Provided*, That such appointment of supervisor's clerks and enumerators may be extended for additional periods of not to exceed one year each. This subparagraph shall not be authority for employment in full time positions for longer than one year.

(e) *National Bureau of Standards.* (1) Scientific and professional research associate positions when filled on a temporary or intermittent basis by persons having a doctoral degree in physical science or related fields of study, for research activities of mutual interest to the appointee and the Bureau. Total employment under this provision may not exceed 10 positions at any one time. Employment under this provision shall not exceed one year in any individual case; provided, that such employment may, with the approval of the Commission, be extended for not to exceed an additional year.

(f) *Bureau of Public Roads.* (1) Temporary, intermittent, or seasonal employment in the field service of the Bureau of Public Roads at grades not higher than GS–5 for subprofessional engineering aide work on highway surveys and construction projects, for not to exceed 180 working days a year, whenever in the opinion of the Commission appointment through competitive examination is impracticable.

(g) *Business and Defense Services Administration.* (1) Not to exceed 30 positions, at grades GS–13 and higher, to be filled by appointment of persons, qualified as industrial specialists, who possess specialized knowledge and experience in the field of industrial production, industrial operations and related problems, applicable to one or more of the current segments of industry served by the Business and Defense Services Administration. Appointments under this authority may be made for a period not to exceed two years, and may, with prior approval of the Commission, be extended for an additional period of two years.

(h) *Maritime Administration.* (1) Public Information Officer.

(2) One Private Secretary to the Public Information Officer.

(3) Chief, Program Planning Office.

(4) One Private Secretary to the Chief, Program Planning Office.

(5) The positions of Chief Investigator and Security Officer and Deputy Chief Investigator and Security Officer.

(6) The position of Commandant, U. S. Maritime Service and Superintendent, U. S. Merchant Marine Academy.

(7) One Maritime Training Liaison Officer.

(8) Dean of the U. S. Merchant Marine Academy.

(9) All positions on Government owned vessels or those bareboat chartered to the Government and operated by or for the Maritime Administration.

(10) Chief, Office of Ship Construction and Repair.

(11) One Special Assistant to the Administrator (Tanker Adviser).

(12) Two Special Assistants to the Deputy Administrator.

(i) *Federal Maritime Board.* (1) Secretary to the Federal Maritime Board.

(j) *Office of the Assistant Secretary for International Affairs.* (1) Ten positions at GS–13 and above in specialized fields relating to international trade or commerce in the Bureau of Foreign Commerce or in other units under the jurisdiction of the Assistant Secretary for International Affairs. Incumbents shall be assigned to advisory rather than to operating duties, except as operating and administrative responsibility may be required for the conduct of pilot studies or special projects. Employment under this authority will not exceed two years for any individual appointee.

§ 6.113 *Department of Labor*—(a) *Office of the Secretary.* (1) Chairman and two members, Employees' Compensation Appeals Board.

(b) *Bureau of Employment Security.* (1) One Minority Groups Consultant.

(c) *Government Contract Committee.* (1) All positions on the staff of the Government Contract Committee established by Executive Order 10479 of August 13, 1953.

§ 6.114 *Department of Health, Education, and Welfare.* (a) *St. Elizabeths Hospital.* (1) Two Medical Officers (Surgical Resident).

(2) Student medical Interns for temporary or part-time employment.

(b) *Public Health Service.* (1) Special escorts to accompany patients of the Public Health Service in accordance with existing laws and regulations. Employment under this subparagragh shall be only for the period of time necessary for the escort to deliver the patient to his destination and to return.

(2) Positions at Government sanatoria when filled by patients during treatment or convalescence.

(3) All positions in leprosy investigation stations.

(4) Positions concerned with problems in preventive medicine financed or participated in by the Department of Health, Education, and Welfare and a cooperating state, county, municipality, incorporated organization, or an individual in which at least one-half of the expense is contributed by the cooperating agency either in salaries, quarters, materials, equipment, or other necessary elements in the carrying on of the work.

(5) Internes and externes (medical and dental) and student nurses.

(6) Positions of scientific, professional, or technical nature when filled by bona fide students enrolled in academic institutions provided that the work performed in the agency is to be used by the student as a basis for completing certain academic requirements required by an educational institution to qualify for a scientific, professional, or technical field; and provided further that appropriate exclusions of the positions under the authority of Public Law 330, 80th Congress, have been approved by the Civil Service Commission.

(7) Student Dietitians and Resident Physicians at Freedman's Hospital.

(8) Positions directly and primarily related to the providing of services to Indians when filled by the appointment of Indians who are one fourth or more Indian blood.

(c) *Office of Education.* (1) Fifteen professional positions in the field of education required in connection with the 1955 White House Conference on Education. Employment under this authority shall not extend beyond June 30, 1956.

(2) Five administrative positions requiring knowledge of, and experience with, the interest and participation in education matters of citizen and other lay groups and organizations, as required in connection with the 1955 White House Conference on Education. Employment under this authority shall not extend beyond June 30, 1956.

(3) Positions concerned with problems in education financed and participated in by the Office of Education, Department of Health, Education, and Welfare, and a cooperating State educational agency, or university or college, in which there is joint responsibility for selection and supervision of employees, and at least one-half of the expense is contributed by the cooperating agency in salaries, quarters, materials, equipment, or other necessary elements in the carrying on of the work.

§ 6.116 *National Security Council.* (a) All positions on the staff of the Council.

§ 6.118 *General Accounting Office.* (a) Two assistants to the Comptroller General.

§ 6.119 *Board of Governors, Federal Reserve System.* (a) All positions.

§ 6.121 *Office of Defense Mobilization.* (a) Not to exceed 18 non-operating specialist positions at the GS–13 level and above, the incumbents of which are responsible for advisory, staff planning, and coordination duties in the areas of military, industrial, or civilian mobilization.

§ 6.122 *Veterans' Administration*—(a) *General.* (1) Positions in Veterans' Administration facilities when filled by the appointment of members of such facilities receiving domiciliary care if, in the opinion of the Veterans' Administration the duties can be satisfactorily performed by such members.

(2) Positions at Veterans' Administration hospitals when filled by paraplegic patients during treatment or convalescence.

(b) *Construction Division.* (1) Temporary construction workers paid from "purchase and hire" funds and appointed for not to exceed the duration of a construction project.

(c) *Department of Veterans' Benefits.* (1) Executive Director for Supervision.

(2) Five Area Management Supervisors.

§ 6.123 *Federal Civil Defense Administration.* (a) Seven Regional Administrators.

(b) Seven Deputy Regional Administrators.

(c) Seven Assistant Regional Administrators for Women's Activities.

(d) Two Labor Specialists GS–13, Industry Office, Technical Advisory Service.

(e) Not to exceed 5 positions requiring Q clearance to be used exclusively for work on top secret projects in cooperation with other agencies and to be filled by persons who have a specialized subject matter background required for the performance of the duties of the position.

§ 6.354 *Saint Lawrence Seaway Development Corporation.* (a) One Private Secretary to the Administrator.
(b) One Special Assistant to the Administrator.

PART 21—APPOINTMENT TO POSITIONS EXCEPTED FROM THE COMPETITIVE SERVICE

Sec.
21.1 Extent of regulations.
21.2 Persons entitled to military preference.
21.3 Receipt of applications; uniform treatment.
21.4 Qualifications of applicants.
21.5 Examination of applicants.
21.6 Maintenance of employment lists.
21.7 Selection and appointment.
21.8 Reappointment.
21.9 Promotion; qualifications.
21.10 Removal, suspension, furlough, or demotion of preference employees.
21.11 General provisions.

AUTHORITY: §§ 21.1 to 21.11 issued under sec. 11, 58 Stat. 390; 5 U. S. C., 860. Statutory provisions interpreted or applied are cited to text in parentheses.

§ 21.1 *Extent of regulations*—(a) *Positions covered.* The regulations in this part shall apply to all positions (1) in the executive branch of the Federal Gov-

ernment that are excepted from the competitive service; (2) in any temporary or emergency establishment, agency, bureau, administration, project, and department created by acts of Congress or Presidential Executive order which are excepted from the provisions of the Civil Service Act of January 16, 1883; and (3) in the civil service of the District of Columbia. Positions excepted from the competitive service include all positions excepted from the provisions of the Civil Service Act of January 16, 1883, by statute or Executive order, including positions listed in Part 6 of this chapter, positions which may be filled by persons under personal service contract, and positions in Government owned or controlled corporations. The civil service of the District of Columbia includes all positions in the Government of the District of Columbia, and positions under the Board of Education and the Board of Library Trustees of the District of Columbia.

(b) *Applicability.* The provisions of the regulations in this part respecting the examination, rating, and selection for appointment of applicants are required to be followed whenever a qualified person entitled to preference under § 21.2 applies for consideration for appointment. Such provisions may be followed, in the discretion of the agency, in making appointments when no preference applicant applies.

(Secs. 2, 9, 58 Stat. 387, 389; 5 U. S. C. 851, 858)

§ 21.2 *Persons entitled to military preference.* In actions taken under the regulations in this part, five-point military preference or ten-point military preference as specified in section 3 of the Veterans' Preference Act of 1944 shall be granted to those persons specified in section 2 of that act. Separation under honorable conditions, as used therein, shall mean any separation from active duty in any branch of the armed forces under honorable conditions. A transfer to inactive status, a transfer to retired status, the acceptance of a resignation, or the issuance of a discharge will be considered as covered by the above definition if such separation was under honorable conditions.

§ 21.3 *Receipt of applications; uniform treatment.* Each agency shall establish definite rules regarding the acceptance of applications for employment in positions covered by the regulations in this part. Such rules shall be made of record in the agency and shall be uniformly applied to all persons who meet the conditions of such rules. Information regarding the rules shall be furnished upon request.

(Secs. 2, 9, 58 Stat. 387, 389; 5 U. S. C. 851, 858)

§ 21.4 *Qualifications of applicants*—(a) *Standards.* (1) Prior to making appointments to positions under the regulations in this part the agency shall establish standards for eligibility such as those relating to experience and training, citizenship, age, physical condition, etc., which standards shall relate to the duties to be performed. The establishment of standards relating to groups of positions or to a specific position may be delegated to the appropriate administrative level or subdivision of the agency and may be amended or modified from time to time in accordance with the needs of the locality in which the position is located, but the agency shall determine that all standards established are in conformity with the regulations in this part.

(2) Any such standard shall be made a matter of record in the appropriate office of the agency and information concerning the standards for any position shall be furnished upon request. The qualifications standards effective for each position shall be applied uniformly to all applicants for such position except for such waivers as are provided under the regulations in this part for persons entitled to preference.

(3) No minimum educational requirement will be included in qualification standards except those for such scientific, technical, or professional positions the duties of which the agency decides cannot be performed by a person who does not have such education. The agency shall make a part of its records its reasons for such decision. A statement of the reasons shall be furnished upon request.

(4) The qualification standards established for each position shall include:

(i) A provision for the waiver by the agency of any requirements as to age, height, and weight for any applicant entitled to preference under the regulations in this part whenever such requirements are not essential to the performance of the duties of the position; and

(ii) A provision for the waiver by the agency of any physical requirements for any applicant entitled to preference under the regulations in this part whenever the agency finds, after giving due consideration to the recommendation of any accredited physician, that such applicant is physically able to discharge the duties of the position.

(b) *Disqualifications.* In the standards established by the agency or the appropriate office of the agency, it may be provided that certain factors will disqualify applicants for employment. These may include, among others, the following: (1) Dismissal from the service for delinquency or misconduct; (2) criminal, infamous, dishonest, immoral, or notoriously disgraceful conduct; (3) intentional false statements as to any material fact, or deception or fraud in connection with an application; (4) habitual use of intoxicating beverages to excess; (5) reasonable doubt as to the loyalty of the person involved to the Government of the United States; (6) any legal disqualification for appointment; and (7) lack of United States citizenship.

§ 21.5 *Examination of applicants*—(a) *Rating.* (1) The agency may provide for an evaluation of the qualifications of all applicants for a position, who are available under §§ 21.3 and 21.4 at any time prior to appointment being made to such position. Numerical ratings shall be assigned on a scale of 100 and all applicants rated 70 or more shall be eligible for appointment: *Provided, That no numerical ratings need be assigned whenever all qualified applicants will be offered immediate appointment: Provided further,* That whenever there is an excessive number of applicants, only a sufficient number of the highest qualified applicants to meet the anticipated needs of the agency within a reasonable length of time need be given numerical ratings; in such cases the agency shall adopt procedures which will insure consideration of all preference applicants in the order in which they would have been considered if all applicants had been assigned numerical ratings. To the earned numerical ratings of applicants who make a passing grade and who are entitled to five-point preference, five points shall be added and to the earned numerical ratings of applicants who make a passing grade and who are entitled to ten-point preference, ten points shall be added. A notice of the rating assigned shall be furnished upon request.

(2) No consideration shall be given the application of any non-preference applicant, nor shall such application be rated, for the positions of elevator operator, messenger, guard, custodian, and until December 31, 1954, apprentices as long as qualified applicants entitled to preference are available for such positions.

(3) Whenever experience is a factor in determining eligibility, an applicant entitled to five-point or ten-point preference under the regulations in this part shall be credited with time spent in the military or naval service of the United States when the position for which he is applying is similar to that he held immediately prior to his entrance into the military or naval service; credit shall also be given such applicant for all valuable experience, including experience gained in religious, civic, welfare, service, and organizational activities, regardless of whether any compensation was received therefor.

(b) *Reemployment list.* The reemployment list will consist of the names of former employees of the agency who are to be considered for future employment, and shall, in any case, include the following:

(1) The names of former employees of the agency entitled to preference under the regulations in this part who have been furloughed or separated without delinquency or misconduct and who apply for reemployment.

(2) The names of any former employees of the agency entitled to preference under the regulations in this part who are found by the Commission, in accordance with § 21.10, to have been unjustifiably dismissed from the agency.

(c) *Regular employment list.* Eligible applicants assigned numerical ratings who are not entered on the agency reemployment list shall be entered on the regular employment list.

(d) *Order of consideration.* (1) The names of all applicants who are assigned eligible numerical ratings for a given position shall, except as provided below for professional and scientific positions in grades GS–9 and above, be considered either in Order A or in Order B, below:

(i) Order A:

(a) The names of qualified applicants who have a compensable service-connected disability of 10 percent or more and who are entitled to ten-point preference under the regulations in this part whose names appear on the agency reemployment list, in the order of their numerical ratings.

(b) The names of all other qualified applicants who have a compensable service-connected disability of 10 percent or more and who are entitled to ten-point preference under the regulations in this part in the order of their numerical ratings.

(c) The names of all other qualified applicants on the agency's reemployment lists in the order of their numerical ratings.

(d) The names of all other qualified applicants in the order of their numerical ratings.

(ii) Order B:

(a) The names of qualified applicants who have a compensable service-connected disability of 10 percent or more and who are entitled to ten-point preference under the regulations in this part whose names appear on the agency reemployment list, in the order of their numerical ratings.

(b) The names of all other qualified applicants on the agency's reemployment list, in the order of their numerical ratings.

(c) The names of all other qualified applicants who have a compensable service-connected disability of 10% or more and who are entitled to ten-point preference under the regulations in this part in the order of their numerical ratings.

(d) The names of all other qualified applicants, in the order of their numerical ratings.

(2) The names of all applicants assigned, numerical eligible ratings for professional and scientific positions at grades GS–9 and above, shall be considered in the following order:

(i) The names of applicants on the agency's reemployment list, in the order of their numerical ratings.

(ii) The names of all other applicants, in the order of their numerical ratings.

§ 21.7 *Selection and appointment*—(a) *Selection.* In making appointments from employment lists the agency shall make selection for appointment to each vacancy from not more than the highest three names available for appointment in the order provided in § 21.6 (d): *Provided,* That the agency need not accord eligibles on the agency reemployment list the preferential consideration provided in that section for such eligibles if such list contains the names of less than three applicants entitled to preference under the regulations in this part: *Provided further,* That the agency need not consider any applicant who has previously been considered three times, nor any preference applicant who has been disqualified under the provisions of paragraph (b) of this section. The second and any additional vacancies shall be filled in like manner.

(b) *Passing over a preference applicant.* (1) Whenever an agency in making a selection of a non-preference applicant in accordance with paragraph (a) of this section passes over the name of a preference applicant who, under § 21.6 (d), is entitled to prior consideration, it shall record its reasons for so doing. A copy of such reasons shall, upon request, be sent to the preference applicant or his designated representative.

(2) When, in making appointments to a position, an agency has on three occasions passed over the name of a preference applicant and recorded its reasons for so doing, consideration of his name for such position may thereafter be discontinued.

(Sec. 8, 58 Stat. 389; 5 U. S. C. 857)

§ 21.8 *Reappointment*—(a) *Persons granted preference.* A former civilian employee of the executive branch of the Federal government or the District of Columbia government who is entitled to preference under the regulations in this part may be reappointed to a position covered by the regulations in this part without regard to the names of qualified applicants on the agency reemployment list or regular employment list.

(Sec. 13, 58 Stat. 390; 5 U. S. C. 862)

§ 21.9 *Promotion; qualifications.* In determining qualifications for promotion with respect to employees entitled to five- or ten-point preference under the regulations in this part, any requirements as to age, height, and weight shall be waived provided any such requirement is not essential to the performance of the duties of the position. After due consideration has been given to the recommendation of any accredited physician, the physical requirements shall be waived in the case of any such employee provided he is found physically able to discharge efficiently the duties of the position for which promotion is proposed.

(Sec. 5, 58 Stat. 388; 5 U. S. C. 854)

§ 21.10 *Removal, suspension, furlough, or demotion of preference employees.* This section shall apply to permanent and indefinite employees entitled to five- or ten-point preference under the regulations in this part but shall not apply to (a) employees during their first year of current continuous Federal or District of Columbia service, or (b) employees appointed for periods specifically limited to one year or less.

Any employee subject to this section who is proposed for involuntary discharge, suspension for more than thirty days, furlough without pay, or reduction in rank or compensation, shall have at least thirty days advance written notice (except where there is reasonable cause to believe the employee to be guilty of a crime for which a sentence of imprisonment can be imposed), stating any and all reasons, specifically and in detail, for any such proposed action. Such employee shall be allowed a reasonable time for answering the same personally and in writing, and for furnishing affidavits in support of such answer, and shall have the right to appeal to the Civil Service Commission from an adverse decision of the administrative officer so acting. Such appeal shall be made in writing within a reasonable length of time after the date of receipt of notice of such adverse decision: *Provided,* That such employee shall have the right to make a personal appearance, or an appearance through a designated representative, in accordance with rules and regulations of the Commission. After investigation and consideration of the evidence submitted, the Commission shall submit its findings and recommendations to the proper administrative officer and shall send copies of the same to the appellant or his designated representative, and if the findings and recommendations are favorable to the employee, it shall be mandatory for such administrative officer to take such corrective action as the Commission finally recommends: *Provided further,* That the Commission may declare any such employee who may have been dismissed or furloughed without pay to be eligible for entry of his name on the agency reemployment list established under § 21.6 (b).

(Sec. 14, 58 Stat. 390, 61 Stat. 723; 5 U. S. C. 863)

§ 21.11 *General provisions*—(a) *Exceptions.* (1) No provisions of the regulations in this part shall apply to any position or appointment which by the Congress is required to be confirmed by, or made with, the advice and consent of the Senate.

(2) The provisions of the regulations in this part relating to examination and appointment shall not apply to (i) positions filled under the Civil Service rules or the War Service regulations in the same manner as competitive positions are filled; or (ii) reemployment in the agency of former employees in accordance with reemployment rights acquired by reason of service in the armed forces or the merchant marine, or by reason of transfer under Executive Order Nos. 8973, 9067, or 9243–3 CFR Cum. Supp.), or Directive X of the War Manpower Commissoin (7 F. R. 7298, 11050; 9 F. R. 3534).

(b) *Procedural modifications.* In view of the circumstances and conditions surrounding employment in the following classes of positions the agency concerned will not be required to apply to such positions the appointment procedures of the regulations in this part: *Provided*, That the principles of veteran preference shall be followed as far as administratively feasible and the reasons for his nonselection shall be furnished upon request to any qualified and available preference applicant:

(1) Positions filled by persons appointed without compensation or at a compensation of $1.00 per annum;

(2) Positions outside the continental limits of the United States and outside the Territories of Hawaii and Puerto Rico when filled by persons resident in the locality, and positions in the Territories of Hawaii and Puerto Rico when compensated in accordance with local prevailing native wage rates;

(3) Positions which the exigencies of the war program demand be filled immediately before lists of qualified applicants can be established or utilized: *Provided*, That appointments to such positions shall be temporary appointments not to exceed one year and may be renewed for one additional year at the discretion of the agency;

(4) Intermittent positions;

(5) Positions paid on a fee basis; and

(6) Such positions as are included in Schedule A (Part 6 of this chapter) and similar types of positions, whenever the Commission agrees with the agency that such position should be included hereunder.

(c) *Special plans.* Any department or agency having positions subject to the regulations in this part may submit to the Commission a system for making appointments which will result in granting to veterans the preference provided for in the Veterans' Preference Act of 1944 but which does not conform to all of the procedural requirements set forth in the regulations in this part: *Provided*, That such a system may not be put into effect until it has received the prior approval of the Commission.

(Sec. 20, 58 Stat. 391; 5 U. S. C. 869)

PART 24—FORMAL EDUCATION REQUIREMENTS FOR APPOINTMENT TO CERTAIN SCIENTIFIC, TECHNICAL, AND PROFESSIONAL POSITIONS

Sec.
24.1 Medical Officer, GS–602–0 (all grades).
24.2 Dentist; all grades.
24.3 Veterinarian, GS–701, 702, 703, 704, GS–7 and higher.
24.5 Student Nurse, St. Elizabeth's Hospital.
24.6 Graduate Nurse, GS–610 all grades; and Public Health Nurse GS–615–6–15 and Nursing Consultant, GS–615–7–15.
24.10 Dietitian, GS–630–0 (all grades).
24.12 Teacher; all grades.
24.13 School Superintendent, GS–1710–12, Instructor, School Activities (Principal, GS–9; High School Teacher, GS–5–7; Elementary Teacher, GS–5), GS–1710–5–9, Army and Navy Civilian Schools.
24.14 Teacher and Substitute (Temporary) Teacher, GS–1710–5–7–8 in Indian schools.
24.15 Range Management Assistant, GS–454–5.
24.19 Forester, GS–460–5–15, and Forester (Range management), GS–460–5–15.
24.23 Clinical Psychologist, GS–180–7–9.
24.27 Pharmacist, GS–660–0 (all grades).
24.28 Chemist, GS–1320–5–15.
24.29 Physicist, GS–1310–0 (all grades).
24.33 Engineering positions involving highly technical research, design or development, or similar functions.
24.34 Instructor, academic subjects, apprentice schools, Navy Department.
24.35 Geophysicist, GS–1313–7–13.
24.36 Junior Professional Assistant.
24.39 Mathematician, GS–1520 all grades, where the duties involve highly complicated or fundamental scientific research or similar difficult scientific duties.
24.40 Instructor (Meteorology), GS–1710–7–12.
24.41 Human Biologist, GS–14.
24.42 U. S. Coast Guard Academy.
24.43 Archeologist, GS–193–5–11.
24.44 Psychologist (Personal Counselor), GS–180–11, Veterans' Administration.
24.45 Metallurgist, GS–1321–7–15 (positions involving highly complicated or fundamental scientific research or similar difficult scientific duties).
24.55 Range Ecologist, GS–454–7–12 (positions involving highly technical or fundamental scientific research, design, or development, or similar complex scientific duties).
24.56 Research Forester, GS–461–5–15 (all options except Fire Research and Forest Influences).
24.57 Social Worker (Child Welfare), GS–185–7–9–11.
24.60 Archivist, GS–1420–7–13 (positions involving specialized archival work of highly technical character).
24.61 Microbiologist, GS–403–7–13 (positions involving highly technical research, design, or development, or similar functions).
24.62 Nutritionist, GS–493–9–13 (positions involving highly technical research, design, or development, or similar functions).
24.63 Physiologist (Human), GS–413–7–15 (positions involving highly technical research, design, or development, or similar difficult scientific functions).
24.64 Aeronautical Research Scientist, GS–861–7–15.
24.68 Training Instructor (Superintendent of Education), GS–1710–9, U. S. Disciplinary Barracks, Camp Gordon, Augusta, Georgia, Department of the Army.
24.69 Agronomist, GS–407–5–15.
24.70 Fishery Research Biologist, GS–482–5–15.
24.71 Wildlife Research Biologist, GS–486–5–15.
24.72 Botanist, GS–430–7–14 (positions involving highly technical research, design, or development, or similar complex scientific functions).
24.74 Dairy Husbandman, GS–487–7–14 (positions involving highly technical research, design, or development, or similar complex scientific functions).
24.75 Dairy Manufacturing Technologist, GS–491–7–14 (positions involving highly technical research, design, or development, or similar complex scientific functions).
24.76 Entomologist, GS–414–5–15.
24.77 Geneticist, GS–440–5–15.
24.78 Horticulturist, GS–437–5–15.
24.79 Meat Technologist, GS–495–7–14 (positions involving highly technical research, design, or development, or similar complex scientific functions).
24.80 Microanalyst (Plant and Animal Fibres), GS–494–7–14 (positions involving highly technical research, design, or development, or similar complex scientific functions).
24.81 Mycologist, GS–431–7–14 (positions involving highly technical research, design, or development, or similar complex scientific functions).
24.82 Parasitologist, GS–412–5–15.
24.83 Plant Pathologist, GS–434–5–15.
24.84 Plant Physiologist, GS–435–7–14 (positions involving highly technical research, design, or development, or similar complex scientific functions).
24.85 Animal Husbandman, GS–487–5–15.
24.86 Animal Physiologist, GS–413–5–15.
24.87 Soil Scientist, GS–470–5–15.
24.88 Bacteriologist, GS–420–5–15 (all grades and options).
24.89 Plant Quarantine Inspector, GS–436–5–15, and Plant Pest Control Inspector, GS–436–5–15.
24.91 Fishery Management Biologist, GS–481–5–15.
24.92 Wildlife Management Biologist, GS–485–5–15.
24.94 Pharmacologist, GS–405–0 (all grades).
24.95 Educational Specialist, GS–1720–0 (all grades).
24.96 Electronic Scientist, GS–1312–5–15 (positions involving highly technical research, design, or development, or similar complex scientific functions).
24.97 Geologist, GS–1350–0 (all grades).
24.99 Veterinarian (Trainee), GS–4—GS–6.
24.100 Technologist, GS–1390–0 (all grades), (positions involving highly technical research, design, or development, or similar complex scientific functions).
24.101 Trainee Research Psychologist (Physiological), GS–180–7.
24.102 Trainee Research Physiologist (Mammalian), GS–413–7.
24.103 Aeronautical Research Pilot, GS–861–7–15.
24.104 Statistician, GS–1530–5.
24.105 Public Health Educator, GS–1720–0 (all grades).
24.106 Fishery Products Technologist, GS–492–7–13 (positions involving highly technical research, design, or development, or similar complex scientific functions).
24.107 Public Welfare Research Analyst (Child Welfare), GS–102–9–12.
24.108 Social Worker; Public Welfare Adviser (Child Welfare), GS–102–9–13.
24.109 Social Worker (Psychiatric and Medical), GS–185–7–13 and GS–102–11–13.
24.110 Social Worker, Public Welfare Adviser (Public Assistance), GS–102–9–13.
24.112 Medical Student Aid, GS–7.
24.113 Soil Conservationist, GS–457–5.
24.114 Counseling Psychologist (Vocational Rehabilitation and Education), GS–180–11–12.
24.115 Principal (Day School), GS–1710–9–11, Principal (Boarding School), GS–1710–9–12, Reservation Principal, GS–1710–9–13, School Superintendent, GS–1710–12–13, in Indian Schools.

Sec.
24.116 Department Head (Academic, Agriculture, Guidance, Home Economics, Vocational Subjects, and General), GS–1710–9, in Indian Schools.
24.117 Director of Schools, GS–1710–12–13–14, in Indian Schools.
24.118 Principal-teacher, GS–1710–8–9, in Indian Schools.
24.119 Director and Chief Scientists (unallocated) $15,000 per annum, Plum Island Animal Disease Research Institute, Agricultural Research Service, Department of Agriculture.
24.120 Cotton Technologist, GS–1390–5–15.
24.121 Student Trainee, GS–1–4, in the following codes: GS–402, 408, 455, 458, 462, 483, 802, 1311, 1341, 1371, 1521, or other code covering positions of student trainee for any professional field as follows: Any biological science (Group GS–400), any branch of engineering (Group GS–800), any physical science (Group GS–1300) architecture, landscape architecture mathematics; and GS 2/4 in economics and statistics.
24.122 Occupational Therapist, GS–631–0 (all grades).
24.123 Mathematician, GS–1520–5–15.
24.124 Forest Products Technologist, GS–1390–5–15.
24.125 Home Economist, GS–493–5–15.
24.126 Food Products Technologist, GS–1390–5–15.
24.127 Geophysicist (Earth Physics, Geomagnetics, Seismology), GS–1313–5–15.

AUTHORITY: §§ 24.1 to 24.127 issued under sec. 11, 58 Stat. 390; 5 U. S. C. 860. Interpret or apply sec. 5, 58 Stat. 388; 5 U. S. C. 854.

§ 24.1 *Medical Officer, GS–602–0 (all grades)*—(a) *Educational requirement.* Applicants must be graduates of a medical school of recognized standing with the degree of doctor of medicine. For positions in aviation medicine, applicants must also be graduates of the basic course of the United States Army School of Aviation Medicine or of the course in aviation medicine prescribed by the United States Navy.

(b) *Duties.* With responsibilities proportionate to the grade, appointees perform professional duties as doctors of medicine in hospitals, in dispensaries or in the field. As examples of the work performed: Conduct physical examinations, give anesthetics, perform minor surgical operations, assist in major operations, supervise care of patients, diagnose and treat diseases, give first aid instructions, supervise a ward or other hospital or dispensary clinic.

(c) *Knowledge and training requisite for performance of duties.* A thorough understanding of the human body, its anatomy, its physiology, and its reactions to drugs; a thorough understanding of the symptoms of disease, the causes of disease and the treatment; a thorough understanding of the principles and procedures in the practice of all branches of medicine are necessary.

(d) *Method of obtaining basic knowledge and training.* Persons desiring to become physicians or doctors of medicine must obtain their education in a medical school of approved standing. The practice of aviation medicine differs from the practice of medicine in any other field because of the emphasis on physical examinations, diseases and their treatments as affected by the piloting of aircraft, and the effect of altitude on the individual. The only places where instruction in aviation medicine may be obtained are in the United States Army and the United States Navy.

§ 24.2 *Dentist; all grades*—(a) *Duties.* Appointees perform dental operations either under supervision or independently according to assignment. As examples of the work performed: In a large hospital or in a dental clinic make an examination of the oral cavity and independently or in consultation with dental specialists in the higher grades in the more unusual cases, make diagnoses of gums or pathological conditions and give treatment or perform dental operations as required; take, develop, and interpret X-ray films, make dental examinations, aid in medical diagnoses, and instruct, advise and assign dental interns, dental assistants, mechanics or others; make dental reports, requisition equipment, medicine and supplies, and act especially on the dental disabilities for compensation purposes or make dental ratings and authorize treatment.

(b) *Knowledge and training requisite for performance of duties.* Applicants must have an understanding of the anatomy and physiology of the mouth and the relation of mouth conditions to the rest of the body; the types of diseases affecting the mouth, gums and teeth; and the cure of such diseases. They must understand thoroughly safe and approved methods for treating teeth and gums and for removing damaged or diseased teeth. They must know all the proper methods for filling of teeth, making of crowns, inlays, and all other related repairs on teeth. They must be able to repair mouth fractures and dental damages resulting from accident or wounds incurred in war.

(c) *Method of obtaining basic knowledge and training.* The knowledge required for the performance of the duties described in paragraph (b) of this section can be obtained only by attending and completing a full four-year course in a dental school of recognized standing.

§ 24.3 *Veterinarian, GS–701, 702, 703, 704, GS–7 and higher*—(a) *Educational requirements.* Applicants must have successfully completed one of the following:

(1) A full course of study in an accredited school of veterinary medicine; or

(2) A full course of study in a nonaccredited school of veterinary medicine in the United States, plus 5 years postgraduate professional veterinary experience, which when completed will give the applicant, in connection with his education, a technical knowledge comparable to that which would have been acquired through successful completion of a full course of study in an accredited school of veterinary medicine.

(b) *Duties.* Persons appointed to these positions will perform such duties as: Antemortem and postmortem inspecting of food animals; inspecting livestock at public stockyards or at points of entry into the United States; inspecting licensed establishments producing veterinary biologics; administering tests for diseases; controlling and eradicating diseases; inspecting sanitation of dairy and other food products; making milk sanitation surveys and advising State and local health departments of proper methods of milk sanitation; and performing related activities. A majority of the positions to be filled involve livestock inspection, virus-serum inspection, and meat inspection.

(c) *Knowledge and training requisite for performance of duties.* The field of veterinary medicine and surgery is as complicated as that of human medicine and surgery and requires as intensive an education including intensive clinical experience. Veterinarians must have a full and complete knowledge of the anatomy, physiology, biochemistry, and functioning of the animal body. They must know all the various types of approved medicines and the effects on the animal body. They must be capable of recognizing animal disease and of correcting such disease.

§ 24.5 *Student Nurse, St. Elizabeths Hospital*—(a) *Duties.* The student attends classes which include theoretical study in the following subjects: Anatomy, physiology, microbiology, chemistry, psychology, sociology, social problems in nursing, introduction to medical sciences, pharmacology and therapeutics nutrition, foods, cookery, diet therapy, medical and surgical nursing, obstetrical nursing, nursing of children, psychiatric nursing. Classes are attended at which demonstration in the nursing care of patients for various types of diseases and conditions are given by nurse instructors. The students practice and return the demonstration to the instructors before being permitted to carry out any procedures on patients. Students then carry out the less complicated procedure on a specially assigned patient under close supervision of ward instructors. As students gain more skill in carrying out nursing procedures and techniques they are then given more advanced nursing procedures in which they assume more responsibility in the nursing care of patients.

(b) *Knowledge and training requisite for performance of duties.* The student nurse is considered as a student in the same manner as a student who is learning to be a teacher, dentist, physician, or preparing for any other profession. The course requires three years and consists of a probationary term of six months, a freshman term of six months, a junior term of twelve months, and a senior term of twelve months. Completion of four years of high school, or its equivalent, with the subjects stated in paragraph (c) of this section is the minimum education necessary for a student entering a basic course in nursing. The requirements of applicants for enrollment in the school of nursing at St. Elizabeths Hospital are necessary to meet the standards set by the District of Columbia Board of Nurse Examiners. Boards of Nurse Examiners are established by law and govern the standards for admission to

accredited schools of nursing. If a school of nursing does not meet the standards, it loses accreditation. Nurses graduating from such schools are not eligible for registration as Graduate Professional Nurses, and would not be eligible to practice as such in the District of Columbia or in the States. In order to maintain its accredited standing, the exact requirements specified by the Board of Nurse Examiners for schools of nursing in the District of Columbia are necessary for entrance as Student Nurse.

(c) *Method of obtaining basic knowledge and training.* To meet the standards set by the District of Columbia Board of Nurse Examiners, the Commission has determined that applicants must have been graduated from an accredited high school giving a four-year course. They must have completed at least 16 units of study, including: 4 units of English; 2 units of high-school mathematics; 2 units of science; preferably including general science, and a second science such as some form of chemistry or physics (home economics units do not constitute acceptable science units); and 2 units of social studies (1 unit must be United States history, except that one-half unit of civics may be substituted for one-half unit of United States history). (1 unit of study means one 36- to 40-week school year of study, five 40- to 60-minute class periods a week.)

§ 24.6 *Graduate Nurse, GS–610, all grades; and Public Health Nurse, GS–615–6–15, and Nursing Consultant, GS–615–7–15*—(a) *Educational requirement.* Applicants must have successfully completed one of the following:

(1) A full three-year course in residence in an approved school of nursing, which course must have included organized instruction and broad clinical practice in medical, surgical, pediatric, and obstetric nursing; or

(2) A full two-year course in residence in an approved school of nursing; plus additional appropriate nursing experience or pertinent education which, when combined with the two-year course in nursing, will have included instruction and broad clinical practice in medical, surgical, pediatric, and obstetric nursing, will total three years of education and experience, and will give the applicant a technical knowledge comparable to that which would have been acquired through successful completion of a three-year course in an approved school of nursing. These requirements apply to all graduate nurse positions in the following and related services: (i) Hospitals (sometimes referred to as staff nurse, general duty nurse, or ward nurse), (ii) clinics or dispensaries, (iii) sanatoria, (iv) infirmaries, (v) rapid treatment centers, (vi) emergency or health rooms in government agencies, (vii) public health service.

(3) Included in or in addition to the training requirements stated in subparagraphs (1) and (2) of this paragraph, applicants for the positions of Public Health Nurse and Nursing Consultant, GS–615, must show the successful completion of a program of study of at least 30 semester hours in public health nursing approved by the National Organization for Public Health Nursing.

(b) *Duties.* (1) Graduate Nurses, GS–610, work under medical direction and under nursing supervision in rendering expert nursing care, both physical and mental, and in applying the social aspects of nursing as indicated to all types of patients. This includes administering prescribed therapeutic treatment and medications; assisting physicians in examining patients, in treatments, in research, and in other medical procedures; instructing patients and their families; instructing and supervising non-professional groups in their assigned duties; maintaining adequate supplies; caring for equipment; and creating a pleasant and restful environment favorable to patients' recovery.

(2) Public Health Nurses and Nursing Consultants, GS–615, working under only general supervision and with responsibilities varying with the grade of the position, perform or supervise the performance of the following activities: Arrange for nursing care in homes and industrial plants and the teaching of others to give such care; provide interpretive and liaison service to appropriate representatives, groups, and institutions such as hospitals, rapid treatment centers, local clinics, and social agencies engaged in any phase of a public health program; prepare or participate in the preparation of pamphlets and other documents furnishing pertinent nursing information to the public; formulate plans to carry out needed research in specialized fields of nursing; confer with nursing schools, universities, and other educational institutions on revisions and modifications of curriculum insofar as they are related to a nursing specialty; and perform related promotional, consultative, educational, and service functions in the field of nursing.

(c) *Knowledge and training requisites for performance of duties.* The duties described in paragraph (b) of this section can be performed only by persons who are familiar with the principles and techniques underlying the modern treatment and care of patients with all types of physical and mental conditions. Ability to recognize symptoms and reactions to therapeutic treatments and medications and a knowledge of biological, physical, medical, and social sciences as well as a knowledge of nursing and allied arts is necessary. In addition, Public Health Nurses and Nursing Consultants, GS–615, must be thoroughly trained in the methods and principles of public health nursing and be familiar with the facilities available and methods of using each to promote and effect a public health program. These technical knowledges and skills can be acquired only by completion of a full course of basic training in residence in an approved school of nursing offering instruction and broad clinical practice under adequate educational direction. The specialized training in public health nursing can be obtained only in an institution having adequate classroom, laboratory, and library facilities, competent instructors, and a program of study in public health nursing, progress in which is evaluated by the application of appropriate standards of attainment.

§ 24.10 *Dietitian, GS–630–0 (all grades)*—(a) *Educational requirement.* Applicants must have successfully completed at least 36 semester hours of study in an accredited college or university. This study must have included 12 semester hours in chemistry (to include general, organic, and biochemistry); 6 semester hours in biology (to include human physiology and bacteriology); 6 semester hours in foods (to include food preparation and meal planning); 6 semester hours in nutrition and diet in disease; 6 semester hours in institution management (to include quantity cookery and organization and management). Successful completion of a standard 4-year course leading to a bachelor's degree in an accredited college or university with major study in dietetics or institutional management will be accepted as meeting the educational requirement for these positions.

(b) *Duties.* The position of dietitian includes the following and related duties: Planning and supervising the preparation and serving of therapeutic diets; charting components and measurements for conformance with type of diet prescribed by the doctors; instructing patients in the composition and preparation of discharge diets as required; making annual budget estimates of food and allotments; and determining the kind and amount of food to be procured. The degree of responsibility will vary with the grade of the position.

(c) *Knowledge and training requisite for performance of duties.* The duties of dietitian cannot be performed successfully without a knowledge of the physiology and digestive processes of the human body, the nutritional requirements of individuals of varying ages and occupations, the special diet requirements of persons suffering from a variety of diseases, bacteriological principles as applied to food spoilage and sanitation, and the organization and administration of a hospital dietary department. This knowledge can be gained only through a directed course of study in an accredited college or university with well-equipped chemistry, physiology, bacteriology, foods, and nutrition laboratories and thoroughly trained instructors, where progress is competently evaluated.

§ 24.12 *Teacher; all grades*—(a) *High School and special subjects*—(1) *Duties.* The duties of high school and special subject teachers consist of imparting basic knowledge of one or more subject matter fields of social, economic, vocational or cultural value to the student; training the student in effective, impartial thinking in the medium of a special subject; making use of the best methods of accomplishing these results; directing appropriate extra-curricular interests.

(2) *Knowledge and training requisite for performance of duties.* Knowledge of various subject-matter fields; understanding of mental and physical characteristics of various age groups; knowledge of and skill in applying effective methods and techniques of instruction; and ability to evaluate the adequacy of methods employed. In addition, experience in teaching is required for higher grade position; the length, nature and extent of responsibility varies with the grade of the position.

(3) *Method of obtaining basic knowledge and training.* The method by which this essential basic knowledge and training may be acquired is in regularly organized teacher training departments of colleges or universities of recognized standing, including, or supplemented by relevant courses in educational psychology, theory and methods courses in the field of subject-matter specialization, and practice teaching. During his training the student works under competent instructors; has access to well stocked libraries and to well equipped laboratories; and receives actual practice in teaching. The literature in most vocational and cultural subjects and in the field of education is so voluminous that an individual cannot master it by random study; guidance in reading is essential for mastery and proper evaluation of the materials in the field.

(b) *Elementary teachers*—(1) *Duties.* The duties of elementary teachers consist of organizing and conducting classroom teaching; teaching elementary school subjects in such a way as to lay a broad foundation for later learning; training in habits of thinking; and evaluating results.

(2) *Knowledge and training requisite for performance of duties.* Knowledge of (i) mental and physical characteristics of various age groups, (ii) accepted methods of classroom management, (iii) various subject-matter fields, and (iv) effective methods and techniques of instruction to meet a wide variety of needs of individual pupils as well as of groups; ability to apply such methods and techniques and to evaluate results.

(3) *Method of obtaining basic knowledge and training.* The method by which this fundamental knowledge of methods of classroom instruction can be obtained is in regularly organized teacher training departments of colleges or universities of recognized standing. In such institutions prevailing practices have undergone analysis and experimentation, and those found to be most effective have been organized into relevant courses and a system of supervised practice teaching. During his training the student works under competent instructors; has access to well stocked libraries and well equipped laboratories; and learns a variety of methods and techniques which have been demonstrated as effective. The literature in the field of education is so voluminous that an individual cannot master it by random study; guidance in reading is essential for mastery and proper evaluation of the materials in the field.

(c) *Training Specialist, Department of the Army, GS–1711–6*—(1) *Duties.* The duties of the position of training specialist are the duties of a teacher position, and consist of teaching non-English speaking persons, illiterates, and slow learners in the Army who do not meet the standards of literacy established by the Army; preparing daily lessons, classroom exercises, and maintaining necessary class records; helping maladjusted trainee by means of frequent conferences and by special tutoring and securing the aid of the personnel consultant in cases of pronounced maladjustment; and assisting the trainee in Army indoctrination.

(2) *Knowledge and training requisite for performance of duties*—(i) *Education.* Applicants must have completed at least a 3-year course in a college, university or teacher-training institution of recognized standing with major study in education including at least one course in methods of teaching reading, provided that an additional year of the experience described below may be substituted for the required course in methods of teaching reading.

(ii) *Experience.* At least 2 years' experience in any one or in any combination of the following:

(*a*) Teaching non-English speaking persons;
(*b*) Teaching illiterates;
(*c*) Teaching remedial reading classes;
(*d*) Teaching backward children;
(*e*) Teaching grades 1, 2, or 3 in elementary schools.

(3) *Method of obtaining basic knowledge and training.* The method by which this essential basic knowledge and training may be acquired is in regularly organized teacher training departments of colleges or universities of recognized standing.

§ 24.13 *School Superintendent, GS–1710–12, Instructor, School Activities (Principal, GS–9; High School Teacher, GS–5–7; Elementary Teacher, GS–5), GS–1710–5–9, Army and Navy Civilian Schools*—(a) *Educational requirement.* The educational requirements for these positions are the current educational requirements of the States in which the positions are located.

(b) *Duties.* The duties of these positions are to serve as school superintendent or principal or as elementary or high school teacher in Army or Navy schools for children or personnel of the armed forces.

(c) *Knowledge and training requisite for performance of duties.* The enrollment in schools maintained by the Army and the Navy Departments is extremely transient because of the frequent shifting of Army and Navy personnel from one assignment to another. In order that students may transfer from these schools without loss of educational credits, the Army and Navy schools must have approval or certification from the State Board of Education in which the school is located. (There is reciprocity between the States in the acceptance of students from an approved or certified school.) Qualifications of superintendents, principals, and teachers in these schools must, therefore, be the current requirements of the State in which the school is located.

§ 24.14 *Teacher and Substitute (Temporary) Teacher, GS–1710–5–7–8, in Indian Schools*—(a) *Educaitonal requirement*—(1) *Elementary.* Completion of a full four-year course, leading to a degree from an accredited college or university, including or supplemented by 24 semester hours in education, 12 of which must be in elementary education.

NOTE: For temporary appointment of substitute elementary teacher, this educational requirement may be modified to require only two full years of study in the education department of an accredited college or university.

(2) *Agriculture.* Completion of a full four-year course in an accredited college or university, leading to a degree in agriculture or agricultural education, including or supplemented by 18 semester hours in education and 24 semester hours in agriculture, 4 of which must be in farm mechanics or farm shop.

NOTE: For temporary appointment of substitute teacher, agriculture, this educational requirement may be modified to require only two full years of study in the agriculture department of an accredited college or university.

(3) *Adviser (boarding school).* Completion of a full four-year course, leading to a degree from an accredited college or university, including or supplemented by 24 semester hours of credit in education and/or guidance in which is included 6 semester hours in a combination of two or more of the following: Child psychology; educational psychology; educational, vocational or child guidance; clinical psychology; mental hygiene; health education; or educational tests and measurements.

(4) *Vocational subjects.* Completion of a full four-year course, leading to a degree from an accredited college or university, including or supplemented by 18 semester hours in education and 24 semester hours in skilled trades.

NOTE: For temporary appointment of substitute teacher of vocational subjects, this educational requirement may be modified to require only two full years of study in an accredited college or university in the department of the subject matter area in which the teaching duties are to be performed.

(5) *Science.* Completion of a full four-year course leading to a degree from an accredited college or university, including or supplemented by 18 semester hours in education and either 24 semester hours in physical and/or biological science or 18 semester hours in physical and/or biological science and 6 semester hours in mathematics.

(6) *Mathematics.* Completion of a full four-year course, leading to a degree from an accredited college or university, including or supplemented by 18 semester hours in education and either 24 semester hours in mathematics or 18 semester hours in mathematics and 6 semester hours in physical science.

(7) *Business and commercial subjects.* Completion of a full four-year course, leading to a degree from an accredited college or university, including or supplemented by 18 semester hours in education and 24 semester hours in business and commercial subjects, 12 of which must be in accounting or in shorthand, typewriting, and office practice.

(8) *English, home economics, music, physical education, and social studies.* Completion of a full four-year course, leading to a degree from an accredited college or university, including or supplemented by 18 semester hours in edu-

cation and 24 semester hours in the subject matter taught.

NOTE: For temporary appointment of substitute teacher, home economics, this educational requirement may be modified to require only two full years of study in an accredited college or university in the department of the subject matter area in which the teaching duties are to be performed.

(9) *General.* Completion of a full four-year course leading to a degree from an accredited college or university, including or supplemented by 18 semester hours in education and 16 semester hours in each of two subject matter fields pertinent to the duties of the position.

(10) *Secondary.* Completion of a full four-year course leading to a degree from an accredited college or university, including or supplemented by 18 semester hours in education and 16 semester hours in each of two subject matter fields pertinent to the duties of the position.

(b) *Duties.* Teachers in Indian schools teach Indian children and exercise educational leadership in Indian communities. Their teaching program is adapted to the needs of the local environment and is practical in its objectives.

(c) *Knowledge and training requisite for performance of duties.* The duties to be performed require a knowledge of teaching principles and techniques, an understanding of the developmental stages, both physical and mental, of young people, the ability to recognize special instructional problems that arise in teaching situations, thorough knowledge of the subject matter area being taught, and an understanding of the interrelationship between the formal school situation and non-school activities as educative factors. This knowledge, understanding, and ability can be gained only through the training shown in paragraph (a) of this section. By such training the student is guided in his reading and evaluation of the literature in the subject matter field to be taught and in the field of education. The student has access to libraries and laboratories; is given opportunity to observe methods of devising and materials for implementing an educational program; and, in a supervised setting, can experiment for himself under professional guidance.

§ 24.15 *Range Management Assistant, GS–454–5*—(a) *Educational requirement.* Applicants must have successfully completed one of the following:

(1) A full 4-year course in an accredited college or university leading to a bachelor's degree, with major work in range management, agriculture, animal husbandry, botany or forestry, which has included the following courses:

(i) One course in each of the following: (*a*) Plant ecology; (*b*) plant physiology; (*c*) soils; (*d*) systematic botany or plant taxonomy.

(ii) Three courses in each of the following groups: (*a*) Animal husbandry (one course in animal nutrition and feeding and two courses in any combination of courses in breeds and breeding, livestock management, livestock production, market classes of livestock); (*b*) agronomy, general botany, forest management, wildlife management, or zoology.

(iii) Four courses in range management (any combination of general range management, range utilization and maintenance, range plants, range history and laws, range or ranch economics, range survey); or

(2) Courses as outlined in subparagraph (1) of this paragraph in an accredited college or university plus additional appropriate education or experience which, when combined with the courses as outlined in subparagraph (1) of this paragraph, will total four years of education and experience and give the applicant a technical knowledge comparable to a 4-year college course.

(b) *Duties:* Range management assistants will assist in making range surveys and conservation plans for farms, ranches, and other grazing areas, including determining the suitability of land for grazing use and classifying and mapping range sites and determining their condition; assemble information on current range management practices; assist farmers and ranchers in the development of detailed conservation plans which will provide for the adoption of such suitable conservation and management practices as fencing, water development, seeding, noxious plant control, rotation or deferred grazing, proper intensity and season of use as necessary to improve the range; they will be required to walk over plowed land, climb hills and fences, and ford streams while carrying equipment weighing from 30 to 40 pounds; explain conservation plans to farmers and ranchers and work with and assist them in establishing and maintaining range conservation and management practices; keep records and make reports of work accomplished; and perform other related duties.

(c) *Knowledge and training requisite for performance of duties.*

NOTE: The provisions of § 24.36 (d) and (e) are applicable to this section.

§ 24.19 *Forester, GS–460–5–15, and Forester (Range Management), GS–460–5–15*—(a) *Educational requirement.* (1) Applicants for Forester, GS–460–5–15, positions must have successfully completed one of the following:

(i) A full 4-year course of study in an accredited college or university leading to a bachelor's or higher degree with major study in forestry, forest engineering, range management, wildlife management or a closely related subject-matter field. This course of study must have included at least 20 semester hours of course-work in forestry with course-work which dealt specifically with the following subjects: silviculture, forest management, forest protection, forest economics, forest utilization and either (1) range management, (2) wildlife management, (3) forest engineering or (4) forest influences.

(ii) A total of at least 30 semester hours of course-work in science or engineering in an accredited college or university with major study in forestry, forest engineering, range management, wildlife management or a closely related subject-matter field, including at least 20 semester hours in forestry with course-work which dealt specifically with the following subjects: silviculture, forest management, forest protection, forest economics, forest utilization and either (1) range management, (2) wildlife management, (3) forest engineering or (4) forest influences, plus enough additional experience, or education, of an appropriate nature to total 4 years of experience and education or 4 years of education. The quality of this additional experience or education must have been such that, when combined with the 30 semester hours of course-work in science or engineering, it gives the applicant a technical knowledge comparable to that normally acquired through the successful completion of the full 4-year course of study described in subdivision (i) of this subparagraph.

(2) Applicants for Forester (Range Management), GS–460–5–15, positions must have successfully completed one of the following:

(i) A full 4-year course of study in an accredited college or university leading to a bachelor's or higher degree with major study in forestry, forest engineering, range management, wildlife management or a closely related subject-matter field. This course of study must have included at least 20 semester hours of course-work in forestry, supplemented by at least 9 semester hours of course-work in range management, or in subjects directly related to range management, and 6 semester hours in a combination of plant ecology (excluding silviculture or silvics) and taxonomic botany.

(ii) A total of at least 40 semester hours of course-work in science or engineering in an accredited college or university with major study in forestry, forest engineering, range management, wildlife management or a closely related subject-matter field, including at least 20 semester hours in forestry with course-work which dealt specifically with the following subjects: silviculture, forest management, forest protection, forest economics, forest utilization and either (1) range management, (2) wildlife management, (3) forest engineering or (4) forest influences, plus enough additional experience, or education, of an appropriate nature to total 4 years of experience and education or 4 years of education. The quality of this additional experience or education must have been such that, when combined with the 30 semester hours of course-work in science or engineering, it gives the applicant a technical knowledge comparable to that normally acquired through the successful completion of the full 4-year course of study described in subdivision (i) of this subparagraph.

(b) *Duties.* (1) Foresters advise on, administer, supervise or perform professional and scientific work in connection with the management, protection and utilization of forest resources and forest lands for the continuous production of goods and services derived from the forest resources or from the forest lands. This involves such things as timber and forage resources, protection of the forest and land from fire, flood and erosion, the maintenance of environmental conditions necessary for wildlife, development and preservation of natural landscape effects and providing for public recreation. For the most part, the duties of these positions involve the management of balanced resources or of forested lands.

(2) Foresters (Range Management) advise on, administer, supervise or perform professional and scientific work in connection with the management, protection and utilization of forest resources and forest lands for the continuous production of forage for livestock and big game where this work must be coordinated with the management of other forest resources such as timber, water, recreation and wildlife. The duties of these positions require a combination of knowledges and abilities in both the science of forestry and the science of range management.

(c) *Knowledge and training requisite for performance of duties.* The duties of these positions cannot be performed without a sound basic knowledge of the fundamental biological and plant sciences and of the basic physical and mathematical sciences and specific training in forestry or forestry and range management. These duties require an exacting and detailed knowledge and training. Appointees must have the ability to apply their professional and scientific knowledge to their work in order to solve specific problems, interpret and apply the results of research, both in the fields of forestry and range management and in related fields of science, and to manage forest resources wisely. The knowledge and training required can only be acquired through the successful completion of a directed course of study in an accredited college or university which has scientific libraries, well-equipped laboratories and thoroughly trained instructors, gives expert guidance and evaluates progress competently.

§ 24.23 *Clinical Psychologist, GS–180–7–9*—(a) *Educational requirement.* (1) At least 10 courses in psychology in an accredited college or university, including:

Two courses in abnormal psychology, clinical psychology, mental hygiene, or personality adjustment.

Two courses in clinical techniques such as individual testing, interviewing, or the case study method;

Two courses in differential psychology or tests and measurements (educational, vocational, psychological, personality, attitude), or statistics;

One course in human biology, neurology, or physiological psychology; and

Three courses in general, experimental, child, adolescent, social, animal, or systematic psychology or additional courses listed in the foregoing paragraphs.

(2) Completion of all requirements for the Ph. D. degree in psychology will be accepted as meeting this educational requirement.

(b) *Duties.* At these grades, clinical psychologists administer and score certain individual psychological tests comparable in difficulty to the Wechsler-Bellevue, the Rorshach and the Thematic Apperception Tests. They evaluate and interpret diagnostically tests comparable in difficulty to the Wechsler-Bellevue and they may be instructed in the evaluation of the more difficult tests. They may also be trained in treatment procedures but they never take responsibility for treatment. They may also participate in research on mental health problems to the extent of the collection of specific data and the use of simple statistical techniques and methods.

(c) *Knowledge and training requisite for performance of duties.* A knowledge of the basic principles of clinical psychology; the fundamentals of test administration and scoring and the analysis and clinical evaluation of test data; an understanding of the relationships between clinical psychology and the related social and life sciences; a knowledge of and ability to use statistical methods and techniques; and ability to participate in research projects to the extent of the collection of psychological and psychometric data. The only way that these knowledges and skills can be acquired is through a balanced program of study in an accredited college or university in the courses listed above.

§ 24.27 *Pharmacist, GS–660–0 (all grades)*—(a) *Educational requirements.* Applicants must have successfully completed one of the following: (1) A four-year course in pharmacy at an approved school; or (2) a resident course in pharmacy of two years or more at a college, university, or other institution above high school level and have had, in addition, sufficient progressive technical experience in the practice of pharmacy to total four years of combined education and experience.

(b) *Duties.* Pharmacists perform professional work in pharmacy involving the compounding of prescriptions, the dispensing of drugs, the manufacture of pharmaceutical and stock preparations, the checking of dated drugs for potency, the issuance of alcoholics and narcotics on proper order, the maintenance of pertinent records and stock and supplies, and the performance of related duties. In the higher grades, pharmacists may supervise other pharmacists in the performance of these duties or they may act as consultants and exercise over-all administration of pharmacy activities to determine that established policies and procedures are being followed and to develop procedures under established over-all policy.

(c) *Knowledge and training requisite for performance of duties.* The duties of a pharmacist cannot be successfully performed without a sound knowledge of the fundamental principles of pharmacy, and of chemistry, pharmacology, toxicology, bacteriology, therapeutics, and mathematics as related to pharmacy. The only method of obtaining this knowledge and training is by attending a school of pharmacy where systematic instruction and guidance, and adequate laboratory and library facilities are available, and where suitable standards are maintained and competent evaluations of the student's progress are made.

NOTE: This section is not applicable to positions in the Department of Medicine and Surgery, Veterans' Administration, the education requirement for which is established by Public Law 293, 79th Congress (sec. 5, 59 Stat. 676; 38 U. S. C. 15d).

§ 24.28 *Chemist, GS–1320–5–15*—(a) *Educational requirement.* Applicants must have successfully completed one of the following:

(1) A full 4-year course, in a college or university of recognized standing, leading to a bachelor's degree in chemistry. This study must have included courses in chemistry consisting of lectures, recitations, and appropriate practical laboratory work totaling at least 30 semester hours; or

(2) Courses in chemistry, in a college or university of recognized standing, consisting of lectures, recitations, and appropriate practical laboratory work totaling at least 30 semester hours, plus additional appropriate experience or education which, when combined with the 30 semester hours in chemistry, will total four years of education and experience and give the applicant the substantial equivalent of a 4-year college course.

(3) In either subparagraph (1) or (2) of this paragraph, the courses must have included analytical chemistry, both quantitative and qualitative, and in addition, any two of the following: (i) Advanced inorganic chemistry; (ii) biochemistry; (iii) organic chemistry; (iv) physical chemistry. All of these courses must have been acceptable for credit toward the completion of a standard 4-year professional curriculum leading to a bachelor's degree in chemistry at a college or university of recognized standing.

(4) For those positions involving highly complicated or fundamental scientific research or similar difficult scientific duties, certification may be restricted to those eligibles who show the successful completion of a full college education in chemistry in a college or university of recognized standing.

(b) *Duties.* The duties of the chemist are: To perform, conduct, plan, or direct scientific investigative, developmental, or fundamental research work in one or more of the specialized fields of chemistry; to collect, examine, and interpret scientific data; to coordinate assignments and programs; to prepare budget estimates for specified research programs; and to perform related duties as assigned.

(1) Those positions in chemistry requiring, as a positive requirement, formal education to the extent only of 30 semester hours of college study in chemistry supplemented by appropriate experience or education are characterized as follows:

(i) The solution of specific problems of limited scope which does not involve the application of all the principles of the scientific fields related to chemistry—in general, problems where a broad viewpoint or training is not necessarily required; conducting important chemical analyses of material; directing the standardization and testing of well-known types of equipment or instruments; developing modifications of standard procedures, tests, techniques, etc.; making literature surveys of the

field; and preparing, editing, and reviewing technical reports on the results of the work performed in the field of professional chemistry.

(2) Those positions requiring the successful completion of four years of college or university training in chemisry are characterized as follows:

(i) Critical investigative work requiring a sound knowledge of the fundamental laws, theories, principles, and terminology of chemistry and related sciences and having for its objective the discovery of new facts, the development of new theories or principles, or a new interpretation of known facts, leading to a revision of accepted theories and laws.

(ii) The application in new ways of known complex scientific laws and facts to the development of new processes, techniques, devices, or products.

(iii) The coordination of a broad research program requiring the combined efforts of several specialists in different scientific fields. The leader of such a program must have an understanding of the scientific principles, procedures, and potentialities of the scientific fields involved, and the ability to coordinate the activities of the various specialists.

(c) *Knowledge and training requisite for performance of duties.* (1) The minimum amount of formalized training required for the successful performance of the duties described in subparagraph (b) (1) of this section consists of the completion of 30 semester hours of study in chemistry in a college or university of recognized standing. This study represents essentially the fundamental body of knowledge of the science of chemistry. It includes courses in the principal fields of chemistry (analytical, inorganic, organic, and physical) which are required to furnish the basic knowledge for any type of professional work in chemistry. In addition, it is supplemented by laboratory training in the application of the scientific principles involving the use of apparatus and equipment, and skills essential to work in chemistry. A familiarity with scientific literature, especially the methods by which such literature is compiled, classified, indexed, and made available, is also a necessary part of such education. And finally, the training will include experience in preparing technical reports in which it is necessary to organize material logically, to make clear distinctions between theory and facts, to make precise and unambiguous statements, and to draw conclusions that are useful and fully warranted by experimental results.

(2) The minimum amount of training required for the successful performance of the duties described in subparagraph (b) (2) of this section is the completion of a 4-year college course leading to a bachelor's degree in a college or university of recognized standing, including or supplemented by 30 semester hours of study in chemistry. Such a college course consists of laboratory work (including the use of complex apparatus), lectures, recitations, seminars, and selected reading in chemistry and other fields given under competent instruction and guidance. Such a curriculum is planned and integrated so as to provide a sound and comprehensive training, not only in chemistry but in related subjects such as physics, mathematics, biology, engineering, etc. Training in the fundamentals of other fields affords the necessary breadth of knowledge, as well as an understanding of the interrelationships of different fields. New advances in science flow from the combination of new knowledge, sometimes from widely separated fields. The justification for requiring a full 4-year college course for certain positions is that it is the only known method by which a broad understanding of the fundamentals of various related fields may be acquired. Full recognition is also given to the importance of training in verbal facility and the development of facility in logical thinking and expression. The scientist must be able to present the results of his work clearly and concisely both orally and in written form.

(d) *Method of obtaining basic knowledge and training.* Paragraph (c) of this section contains statements of the minimum knowledge and training required to carry on successfully professional work in two broad areas in the field of chemistry. The only method by which such knowledge and training may be acquired is by attending a college or university where competent instruction and guidance are available, where courses are arranged in a systematic progressive schedule, and where adequate laboratory facilities and libraries are provided, and where objective evaluations are made of a person's progress in acquiring professional and scientific information.

(e) *Justification of educational requirement.* The world of today is conscious that it is living in an atomic age, and the people of the United States are aware of the urgent need for fundamental research and developmental work in all scientific fields in order to safeguard and improve the nation's security, health, and general welfare. The Congress has given recognition to the vital necessity for such scientific research and developmental work and has authorized, through appropriations, the spending of large sums of money for varied and important programs. These programs are carried on by the various departments and agencies of the Federal Government, and have resulted in very notable achievements in scientific research during World War II.

The advances in the various sciences, during World War II, have been outstanding and of major importance. Particularly is this true of the field of chemistry in all of its branches, and further advances will depend on the number of highly qualified and properly trained chemists who are competent to explore the particular field in which a research problem is centered. Concurrent with these advances in the fields of science is the flow of new scientific knowledge, so that persons engaged in highly complicated scientific research in a specialized field of chemistry must of necessity possess the fundamental scientific knowledge characteristic of their own field and, in addition, that of certain allied fields, in order that they may successfully attack these complex problems with which they are faced.

Private industry doing research in chemistry has long recognized the necessity for broadly trained men for professional chemists' positions who are well-grounded in the fundamentals of the sciences involved. They are required to have education represented by at least the attainment of a bachelor's degree in the science, and in many instances, a doctor of philosophy degree with specialization in a particular field is demanded.

§ 24.29 *Physicists, GS–1310–0 (all grades)*—(a) *Educational requirement.* Applicants must have successfully completed one of the following:

(1) A full 4-year course, in an accredited college or university, leading to a bachelor's degree. This study must have included courses in physics consisting of lectures, recitations, and appropriate practical laboratory work totaling at least 24 semester hours; or

(2) Courses in physics, in an accredited college or university (or courses in physics which would be acceptable to such a college or university), consisting of lectures, recitations, and appropriate practical laboratory work totaling at least 24 semester hours; plus additional appropriate experience or education which, when combined with the 24 semester hours in physics, will total four years of education and experience and give the applicant a technical and professional knowledge of physics comparable to that which would have been acquired through the successful completion of a 4-year college course.

(3) In either subparagraph (1) or (2) of this paragraph, the courses must have included a fundamental course in general physics and, in addition, courses in any two of the following: (i) Electricity and magnetism; (ii) heat; (iii) light; (iv) mechanics; (v) modern physics; and (vi) sound. All of these courses must have been acceptable for credit toward the completion of a standard 4-year professional curriculum leading to a bachelor's degree at an accredited college or university, and must have been taught in the Department of Physics or be acceptable to that department as courses in physics toward meeting the institution's requirements for a major in physics.

(b) *Duties.* Physicists plan, direct, conduct or assist in conducting scientific or developmental work or fundamental research work in one or more of the specialized fields of physics. The duties include the collection, examination, and interpretation of scientific data; the presentation of the results of such experimentation in clear, concise terms; and the construction or direction of the construction and manipulation of scientific and laboratory apparatus. In many cases they also include mathematical analyses for the outlining of physical experimentation plans and for the preparation of the results of experimentation in such form that valid conclusions may be drawn.

(c) *Knowledge and training requisite for performance of duties.* The duties of physicist cannot be successfully performed without a sound and comprehensive training in physics, a broad understanding of various related subjects (such as chemistry, mathematics, biology, engineering, etc.), and a knowledge of the interrelationships of these different fields. Appointees must be able to present the results of their research clearly and concisely in either oral or written form. The only method by which this knowledge and training can be acquired is through a directed course of study in an accredited college or university with scientific libraries, well-equipped laboratories, and thoroughly trained instructors, where progress is completely evaluated.

NOTE: For those positions involving highly complicated or fundamental scientific research or similar difficult duties, certification may be restricted to those eligibles who show the successful completion of a full college education in physics in an accredited college or university.

§ 24.33 *Engineering positions involving highly technical research, design or development, or similar functions—(a) Educational requirement.* Applicants must have successfully completed a full college course in engineering.

(b) *Duties.* Professional engineering positions which require the successful completion of four years of college or university training are those positions "involving highly technical research, design and development or similar functions," the duties of which include the performance of such functions as the following:

(1) A critical investigation requiring a high level of intelligence and a sound knowledge of fundamental scientific concepts, principles, and terminology and having for its aim the discovery of new facts or principles, the interpretation of new knowledge or the more complete interpretation of facts already known, or the revision of accepted conclusions, theories, and laws in the light of newly discovered facts; or

(2) The application of known complex scientific laws, facts and discoveries, in new and untried ways to develop new or improved processes, techniques, methods of production, devices, or products; or

(3) In general those scientific activities of an extremely complex nature in which new methods are devised, or new and advanced contributions to knowledge are developed.

(c) *Knowledge and training requisite for performance of duties.* It is widely recognized that improvement in, and the safeguarding of, the health, security, and welfare of the Nation and the modernization and safe and adequate design of large and complicated engineering structures is dependent upon the quality and extensiveness of the scientific and engineering research and development activities of the Nation. These problems are recognized as of such vital importance to the activities and existence of the Nation that the Federal Government, through its various departments and agencies, is required by Congress to engage in scientific research and development.

In their infancy scientific and engineering research were of necessity concerned with the discovery of the simpler and more elementary facts, laws and processes of nature. However, so much has now been learned about the facts, laws, materials and processes of nature, and so complex are the concepts and tools of modern science and engineering that personnel engaged today in carrying out highly technical scientific and engineering research, design, or development and similar functions must possess special qualifications if their work is to be productive and in step with the times.

The more successful establishments throughout the country now require of applicants for research and similar scientifically exacting positions at least a bachelor's degree and frequently a doctorate in scientific subjects. Because of the complexity of scientific knowledge, concepts and specialized tools required for satisfactory achievement in modern engineering research, design and development, and because of the difficulty of acquiring proficiency in the scientific fields, agencies of the Federal Government must have for certain positions in scientific work, personnel who have a sound fundamental knowledge in the sciences and the ability to apply this theoretical knowledge to the interpretation of data gathered in the fields of research or to the production or development of new processes, devices or techniques.

(d) *Method of obtaining basic knowledge and training.* Positions in the engineering field as defined in paragraph (b) of this section require the completion of a full four-year course in engineering in a college or university of recognized standing to insure technical knowledge and training of the level and extent required for the proper performance of these duties. In the professional schools of such institutions a student receives competent instruction and guidance in the technical and theoretical subjects that he will have to apply in his profession. He attends seminars and lectures, has access to scientific libraries and works in well equipped laboratories provided by the professional schools. In these schools prevailing practices have undergone analysis and those found to be most effective have been organized into relevant courses of instruction. Through training received in the professional schools the student receives competent instruction in specialized fields and is expertly guided in his selection of readings from available literature which is so voluminous that no individual could master it by random study. The required studies represent information from a variety of fields and the student cannot cover the material except through supervised courses of study designed to provide a comprehensive understanding of the subject.

§ 24.34 *Instructor, academic subjects, apprentice schools, Navy Department.*

NOTE: The provisions of § 24.12 are applicable to this section.

§ 24.35 *Geophysicist, GS–1313–7–13—(a) Educational requirements.* For those positions involving highly complicated or fundamental scientific research or similar difficult scientific duties, certification may be restricted to those eligibles who show the successful completion of a full college education in a pertinent field in a college or university of recognized standing.

(b) *Duties.* The duties of the geophysicist are: (1) Planning, directing, and making geophysical observations in the field or at fixed stations, interpreting the results, preparing charts, tabulations, and securing other scientific information required in observations for interpretations, designing or assisting in constructing specialized operatives and equipment for use in connection with geophysical investigations; (2) conducting or assisting in geophysical prospecting, explorations, or other geophysical observations; (3) making reports, and preparing articles for publication.

(4) These positions involving the duties described in subparagraphs (1)–(3) of this paragraph and requiring the successful completion of four years of pertinent college or university training are characterized as follows:

(i) Critical investigative work requiring a sound knowledge of the fundamental laws, theories, principles and terminology of geophysics and the related sciences and having for its objective the discovery of new facts, the development of new theories or principles, or a new interpretation of known facts, leading to a revision of accepted theories and laws.

(ii) The application, in new ways, of known complex scientific laws and facts to the development of new techniques or devices.

(iii) The coordination and planning of a broad research program requiring the combined efforts of several specialists in different scientific fields, in which the leader of the program must have a thorough understanding of the scientific principles, procedures and potentialities of the scientific fields involved, and the ability to coordinate the activities of the various specialists.

(c) *Knowledge and training requisite for performance of duties.* The minimum amount of training required for the successful performance of the duties described in paragraph (b) of this section is the completion of a 4-year college course leading to a bachelor's degree in a college or university of recognized standing including a minimum of 30 semester hours credit in either geology, mathematics, physics, geophysics, engineering, or closely allied subjects, or any combination thereof. Such college courses include laboratory work (including the use of complex apparatus), lectures, recitations, seminars, and selected reading in various fields all given under competent instruction and guidance. Such curricula are planned and integrated so as to provide a sound and broad training in related scientific fields. Training in the fundamentals of various related scientific fields affords the necessary breadth of knowledge as well as an understanding of the inter-relationships of different fields. New advances in science flow from the combination of new knowledge, sometimes from widely separated fields. The justification for requiring a full 4-year college course for certain positions is that it is the only

known method by which a broad understanding of the fundamentals of various related fields may be acquired. Full recognition is also given to the importance of training in verbal facility and the development of facility in logical thinking and expression. The research scientist must be able to present the results of his work clearly and concisely both orally and in written form.

(d) *Method of obtaining basic knowledge and training.* Paragraphs (a)–(c) of this section contain statements of the minimum knowledge and training required to carry on successfully professional complex research work in the field of geophysics. The only method by which such knowledge and training may be acquired is by attending a college or university where competent instruction and guidance is available, where courses are arranged in a systematic progressive schedule and where adequate laboratory facilities and libraries are provided, and where objective evaluations are made of a person's progress in acquiring professional and scientific information.

(e) *Justification.* All people throughout the world today are conscious that they are living in a rapidly moving world and the people of the United States are particularly aware of the urgent need for fundamental research and developmental work in all scientific fields in order to safeguard and improve the Nation's security, health, and general welfare. The Congress has given recognition to the vital necessity for such scientific research and developmental work and has authorized, through appropriations, the spending of large sums of money for varied and important programs. These programs are carried on by the various departments and agencies of the Federal Government, and have resulted in very notable achievements in scientific research during World War II.

The advances in the various physical sciences, during World War II, have been outstanding and of major importance. This is especially true in the field of geophysics and many of the advances in the allied sciences have been useful in the field of geophysics. Further advances will depend on the number of highly qualified and properly trained geophysicists who are competent to explore the particular phase of the work on which a research problem is centered. Concurrent with these advances in the fields of science is the flow of new scientific knowledge from all fields, so that persons engaged in highly complicated scientific research in geophysics must of necessity possess the fundamental scientific knowledge characteristic of their own field and in addition that of certain allied fields in order that they may successfully attack those complex problems with which they are faced.

§ 24.36 *Junior Professional Assistant*—(a) *Educational requirements*—(1) *Metallurgist.* Metallurgists will conduct or assist in conducting scientific investigative, developmental or fundamental research work in metallurgy; collect, examine and interpret metallurgical data; design, construct, install or operate metallurgical equipment. These duties require a working knowledge of the basic laws, concepts, techniques, and terminology of recovery or process metallurgy which includes extractive processes such as grinding of ores, sedimentation, roasting, smelting flotation, leaching, crystallization, precipitation, and electrolysis of metallic salts and physical or adaptive metallurgy which includes adaptive processes such as casting, rolling, hammer forging, drawing, spinning, die-casting, welding, and heat treating. This work requires a knowledge of thermodynamics, stoichiometry, electrochemistry, mineralogy of ores, phase relationships in alloys, the effect of heat and forming processes on crystalline structure, X-ray analysis, microscopic metallography, and methods of testing ores, metals, and metal alloys. Applicants must have successfully completed one of the following:

(i) A full 4-year course, in a college or university of recognized standing, leading to a bachelor's degree in metallurgy or metallurgical engineering. This study must have included courses in metallurgical subjects consisting of lectures, recitations and appropriate practical laboratory work totaling at least 20 semester hours; or

(ii) Courses in metallurgical subjects, in a college or university of recognized standing, consisting of lectures, recitations, and appropriate practical laboratory work totaling at least 20 semester hours; plus additional appropriate experience or education, which when combined with the 20 semester hours in metallurgical subjects, will total 4 years of education and experience and give the applicant the substantial equivalent of the 4-year college course.

(iii) The following are types of experience which will be accepted in combination with education to complete the 4-year requirement:

(*a*) Subprofessional and higher grade laboratory work, production or manufacturing involving technical duties, and similar types of work which provide a means of obtaining a working knowledge of the theory and application of the scientific principles of a physical or natural science or of engineering.

(*b*) Experience in patent examining, or in abstracting, editing, or translating reports or scientific literature dealing with matters closely related to the field of metallurgy.

(*c*) Research experience in such fields as physics, chemistry or engineering which included the analysis of data and the preparation of reports.

(*d*) Metallurgical work of professional grade such as that described in the duties of the positions to be filled from the examination, or related work of a subprofessional grade.

(iv) In either subdivision (i) or (ii) of this subparagraph the courses must have included at least 3 of the following:

(*a*) Physical metallurgy; (*b*) metallurgy of iron and steel; (*c*) metallurgy of non-ferrous metals; (*d*) metallography; (*e*) mineral dressing; (*f*) electrometallurgy; (*g*) process metallurgy.

(2) *Geographer.* Geographers will perform or assist in performing professional work in the field of geography; perform related cartographic work including the compilation and the analyzing of geographic data; assist in studies and researches relating to industrial and commercial geography, soils, soil erosion and land utilization mapping, climatology, vegetation distribution, and allied fields; prepare reports on the geography (physical, economic, social, and political) of specified areas; and assist in the establishment and use of map collections. Applicants must have successfully completed one of the following:

(i) A full 4-year course, in a college or university of recognized standing, leading to a bachelor's degree. This study must have included or been supplemented by courses in geography consisting of lectures and recitations totaling at least 24 semester hours. Study in closely allied fields such as geology, archaeology, cartography, etc., may be included in the 24 semester hours of geography provided the applicant shows at least 15 hours in purely geographic subjects; or

(ii) Courses in geography, in a college or university of recognized standing, consisting of lectures and recitations totaling at least 24 semester hours; plus additional appropriate experience or education which when combined with the 24 semester hours in geography will total 4 years of education and experience and give the applicant the substantial equivalent of the 4-year college course. Study in closely allied fields such as geology, archaeology, cartography, etc., may be included in the 24 semester hours of geography, provided the applicant shows at least 15 hours in purely geographic subjects. The following are types of experience which will be accepted in combination with education to complete the 4-year requirement:

(*a*) Library or field research dealing with the collection and analysis of geographic of closely allied data.

(*b*) Assisting in editing, abstracting, or translating documents, scientific literature and preparing reports relating to geography, or closely allied fields such as geology, or meteorology, etc.

(*c*) Experience gained in such positions as geographic aid, scientific aid in geology, air intelligence specialist, or cartographer.

(*d*) Subprofessional or higher grade experience in the field of oceanography, nautical science, air navigation, and other related fields.

(3) *Textile technologist.* Textile technologists will conduct, or assist in conducting, scientific investigative, developmental, production, or fundamental research work in textile technology. These duties include work in such branches of textile technology as yarn and fabric manufacturing, processing, and utilization; textile chemistry; fiber technology; determination of the physical characteristics of textiles and textile fibers. All of these duties involve the collection, examination, and interpretation of scientific and operating data and require a knowledge of the scientific laws and concepts underlying textile processing, manufacturing, designing, and utilization. Applicants must

have successfully completed one of the following:

(i) A full 4-year course, in a college or university of recognized standing, leading to a bachelor's degree in textile technology. This study must have included courses in textile technology consisting of lectures, recitations and appropriate practical laboratory work totaling at least 20 semester hours; or

(ii) Courses in textile technology, in a college or university of recognized standing, consisting of lectures, recitations and appropriate practical laboratory work totaling at least 20 semester hours; plus additional appropriate experiences or education which, when combined with the 20 semester hours in textile technology, will total 4 years of education and experience and give the applicant the substantial equivalent of the 4-year college course. The following are types of experience which will be accepted in combination with education to complete the 4-year requirement:

(*a*) Subprofessional and higher grade laboratory work, production or manufacturing involving technical duties, and similar types of work which provide a means of obtaining a working knowledge of the theory and application of the scientific principles of a physical or natural science or of technology or engineering.

(*b*) Experience in patent examining, or in abstracting, editing, or translating reports or scientific literature dealing with textiles and related matters.

(*c*) Research experience in such fields as physics, chemistry, engineering, or biology, which included the analysis of data and the preparation of scientific reports.

(*d*) Technological work of professional grade, such as the duties of the position shown above, or professional and subprofessional work in related duties.

(4) *Archivist.* Archivists will analyze, evaluate, and appraise Government records for the purpose of determining which ones are of historical value. They may be responsible for classifying the documents and for preparing index cards containing a brief summary of the contents of the material. Their duties may also include reference and research work to locate information requested by specialists in various fields who are engaged in identifying, classifying and preserving documentary materials. Applicants must have successfully completed one of the following:

(i) A full 4-year course, in a college or university of recognized standing, including or supplemented by 12 semester hours in U. S. history and 18 semester hours in any one or in any combination of the following: (*a*) history; (*b*) political science; (*c*) sociology; (*d*) economics; (*e*) public administration; or

(ii) Courses in a college or university of recognized standing as described in subdivision (i) of this subparagraph; plus additional appropriate education or experience which, when combined with the 12 semester hours in U. S. history and 18 semester hours in the other above-mentioned subjects, will total 4 years of education and experience and give the applicant the substantial equivalent of the 4-year college course. The following are types of experience which will be accepted in combination with education to meet this requirement:

(*a*) Experience as an archivist in a Federal, State, church, business, or other archives.

(*b*) Experience as a records analyst engaged in the management and retirement of non-current records in a Government agency.

(*c*) Responsible experience in the Historical Records Survey.

(5) *Economist.* Economists will conduct elementary professional economic research, including the evaluation and briefing of expository data, the appraisal and compilation of statistical data, and the preparation of tentative economic reports on some phase of a major economic problem. Applicants must have successfully completed one of the following:

(i) A full 4-year course leading to a bachelor's degree, in a college or university of recognized standing, with 24 semester hours in economics and 3 semester hours in statistics.

(ii) Courses consisting of 24 semester hours in economics and 3 semester hours in statistics, in a college or university of recognized standing; plus additional appropriate experience or education which when combined with these courses, will total 4 years of education and experience and give the applicant the substantial equivalent of a 4-year college course. The following are types of experience which will be accepted in combination with education to complete the 4-year requirement:

(*a*) Progressively responsible clerical experience in the appraisal of economic data (not of a statistical nature), and the preparation of economic outlines, briefs and reports.

(*b*) Progressively responsible clerical experience in the appraisal of economic data, both expository and statistical; the compilation of appropriate statistical data; and the preparation of economic outlines, briefs and reports.

(6) *Agricultural economist.* Agricultural economists will assist in research or other scientific or professional works in the field of agricultural economics, applying basic economic laws and principles in connection with the collection of agricultural data and will assist in the preparation of reports on farm policies and on the production and distribution of agricultural commodites. These duties require a working knowledge of the basic principles, concepts and terminology of agricultural economics and a knowledge of the application of statistics to economic research. Applicants must have successfully completed one of the following:

(i) A full 4-year course, in a college or university of recognized standing, leading to a bachelor's degree in agricultural economics, or study leading to a degree in the closely allied fields of general economics, business administration, political science or sociology, including at least 12 semester hours in agricultural economics and 3 semester hours in statistics; or

(ii) Courses in agricultural economics in a college or university of recognized standing, consisting of lectures and recitations totaling 21 semester hours in agricultural economics and 3 semester hours in statistics; plus additional appropriate experience or education which, when combined with the 21 semester hours in agrictultural economics and 3 semester hours in statistics, will total 4 years of education and experience and will give the applicant the substantial equivalent of a 4-year college course. Study in the closely allied fields of general economics, political science, business administration (including marketing and transportation), economic geography, or sociology may be included in the 21 semester hours of agricultural economics, *Provided,* That the applicant shows at least 12 semester hours in purely agricultural economic subjects and 3 semester hours in statistics. The following types of experience will be accepted in combination with education to complete the 4-year requirement: Progressively responsible experience in the collection and preliminary analysis of statistical and narrative economic data in such agricultural fields as production, storage, transportation, marketing, distribution, consumption, prices and income.

(7) *Botanist.* Botanists will assist the planning and execution of field and laboratory work in botanical research or other scientific or professional work in the field of botany, including the making of observations, and the collection, examination and statistical analysis of data. They will assist in identification and description of plants and seeds, and the investigation of their distribution, habits of growth and economic value. These duties require a working knowledge of the basic principles, concepts and terminology of botany. Applicants must have successfully completed one of the following:

(i) A full 4-year course in a college or university of recognized standing, leading to a bachelor's degree with a major in botany.

(ii) Courses in botany in a college of university of recognized standing consisting of lectures, recitations and laboratory work totaling at least 20 semester hours; plus additional appropriate experience which when combined with the 20 semester hours in botany will total 4 years of education and experience and give the applicant the substantial equivalent of a 4-year college course. The following are types of experience which will be accepted in combination with education to complete the 4-year requirement:

(*a*) Subprofessional or professional laboratory work which provides a means of obtaining a working knowledge of the theory and application of the scientific principles of a botanical science.

(*b*) Experience in abstracting, editing, or translating reports or scientific literature in botany or closely related fields. Research experience in botany or related fields.

(*c*) Work in botany of a professional grade, such as described in the typical duties of the positions to be filled from this examination.

(*d*) Teaching botany.

(8) *Dairy husbandman.* Dairy husbandmen will assist in research or other

professional or scientific work in the breeding, nutrition and management of dairy cattle. These duties require a working knowledge of the basic principles, concepts and terminology of dairy husbandry, dairy animal nutrition and animal production. Applicants must have successfully completed one of the following:

(i) A full 4-year course in a college or university of recognized standing leading to a bachelor's degree with a major in dairy husbandry, or in animal husbandry including at least one course in dairy husbandry.

(ii) Courses in dairy husbandry and animal husbandry in a college or university of recognized standing consisting of lectures, recitations and laboratory work totaling at least 20 semester hours plus additional appropriate experience or education which when combined with the 20 hours in dairy and animal husbandry will total 4 years of education and experience and give the applicant the substantial equivalent of a 4-year college course. The following are types of experience which will be accepted in combination with education to complete the 4-year requirement:

(*a*) Responsible experience in the breeding, nutrition and management of a large pure bred or commercial dairy herd.

(*b*) Responsible experience in the breeding, nutrition and management of a college or experiment station dairy herd.

(9) *Dairy manufacturing specialist.* Dairy manufacturing specialists will assist in performing research or other professional or scientific work in the development and introduction of improved methods in the manufacture or processing of milk and milk products. These duties require a working knowledge of the principles, concepts and terminology of dairy practice, milk testing, the manufacture of dairy products, and dairy economics. Applicants must have successfully completed one of the following:

(i) A full 4-year course in a college or university of recognized standing leading to a bachelor's degree with a major in dairy manufacturing, or;

(ii) Courses in dairy manufacturing in a college or university or recognized standing consisting of lectures, recitations and laboratory work totaling not less than 20 semester hours plus additional appropriate experience or education which when combined with the 20 semester hours in dairy manufacturing will total 4 years of education and experience and give the applicant the substantial equivalent of a 4-year college course. The following are types of experience which will be accepted in combination with education to complete the 4-year requirement: Responsible experience in the following:

(*a*) Laboratory analysis and research of milk and milk products.

(*b*) State or municipal inspection of creameries.

(c) Butter maker, cheese maker, ice cream maker or processor of whole milk in a large commercial milk plant.

(10) *Farm management supervisor.* Farm management supervisors advise on or perform technical or other professional work in the field of farm management involving the extension of credit and the supervision of operators of family-type farms. The duties of this position require a practical working knowledge of the basic principles, concepts, and terminology of farm management, agricultural credit, and crop and livestock management. Applicants must have successfully completed one of the following:

(i) A full 4-year course, in a college or university of recognized standing, leading to a bachelor's degree in farm management; in other fields within agricultural economics; in agronomy, animal husbandry, agricultural engineering, horticulture, agricultural education; or in general agriculture; or

(ii) Courses in farm management or one of the other related agricultural sciences acceptable toward a degree in agriculture in a college or university of recognized standing, and consisting of lectures, recitations, and laboratory work, totaling at least 40 semester hours and including at least one course in farm management and the balance of the semester hours in at least three of the following groups:

(*a*) Agricultural economics.
(*b*) Soils.
(*c*) Crops.
(*d*) Animal, dairy, or poultry husbandry.
(*e*) Feeds and feeding or animal nutrition.
(*f*) Agricultural engineering.

plus additional appropriate experience or education which, when combined with the 40 semester hours of course work outlined above, will total 4 years of education and experience and give the applicant the substantial equivalent of a 4-year college course.

(11) *Plant physiologist.* Plant physiologists will assist in the performance of research or other scientific or professional work in plant physiology, including studies of the effect of toxic substances, soil and nutritional conditions upon plant growth and maturity and of conditions affecting the storage life of fruits and vegetables. The duties of this position require a working knowledge of the principles, concepts and terminology of botany, plant science and plant physiology. Applicants must have successfully completed one of the following:

(i) A full 4-year course, in a college or university of recognized standing leading to a bachelor's degree with a major in botany or plant science with a minimum of 10 semester hours of plant physiology.

(ii) Courses in plant science totaling at least 20 semester hours including at least 10 semester hours of plant physiology in a college or university of recognized standing consisting of lectures, recitations and laboratory work; plus additional appropriate education or experience which when combined with the 20 semester hours in plant science will total 4 years of education or experience and give the applicant the substantial equivalent of a 4-year college course. The following are types of experience which will be accepted in combination with education to complete the 4-year requirement:

(*a*) Subprofessional or professional laboratory work which provided a means of obtaining a working knowledge of the theory and application of the scientific principles of a natural science.

(*b*) Experience in abstracting, editing or translating reports or scientific literature in plant physiology or closely related fields.

(*c*) Research experience in plant physiology or related fields.

(*d*) Work in plant physiology of a professional grade, such as described in the duties of the positions to be filled from this examination.

(b) *Restriction of certification for highly technical positions.* For positions involving highly technical research, design or development, or similar functions, certification may be restricted to eligibles who show the successful completion of a full college course in the appropriate option.

(c) *Duties.* The options selected for the current Junior Professional Assistant examination are of highly specialized nature, having to do with original research, design or development or other functions of comparable scope or difficuty. Appointees perform professional work in the appropriate specialized field or option in connection with (1) the study, collection, investigation, classification, analysis, preservation and interpretation of data, documents, exhibits or publications in one or more of the social or physical sciences, or (2) a wide variety of projects requiring the use or development of technical equipment, laboratory apparatus, chemical compounds and solutions, other scientific instruments, or research methods and devices.

(d) *Knowledge and training requisite for performance of duties.* The Junior Professional Assistant positions are at the entrance level to a career in the scientific and professional service. Appointees must have an understanding of the fundamental important basic principles, methods and skills required in the appropriate scientific or professional field, and they must be equipped with considerable specialized knowledge if they are to deal in an effective manner with the varied and diversified problems to be encountered. This may only be obtained through instruction and training where an adequate comprehensive and preferably an exceptional background and foundation in the appropriate scientific or professional field is furnished. A thorough knowledge of the literature of the scientific or professional field is essential together with the ability to understand and make use of that which has been written. Incumbents must, to a marked degree, be fitted to advance into more responsible, more technical and more exacting positions.

(e) *Method of obtaining basic knowledge and training.* The professional and scientific knowledge and training, of the level and extent required for the proper performance of these duties, can be obtained only by attending and completing major study in the appropriate option at a college or university of recognized standing, where a full staff of competent instructors and adequate library, laboratory and other research facilities are

available and where suitable standards regarding completeness of program and attainment of proficiency may be enforced.

§ 24.39 *Mathematician, GS–1520, all grades where the duties involve highly complicated or fundamental scientific research or similar difficult scientific duties*—(a) *Educational requirement.* The successful completion of a full four-year course in an accredited college or university leading to a bachelor's degree. This study must have included courses in mathematics totaling at least 24 semester hours which were acceptable for credit toward meeting the requirements of a major in mathematics and which included at least five of the following: differential calculus, integral calculus, theory of equations, vector analysis, statistics, higher algebra (beyond elementary college algebra), differential equations, advanced differential calculus, advanced integral calculus, any other advanced course in mathematics for which one of the above is prerequisite.

(b) *Duties.* The duties of these positions are: performing, conducting, planning, or directing mathematical work involving calculations and computations incident to investigative, developmental and research work in the scientific fields such as engineering, physics, astronomy, etc.; collecting, examining and interpreting scientific data; coordinating assignments and programs; planning mathematical procedures for scientific field trips; preparing reports and manuals, and editing or preparing articles for publication. Those positions requiring the sucessful completion of four years of college or university training are characterized as follows:

(1) Critical investigative work requiring a sound knowledge of the fundamental laws, theories, principles and terminology of mathematics and related sciences and having for its objective the development of new or improved methods of analysis, the development or extension of new theories or principles, or a new interpretation of known facts, leading to a revision of accepted theories and laws.

(2) The application in new ways of known complex mathematical laws and facts to the development of new techniques or devices.

(3) The coordination of a broad research program requiring the combined efforts of several specialists in different scientific fields. The leader of such a program must have an understanding of the mathematical principles, procedures and potentialities of the scientific fields involved, and the ability to coordinate the activities of the various specialists.

(c) *Knowledge and training requisite for performance of duties.* The urgent need for fundamental research and developmental work in all scientific fields in order to safeguard and improve the nation's security, and general welfare is apparent. The Congress of the United States has recognized the vital necessity for such scientific research and developmental work and has authorized through appropriations the spending of large sums of money for varied and important research programs. These programs are carried on by the various departments and agencies of the Federal government and have resulted in very notable achievements in scientific research during World War II.

The advances in the various sciences during World War II have been outstanding and of major importance. Especially in the fields of physical science and of engineering have these advances been dependent upon and interrelated to mathematics in all its branches. Mathematics is an indispensable tool in expressing basic laws and concepts in these fields, in interpreting experimental data, in extending old or establishing new concepts of matter and energy, and in establishing basic hypotheses for experimental work in new fields. Further advances in the physical sciences and in engineering will depend on the number of highly qualified and properly trained mathematicians who are competent to explore from a mathematical standpoint the particular field in which a research problem is centered. Concurrent with these advances in the fields of science is the flow of new scientific knowledge, so that persons engaged in highly complicated mathematical computations in a specialized field must of necessity possess the fundamental knowledge characteristic of mathematics and in addition that of pertinent allied fields in order that they may successfully attack complex problems.

Private industry requiring mathematicians for research positions has long recognized the necessity for broadly trained men for professional mathematics positions who are well grounded in the fundamentals of the sciences involved. They are required to have education represented by at least the attainment of a bachelor's degree in mathematics and, in many cases, a higher degree with specialization in a particular field is demanded.

(d) *Method of obtaining the basic knowledge and training.* Paragraphs (a)–(c) of this section contain statements of the minimum knowledge and training required to carry on sucessfully professional research work in the field of mathematics. The only method by which such knowledge and training may be acquired is by attending a college or university where competent instruction and guidance are available, where courses are arranged in a systematic progressive schedule and where adequate laboratory facilities and libraries are provided, and where objective evaluations are made of a person's progress in acquiring professional and scientific information.

§ 24.40 *Instructor (Meteorology), GS–1710–7–12*—(a) *Educational requirement.* All applicants must have successfully completed a resident course of study in Weather Forecasting Theory at a military school or college, or a curriculum of study which included or has been supplemented by at least 20 semester hours of study consisting of laboratory work in synoptic meteorology and forecasting, and fundamental courses in synoptic and dynamic meteorology at a college or university of recognized standing.

(b) *Duties.* With varying degrees of responsibility commensurate with the grades indicated, to instruct military personnel in one or more of the following subjects: Surface Charts and Weather Forecasting, Auxiliary Charts and Diagrams, Air Mass Analysis, Synoptic Meteorology, Dynamic Meteorology, Limited Data Analysis, World Geography and Climatology, Extended and Long Range Forecasting, Weather Station Operation, Staff Weather Subjects, Oceanography, Applied Micro-Meteorology, Tropical Meteorology, Anomalous Radar Propagation. In-Flight Weather Observation, and other related subjects, in accordance with a definite instructional program, or prescribed course of study; to prepare or assist in preparing material for instruction; and to perform related duties as assigned.

(c) *Knowledge and training requisite for performance of duties.* The advances in the field of meteorology have been largely the result of the application of the laws and concepts of the physical sciences to the solution of the problems of meteorology. A knowledge of the pertinent physical sciences is indispensable in interpreting observational data, in designing and improving the instruments used in making scientific observations, and in extending old or developing new concepts and theories used in forecasting weather. Further advances in meteorology must depend on the number of highly qualified and properly trained meteorologists who are competent to explore the field and make further applications of the new developments in the physical sciences to the science of meteorology. Instructors, therefore, must be fully qualified to teach such technical subjects to those who will be engaged in gathering and interpreting meteorological data. In order to perform successfully these Instruction duties the applicant must have a knowledge and training in weather forecasting at the full professional level. This knowledge and training can be obtained in either of the followings ways: (1) Through four years of experience in meteorology at either a professional or subprofessional level supplemented by the successful completion of a resident course in Weather Forecasting Theory, or (2) Through the successful completion of a four year college course with a major in the physical sciences such as physics, meteorology, mathematics, chemistry, or engineering, including or supplemented by the successful completion of a course of training in Weather Forecasting Theory. It is not believed that a knowledge of weather forecasting at the full professional level can be acquired without at least some formal training at the professional level. In order to complete a course in Weather Forecasting Theory a knowledge of physics and mathematics is necessary. The necessary background to weather forecasting cannot be obtained without at least some formal educational training in these subjects.

(d) *Method of obtaining basic knowledge and training.* Paragraphs (a)–(c) of this section contain statements of the minimum knowledge and training required to carry on successfully profes-

sional work in the field of meteorology. The only method by which such professional knowledge and training may be acquired is by attending a college or military school or university where competent instruction and guidance are available, where courses are arranged in a systematic progressive schedule and where adequate laboratory facilities and libraries are provided, and where objective evaluations are made of a person's progress in acquiring professional and scientific information.

§ 24.41 *Human Biologist, GS–14*—(a) *Educational requirement.* Applicants must show the successful completion of a full college course in a college or university of recognized standing with courses totaling at least 20 semester hours credit in either (1) physiology or, (2) a combination of biophysics, biochemistry and physiology which includes at least 10 semester hours credit in physiology.

(b) *Duties.* The human biologist plans, directs and coordinates research programs in environmental biology to determine the kind and degree of man's physiological responses to all variations of environmental stresses to which he may be subjected upon a world wide scale as these responses are related to his protection against or adaptation to such stresses. Directs the activities of scientists, working principally in research in biophysics, biochemistry, physiology and anthropology to determine man's physiological responses to varying kinds and degrees of environment and how these are modified by such factors as occupation, racial background, anthropological type, age, preconditioning to extreme environmental changes, mental attitudes, etc., to determine the capacities and limitations of the human body in coping with adverse environments, the causes and effects of the environment upon man and possible compensations. Coordinates research programs under his direction with those being conducted elsewhere within the organization to determine the clothing, clothing assemblies, and other specialized types of equipment which will provide maximum protection against and resistance to destructive environmental forces and to analyze and evaluate the elements of environment and develop formula for their correlation with the physical and human biological problems being studied.

(c) *Knowledge and training requisite for performance of duties.* The duties of this position call for research in environmental effects on a much greater scale than has been done previously. The incumbent of the position must have a broad, extensive background in physiology or in a combination of physiology, biology, biochemistry and biophysics. The training must have been such as to demonstrate ability to develop and direct research programs of sound, practical scope.

(d) *Method of obtaining basic knowledge and training.* Paragraphs (a)–(c) of this section contain statements of the minimum knowledge and training required to carry on successfully the duties of the position. The only method by which such knowledge and training may be acquired is by attending a college or university where competent instruction and guidance is available, where courses are arranged in a systematic progressive schedule and where adequate laboratory facilities and libraries are provided and where objective evaluations are made of a person's progress in acquiring professional and scientific information.

§ 24.42 *U. S. Coast Guard Academy*—(a) *Instructor of Electrical Engineering, GS–1710–11*—(1) *Educational requirement.* Applicants must have successfully completed a 4-year course of study leading to a bachelor's degree in engineering or physics in a college or university of recognized standing.

(2) *Duties.* The appointee to this position will instruct cadets at the U. S. Coast Guard Academy in electrical engineering including alternating and direct current machines and circuits and engineering electronics. Under the supervision of the head of the engineering department he will prepare daily assignments, using as guides the assigned textbook, reference texts, Coast Guard instructions and manufacturers' and other technical publications. He will give classroom and laboratory instruction and prepare and grade examinations. He will be required to keep himself informed of the latest developments in his technical field and in education methods so that cadets may receive a knowledge of fundamental concepts and techiques in electrical engineering and develop analytical ability which will enable them to perform the duties of commissioned officers of the Coast Guard.

(3) *Justification of educational requirement.*

NOTE: Justification for Instructor of Electrical Engineering GS–11 is the same as the justification for Teacher, All Grades (see § 24.12).

(b) *Instructor of Mathematics, GS–1710–11*—(1)—*Educational requirement.* Applicants must have successfully completed a 4-year course of study leading to a bachelor's degree with study in mathematics or civil engineering in a college or university of recognized standing.

(2) *Duties.* The appointee to this position will instruct cadets at the U. S. Coast Guard Academy in mathematics and surveying and related subjects including plane and spherical trigonometry, analytical geometry, plane and hydrographic surveying, differential and integral calculus and analytical mechanics. Under the supervision of the heads of the departments of mathematics and civil engineering he will prepare daily assignments using as guides the assigned textbook, reference texts, Coast Guard instructions and manufacturers' and other technical publications. He will give classroom instruction and prepare and grade examinations. He will be required to keep himself informed of the latest developments in his technical field and in educational methods so that cadets may receive a knowledge of fundamental concepts and techniques and develop analytical ability which will enable them to perform the duties of commissioned officers in the Coast Guard.

(3) *Justification of educational requirement.*

NOTE: Justification for Instructor of Mathematics, GS–11 is the same as the justification for Teachers, All Grades (see § 24.12).

§ 24.43 *Archeologist, GS–193–5–11*—(a) *Educational requirement.* (1) Applicants must have completed a four-year course of study in a college or university of recognized standing, including or supplemented by 20 semester hours in anthropology including courses that are acceptable toward a major in anthropology. At least one course in American archeology is required and the training must also have included or been supplemented by at least three months of archeological excavations experience under the direction of a recognized professional archeologist, or

(2) Applicants must have completed 20 semester hours in anthropology including courses that are acceptable toward a major in anthropology. At least one course in American archeology is required. In addition, they must have had three years of education or appropriate experience which when combined with the specialized study described above will give them the equivalent of a four-year college course. This education or experience must have included or been supplemented by at least three months of archeological excavations experience under the direction of a recognized professional archeologist.

(b) *Duties.* Archeological positions in the Federal service are highly specialized. They involve technical aspects of archeological excavations, collection of museum specimens, and dissemination of information in the archeological field. They also involve the coordination of archeological research with various educational programs. Specific duties performed by archeologists include: Archeological excavations, repair and stabilization of ruins, classification and cataloging museum specimens, preparation of reports on archeological subjects, performance of research in archeological problems, and coordination of the activities of the Federal agency with the efforts of Federal, state, and local organizations interested in preservation of important archeological and historical areas.

(c) *Knowledge and training requisite for the performance of duties.* In order to preserve, care for, and interpret the archeological resources of the nation, the archeologist must have a thorough knowledge of archeology and related fields and an understanding of field and laboratory research. The archeologist, in order to perform professional duties satisfactorily, must have a knowledge of all technical aspects of the work. He must be able to secure and present to Federal agencies and to the American public authentic and usable information concerning archeological resources.

(d) *Method of obtaining basic knowledge and training.* The only method known by which persons may obtain the basic knowledge required to perform adequately the duties of a professional archeologist is through training secured in a college or university of recognized standing. The necessary knowledge cannot be gained simply through experience, but requires formal training in method, and formal and comprehensive

review under supervision of the principal reports in the field of American Archeology. It also requires specialized and supervised examination of collections of artifacts only available in institutions of learning where courses in the subject are regularly given. Unless an archeologist is properly trained he may do irreparable damage to the resources under consideration.

§ 24.44 *Psychologist (Personal Counselor), GS–180–11, Veterans' Administration*—(a) *Educational requirement.* Applicants must have successfully completed the following courses in a college or university of recognized standing:

(1) Two courses in abnormal psychology, clinical psychology, mental hygiene, psychopathology, personality or psychology of adjustment.

(2) One course in clinical techniques including individual testing, interviewing, or the case-study method.

(3) One course in differential psychology or tests and measurements (educational, vocational, psychological, personality, attitude) or statistics (psychological or educational).

(4) A total of six additional courses composed of any combination of the courses mentioned above and courses in human biology, neurology, physiological psychology and general, experimental, child, adolescent, social, animal, systematic or industrial psychology. Completion of all requirements for the Ph. D. degree in psychology except for a thesis will be accepted as meeting this minimum educational requirement.

(b) *Duties.* Psychologists (Personal Counselor) counsel veterans who during the utilization of Veterans' Administration services for the selection of a vocational objective or in the course of vocational training have personal problems which interfere in their successful vocational rehabilitation. Psychologists (Personal Counselor) confer with Vocational Advisers and Vocational Rehabilitation Training Officers in furthering the vocation rehabilitation of veterans with maladjustments; assist veterans with personal and social maladjustments, using the appropriate therapeutic techniques, with the aim of eliminating their difficulties wherever possible; detect those veterans with serious mental or emotional disturbances and refer them to Veterans Administration Mental Hygiene Clinics or authorized private mental hygiene clinics.

(c) *Knowledge and training requisite for performance of duties.* In order to adequately counsel maladjusted veterans, the Psychologist (Personal Counselor) must have had a specialized technical background of education and experience in the field of psychology. This background should have provided a thorough knowledge of the principles underlying behavior and of psychological and counseling techniques. The Psychologist (Personal Counselor) must possess such technical knowledge in order that he may counsel veterans in the effort to eliminate the problems which have been blocking their vocational adjustment, thereby assisting in their total rehabilitation. Since Psychologists (Personal Counselor) function without professional direction from psychiatrists, they must have sound preparation which will enable them to make decisions as to which maladjusted veterans, had they not been forced into difficult military or combat situations, would have adjusted to civilian situations with a minimum of difficulty and which ones, because of the serious nature of their social and personal problems, should be referred to mental hygiene clinics for more intensive and extensive treatment.

(d) *Method of obtaining basic knowledge and training.* The only method known by which persons may obtain the basic knowledges and skills required to perform the duties of this position is through the training given at recognized colleges and universities. Through such training, under instructors having extensive specialized training, the student is able to acquire a knowledge of psychological principles and techniques. Under close professional supervision, he learns the psychological techniques appropriate for dealing with the various types of maladjusted individuals either through close observation of, or actual practice with, clinical cases or through study of a wealth of clinical case material. Such scientific knowledge and skill cannot be acquired and integrated through individual study because the necessary supervision and facilities are not available. The requisite studies represent information from a variety of fields, and the student cannot cover the material except through supervised progressive courses of study designed to provide a comprehensive understanding of the subjects.

§ 24.45 *Metallurgist, GS–1321–7–15 (positions involving highly complicated or fundamental scientific research or similar difficult scientific duties)*—(a) *Educational requirement.* Certification for these positions will be restricted to those eligibles who show the successful completion of a four-year course in a college or university of recognized standing, leading to a bachelor's degree in metallurgy or metallurgical engineering. This study must have included courses in metallurgical subjects consisting of lectures, recitations, and practical laboratory work totaling at least 20 semester hours.

(b) *Duties.* The duties of these positions are as follows:

(1) Critical investigative work requiring a sound knowledge of the fundamental principles, theories, practices, and terminology of metallurgy and related sciences and having for its objective the development or extension of new theories or principles, or a new interpretation of known facts leading to a revision of accepted theories and practices.

(2) The application of the known laws and facts of the physical sciences and principles of metallurgy to the development of new processes or products.

(3) The coordination of a broad research program requiring the combined efforts of several specialists in different scientific fields. The leader of such a program must have an understanding of the metallurgical principles, practices, and potentialities of the scientific fields involved, and the ability to coordinate the activities of the various specialists.

(c) *Knowledge and training requisite for performance of duties.* The advances in metallurgy have been dependent upon and related to the advances made in the various physical sciences. A knowledge of the principles and theories of metallurgy and of the related physical sciences, particularly physics and chemistry, is indispensable in formulating new concepts in metallurgy, in interpreting experimental data, in establishing new processes, and in developing new products. Further advances in metallurgy will be dependent upon the number of highly qualified and properly trained metallurgists who are competent to explore the field and are able to bring new scientific knowledge or established scientific concepts to bear on the problems met in research. Consequently those engaged in highly complicated fundamental research or similar difficult scientific duties in metallurgy must of necessity possess a fundamental knowledge of metallurgy, chemistry, physics, mathematics, and in addition that of pertinent allied fields in order that they may successfully attack complex problems. Private industry using metallurgists for research positions has long recognized the necessity for broadly trained men for professional metallurgist positions who are well grounded in the fundamentals of the related sciences. They are required to have education represented by at least the attainment of a Bachelor's degree in metallurgy, and in many cases, a higher degree with specialization in a particular field is demanded.

(d) *Method of obtaining basic knowledge and training.* The above are statements of the minimum knowledge and training required to carry on successfully professional research work in the field of metallurgy. The only method by which such knowledge and training may be required is by attending a college or university where competent instruction and guidance are available, where courses are arranged in a systematic progressive schedule, and where adequate laboratory facilities and libraries are provided, and where objective evaluations are made of a person's progress in acquiring professional and scientific information.

§ 24.55 *Range Ecologist, GS–454–7–12 (positions involving highly technical or fundamental scientific research, design, or development, or similar complex scientific duties)*—(a) *Educational requirement.* Applicants must have successfully completed a full 4-year course in a college or university of recognized standing, with major study in plant ecology, botany, range management, agronomy, or animal husbandry, plus responsible and successful experience in research or technical work.

(b) *Duties.* Persons appointed as range ecologists will perform such duties as planning and conducting research and investigations, primarily to ascertain ways and means of maintaining, improving, or reestablishing vegetation on range lands by improved range management methods; determining plants best suited to reseeding; developing reseeding and planting methods best

adapted to range conditions in the area, and proper grazing management of reseeded stands. In all grades and options, the duties are essentially and preponderantly research in nature.

(c) *Knowledge and training requisite for performance of duties.* In order to perform the research duties involved, appointees must have had sound training in the basic sciences pertaining to their field. This can be acquired only through the successful completion of appropriate college courses in which the student receives competent instruction and guidance in the technical and theoretical subjects that he will have to apply in his professional field.

§ 24.56 *Research Forester, GS–461–5–15 (all options except Fire Research and Forest Influences)*—(a) *Educational requirement.* Applicants must have successfully completed a full 4-year course of study in an accredited college or university leading to a bachelor's or higher degree with major study in forestry, forest engineering, range management, wildlife management or a closely related subject-matter field. This course of study must have included at least 20 semester hours of course-work in forestry with course-work which dealt specifically with the following subjects: silviculture, forest management, forest protection, forest economics, forest utilization and either (1) range management, (2) wildlife management, (3) forest engineering or (4) forest influences.

(b) *Duties.* Research Foresters advise on, administer, supervise or perform professional and scientific research work in connection with the development of improved methods and practices followed in managing, protecting and utilizing the resources of the forests and the forest lands. This work involves the discovery and interpretation of the principles and facts upon which rest the full productive use of the forests and the forest lands.

(c) *Knowledge and training requisite for performance of duties.* The duties of these positions cannot be performed without a sound basic knowledge of the fundamental biological and plant sciences and of the basic physical and mathematical sciences and specific training in forestry. These duties require a most exacting and detailed knowledge and training. Appointees must have the ability to apply their professional and scientific knowledge to their work in order to solve specific problems, interpret and apply the results of research, both in the field of forestry and in related fields of science, and to do research in forestry. The knowledge and training required can only be acquired through the successful completion of a directed course of study in an accredited college or university which has scientific libraries, well-equipped laboratories and thoroughly trained instructors, gives expert guidance and evaluates progress competently.

§ 24.57 *Social worker (child welfare), GS–185–7–9–11*—(a) *Educational requirement.* Applicants must have completed, in a college, university, or school of social work of recognized standing, two courses in social case work, theory and principles, 500 hours of supervised field work in social case work and six additional courses in any of the following: Child welfare, juvenile delinquency, probation and parole, psychiatric social work, medical social work, social legislation, labor problems, social group work, community organization, public welfare administration, or social research.

(b) *Duties.* Social workers (child welfare) assist children who are brought to the attention of child welfare agencies because of behavior problems, delinquency, neglect, or dependency. They make social studies of the child, his family, and community, working them out. Child welfare workers work with the child, his family, and community forces in facilitating the adjustment of the child in his own home. When circumstances within the child, the home, or the community make it necessary for the child to leave his home, the child welfare worker interprets this to the child and his family in order to gain acceptance of a plan of foster care or group care, as the needs of the child indicate. After placement, work with the child and his family is continued and is directed toward a modification which will enable the child to return to his home and community.

(c) *Knowledge and training requisite for performance of duties.* Social workers (child welfare) must have skill in applying the principles and methods of social case work. They must be able to establish constructive relationships with children and adults under difficult circumstances and exercise judgment and skill in assisting them to use their capacities to the fullest extent. They must have an understanding of the meaning of behavior and a knowledge of personality problems. A good understanding of family relationships is required as is knowledge of the social, legal, and economic aspects of child placement.

(d) *Method of obtaining basic knowledge and training.* The only method known by which persons may obtain the basic knowledge required to perform adequately the duties of a social worker (child welfare) is through training in social work. In such training, the student receives competent instruction in the technical subject which must be applied—social case work theory and principles, patterns and implications of behavior, and community forces as they affect individuals. In the field work experience where the student works in a social agency with a limited number of selected cases, theory and practice are integrated. The scientific knowledge and skill cannot be acquired by individual study because the necessary facilities and supervision are not available. Requisite studies represent information from such a variety of fields that an individual cannot cover the material except through the careful correlation of directed classroom study and reading with the supervised field work.

§ 24.60 *Archivist GS–1420–7–13 (positions involving specialized archival work of highly technical character)*—(a) *Educational requirement.* Applicants must have successfully completed a full 4-year course in a college or university of recognized standing, including or supplemented by 12 semester hours in United States History and 18 semester hours in any one or any combination of history, political science, sociology, economics, and public administration.

(b) *Duties.* Persons appointed to these positions will be responsible for reference services involving old documents; appraising the historical or research value of documents; consultative services to scholars; scholarly historical research of a different nature.

(c) *Knowledge and training requisite for performance of duties.* For the proficient performance of these specialized duties, the incumbent must have a good knowledge of the social sciences, particularly United States History.

(d) *Method of obtaining basic knowledge and training.* The knowledge and training required for the performance of the duties specified in paragraph (b) of this section can be obtained only by attending and completing courses in a recognized college or university.

§ 24.61 *Microbiologist, GS–403–7–13 (positions involving highly technical research, design, or development, or similar functions)*—(a) *Educational requirement.* Applicants must have successfully completed a full 4-year course in a college or university of recognized standing, leading to a degree with major study in microbiology, bacteriology, biology, or biochemistry. This study must have included courses consisting of lectures, recitations, and appropriate practical laboratory work totaling at least 20 semester hours in either microbiology or bacteriology or any combination of these; or any combination of microbiology, bacteriology, biology, and biochemistry totaling 20 semester hours which includes at least 10 semester hours in microbiology or bacteriology or in both.

(b) *Duties.* Appointees investigate the bacteriology of foods, including the categories of bacteria, molds, and fungi. Devise technical methods for preventing the spoilage of foods by microorganisms and conduct research to determine the fundamental microbiologic processes responsible for spoilage. Develop details of processing and storing foods which will prevent their bacteriologic contamination. Devise rapid methods of checking the rate of growth of such organisms in foods used by the Army, and incorporate these methods into bacteriologic techniques used in the field and overseas. Carry out microbiologic examination of typical samples of Army food that has been stored under diverse environmental conditions, and may appraise quality as well as nutritional value based on the findings. Keep informed on all phases of research in microbiology conducted under contract with academic institutions, and may advise concerning the initiation and continuation of microbiological research projects. Aid in applying to the planning of rations all technical information obtained from many organizations engaged in microbiologic and bacteriologic research.

(c) *Knowledge and training requisite for performance of duties.* The science of microbiology as the term is used in these requirements indicates the study and habits of bacteria, yeasts, and molds, and the effect of these organisms on food. Such study involves investigation of the physical and chemical changes that accompany the growth and development of the various species of bacteria, yeasts, and molds and therefore requires a basic knowledge of the related sciences of biology, chemistry, and physics. The laboratory techniques of these latter sciences, as well as those used in microbiological investigation, are necessary in order to solve the problems which arise. Ability to carry out basic research projects and thorough knowledge of recent advancements in the field of microbiology are required.

(d) *Method of obtaining basic knowledge and training.* The specialized and technical knowledge required for the successful performance of the duties listed in paragraph (b) of this section can be obtained only through attendance at a college or university of recognized standing which has the necessary competent instruction staff in these subjects and has the necessary laboratory facilities and library which are necessary for the acquisition of training in these subjects. It is recognized that, in specialized subjects such as microbiology, no other source of obtaining such basic information is available.

§ 24.62 *Nutritionist, GS–493–9–13 (positions involving highly technical research, desgin, or development, or similar functions)*—(a) *Educational requirement.* Applicants must have successfully completed a full 4-year course, in a college or university of recognized standing, leading to a degree, with major study in nutrition, biochemistry, or physiology. This study must have included courses in nutrition, biochemistry, or physiology consisting of lectures, recitations, and appropriate practical laboratory work totaling at least 20 semester hours.

(b) *Duties.* Investigates the nutritional values of foods in relation to adequate rations for the armed services and for civilian feeding programs. In this connection may carry out, or supervise, work relating to the quantities of various nutrients found in foods, their summation and correspondence with the quantities required for the maintenance of health and efficiency. May be concerned with the food supply indigenous to foreign countries, and with devising feeding programs based on those and other supplies. Conducts field tests of rations in order to determine their adequacy in various stages of development. Is closely informed on all phases of nutritional research conducted under contract with academic institutions, and may advise concerning the initiation and continuation of nutritional research projects. Aids in applying to the planning of rations all technical information obtained from many organizations engaged in nutritional, biochemical, and physiological research. May assist in instruction of students in appropriate subject.

(c) *Knowledge and training requisite for performance of duties.* These positions are characterized by investigation in the fields of nutrition, which subject is dependent upon the biochemical and physiological aspect of foods and their effects upon human beings and animals. Therefore, incumbents must possess a knowledge of either biochemistry, physiology, or nutrition. Further, incumbents must have aptitude for and training in the methods of original research, coupled with scientific curiosity, ability to carry on and discover new relationships between food and their components and animal organisms. In order to properly conduct such research it is necessary that applicants have a comprehensive basic science background in chemistry, mathematics, etc. They must also have specialized training or experience in either nutrition, biochemistry, or physiology.

(d) *Method of obtaining basic knowledge and training.* The field of nutrition is a highly specialized field which is dependent upon basic knowledge of biochemistry and physiology. In this highly specialized science it is impossible to acquire the necessary advance chemistry or physiology necessary for performance of these duties outside of an educational institution which gives special training in these sciences. The intricate and specialized nature of various knowledges required for these positions, the necessity for other basic sciences in conjunction with these sciences are such that it is universally recognized that they cannot be obtained outside the medium of formal education. Private industry, as well as educational institutions, usually requires much more than is hereby being requested. Very often such institutions require a doctor of philosophy degree. In view of this, it can be seen that the necessary specialized skills cannot be obtained except through an educational institution giving the specialized courses specified in the educational requirement.

§ 24.63 *Physiologist (Human), GS–413–7–15 (positions involving highly technical research, design, or development, or similar difficult scientific functions)*—(a) *Educational requirement.* Applicants must have successfully completed a full 4-year course in an accredited college or university leading to a bachelor's degree, with major study in physiology. This study must have included courses totaling at least 20 semester hours in physiology or in any combination of 20 semester hours of biology, biochemistry, and physiology, which has included at least 6 semester hours in physiology.

(b) *Duties.* Performs research in human physiology, and in animal physiology as related to humans, through laboratory and clinical investigations. In the higher grades, acts as consultant and furnishes expert advice to the agency in which employed and to other Federal agencies.

(c) *Knowledge and training requisite for the performance of duties.* In order that the appointee may successfully perform the professional duties of physiologist, it is necessary that he have a basic knowledge of the physical and biological sciences and have scientific training in physiology. The specific knowledges of physiology, biochemistry, and biology must be augmented with more generalized scientific information in chemistry, mathematics, and physics. As appointees will be required to perform research in physiology, they must have aptitude and training in the methods of original research, together with the ability to discover and interpret new relationships in physiology. They must have the ability to present clear and accurate reports of their scientific work.

(d) *Method of obtaining basic knowledge and training.* These positions are research in character and the duties require that incumbents be thoroughly trained in the field of physiology and the related sciences. The only place in which the required knowledges and training may be obtained is in accredited colleges in which adequate courses of instruction have been developed, which have well equipped laboratories and thoroughly trained instructors, and in which the training is so organized and progress so evaluated as to insure adequate training in the field of physiology.

§ 24.64 *Aeronautical Research Scientist, GS–861–7–15*—(a) *Educational requirement.* Applicants must have successfully completed a standard professional curriculum leading to a bachelor's degree in a college or university of recognized standing, with major study in an appropriate field of engineering, physical science, mathematics, or other field of science closely related to the duties of positions included in this examination.

(b) *Duties.* These positions cover a wide variety of professional aeronautical research work. Appointees may be required to make theoretical and experimental studies of the airflow in and about aircraft components at subsonic, transonic, and supersonic airspeeds; research in stress distribution and stability of shell-type structures; research work in instrumentation in a wide field covering a multitude of measurement problems arising in aeronautical research; suitability of special fuels for various types of heat engines; flight research, utilizing pilotless aircraft, such as guided missiles, to determine aerodynamic properties of aircraft and aircraft components in the supersonic and transonic speed range.

(c) *Knowledge and training requisite for performance of duties.* The minimum amount of training required for the successful performance of the duties described in paragraph (b) of this section is the completion of a standard professional curriculum leading to a bachelor's degree, with major study in an appropriate field. Such a curriculum is planned and integrated so as to provide sound and comprehensive training not only in the particular field, but in other related fields. Full recognition is also given to the training in verbal facility and the development of facility in logical thinking and expression. The research scientist must be able to present the results of his work clearly and concisely in both oral and written form.

(d) *Method of obtaining basic knowledge and training.* The only method by which the knowledge and training requisite to perform the duties set forth in paragraph (b) of this section can be acquired is by attending a college or university where competent instruction and

guidance are available, where courses are arranged in a systematic, progressive schedule, where adequate laboratory facilities and libraries are provided, and where objective evaluations are made of a person's progress in acquiring professional and scientific information.

§ 24.68 *Training Instructor (Superintendent of Education), GS–1710–9, U. S. Disciplinary Barracks, Camp Gordon, Augusta, Georgia, Department of the Army*—(a) *Educational requirement.* Completion of a full four-year course in a college or university of recognized standing, which must have included or have been supplemented by major study in education.

(b) *Duties.* The Training Instructor (Superintendent of Education) is responsible for carrying out the academic program for teaching general prisoners confined within the institution and performs the following duties: coordinates and directs the work of 2 civilian instructors, 22 prisoner instructors, and 4 prisoner clerks who are engaged in teaching general prisoners in Literacy School (including elementary reading, writing, arithmetic, and spelling) and Commercial School (including typing, shorthand, secretarial practice, bookkeeping, etc.); coordinates and approves all courses of study outlined by supervisors and approves all daily lesson plans, seeing that visual aids and supplementary material are being used; determines whether lesson plans are being carried out, whether the courses of study are being followed, and whether the instructor is accomplishing and fulfilling the aims of the Academic Training School; conducts instructor training program, using training manuals; instructs prisoner teachers in proper educational methods, such as classroom procedure, fundamentals of teaching, lesson plans, etc.; supervises the Visual Aids Section where general prisoners diagram and design visual educational charts for the Academic Training Branch, as well as other activities on the post; prepares charts, maps, and illustrations from current magazines and other publications to be used as training aids; directs the weekly publication of the "DB News" which is published by and for the inmates.

(c) *Knowledge and training requisite for performance of duties.*

(d) *Method of obtaining basic knowledge and training.*

NOTE: The provisions of § 24.12 (a) (2) and (3) are applicable to paragraphs (c) and (d) of this section.

§ 24.69 *Agronomist, GS–407–5–15*—(a) *Educational requirement.* (1) Applicants must have successfully completed one of the following:

(i) A full 4-year course of study in an accredited college or university leading to a bachelor's or higher degree with major study in agronomy or a closely related subject-matter field. This course of study must have included at least 10 semester hours of course-work in crop production or plant breeding.

(ii) A total of at least 30 semester hours of course-work in plant science and agronomy in an accredited college or university with major study in agronomy or a closely related subject-matter field, including at least 10 semester hours of course-work in crop production or plant breeding, plus enough additional experience, or education, of an appropriate nature to total 4 years of experience and education or 4 years of education. The quality of this additional experience or education must have been such that, when combined with the required 30 semester hours in plant science and agronomy, it gives the applicant a technical knowledge comparable to that normally acquired through the successful completion of the full 4-year course of study described in subdivision (i) of this subparagraph.

(2) Applicants for positions which involve highly technical research, design or development, or similar complex scientific functions, must have successfully completed the full 4-year course of study described in subparagraph (1) (i) of this paragraph.

(b) *Duties.* Agronomists advise on, administer, supervise or perform research or other professional and scientific work in the application of fundamental principles of plant, soil and related sciences to the problems of field crop improvement (including breeding, propagation and culture); conservation crop and turf establishment and management; propagation and seed production; grounds maintenance; and plant adaptation and varietal testing. This includes work with such crops and plant materials as cereals and grains; grasses, legumes and forbs used for forage, hay, green manure or soil conservation purposes; tobacco; cotton and other fibers; rubber plants and shrubs; sugar plants; and medicinal, drug and other special crops.

(c) *Knowledge and training requisite for performance of duties.* The duties of these positions cannot be performed successfully without a sound basic knowledge of the agricultural sciences and scientific training in agronomy and closely related agricultural sciences. The duties of research positions require even more exacting and detailed knowledge and training. Appointees must have the ability to apply their professional and scientific knowledge to their work in order to solve specific problems, interpret and apply the results of research, both in the field of agronomy and in related fields of agricultural research, or to do research in agronomy. The knowledge and training required can only be acquired through the successful completion of a directed course of study in an accredited college or university which has scientific libraries, well-equipped laboratories and thoroughly trained instructors, gives expert guidance, and evaluates progress competently.

§ 24.70 *Fishery Research Biologist, GS–482–5–15*—(a) *Educational requirement.* Applicants must have successfully completed a full 4-year course of study in an accredited college or university leading to a bachelor's or higher degree with major study in fishery science, biology or zoology. This course of study must have included at least 30 semester hours in biology, of which 9 must have been in zoology and 6 in such aquatic courses as limnology, fishery biology, fish culture or aquatic biology.

(b) *Duties.* Fishery Research Biologists advise on, coordinate, administer, supervise or perfrom research for the purpose of determining and establishing the biological facts and principles necessary for the conservation, management and control of fishes and other aquatic animals, including crustaceans and mollusks. This research is concerned with such things as the quantitative determination of the interrelations of the abundance of fishes, variations in ecological elements and fishing success; the determination of the rearing and planting methods best adapted for maximum success in hatchery operations; and the devising of methods used to regulate fishing to secure a sustained optimum yield. Some research is primarily concerned with the study of the probable effects of the operation of river-development projects on fisheries.

(c) *Knowledge and training requisite for performance of duties.* The duties of these positions cannot be performed successfully without a sound basic knowledge of the fundamental biological sciences and specialized scientific training in fishery science and aquatic biology. These duties require an exacting and detailed knowledge and training. Appointees must have the ability to apply their professional and scientific knowledge to their work in order to solve specific problems, interpret and apply the results of research, both in the field of fishery science and in closely related fields of science, or to do fishery research. The knowledge and training required can only be acquired through the successful completion of a directed course of study in an accredited college or university which has scientific libraries, well-equipped laboratories and thoroughly trained instructors, gives expert guidance, and evaluates progress competently.

§ 24.71 *Wildlife Research Biologist, GS–486–5–15*—(a) *Educational requirement.* Applicants must have successfully completed a full 4-year course of study in an accredited college or university leading to a bachelor's or higher degree in zoology, wildlife management or a closely related subject-matter field of biology. This course of study must have included at least 15 semester hours of course-work in zoology, of which 6 must have been in such wildlife courses as mammalogy, ornithology, animal ecology or wildlife management, supplemented by at least 10 semester hours in botany.

(b) *Duties.* Wildlife Research Biologists advise, coordinate, administer, supervise or perform research for the purpose of determining and establishing the biological facts and principles necessary for the management, conservation and control of birds, mammals and other vertebrate wildlife, excluding fishes. This research deals with such things as the ecology of the various forms in their natural environment; life history studies; wild-animal nutrition studies; bird and mammal disease investigations; the development and testing of methods used to control populations of harmful species; and studies specifically directed toward the preparation of management plans for game species, or for the management of the wildlife of an area. Some research is primarily concerned with the formulation and operation of a wildlife research program in cooperation with States, other Federal agencies and interested private organizations. Other research involves the study and analysis of plans for the construction and operation of water-development projects to determine the probable effects of these projects on wildlife resources.

(c) *Knowledge and training requisite for performance of duties.* The duties of these positions cannot be performed successfully without a sound basic knowledge of the fundamental biological sciences and specialized scientific training in wildlife biology. These duties require an exacting and detailed knowledge and training. Appointees must have the ability to apply their professional and scientific knowledge to their work in order to solve specific problems, interpret and apply the results of research, both in the field of wildlife biology and in closely related fields of science, or to do research in wildlife biology. The knowledge and training required can only be acquired through the successful completion of a directed course of study in an accredited college or university which has scientific libraries, well-equipped laboratories and thoroughly trained instructors, gives expert guidance, and evaluates progress competently.

§ 24.72 *Botanist, GS–430–7–14 (positions involving highly technical research, design, or development, or similar complex scientific functions)*—(a) *Educational requirement.* Applicants must have successfully completed a full four-year course in an accredited college or university leading to a bachelor's degree with major study in botany or plant science.

(b) *Duties.* Research botanists plan and conduct research and investigations on the taxonomic position and nomenclatorial status of economic plants and their wild relatives; prepare revisions and monographs of plant groups; identify and describe plants and seeds; investigate plant distribution, habits of growth, and economic value; make histological and histochemical studies of agricultural materials; and perform related duties.

(c) *Knowledge and training requisite for performance of duties.*

NOTE: The provisions of § 24.69 (c) are applicable to this section.

§ 24.74 *Dairy Husbandman, GS–487–7–14 (positions involving highly technical research, design, or development, or similar complex scientific functions)*—(a) *Educational requirement.* Applicants must have successfully completed a full four-year course in an accredited college or university leading to a bachelor's degree with major study in dairy husbandry or animal husbandry.

(b) *Duties.* Research dairy husbandmen administer, supervise, perform, or advise on research studies and investigations in the breeding, nutrition, management, housing, growth, body form, physiology, and anatomy of dairy cattle; and perform related duties.

(c) *Knowledge and training requisite for performance of duties.*

NOTE: The provisions of § 24.69 (c) are applicable to this section.

§ 24.75 *Dairy Manufacturing Technologists, GS–491–7–14 (positions involving highly technical research, design, or development, or similar complex scientific functions)*—(a) *Educational requirement.* Applicants must have successfully completed a full four-year course in an accredited college or university leading to a bachelor's degree with major study in dairy manufacturing, dairy engineering, dairy chemistry, or dairy bacteriology.

(b) *Duties.* Research dairy manufacturing technologists administer, supervise, perform, or advise on research studies of dairy manufacturing processes involved in the processing of milk and its by-products to produce butter, cheese, concentrated milks, ice cream, market milk, process butter, and other related food and non-food products; and perform related duties.

(c) *Knowledge and training requisite for performance of duties.*

NOTE: The provisions of § 24.69 (c) are applicable to this section.

§ 24.76 *Entomologist, GS–414–5–15*—(a) *Educational requirement.* (1) Applicants must have successfully completed one of the following:

(i) A full 4-year course of study in an accredited college or university leading to a bachelor's or higher degree with major study in entomology or invertibrate zoology. This course of study must have included at least 12 semester hours of course-work in entomology.

(ii) A total of at least 30 semester hours of course-work in the fundamental biological and physical sciences, in an accredited college or university with major study in entomology or invertebrate zoology, including at least 12 semester hours of course-work in entomology, plus enough additional experience, or education, of an appropriate nature to total 4 years of experience and education or 4 years of education. The quality of this additional experience or education must have been such that, when combined with the required 30 semester hours in fundamental biological and physical sciences, it gives the applicant a technical knowledge comparable to that normally acquired through the successful completion of the full 4-year course of study described in subdivision (i) of this subparagraph.

(2) Applicants for positions which involve highly technical research, design or development, or similar complex scientific functions, must have successfully completed the full 4-year course of study described in subparagraph (1) (i) of this paragraph.

(b) *Duties.* Entomologists advise on, administer, supervise or perform professional research on the biology, classification, distribution, and economic importance of insects, or on measures used to destroy or cultivate them. This research deals with such things as the development of control measures used against insects affecting crops, stored products, man or animals, and the utilization of beneficial insects. It may include studies in insect biology, ecology, morphology, and taxonomy; the conducting of research to determine the abundance and distribution of insects; and the development of cultural controls, mechanical controls, or biological controls, as well as work on plant resistance to insect attack and insect transmission of plant diseases. Entomologists also develop cooperative research projects with interested Federal, State, and private agencies, and prepare reports and publications on the results of research activities carried on by them and their subordinates.

(c) *Knowledge and training requisite for performance of duties.* The duties of these positions cannot be performed successfully without a sound basic knowledge of the fundamental biological and physical sciences and scientific training in entomology. The duties of some of these positions are of a research nature and require exacting and detailed knowledge and training. Appointees must have the ability to apply their professional and scientific knowledge to their work in order to solve specific problems, interpret and apply the results of research and do research in entomology. The knowledge and training required can only be acquired through the successful completion of a directed course of study in an accredited college or university which has scientific libraries, well-equipped laboratories and thoroughly trained instructors, gives expert guidance and evaluates progress competently.

§ 24.77 *Geneticist, GS–440–5–15*—(a) *Educational requirement.* Applicants must have successfully completed a full 4-year course of study in an accredited college or university leading to a bachelor's or higher degree with major study in genetics or one of the fundamental biological sciences. This course of study must have included at least 6 semester hours of course-work in genetics and cytogenetics.

(b) *Duties.* Geneticists advise on, administer, supervise or perform professional research in connection with the study of the principles and mechanisms of transmission of characters by inheritance, including in some instances the application of these principles in planning breeding programs. The work deals with the testing and application of genetic principles with respect to plants, animals or poultry to determine the mode of inheritance of genetic characters and to develop more effective breeding methods and selection procedures for the improvement of plants, animals or poultry and the products derived from them. It also involves the examination of the interaction of genetic characters with one another and with the environment (including genetic), and an appraisal of the basic physiological and anatomical principles involved; the evaluation of the possibilities of utilizing induced polyploidy and irradiation in crop improvement; the investigation of the cytogenetics and cytotaxonomy of plants; the statistical analyses of experimental data; and the prepara-

tion of manuscripts dealing with such research investigation.

(c) *Knowledge and training requisite for performance of duties.* The duties of these positions cannot be performed successfully without a sound basic knowledge of the biological sciences and scientific training in one of the fundamental biological sciences and genetics. They require a most exacting and detailed knowledge and training. Appointees must have the ability to apply their professional and scientific knowledge to their work in order to solve specific problems, interpret and apply the results of research, both in the field of genetics and in the basic biological and physical sciences, or to do research in genetics. The knowledge and training required can only be acquired through the successful completion of a directed course of study in an accredited college or university which has scientific libraries, well-equipped laboratories and thoroughly trained instructors, gives expert guidance, and evaluates progress competently.

§ 24.78 *Horticulturist, GS–437–5–15*—(a) *Educational requirement.* (1) Applicants must have successfully completed one of the following:

(i) A full 4-year course of study in an accredited college or university leading to a bachelor's or higher degree with major study in horticulture or a closely related subject-matter field of plant science. This course of study must have included at least 10 semester hours of course-work in horticulture.

(ii) A total of at least 20 semester hours of course-work in plant science in an accredited college or university with major study in horticulture or a closely related subject-matter field of plant science including at least 10 semester hours of course-work in horticulture, plus enough additional experience, or education, of an appropriate nature to total 4 years of experience and education or 4 years of education. The quality of this additional experience or education must have been such that, when combined with the required 20 semester hours in plant science, it gives the applicant a technical knowledge comparable to that normally acquired through the successful completion of the full 4-year course of study described in subdivision (i) of this subparagraph.

(2) Applicants for positions which involve highly technical research, design or development, or similar complex scientific functions, must have successfully completed the full 4-year course of study described in subparagraph (1) (i) of this subparagraph.

(b) *Duties.* Horticulturists advise on, administer, supervise or perform research or other professional and scientific work which is concerned with the breeding, testing (behavior), propagation or culture of fruits, vegetables, flowers or ornamental trees and shrubs, and on allied problems related to their production, storage and handling. Some of the positions are of a research nature and require an understanding of the growth habits and full life cycle of specific horticultural plants, or of the various processes of germination, reproduction and propagation, cultural requirements, harvesting techniques and methods of storage and handling. Other positions involve the application of a professional knowledge of horticulture to orchard or land management, farm management, greenhouse and nursery management, the maintenance of parks and grounds, or the operation of arboretums and botanic gardens.

(c) *Knowledge and training requisite for performance of duties.* The duties of these positions cannot be performed successfully without a sound basic knowledge of the agricultural sciences and scientific training in horticulture and closely related agricultural sciences. The duties of research positions require even more exacting and detailed knowledge and training. Appointees must have the ability to apply their professional and scientific knowledge to their work in order to solve specific problems, interpret and apply the results of research, both in the field of horticulture and in related fields of agricultural research, or to do research in horticulture. The knowledge and training required can only be acquired through the successful completion of a directed course of study in an accredited college or university which has scientific libraries, well-equipped laboratories and thoroughly trained instructors, gives expert guidance, and evaluates progress competently.

§ 24.79 *Meat Technologist, GS–495–7–14 (positions involving highly technical research, design, or development, or similar complex scientific functions)*—(a) *Educational requirement.* Applicants must have successfully completed a full four-year course in an accredited college or university leading to a bachelor's degree with major study in food technology or in bacteriology combined with courses in food technology.

(b) *Duties.* Research meat technologists conduct research on the effects which methods of curing and storing meats have on the quality and nutritive value of the products; and perform related duties.

(c) *Knowledge and training requisite for performance of duties.*

NOTE: The provisions of § 24.69 (c) are applicable to this section.

§ 24.80 *Microanalyst (Plant and animal Fibres), GS–494–7–14 (positions involving highly technical research, design, or development, or similar complex scientific functions).*—(a) *Educational requirement.* Applicants must have successfully completed a full four-year course in an accredited college or university leading to a bachelor's degree with major study in textile technology, physics, chemistry, biological science, or a closely related subject.

(b) *Duties.* Research microanalysts (plan and animal fibers) make routine microscopical tests of fibers, yarns, cords, and fabrics composed of cotton and competitive fibers to determine physical properties; study such changes as may be wrought in those properties by chemical and physical treatments in connection with experimental projects relating to cotton fiber research, and make related investigations; or perform research in the several fields of animal fiber technology and related investigations designed to develop techniques for measuring standards; and perform related duties.

(c) *Knowledge and training requisite for performance of duties.*

NOTE: The provisions of § 24.69 (c) are applicable to this section.

§ 24.81 *Mycologist, GS–431–7–14 (positions involving highly technical research, design, or development, or similar complex scientific functions)*—(a) *Educational requirement.* Applicants must have successfully completed a full four-year course in an accredited college or university leading to a bachelor's degree with major study in mycology, or botany combined with courses in mycology.

(b) *Duties.* Research mycologists plan and conduct research with and investigations of the fungi; prepare monographic studies of genera, families, etc.; work out life histories; make critical studies in the morphology, physiology, classification, biochemistry, genetics, and nomenclature of fungi; prepare technical reports on all phases of mycological activities; and perform related duties.

(c) *Knowledge and training requisite for performance of duties.*

NOTE: The provisions of § 24.69 (c) are applicable to this section.

§ 24.82 *Parasitologist, GS–412–5–15*—(a) *Educational requirement.* (1) Applicants must have successfully completed one of the following:

(i) A full 4-year course of study in an accredited college or university leading to a bachelor's or higher degree with major study in animal parasitology or zoology. This course of study must have included course-work in invertebrate zoology suplemented by at least 3 semester hours of course-work in general parasitology, helminthology, protozoology, or medical or veterinary entomology.

(ii) A total of at least 20 semester hours of course-work in zoology and parasitology, including course-work in invertebrate zoology supplemented by at least 3 semester hours of course-work in general parasitology, helminthology, protozoology, or medical or veterinary entomology, plus enough additional experience, or education, of an appropriate nature to total 4 years of experience and education or 4 years of education. The quality of this additional experience or education must have been such that, when combined with the required 20 semester hours in zoology and parasitology, it gives the applicant a technical knowledge comparable to that normally acquired through the successful completion of the full 4-year course of study described in subdivision (i) of this subparagraph.

(2) Applicants for positions which involve highly technical research, design or development, or similar complex scientific functions, must have successfully completed the full 4-year course of study described in subparagraph (1) (i) of this paragraph.

(b) *Duties.* Parasitologists advise on, administer, supervise, or perform research or other professional and scientific work in connection with the study, investigation and control of the parasites of man, domestic and wild animals and fish. The work deals with the occurrence, structure, identification, life histories, pathology, epidemiology, immunology, physiology, host relationships and the biological, physical and chemical control of the various protozoan, helminth and arthropod parasites.

(c) *Knowledge and training requisite for performance of duties.* The duties of these positions cannot be performed successfully without a sound basic knowledge of the biological sciences and specific training in parasitology and closely related fields of biology. Appointees must have the ability to apply their professional and scientific knowledge to their work in order to solve specific problems, interpret and apply the results of research, both in the field of parasitology and in related fields of biological or medical research, or to do research work in parasitology. The knowledge and training required can only be acquired through the the successful completion of a directed course of study in an accredited college or university which has scientific libraries, well-equipped laboratories and thoroughly trained instructors, gives expert guidance and evaluates progress competently.

§ 24.83 *Plant Pathologist, GS–434–5–15*—(a) *Educational requirement.* (1) Applicants must have successfully completed one of the following:

(i) A full 4-year course of study in an accredited college or university leading to a bachelor's or higher degree with major study in plant pathology or a closely related subject-matter field of plant science. This course of study must have included at least 10 semester hours of course-work in plant pathology.

(ii) A total of at least 20 semester hours of course-work in plant science in an accredited college or university with major study in plant pathology or a closely related subject-matter field of plant science, including at least 10 semester hours of course-work in plant pathology, plus enough additional experience, or education, of an appropriate nature to total 4 years of experience and education or 4 years of education. The quality of this additional experience or education must have been such that, when combined with the required 20 semester hours in plant science, it gives the applicant a technical knowledge comparable to that normally acquired through the successful completion of the full 4-year course of study described in subdivision (i) of this subparagraph.

(2) Applicants for positions which involve highly technical research, design or development, or similar complex scientific functions, must have successfully completed the full 4-year course of study described in subparagraph (1) (i) of this paragraph.

(b) *Duties.* Plant Pathologists advise on, administer, supervise or perform research or other professional and scientific work in connection with the investigation and study of the cause, nature, prevalence and severity of plant diseases caused by parasitic and non-parasitic micro-organisms and viruses. They develop, and investigate the use of techniques designed to produce artificial epiphytotics of the various diseases under study; experiment on the use, or the establishment of, methods designed for the control of such diseases; investigate the life cycles of the disease producing organisms, and determine host parasite relationships; and find out how these diseases affect the culture, harvest, transportation and storage of plants or plant products. Most of these positions are of a research nature, where the emphasis is largely on a specialized field of plant pathology, such as a particular group of pathogens, particular kinds of crops, etc. Some positions involve work with various groups, through colleges, extension programs, etc.

(c) *Knowledge and training requisite for performance of duties.* The duties of these positions cannot be performed successfully without a sound basic knowledge of plant pathology and the plant sciences and scientific training in plant physiology and the closely related plant sciences. The duties of these positions are of an investigative and research nature, or involve the application of highly technical research, and require exacting and detailed knowledge and training. Appointees must have the ability to apply their professional and scientific knowledge to their work in order to solve specific problems, interpret and apply the results of research, or to do research in plant pathology. The knowledge and training required can only be acquired through the successful completion of a directed course of study in an accredited college or university which has scientific libraries, well-equipped laboratories and thoroughly trained instructors, gives expert guidance, and evaluates progress competently.

§ 24.84 *Plant Physiologist, GS–435–7–14 (positions involving highly technical research, design, or development, or similar complex scientific functions)*—(a) *Educational requirement.* Applicants must have successfully completed a full four-year course in an accredited college or university leading to a bachelor's degree with major study in plant physiology, or in plant science including courses in plant physiology.

(b) *Duties.* Research plant physiologists plan and conduct experiments for determining (1) the effects of environmental factors, light, temperature, moisture, and nutrition upon the rate, kind, and amount of plant growth; (2) physical properties and chemicals composition of plants or plant parts in relation to variety and conditions of growth; and (3) maturity, quality and storage life of flowers, fruits, roots, seeds, or plant products; study effects and nature of substances that regulate growth and development of plants; make analyses of experimental data and prepare manuscripts dealing with such research investigations; and perform related duties.

(c) *Knowledge and training requisite for performance of duties.*

NOTE: The provisions of § 24.69 (c) are applicable to this section.

§ 24.85 *Animal Husbandman, GS–487–5–15*—(a) *Educational requirement.* (1) Applicants must have successfully completed one of the following:

(i) A full 4-year course of study in an accredited college or university leading to a bachelor's or higher degree with major study in animal husbandry, poultry husbandry or a closely related subject-matter field. This course of study must have included at least 15 semester hours of course-work in animal or poultry husbandry.

(ii) A total of at least 30 semester hours of course-work in the agricultural sciences with major study in animal husbandry, poultry husbandry or a closely related subject-matter field, including at least 15 semester hours of course-work in animal or poultry husbandry, plus enough additional experience, or education, of an appropriate nature to total 4 years of experience and education or 4 years of education. The quality of this additional experience or education must have been such that, when combined with the required 30 semester hours in agricultural science, it gives the applicant a technical knowledge comparable to that normally acquired through the successful completion of the full 4-year course of study described in subdivision (i) of this subparagraph.

(2) Applicants for positions which involve highly technical research, design or development, or similar complex scientific functions, must have successfully completed the full 4-year course of study described in subparagraph (1) (i) of this paragraph.

(b) *Duties.* Animal Husbandmen advise on, administer, supervise or perform research or other professional and scientific work in connection with the breeding, nutrition and management of all classes of livestock (except dairy cattle) and poultry. This may involve such things as the breeding, nutrition, biochemistry, management, housing, growth, body form, physiology and anatomy of the animals or birds, or any other phase of animal or poultry husbandry which would tend to establish sound breeding programs, find better and more economical methods of managing herds or flocks, or better animal and poultry husbandry in general. Some of these positions are of a research nature, where the results of the work must be presented in writing. Other positions require the application of a professional knowledge of animal or poultry husbandry to the management of herds or flocks, or to general farm management.

(c) *Knowledge and training requisite for performance of duties.* The duties of these positions cannot be performed successfully without a sound basic knowledge of the agricultural sciences and scientific training in animal or poultry husbandry. The duties of research positions require even more exacting and detailed knowledge and training. Appointees must have the ability to apply their professional and scientific knowledge to their work in order to solve specific problems, interpret and apply the results of research, both in the fields of

animal and poultry husbandry and in closely related fields of agricultural research, or to do research in animal or poultry husbandry. The knowledge and training required can only be acquired through the successful completion of a directed course of study in an accredited college or university which has scientific libraries, well-equipped laboratories and thoroughly trained instructors, gives expert guidance and evaluates progress competently.

§ 24.86 *Animal Physiologist, GS–413–5–15.* — (a) *Educational requirement.* Applicants must have successfully completed a full 4-year course of study leading to a bachelor's or higher degree with major study in animal or poultry physiology or a closely related subject-matter field. This course of study must have included at least 10 semester hours of course-work in animal or poultry physiology.

(b) *Duties.* Animal Physiologists advise on, administer, supervise or perform research or other professional and scientific work in the field of animal physiology, including studies of the physiological and pathological effects of poisonous plants on different kinds of animals. This may involve such things as the study of the physiological aspects of reproduction and development in all classes of farm livestock, poultry and such experimental small laboratory animals as may be included in the studies; the development, planning and conducting of research studies on the physiological aspects of such factors as the effect of environment, light, temperature, climate, and management; and the application of various techniques used in bioassays, hypophysectomys and other established procedures used in physiological work.

(c) *Knowledge and training requisite for performance of duties.* The duties of these positions cannot be performed successfully without a sound basic knowledge of the fundamental biological and animal sciences and scientific training in animal physiology. The duties of these positions require exacting and detailed knowledge and training. Appointees must have the ability to apply their professional and scientific knowledge to their work in order to solve specific problems, interpret and apply the results of research in animal or poultry physiology, or closely related fields, or to do research in animal or poultry physiology. The knowledge and training required can only be acquired through the successful completion of a directed course of study in an accredited college or university which has scientific libraries, well-equipped laboratories and thoroughly trained instructors, gives expert guidance, and evaluates progress competently.

§ 24.87 *Soil Scientist, GS–470–5–15.* (a) *Educational requirement.* (1) Applicants must have successfully completed one of the following:

(i) A full 4-year course of study in an accredited college or university leading to a bachelor's or higher degree with major study in soil science or a closely related subject-matter field. This course of study must have included at least 12 semester hours of course-work in soil science.

(ii) A total of at least 30 semester hours of course-work in plant science, soil science and closely related subject-matter fields of agriculture with major study in soil science or a closely related subject-matter field, including at least 12 semester hours in soil science, plus enough additional experience, or education, of an appropriate nature to total 4 years of experience and education or 4 years of education. The quality of this additional experience or education must have been such that, when combined with the required 30 semester hours in plant science, soil science or a closely related subject-matter field of agriculture, it gives the applicant a technical knowledge comparable to that normally acquired through the successful completion of the full 4-year course of study described in subdivision (i) of this subparagraph.

(2) Applicants for positions which involve highly technical research, design or development, or similar complex scientific functions, must have successfully completed the full 4-year course of study described in subparagraph (1) (i) of this paragraph.

(b) *Duties.* Soil Scientists advise on, administer, supervise, perform research or other professional and scientific work in connection with the study and investigation of soils from the standpoint of their distribution, their interrelated physical, chemical and biological properties and processes, their relationships to climatic, physiographic and vegetative influences and their adaptation to use and management in agriculture. This includes the investigation of soils in the field to determine their character, genesis, morphology and classification for plant production and management; the determination of methods of soil management which will maintain and improve the production of crops by means of fertilization, green manuring, liming, tillage, irrigation and drainage; and the conducting of soil-plant research in the chemical, physical and biological properties of the soil by laboratory, greenhouse and field plot studies, etc. Soil Scientists may work primarily in the field, where they determine how best to classify, map and evaluate various types of soil by laboratory analyses or conduct field plot experiments to discover new and improved management practices; or they make laboratory and greenhouse studies where they use the more technical and analytical research procedures.

(c) *Knowledge and training requisite for performance of duties.* The duties of these positions cannot be performed successfully without a sound basic knowledge of the agricultural sciences and scientific training in soil science. The duties of research positions require even more exacting and detailed knowledge and training. Appointees must have the ability to apply their professional and scientific knowledge to their work in order to solve specific problems, interpret and apply the results of research, both in the field of soil science and in closely related fields of agricultural research, or to do research in soils. The knowledge and training required can only be acquired through the successful completion of a directed course of study in an accredited college or university which has scientific libraries, well-equipped laboratories and thoroughly trained instructors, gives expert guidance, and evaluates progress competently.

§ 24.88 *Bacteriologist, GS–420–5–15 (all grades and options).* — (a) *Educational requirement.* (1) Applicants must have successfully completed one of the following:

(i) A full 4-year course of study in an accredited college or university leading to a bachelor's or higher degree with major study in bacteriology, biology or chemistry. This course of study must have included at least 20 semester hours of course-work in bacteriology or microbiology.

(ii) A total of at least 30 semester hours of course-work in bacteriology, biology and chemistry, including at least 20 semester hours of course-work in bacteriology and microbiology, plus enough additional experience, or education, of an appropriate nature to total 4 years of experience and education or 4 years of education. The quality of this additional experience or education must have been such that, when combined with the required 20 semester hours in bacteriology or microbiology, it gives the applicant a technical knowledge comparable to that normally acquired through the successful completion of the full 4-year course of study described in subdivision (i) of this subparagraph.

(2) Applicants for positions which involve highly technical research, design or development, or similar complex scientific functions, must have successfully completed the full 4-year course of study described in subparagraph (1) (i) of this paragraph.

(b) *Duties.* Bacteriologists advise on, administer, supervise or perform research and other professional and scientific work in which they make investigations on bacteria, rickettsiae, viruses and other such microorganisms affecting humans, animals and agricultural products. This work deals with such things as the microorganisms origin, form, structure, life processes, diseases, the manner and conditions of infection, and the artificial induction of epizootics in insects; or animals, their importance in the causation of human, animal or fish diseases; the hematological, serological and toxic relationships, involved methods of their sterilization, disinfection and control; their use in the treatment of diseases; their role as problems or agents in sanitation, decomposition, fermentation and industrial processes, including the production of vitamins, antibiotics, amino acids, organic acids, etc.; or their activities and effect on soil productivity or nutrition.

(c) *Knowledge and training requisite for performance of duties.* The duties of these positions cannot be performed successfully without a sound basic knowledge of biology and scientific training in bacteriology and the closely related sciences. The duties of these positions are of a technical and research nature, or involve the application of highly technical research and require exacting and detailed knowledge and training. Appointees must have the ability to apply their professional and scientific knowledge to their work in order to solve specific problems, interpret and apply the results of research, or to do research in bacteriology. The knowledge and training required can only be acquired through the successful completion of a directed course of study in an accredited college or university which has scientific libraries, well-equipped laboratories and thoroughly trained instructors, gives expert guidance, and evaluates progress competently.

§ 24.89 *Plant Quarantine Inspector, GS–436–5–15, and Plant Pest Control Inspector, GS–436–5–15.* — (a) *Educational requirement.* (1) Applicants must have successfully completed one of the following:

(i) A full 4-year course of study in an accredited college or university leading to a bachelor's or higher degree with major study in one of the biological sciences. This course of study must have included at least 20 semester hours of course-work in any one, or in any combination, of the following subjects: entomology, botany, plant pathology, nematology, horticulture, mycology, invertebrate zoology, or closely related scientific subjects.

(ii) A total of at least 30 semester hours of course-work in biology and related natural and physical sciences in an accredited college or university with major study in one of the biological sciences, including at least 20 semester hours of course-work in any one, or in any combination, of the following subjects: entomology, botany, plant pathology, nematology, horticulture, mycology, invertebrate zoology, or closely related scientific subjects, plus enough additional experience, or education, of an appropriate nature to total 4 years of experience and education or 4 years of education. The quality of this additional experience or education must have been such that, when combined with the required 30 semester hours in biology and related natural and physical sciences, it gives the applicant a technical knowledge comparable to that normally acquired through the successful completion of the full 4-year course of study described in subdivision (i) of this subparagraph.

(2) Applicants for positions which involve highly technical research, design or development, or similar complex scientific functions, must have successfully completed the full 4-year course of study described in subparagraph (1) (i) of this paragraph.

(b) *Duties.* Plant Quarantine Inspectors and Plant Pest Control Inspectors advise, supervise or perform professional and scientific work in the inspection of plants and plant products for the purpose of enforcing plant quarantines and protecting the agricultural regions of the United States against the introduction of harmful plant insects and plant diseases and to see that plants and plant materials produced in the United States for export meet the sanitary requirements established by foreign countries. Plant Quarantine Inspectors enforce the various plant quarantines at the ports of entry or departure and inspect plants and plant products which are being imported or exported. Plant Pest Control Inspectors are concerned primarily with domestic plant quarantine regulations, make surveys to ascertain the distribution and abundance of plant pests to see what regulations should be established, and see that existing regulations are enforced.

(c) *Knowledge and training requisite for performance of duties.* The duties of these positions cannot be performed successfully without a sound basic knowledge of the biological sciences and scientific training in plant science, entomology and the control of plant pests. The duties of research positions require even more exacting and detailed knowledge and training. Appointees must have the ability to apply their professional and scientific knowledge to their work in order to solve specific problems, interpret and apply the results of research in plant pest control and related fields, or to do research in plant pest control. The knowledge and training required can only be acquired through the successful completion of a directed course of study in an accredited college or university which has scientific libraries well-equipped laboratories and thoroughly trained instructors, gives expert guidance, and evaluates progress competently.

§ 24.91 *Fishery Management Biologist, GS–481–5–15.* — (a) *Educational requirement.* Applicants must have successfully completed one of the following:

(1) A full 4-year course of study in an accredited college or university leading to a bachelor's or higher degree with major study in fishery science, biology or zoology. This course of study must have included at least 30 semester hours in biology, of which 9 must have been in zoology and 6 in such aquatic courses as limnology, fishery biology, fish culture or aquatic biology.

(2) A total of at least 30 semester hours of course-work in biology in an accredited college or university with major study in fishery science, biology or zoology, including at least 9 semester hours in zoology and 6 in such aquatic courses as limnology, fishery biology, fish culture or aquatic biology, plus enough additional experience, or education, of an appropriate nature to total 4 years of experience and education or 4 years of education. The quality of this additional experience or education must have been such that, when combined with the required 30 semester hours in biology, it gives the applicant a technical knowledge comparable to that normally acquired through the successful completion of the full 4-year course of study described in subparagraph (1) of this paragraph.

(b) *Duties.* Fishery Management Biologists advise on, administer, supervise or perform professional and scientific work in connection with the management and conservation of fisheries or on fishery projects. This work deals with such things as the life history, habits, classification and economic relations of aquatic organisms and fish, particularly those which are of importance to industry. It may be concerned with the management of various fisheries or fishery projects or with the administration and management of Federal programs or other phases of fishery management.

(c) *Knowledge and training requisite for performance of duties.* The duties of these positions cannot be performed successfully without a sound basic knowledge of the fundamental biological sciences and specialized scientific training in fishery science and aquatic biology. Appointees must have the ability to apply their professional and scientific knowledge to their work in order to solve specific problems, interpret and apply the results of research, both in the field of fishery science and in closely related fields of science. The knowledge and training required can only be acquired through the successful completion of a directed course of study in an accredited college or university which has scientific libraries, well-equipped laboratories and thoroughly trained instructors, gives expert guidance, and evaluates progress competently.

§ 24.92 *Wildlife Management Biologist, GS–485–5–15.* — (a) *Educational requirement.* Applicants must have successfully completed one of the following:

(1) A full 4-year course of study in an accredited college or university leading to a bachelor's or higher degree with major study in zoology, wildlife management or a closely related subject-matter field of biology. This course of study must have included at least 15 semester hours of course-work in zoology, of which 6 must have been in such wildlife courses as mammalogy, ornithology, animal ecology or wildlife management, supplemented by at least 10 semester hours in botany.

(2) A total of at least 30 semester hours of course-work in biology in an accredited college or university with major study in zoology, wildlife management or a closely related subject-matter field of biology, including at least 15 semester hours in zoology, of which 6 must have been in such wildlife courses as mammalogy, ornithology, animal ecology or wildlife management, supplemented by at least 10 semester hours in botany, plus enough additional experience, or education, of an appropriate nature to total 4 years of experience and education or 4 years of education. The quality of this additional experience or education must have been such that, when combined with the required 30 semester hours in biology, it gives the applicant a technical knowledge comparable to that normally acquired through the successful completion of the full 4-year course of study described in subparagraph (1) of this paragraph.

(b) *Duties.* Wildlife Management Biologists advise on, administer, supervise, or perform professional and scientific work in connection with the management and conservation of wildlife. This work deals with such things as the distribution, habits, life history and classification of birds, mammals and other forms of animal life and their rela-

tion to agriculture and other interests throughout the nation. It may be concerned with the management of refuges, the administration of various Federal wildlife programs, or with other phases of wildlife management which require a thorough understanding of wildlife and wildlife management.

(c) *Knowledge and training requisite for performance of duties.* The duties of these positions cannot be performed successfully without a sound basic knowledge of the fundamental biological sciences and specialized scientific training in wildlife biology. Appointees must have the ability to apply their professional and scientific knowledge to their work in order to solve specific problems, interpret and apply the results of research, both in the field of wildlife biology and in closely related fields of science. The knowledge and training required can only be acquired through the successful completion of a directed course of study in an accredited college or university which has scientific libraries, well-equipped laboratories and thoroughly trained instructors, gives expert guidance, and evaluates progress competently.

§ 24.94 *Pharmacologist, GS–405–0 (all grades)*—(a) *Educational requirement.* Applicants must have successfully completed one of the following:

(1) A full 4-year course leading to a bachelor's degree in an accredited college or university. This study must have included courses consisting of lectures, recitations, and practical laboratory work in organic chemistry, biochemistry, pharmacology, toxicology, or physiology and prerequisites to these subjects which total at least 30 semester hours; or

(2) Courses acceptable for credit toward a bachelor's degree in an accredited college or university consisting of lectures, recitations, and practical laboratory work in organic chemistry, biochemistry, pharmacology, toxicology, or physiology and prerequisites to these subjects which will total at least 30 semester hours; plus additional education or experience in the fields of organic chemistry, biochemistry, physiology, pharmacology, or toxicology, which when combined with the above 30 semester hours, will total 4 years of education and experience and give the applicant a technical and professional knowledge comparable to that which would have been acquired through completion of the 4-year college course.

(b) *Duties.* Pharmacologist plan, direct, or conduct investigational and research work in pharmacology, including studies in acute and chronic toxicity, therapeutic action, site and mode of action, storage, excretion, metabolism, and the biochemical, physiological, and anatomical effects of drugs or chemical agents either (1) in basic pharmacology or (2) in connection with substances suspected of being adulterants or toxicants in foods, drugs, and cosmetics or suspected of causing hazards in industrial use.

(c) *Knowledge and training requisite for the performance of duties.* The duties of a pharmacologist cannot be performed successfully without a sound knowledge of the basic principles and theories of chemistry and biology and specific scientific training in at least one of the following specialized areas: namely, organic chemistry, biochemistry, pharmacology, toxicology, or physiology. Appointees must have aptitude and training in the methods of original research, the ability to discover and interpret new relationships in pharmacology and related fields, and an intimate knowledge of the latest equipment and laboratory techniques used in the field of pharmacology. This knowledge and training can be gained only through a directed course of study in an accredited college or university with well-equipped laboratories and thoroughly trained instructors, where progress is competently evaluated.

§ 24.95 *Educational Specialist, GS–1720–0 (all grades)*—(a) *Educational requirement.* Applicants must have completed a full four-year course in an accredited college or university, which must have included or been supplemented by major study in education or in the particular field in which the duties as a specialist are to be performed.

(b) *Duties.* Educational specialists advise officials of school systems and community groups concerning technical phases of educational programs; conduct research and provide assistance in planning curriculum content and methods of teaching; and advise local officials in the application of approved educational methods for their individual school and community. These duties vary in nature and responsibility with the field and grade of the position.

(c) *Knowledge and training requisite for performance of duties.* The duties to be performed require knowledge or training in research, teaching, or administration of educational programs and a thorough knowledge of one or more specialized fields of vocational, general, or cultural subjects; comprehensive grasp of the written materials related to the specialized field; ability to impart this knowledge both formally and informally; and an understanding of the relationship of special fields of knowledge to the needs of the school and community as a whole. This knowledge can be gained only through directed training in an accredited college or university. By such training the student, under competent instructors, is guided in his reading and evaluation of the literature, which is so voluminous that an individual cannot master it on his own initiative or by random study. The student has access to libraries and laboratories; is given opportunity to observe materials and methods of devising and implementing educational programs; and, in a controlled and supervised setting, can experiment for himself under professional guidance.

§ 24.96 *Electronic Scientist, GS–1312–5–15 (positions involving highly technical research, design, or development, or similar complex scientific functions)*—(a) *Educational requirement.* Applicants must have successfully completed a full curriculum leading to a bachelor's degree in an appropriate field in an accredited college or university, with major study in mathematics, engineering or a recognized branch of the physical sciences.

(b) *Duties.* The duties of these positions involve the formulation, application, interpretation, or evaluation of mathematical techniques and scientific concepts. The nature of the duties is comparable to electronics work or study usually conducted at the graduate level in an accredited college or university.

(c) *Knowledge and training requisite for performance of duties.* Successful performance of the duties of these positions requires a breadth of background and depth of insight into the fundamental nature and properties of matter and energy as applied to electronics and related physical sciences. This knowledge and training can be obtained only through a directed course of study in an accredited college or university with well-equipped laboratories and thoroughly trained instructors, where progress is competently evaluated.

§ 24.97 *Geologist, GS–1350–0 (all grades)*—(a) *Educational requirement.* Applicants must have successfully completed either (1) or (2) of the following:

(1) A full 4-year curriculum in an accredited college or university leading to a bachelor's degree, including courses in geology and allied subjects consisting of lectures, recitations, and appropriate practical laboratory and field work totaling at least 30 semester hours.

(2) Courses in geology and allied subjects in an accredited college or university consisting of lectures, recitations, and appropriate practical laboratory and field work totaling at least 30 semester hours; plus additional appropriate experience or education which, when combined with the 30 semester hours, will total 4 years of education and experience and give the applicant a technical and professional knowledge comparable to that which would be acquired through the successful completion of a 4-year college course.

(3) In either subparagraph (1) or (2) of this paragraph, the required 30 semester hours of study must have been in subjects as indicated by either subdivisions (i) or (ii) of this subparagraph:

(i) 30 semester hours in geology courses distributed in at least 5 of the following subjects: (*a*) Physiography, (*b*) structural geology, (*c*) mineralogy, (*d*) petrology, (*e*) paleontology, (*f*) stratigraphy, (*g*) sedimentation, (*h*) field geology, (*i*) geophysics, (*j*) geochemistry, (*k*) regional geology, (*l*) economic geology (metals, nonmetals, or fuels) or (*m*) ground water geology.

(ii) 30 semester hours of which 24 or more are distributed in at least 4 of the geology subjects (*a*) to (*j*) listed in subdivision (i) of this subparagraph and the remainder are in one or more advanced courses in the related sciences of mathematics, physics, chemistry, zoology, or botany.

NOTE: For those positions involving highly complicated or fundamental scientific research or similar difficult scientific duties certification may be restricted to those eligibles who show the successful completion of a full college curriculum as prescribed in subparagraph (1) of this paragraph.

(b) *Duties.* Geologists perform professional geological work in one or more of the specialized fields of geology, including such duties as: making and recording geological observations; identifying and studying specimens of rocks, fossils, and ores; carrying on geologic mapping for the purpose of showing location and character of rock formations, mineral and ore deposits, or underground water; studying mineral deposits to determine extent and value; and preparing professional scientific and economic reports for publication. The duties performed and the responsibilities assumed vary with and are commensurate with the grade of the position. In the higher grades in addition to performing difficult and responsible individual work, many geologists occupy administrative and supervisory positions, planning the work of a group of geologists or reviewing and directing the activities of lower grade geologists or assistants.

(c) *Knowledge and training requisite for the performance of duties.* For the successful performance of the duties described in paragraph (b) of this section the geologist needs a basic general knowledge of the principles of stratigraphy, sedimentation, structural geology, paleontology, ore deposition, and mineralogy, and a specialized knowledge of the various types of sedimentary, igneous, and metamorphic rocks, the rank and grade of coals, the characteristics of rocks as reservoirs of oil and underground water, the processes of erosion and sedimentation, and the application of mathematics and the physical and biological sciences to geological problems. The only method of obtaining this broad knowledge and training in the fundamentals of the various sciences involved, of the level and extent required, is by attending an accredited college or university where competent instruction and guidance are available. Where courses are arranged in a systematic schedule, where adequate laboratory and library facilities are provided and suitable standards for completeness of the program and thoroughness of the methods of instruction are maintained and where objective evaluations are made of a person's progress in acquiring professional and scientific information.

§ 24.99 *Veterinarian (trainee), GS–4–GS–5*—(a) *Educational requirement.* Applicants must have successfully completed at an accredited college or university three years for GS–4, four years for GS–5, of academic study toward a bachelor's or higher degree with specialization leading to a major in veterinary medicine. For either grade, one year only of the required education may consist of pre-veterinarian courses.

(b) *Duties.* The duties of the Veterinarian (trainee) consist of a combination of on the job training in a Federal agency and scholastic training in an accredited college or university. Appointees perform subprofessional work, participating in scientific research or other scientific or technical work in the fields of veterinary medicine or in inspecting animals received at stockyards to determine if they have symptoms of infectious, contagious, or communicable diseases.

(c) *Knowledge and training requisite for performance of duties.* Veterinarians (trainee) are employed at subprofessional levels for the purpose of training them for advancement to the professional service in the employing agency upon completion of the training program. Since the duties of the position involve, in addition to the actual scientific research or technical work while in training, the pursuance of academic studies of the last year or two years of a college course in order to perform successfully the duties at the professional level, applicants must have the specified education in order to enroll in the third or final year of a standard college curriculum in veterinary medicine in an accredited college or university.

§ 24.100 *Technologist, GS–1390–0 (all grades), (positions involving highly technical research, design, or development, or similar complex scientific functions)*—(a) *Educational requirement.* Applicants must have successfully completed a full 4-year course, in an accredited college or university, leading to a bachelor's degree in technology or in a pertinent field of engineering or physical science.

(b) *Duties.* The duties of these positions are to plan, direct, conduct, or assist in conducting critical investigative and research work of an applied scientific or technological nature involving design, development, or similar complex scientific functions for the improvement and utilization of industrial processes or techniques; or to coordinate a broad research program requiring the combined efforts of several specialists in different scientific fields. In all positions, appointees are required to present the results of their work in a clear concise manner, both orally and in writing.

(c) *Knowledge and training requisite for performance of duties.* For the successful performance of the duties described in paragraph (b) of this section the technologist needs a basic general knowledge of the principles and concepts of those physical sciences or that field of engineering pertinent to the branch of technology in which he works and, in addition, a knowledge of mathematics, those arts and sciences peculiar to the branch of technology in which he works, and ability for logical thinking and expression. The only method of obtaining this broad knowledge and training, of the level and extent required, is by attending a college or university where competent instruction and guidance are available, where courses are arranged in a systematic schedule, where adequate laboratory and library facilities are provided and suitable standards for completeness of the program and thoroughness of the methods of instruction are maintained, and where objective evaluations are made of a person's progress in acquiring professional and scientific information.

§ 24.101 *Trainee Research Psychologist (Physiological), GS–180–7*—(a) *Educational requirement.* Applicants must have successfully completed 1 year of graduate study acceptable by an accredited college or university as applying toward the requirements for the Doctor of Philosophy degree in the field of physiological psychology.

(b) *Duties.* The duties of this position are a combination of on-the-job training in a Federal agency and resident graduate scholastic training in physiological psychology at an accredited college or university to culminate in a Doctor of Philosophy degree. Appointees will perform psychological research directed toward measurement of human capacities relevant to the design of aviation instruments, controls, and complex equipment systems by preparation of experimental materials, collection and analysis of data, and preparation of reports. Psychological research areas include visual perception, dark adaptation, reaction time to complex stimuli, kinesthetic discrimination, motor coordination, transfer of training, fatigue, and activity analysis.

(c) *Knowledge and training requisite for performance of duties.* Trainee research psychologists (physiological) are appointed at the GS–7 level for the purpose of training them for advancement to the higher grade positions involving highly technical research and development in the field of physiological psychology in the employing agency upon the completion of their on-the-job and academic training period. Appointees must have a basic knowledge of the principles and techniques of physiological psychology to provide a basis for a fundamental understanding of research problems in this area. They must have the capacity to recognize the departure points for original research, to evaluate findings, and to integrate results of related experiments. The only method known by which this knowledge and training can be acquired is through advanced graduate scholastic training at an accredited college or university. Through such a specialized course of study under close professional supervision the advanced graduate student obtains a comprehensive understanding of the appropriate research and development techniques and obtains a vast store of knowledge of both the fundamental and advanced concepts applicable in the field. This graduate study is accomplished under competent professional instruction and guidance, where adequate laboratory facilities and libraries are available, and objective evaluations are made of the student's progress in the acquisition of professional information and scientific methods.

§ 24.102 *Trainee Research Physiologist (Mammalian), GS–413–7*—(a) *Educational requirement.* Applicants must have successfully completed one year of graduate study acceptable by an accredited college or university as applying to the requirements for the Doctor of Philosophy degree in the field of mammalian physiology.

(b) *Duties.* The duties of these positions are a combination of on-the-job training in a Federal agency and resident graduate scholastic training in mammalian physiology at an accredited college or university to culminate in a Doctor of Philosophy degree. Appoint-

ees will perform research in mammalian physiology and in biophysics to determine the effect of flight and emergency environments on the human organism and recommend means for maintaining and improving the efficiency, health, and safety of flying personnel and to establish criteria for the development of personal protective equipment to be used during flight such as oxygen masks, pressure suits, goggles, sun-glasses, flying clothing, anti-gravity suits, etc. Areas of research included in these investigations are respiratory phenomenon at high altitudes; explosive decompression; thermal, nutritional, sonic, accelerative, and decelerative forces; toxicological and metabolic studies associated with flying operations.

(c) *Knowledge and training requisite for performance of duties.* Trainee research physiologists (mammalian) are appointed at the GS–7 level for the purpose of training them for advancement to higher grade positions involving highly technical research and development in the field of mammalian physiology in the employing agency upon the completion of their on-the-job and academic training periods. Appointees must have a basic knowledge of the principles and techniques of mammalian physiology to provide a basis for a fundamental understanding of research problems in this area. They must have the capacity to recognize the departure points for original research, to evaluate findings, and to integrate results of related experiments. The only method known by which this knowledge and training may be obtained is through advanced graduate scholastic training at an accredited college or university. Through such a specialized course of study under close professional supervision, the advanced graduate student obtains a comprehensive understanding of the appropriate research and development techniques and obtains a vast store of knowledge of both the fundamental and advanced concepts applicable in the field. This graduate study is accomplished under competent professional instruction and guidance, where adequate laboratory facilities and libraries are available, and objective evaluations are made of the student's progress in the acquisition of professional information and scientific methods.

§ 24.103 *Aeronautical Research Pilot, GS–861–7–15*—(a) *Educational requirement.* Applicants must have successfully completed a 4-year course in an accredited college or university, leading to a bachelor's degree, with major study in an appropriate field of engineering, mathematics, or physical science.

(b) *Duties.* With responsibility proportionate to the grade, aeronautical research pilots perform a range of duties typified by the following: Make training flights in connection with the training and development of research pilots; fly a variety of aircraft of experimental and production types; operate airplanes in order to perform maneuvers and collect data in connection with research investigations of aircraft propulsion systems, engineering equipment and accessories, etc., for the purpose of adding to the general knowledge of aeronautics and providing criteria and other information useful in the design, development, and operation of aircraft; engage in diving and flying at high speeds involving noise, vibrations, and extreme and rapid changes in altitude; observe reaction and behavior of the airplane under varying and trying conditions, recording and reporting data to project engineers; collaborate with research project engineers to develop new testing techniques and equipment, entering into the active production of research projects and preparation of research reports; review test methods used on research projects; and assign research pilots of lower grades to flight tests.

(c) *Knowledge and training requisite for performance of duties.* The flying duties of research pilots can be performed with full efficiency only by pilots who have a professional understanding of the physical principles involved in the experiments. Such understanding enables them to perform the necessary maneuvers with a comprehension of the desired objective, to make and record the necessary sensory observations with perception of their significance, and to note and accurately record unexpected or incidental phenomena of value to a research project. Professional training in an appropriate field of engineering, physical science, or mathematics is necessary in order that the research pilot may have a pre-flight understanding of the research project, the problems under investigation, and the experimental techniques and instrumentation to be utilized, and so that he may be able to make post-flight recordings of data and to make analyses of such data, whether recorded by himself or other research pilots. The only method by which such knowledge and training can be acquired is through a directed course of study in an accredited college or university with adequate laboratory facilities and libraries and thoroughly trained instructors and where progress is competently evaluated.

§ 24.104 *Statistician, GS–1530–5*—(a) *Educational requirement.* Applicants must have successfully completed one of the following:

(1) A full 4-year course in an accredited college or university leading to a bachelor's degree, with either (i) 15 semester hours in statistics (or in a combination of mathematics and statistics of which at least 6 semester hours must be in statistics) and 9 additional semester hours of college work in one of the following: Biological sciences, demography, economics, education, engineering, health and medicine, physical science, or other social sciences; or (ii) 9 semester hours in statistics (or in a combination of mathematics and statistics of which at least 6 semester hours must be in statistics) and 9 additional semester hours of college work in agriculture or agricultural economics; or

(2) Courses as given under subparagraph (1) of this paragraph, plus additional appropriate experience or education which, when combined with these courses, will total 4 years of education and experience and give the applicant a technical knowledge comparable to that which would have been acquired through successful completion of a full 4-year course.

NOTE: For positions involving highly technical research, development, or similar complex scientific functions, certification may be restricted to eligibles who show the successful completion of a full college course as prescribed in paragraph (a) (1) of this section.

(b) *Duties.* Statisticians conduct elementary professional statistical research including the use, under guidance, of technical statistical methods; the initial appraisal of statistical measures; and the preparation and interpretation of tables, charts, and graphs.

(c) *Knowledge and training requisite for performance of duties.* This position is at the entrance level to a career in the scientific and professional service. Appointees must have a knowledge of fundamental statistical theory and methods, including probability, calculation of mean values, basic distribution laws, tests of significance, correlation and regression, elements of sampling, and, as required, preparation of index numbers, determination of trends, seasonal variation and cyclical components of time series, and construction of charts, tables, and worksheets; as required, knowledge of calculus and other appropriate mathematics; as required, some knowledge of subject matter. This knowledge can be gained only through direct training in a college or university. The student receives in such training competent instruction in the technical and theoretical subjects, which cannot be obtained through individual study.

§ 24.105 *Public Health Educator, GS–1720–0 (all grades)*—(a) *Educational requirement.* Applicants must have completed a year of graduate study in public health education in an accredited school of public health.

(b) *Duties.* Public health educators stimulate the interest of individuals and groups in scientific discoveries affecting health and in the application of health principles to daily living; assist school officials in establishing and improving health education curricula; organize community groups to study health problems and methods of disease prevention; assist in coordinating mass health programs and in evaluating and improving health education programs; and perform related duties.

(c) *Knowledge and training requisite for performance of duties.* The duties cannot be successfully performed without a knowledge of the public health sciences and an understanding of their practical application to public health programs. This can be acquired only through a directed course of study in public health education, in an accredited school of public health, which covers such subjects as epidemiology, parasitology, human bacteriology, communicable and noncommunicable disease control procedures, mental health, vital statistics and their meaning for community health planning, public health organization and administration, community organization, and principles of adult education as applied to public health. In this training students also learn the functions and methods of other public health personnel such as health officers, nurses, and sanitary engineers with whom they will be working in the performance of their duties as health educators.

§ 24.106 *Fishery Products Technologist, GS–492–7–13 (positions involving highly technical research, design, or development, or similar complex scientific functions)*—(a) *Educational requirement.* Applicants must have successfully completed a full 4-year course in an accredited college or university leading to a bachelor's degree with major study in bacteriology, chemistry, chemical engineering, or food or fisheries technology.

(b) *Duties.* Fishery Products Technologists advise on, administer, supervise, or perform research or other professional and scientific work in current and new methods and procedures used in the processing, storing, preserving, packaging, and distribution of fishery products; and in the development, manufacture, and use of fishery by-products.

(c) *Knowledge and training requisite for performance of duties.* The duties of this position cannot be successfully performed without basic training in fishery technological research and a sound knowledge of the basic principles of chemistry, bacteriology, physics, engineering, mathematics, and economics. Appointees must have the ability to apply this theoretical knowledge to the interpretation of data gathered in this field. This knowledge and training can be gained only through a directed course of study in an accredited college or university with scientific libraries, well-equipped laboratories, and thoroughly trained instructors, where guidance is expertly given and progress is competently evaluated.

§ 24.107 *Public Welfare Research Analyst (Child Welfare), GS–102–9–12*—(a) *Educational requirement.* Applicants must have completed 1 year of study in an accredited school of social work including courses in case work and supervised field work. This study must have included or been supplemented by 9 semester hours in statistics or 6 semester hours in statistics and 3 semester hours in methods of social research.

(b) *Duties.* Public Welfare Research Analysts (Child Welfare) work with public and voluntary social welfare agencies, juvenile and family courts, research foundations, and schools of social work in planning and conducting studies of social and economic conditions affecting the well-being of children, including case work and other social services provided by a variety of public and private agencies and institutions. Public Welfare Research Analysts (Child Welfare) plan and direct the collection, analysis, and presentation of statistical reports and studies, make difficult and complex analyses of areas of special need and gaps in programs and case work services and make appraisals of the adequacy and technical content of existing services.

(c) *Knowledge and training requisite for performance of duties.* The duties require an understanding of the field of social work, family relationships, and child welfare and knowledge of statistical techniques and principles and methods of social research. The required knowledge can be obtained only through the completion of the training shown in paragraph (a) of this section which enables the individual to apply sound technical standards in the evaluation and selection of material for study and to apply the necessary statistical and research principles in the treatment of the material.

§ 24.108 *Social Worker; Public Welfare Adviser (Child Welfare) GS–102–9–13*—(a) *Educational requirement.* Applicants must have completed 2 years (1 year for legislation specialists) of study in an accredited school of social work, including courses in case work, child welfare, and supervised field work in case work.

(b) *Duties.* With duties varying in responsibility in accordance with the grade, Social Workers—Public Welfare Advisers (Child Welfare), work with public and private, national, and international groups in developing, strengthening, and extending social services to children and youth. They advise on broad phases of planning for the social well-being of children and youth (such as legislation and other protective measures including adoption safeguards and licensing of child care institutions and agencies) and on administration and standards of social services directed toward facilitating the adjustment of children in their own homes, preventing development of conditions that require removal of children from their homes, and, for the child that cannot be cared for in his own home, providing for adequate and appropriate foster care. They also advise on the technical phases of providing and improving case work services for special groups of children (such as the dependent, neglected, and delinquent), on community programs to develop and strengthen services and facilities for children, and on staff development and training to improve the quality of case work services.

(c) *Knowledge and training requisite for performance of duties.* The duties require a knowledge of the field of social case work and child welfare. Knowledge and understanding of case work methods and techniques, patterns of human behavior, community organization, social, economic and health problems as they affect children, standards of child care, and factors entering into dependency, neglect and delinquency of children are required. This knowledge can be acquired only through study in an accredited school of social work in which the student concurrently receives competent classroom instruction in the technical principles and practices of social work and supervised practice in the application of these principles and practices, reading is directed, and the student's progress is carefully evaluated.

§ 24.109 *Social Worker (Psychiatric and Medical), GS–185–7–13 and GS–102–11–13* — (a) *Educational requirement.* Applicants must have completed 2 years of study in an accredited school of social work, including courses in case work, psychiatric information, medical information, and supervised field work in case work.

(b) *Duties.* With duties varying in responsibility in accordance with the grade, Social Workers (Psychiatric and Medical) are responsible for rendering psychiatric and medical social services or for directing operating medical and psychiatric social work programs in hospitals and clinics, including those of a demonstration nature in which new techniques for treatment and preventive services are tested; or are responsible for the development of program standards in the field of medical or psychiatric social work and for working with State agencies in the development and improvement of psychiatric and medical social services.

(c) *Knowledge and training requisite for performance of duties.* The duties require a knowledge of the field of social case work and psychiatric or medical social work. Knowledge and understanding of the emotional aspects of illness and social components in medical care, facilities and organizations established to provide services of a medical or psychiatric nature, community organization and skill in the application of case work methods and techniques are required. This knowledge can be acquired only through study in an accredited school of social work in which the student concurrently receives competent classroom instruction in the technical principles and practices of social work and supervised practices in the application of these principles and practices, reading is directed, and the student's progress is carefully evaluated.

§ 24.110 *Social Worker, Public Welfare Adviser (Public Assistance), GS–102–9–13*—(a) *Educational requirement.* Applicants must have completed 1 year of study in an accredited school of social work, including courses in case work and supervised field work in case work.

(b) *Duties.* Social workers, Public Welfare Advisers (Public Assistance), render advisory services for operating social welfare programs in the development and carrying out on a nation-wide basis of a broad public welfare program for financial assistance and case work services to the needy aged, needy blind, and dependent children. They exercise leadership in assisting State welfare departments to use effectively Federal and State resources and to develop programs not only to meet economic need but also to develop and strengthen case work services. They advise State welfare departments on legislation, organization, social policies, and methods of social investigations and social treatment that will facilitate efficient and equitable administration by the States and extend to individual recipients opportunity to utilize fully benefits and services. They report back to the Federal agency on the impact of the program in communities and in typical individual case situations for the purpose of guiding the development or modification of policy.

(c) *Knowledge and training requisite for performance of duties.* The duties require a knowledge of the field of social

case work and public welfare administration. An understanding of the norms of individual behavior and family life, typical deviations from these norms, the effects of financial dependency upon the individual and society, economic risks against which safeguards should be provided, knowledge of the principles of the social investigation and social treatment are required. This knowledge can be acquired only through the completion of the training shown in paragraph (a) of this section in which there is competent instruction and integration of principles and techniques through carefully supervised practice in a controlled setting and the application of sound standards in evaluation of progress.

§ 24.112 *Medical Student Aid, GS–7*—(a) *Educational requirements.* Applicants must have successfully completed their third year in an approved medical school.

(b) *Duties.* Appointees to this position make routine physical examinations of individuals and make their diagnoses and recommendations for treatment to the medical officer; make appointments for return visits of patients as necessary; examine patients with inoculation reactions; maintain records of individual cases seen, and work with medical technicians and laboratory assistants in administering inoculations and doing special laboratory tests.

(c) *Knowledge and training requisite for performance of duties.* Successful performance of these duties requires an understanding of the human body, its physiology and its reactions to drugs; and an understanding of the symptoms of disease and the causes of disease. The duties are similar to those performed by medical students in dispensaries and clinics as part of their medical education. The necessary knowledges and training can only be acquired through a directed course of study in an approved medical school of at least 3 years duration.

§ 24.113 *Soil Conservationist, GS–457–5*—(a) *Educational requirement.* Applicants must have successfully completed one of the following:

(1) A full 4-year course in an accredited college or university leading to a bachelor's degree with a major in soil conservation or one of the related agricultural sciences; or

(2) Courses in soil conservation or one of the related agricultural sciences acceptable toward a degree in an accredited college or university totaling at least 40 semester hours, plus additional appropriate experience or education which, when combined with the 40 semester hours, will total 4 years of education or experience and give the applicant a technical knowledge comparable to that which would have been acquired by the successful completion of a 4-year college course. The 40 semester hours must include at least one course in soils or soil conservation and at least one course in each of three of the following five groups: woodland management, plant ecology, or economic biology; farm crops or pasture management; feeds and feeding or animal nutrition; farm or range management or agricultural economics; farm drainage or hydraulics, hydrology or plane surveying. Applicants for positions in range country must show at least one course in range management.

(b) *Duties.* Soil Conservationists advise on or perform technical or other professional and scientific work in the field of soil conservation, involving farm planning and soil or water conservation practices. They will be required to walk over plowed land, climb hills and fences and ford streams while carrying equipment weighing from 30 to 40 pounds and will perform other duties as required. The duties of this position require a practical working knowledge of the basic principles, concepts, and terminology of water conservation, sound land use, and the control and prevention of soil erosion.

(c) *Knowledge and training requisite for performance of duties.*

NOTE: The provisions of § 24.36 (d) and (e) are applicable to this section.

§ 24.114 *Counseling Psychologist (Vocational Rehabilitation and Education) GS–180–11–12*—(a) *Educational requirements.* Applicants must meet the requirements stated in subparagraph (1) or (2) of this paragraph, as follows:

(1) Completion in an accredited college or university of two years graduate study (60 semester hours or 2 years of graduate credit as defined by the institution attended) including subdivisions (i), (ii), and (iii) of this subparagraph:

(i) Thirty-six semester hours distributed as follows:

(*a*) Personality organization and dynamics (9 semester hours) including courses such as abnormal psychology, mental hygiene, clinical psychology, and theories of personality: *Provided,* That at least one course was in theories of personality.

(*b*) Counseling theory and techniques (9 semester hours) including courses such as interviewing, case study method, theory and methods of counseling, principles of counseling, or practicum in counseling.

(*c*) Psychological tests and measurements (12 semester hours) including 6 semester hours in statistics and/or research method or theory of measurement and 6 semester hours in tests and measurements, of which at least 3 semester hours shall be in individual testing other than projective techniques.

(*d*) Occupations and their socio-economic setting (6 semester hours) including such courses as occupational information, job analysis, industrial sociology, sociology of occupations, labor problems, provided at least one course was in occupational information.

In meeting the requirements of this subdivision, up to 9 semester hours of advanced undergraduate courses, not more than six of which may be in any one area, may be offered in lieu of graduate courses: *Provided,* That an equivalent additional number of graduate credits is offered in other areas of this subdivision and/or subdivision (ii) of this subparagraph.

(ii) Twelve semester hours in any combination of additional courses in the areas mentioned above and/or courses in psychology, such as general, educational, experimental, child, adolescent, social, comparative, industrial, personnel, physiological, systematic, applied or learning theory.

(iii) The remaining courses may be in any combination of additional courses in the areas mentioned in subdivisions (i) and (ii) of this subparagraph and/or courses related to psychology, counseling or vocational rehabilitation, such as courses in rehabilitation of the handicapped, disabilities and their vocational implications, field work in rehabilitation principles, practices and problems of vocational rehabilitation, research in rehabilitation, personnel management or administration, personnel research, community organization and resources, education, economics, sociology, social work, and cultural anthropology.

(2) Satisfactory completion of all the requirements for the doctoral degree from an accredited college or university, based upon a graduate course of study with major emphasis in the field of psychology or counseling and guidance.

(b) *Duties.* Counseling psychologists (Vocational Rehabilitation and Education) apply psychological principles and appropriate counseling techniques in assisting eligible veterans in selecting and attaining suitable educational or occupational goals. They determine whether disabled veterans are in need of vocational rehabilitation to prepare them for suitable employment. They apply professionally recognized therapeutic counseling techniques in assisting the veteran with personal problems or conflicts which interfere with his vocational choice or with his progress in training. They detect those veterans with serious mental or emotional disturbances and refer them to Veterans Administration Mental Hygiene Clinics or other mental hygiene or medical services. They conduct research concerning the objectives, methods, and results of counseling.

(c) *Knowledge and training requisite for performance of duties.* (1) In order to adequately counsel veterans in selecting and attaining suitable educational and/or occupational goals the counseling psychologist (VR&E) must have had a specialized background of education and experience in the field of psychology, with particular emphasis upon counseling, and in other fields related to vocational and educational guidance. This background should have provided a thorough knowledge of the principles underlying behavior and of psychological and counseling techniques. The counseling psychologist (VR&E) must have the ability to apply professionally recognized therapeutic counseling techniques in assisting the veteran with personal problems or conflicts which interfere with his vocational choice or with his progress in training. Since counseling psychologists (VR&E) function without professional direction from psychiatrists, they must have sound preparation in order to be able to detect those veterans with serious mental or emotional disturbances and refer them to mental or hygiene clinics for more intensive and extensive treatment.

(2) The counseling psychologist (VR&E) must have a comprehensive knowledge of occupations and their varied demands and opportunities, an understanding of scientific method and of theory of measurement and be thoroughly familiar with a wide array of psychological tests used in assessment of interests, personality traits, mental abilities, achievements and special aptitudes. He must be able to interpret test results to the veterans. The counseling psychologist (VR&E) should have had sufficient training and experience to enable him to conduct research concerning the objectives, methods and results of counseling in order to improve the professional quality of counseling.

(3) In dealing with seriously disabled veterans the counseling psychologist (VR&E) must have a comprehensive background of information concerning the nature of, and common inter-relationships among various types of disabilities. This knowledge must be sufficiently thorough to enable him to determine whether disabled veterans are in need of vocational rehabilitation to prepare them for suitable employment, to understand and use medical terminology, and to interpret and apply medical information and advice concerning physical capacities and limitations in relation to specific occupations. He must be able to recognize the psychological effects of severe physical disabilities upon the veteran and apply counseling techniques which will fully develop the veteran's residual capacities through his choice of a vocational and/or educational goal.

(4) The only way that these knowledges can be acquired is through a balanced program of study in an accredited college or university in the courses listed in paragraph (a) of this section.

§ 24.115 *Principal (Day School), GS–1710–9–11, Principal (Boarding School), GS–1710–9–12, Reservation Principal, GS–1710–9–13, School Superintendent, GS–1710–12–13, in Indian Schools*—(a) *Educational requirement.* Completion of a full four-year course, leading to a degree from an accredited college or university, including or supplemented by 18 semester hours in education.

(b) *Duties.* Principals and Superintendents are responsible for planning an educational program to meet the special need of the students, which includes development of curricula and standards of instructions, evaluation of teacher performance, integration of school and community programs, supervision of the staff, and administration of the school plant.

(c) *Knowledge and training requisite for performance of duties.* The duties to be performed require a knowledge of principles, philosophy, and techniques of education; the ability to recognize special instructional problems that arise in teaching situations; and the ability to develop curricula and analyze effectiveness of the teaching program. This knowledge, understanding and ability can be gained only through a directed course of study as shown in paragraph (a) of this section, in an accredited college with well equipped libraries and thoroughly trained instructors, where guidance is expertly given and the student's progress is carefully evaluated.

§ 24.116 *Department Head (Academic, Agriculture, Guidance, Home Economics, Vocational Subjects, and General), GS–1710–9, in Indian Schools*—(a) *Educational requirement.* Completion of a full four-year course leading to a degree from an accredited college or university with a major in a subject matter area in which the duties are to be performed, including or supplemented by 18 semester hours of education.

(b) *Duties.* Department Heads are responsible for organizing a subject matter department and supervising its activities so that the knowledge and skills of the field of specialization will be efficiently taught. Department Heads establish overall course objectives and collaborate with the staff on preparation of instructional material and teaching techniques. They keep pertinent records for the departments.

NOTE: The Department Head (Academic) is responsible for organizing instruction either in the elementary grades or in one of the subject matter fields taught at the secondary level, other than agriculture, home economics, guidance, and vocational subjects.

The Department Head (General) is responsible for the organization of two subject matter fields in any combination of elementary grades, agriculture, home economics, guidance, vocational subjects or any of the other subjects taught at the secondary level.

(c) *Knowledge and training requisite for performance of duties.* The duties to be performed require a knowledge of principles, philosophy, and techniques of education; the ability to recognize special instructional problems that arise in teaching situations; thorough knowledge of one or more subject matter fields being taught, ability to integrate the department program with remainder of school program. This knowledge, understanding, and ability can be gained only through a directed course of study as shown in paragraph (a) of this section, in an accredited college with well-equipped libraries and thoroughly trained instructors, where guidance is expertly given and the student's progress is carefully evaluated.

§ 24.117 *Director of Schools, GS–1710–12–13–14, in Indian Schools*—(a) *Educational requirement.* Completion of a full four-year course leading to a degree from an accredited college or university, including or supplemented by major study in education.

(b) *Duties.* The Director of Schools is responsible for planning and developing an educational program to meet the special needs of the students; giving technical assistance to the staff in the development of curricula, course materials and teaching aids; for reviewing teaching methods and techniques; and also for recruitment, supervision, training and management of educational personnel.

(c) *Knowledge and training requisite for performance of duties.* The duties to be performed require a knowledge of the professional principles and philosophy of education, its theories, practices and techniques; comprehensive knowledge of educational and child psychology and the demonstrated ability to utilize this knowledge to facilitate learning; outstanding ability to evaluate the educational and vocational needs of the area and to plan a program to meet these needs. This knowledge and training can be obtained only through a directed course of study in an accredited college with well equipped libraries and thoroughly trained instructors, where guidance is expertly given and student progress is competently evaluated.

§ 24.118 *Principal-Teacher, GS–1710–8–9, in Indian Schools*—(a) *Educational requirement.* Completion of a full four-year course, leading to a degree from an accredited college or university, including or supplemented by 24 semester hours in education, 12 of which must be in elementary education.

(b) *Duties.* Principal-Teachers are responsible for the administration and development of the school and community programs; for the guidance and supervision of the teachers and custodial employees assigned to the school; for teaching in the elementary grades; for all school property, records, reports and correspondence; and for issuing supplies and equipment.

(c) *Knowledge and training requisite for performance of duties.* The duties to be performed require a knowledge of teaching principles and techniques and philosophy of education; the ability to recognize special instructional problems that arise in teaching situations; and the ability to integrate the school program with community activities as educative factors. This knowledge, understanding, and ability can be gained only through a directed course of study as shown in paragraph (a) of this section, in an accredited college with well-equipped libraries and thoroughly trained instructors, where guidance is expertly given and the student's progress is carefully evaluated.

§ 24.119 *Director and Chief Scientists (unallocated) $15,000 per annum, Plum Island Animal Disease Research Institute, Agricultural Research Service, Department of Agriculture*—(a) *Educational requirements*—(1) *Director.* Applicants must have successfully completed the full course of study in veterinary medicine in an accredited veterinary college.

(2) *Chief Scientist (Biochemistry and Biophysics).* Applicants must have successfully completed a full four year course in an accredited college leading to a bachelor of science degree in chemistry, which included courses in biochemistry.

(3) *Chief Scientist (Cytology).* Applicants must have successfully completed a full four year course in an accredited college, leading to a bachelor's

degree in biological science, which included courses in cytology.

(4) *Chief Scientist (Immunology) and Chief Scientist (Virology and Bacteriology).* Applicants must have completed the full course of study in veterinary medicine in an accredited veterinary college, or be graduates of a medical school of recognized standing with the degree of doctor of medicine.

(b) *Duties.* The Director of the Plum Island Animal Disease Research Institute has the responsibility for providing scientific and administrative direction and leadership to the Institute's broad program of extensive research and investigation, designed to discover and develop scientifically sound and practicable methods for the prevention, control, and eradication of foot-and-mouth and other exotic diseases of animals. The chief scientists share with the director the responsibility for planning and developing broad programs of fundamental research and have specific responsibility for the coordination of the research program in the specific areas of Biochemistry and Biophysics, Cytology, Immunology, Virology and Bacteriology, and related scientific fields.

(c) *Knowledge and training requisite for performance of duties.* The duties of these positions are such that they cannot be successfully performed without a basic background of sound knowledge of, and specific scientific training in, the particular fields indicated in paragraph (a) of this section. This background of knowledge and training can be acquired only through a directed course of study in an accredited college or university with scientific, and well-equipped laboratories, and thoroughly trained instructors, where guidance is expertly given and progress is competently evaluated.

§ 24.120 *Cotton Technologist, GS-1390-5-15*—(a) *Educational requirement.* Applicants must have successfully completed one of the following:

(1) A full 4-year course in an accredited college or university leading to a bachelor's degree in cotton technology or related subjects such as physics, chemistry, or mechanical or electrical engineering. This study must have included courses in cotton technology consisting of lectures, recitations and appropriate laboratory work totaling at least 20 hours; or

(2) Courses in cotton technology or related subjects such as physics, chemistry, or mechanical or electrical engineering (in an accredited college or university, consisting of lectures, recitations and laboratory work totaling not less than 20 semester hours) plus additional appropriate experience or education which when combined with the 20 semester hours in cotton technology or related subjects will total four years of education and experience and give the applicant a technical knowledge comparable to that which would have been acquired through successful completion of a 4-year college course.

(b) *Duties.* Persons appointed to these positions perform the following specific kinds of work:

(1) Cottonseed Technologists at this grade serve in a trainee capacity and assist higher grade Cotton Technologists perform work in connection with the testing and analyzing of cottonseed to ascertain the effect of variety, growth conditions, moisture, trash content, method of conditioning, sorting and handling and other related factors upon the quality and quantity of products obtained from cottonseed. They help interpret the results of these tests and analyses; help study the physical and chemical characteristics of cottonseed to determine those which can be measured at the gin in order to develop practical methods and techniques to grade cottonseed by individual lots as sold by producers; help observe and study present methods of grading cottonseed so these methods may be improved; and render preliminary recommendations and reports for publications on the results of their studies or experiments.

(2) Fiber Technologists at this grade assist higher grade technologists perform the more advanced laboratory studies in connection with testing or measuring the various properties of cotton fibers; assist in research studies and investigations designed to improve equipment and techniques and to develop new laboratory methods for the more precise and expeditious measurement of the various properties of cotton fibers and cotton products; study and observe the interrelationships of various fiber properties and the relationship of such properties to processing performance and product quality; and assist in analyzing and interpreting fiber test results and in the preparation of related reports and publications.

(3) Textile Technologists assist in making scientific investigations and experimental studies to determine the effect of various cotton fiber properties and other elements of quality in raw cotton or processing performance and on the quality of yarns and fabrics; and in helping conduct technical studies of the effect of different processing conditions and machine adjustments on the processing performance of cottons of various types and characteristics, and on product quality. They cooperate with State Agricultural Colleges and Experiment Stations on programs to improve cotton marketing and processing; serve cotton breeders, producers, merchants and manufacturers in testing the manufacturing performance of cottons; attend conferences with representatives of public and private research agencies, cotton manufacturers and other interested parties; and assist in analyzing and interpreting spinning test results and prepare related reports and publications.

(c) *Knowledge and training requisite for performance of duties.* The field of cotton technology is quite complicated and requires an intensive educational background. Cotton Technologists must have a full and complete knowledge of the physical and chemical properties of cotton and cottonseed, the specific properties of cotton fibers and types of cotton fibers, and must also know the methods, techniques and practices involved in the production and marketing of cotton and cottonseed and the manufacture of cotton and cottonseed products. They must be able to design experiments and tests, properly interpret the results of these tests and disseminate the results of such tests or experiments to technical workers in the field and the general public.

§ 24.121 *Student Trainee, GS-1-4, in the following codes: GS-402, 408, 455, 458, 462, 483, 802, 1311, 1341, 1371, 1521, or other code covering positions of student trainee for any professional field as follows: Any biological science (Group GS-400), any branch of engineering (Group GS-800), any physical science (Group GS-1300), architecture, landscape architecture, mathematics; and GS 2/4 in economics and statistics*—(a) *Educational requirements.* (1) For Student Trainee, GS-1: Applicants must have been graduated from an accredited high school upon the successful completion of all the high school courses required for admisssion to an accredited college or university in a curriculum leading to the bachelors' degree in one of the specialized fields shown in the headnote of this section, and they must have the intention of enrolling in such institution and curriculum within 4 months of the date of entrance on duty in the Student Trainee positions.

(2) Applicants for grades GS-2, 3, and 4 must have successfully completed the number of academic years of study specified below, a full academic year of study being defined as a period or combination of periods of study at college (in either cooperative or noncooperative curricula) equal in length to two semesters or three quarters:

For Student Trainee, GS-2: One full academic year of study.
For Student Trainee, GS-3: Two full academic years of study.
For Student Trainee, GS-4: Three full academic years of study.

(3) The college study specified must have been at an accredited college or university in a full 4-year or longer professional curriculum leading to a bachelors' degree with specialization in one of the fields listed in the headnote of this section. The specialized field applied for, which is the field in which the applicant will receive training on the job if appointed, must correspond to the course which the applicant is pursuing in college and to the specialization in which he expects to complete the requirements of major study. The required specialization must be such that at time of graduation the specific course requirements which are specified for eligibility in the U. S. Civil Service Commission examination for the corresponding GS-5 professional positions can be met.

(4) College study at an accredited junior college will be accepted if the credits are acceptable in full by a 4-year accredited college toward completion of its own curriculum in the field concerned.

(b) *Duties.* The duties of a student trainee consist of a combination of (1) on-the-job training in a Federal agency, and (2) scholastic training in a college or university. While on the job in a Federal agency, appointees participate in

research or other scientific or engineering work such as development, design, surveys, investigations, computations, laboratory or full experimentation or studies, construction, testing, standardization; or appointees participate in technical or research work in compiling, analyzing, summarizing and interpreting of statistical and economic data.

(c) *Knowledge and training requisite for performance of duties.* Student Trainees are employed for the purpose of training them for advancement to professional positions in the employing agency upon completion of the training program. Since the duties of the position involve, in addition to actual scientific, engineering, or technical work while in training, the pursuance of academic studies of the first, second, third, or fourth year of a specified under graduate college curriculum in order to perform successfully duties at the professional level, applicants must have the specified education in order to enroll in the required year of a standard college curriculum in an accredited college or university.

§ 24.122 *Occupational Therapist, GS-631-0 (all grades)*—(a) *Educational requirement.* Applicants must be graduates of a school of occupational therapy approved at the time of graduation by the Council on Medical Education and Hospitals of the American Medical Association. Applicants who graduated prior to 1938 must be graduates of a school of occupational therapy approved at the time of their graduation by the American Occupational Therapy Association.

(b) *Duties.* With duties varying in responsibility in accordance with grade, occupational therapists under general supervision of a medical officer follow accepted theories and practices for definitive therapeutic purposes to give treatment to patients for disease or injury, whether physical or mental, by the scientific use of remedial activities such as machine and hand crafts properly selected and adapted to provide restoration of muscle function and joint motion, improved work tolerance, relief from mental and emotional strain, and motivation back to normal life as a useful member of society.

(c) *Knowledge and training requisite for the performance of duties.* Occupational therapists must have a knowledge of the sciences such as anatomy, physiology, neurology, psychiatry, psychology, sociology, and child growth and development; a knowledge of clinical subjects covering general medical and surgical conditions, orthopedics, psychiatric, pediatric, tuberculosis and cardiac diseases; theory courses interpreting the principles and practices of occupational therapy in pediatrics, psychiatry, tuberculosis, orthopedics, and general medicine and surgery. He must be able to perform disability evaluations including joint measurement, locomotion, and functional testing. He must be able to recognize the connotation of the diagnosis so that limitations of the physical condition of the patient can be related to the treatment program. He must have a scientific knowledge of the use of occupational therapy equipment and be able to plan for and/or construct specific equipment adaptations to meet the specific patient needs. He must be able to anticipate and to recognize changes in the patient's physical or emotional condition and be able to make immediate adjustments in the treatment program. He must also have the ability to perform tests for the evaluation of developmental level, handedness, attention span, and activity tolerance. The necessary knowledges and training can only be acquired through a directed course of study in an approved occupational therapy school.

§ 24.123 *Mathematician, GS-1520-5-15*—(a) *Educational requirements.* Applicants must have completed one of the following:

(1) A full 4-year course in an accredited college or university leading to a bachelor's degree. This study must have included courses in mathematics totaling at least 24 semester hours.

(2) Courses in mathematics in an accredited college or university totaling at least 24 semester hours; plus additional appropriate experience or education which when combined with the 24 semester hours in mathematics will total 4 years of education and experience and will give the applicant a technical and general professional knowledge comparable to that which would have been acquired through the successful completion of the 4-year college course described in subparagraph (1) of this paragraph.

In either subparagraph (1) or (2) of this paragraph, the courses in mathematics must have been acceptable for credit toward meeting the requirements of a major in mathematics in a 4-year professional curriculum leading to a bachelor's degree. These courses must have included at least five of the following: Differential calculus, integral calculus, theory of equations, vector analysis, statistics, higher algebra (beyond elementary college algebra), differential equations, advanced differential calculus, advanced integral calculus, any other advanced course in mathematics for which one of the above is prerequisite.

(b) *Duties.* Mathematicians will plan, direct, perform, or assist in performing research in basic mathematical theory or related theoretical analytic or evaluation studies, or mathematical analyses and computations incident to investigative, developmental and research work in the scientific fields, such as engineering, physics, astronomy, etc. Their duties will include mathematical research and critical investigative work, mathematical analyses of observational data, computation of scientific tables, adaptation of mathematical projects to solution by high speed automatic electronic computing machinery, and writing of scientific reports, all involving a thorough knowledge of basic mathematics and in some cases involving a familiarity with the physical sciences or with engineering practices.

(c) *Knowledge and training requisite for performance of duties.* (1) The minimum amount of formalized training required for the successful performance of the duties described in paragraph (b) of this section consists of 24 semester hours of study in mathematics which, being distributed among several principal branches of the field, represents essentially a basic fundamental body of mathematical knowledge. In order that mathematicians may engage successfully in basic research in mathematics, or in other diverse phases of mathematics represented by the professional mathematician positions of the Federal Government, it is necessary that they be thoroughly and broadly trained.

(2) Advances in the various scientific fields have been dependent upon and interrelated to mathematics in all its branches, since mathematics is an indispensable tool in expressing basic laws and concepts, in interpreting experimental data, in extending old or establishing new concepts and in establishing basic hypotheses for new experimental work in scientific fields. Further advances in these fields will be vitally dependent on the number of highly qualified, and broadly trained mathematicians who are competent to explore from a mathematical standpoint the particular field in which a research problem is centered. The only method by which mathematicians can be thoroughly and broadly trained to the level and extent required is through a planned and directed course of study in an accredited college or university where there are adequate scientific libraries, where competent instruction and guidance are available, where courses are arranged in a systematic, progressive schedule, and where progress in the acquisition of professional and scientific knowledge is competently evaluated.

§ 24.124 *Forest Products Technologist, GS-1390-5-15* — (a) *Educational requirement.* (1) Applicants must have successfully completed one of the following:

(i) A full 4-year course of study in an accredited college or university leading to a bachelor's or higher degree with major study in forestry, botany, wood utilization, wood technology, chemistry, physics or closely related subject-matter fields. This course of study must have included a combined total of at least 20 semester hours course-work in engineering, mathematics and physics, and 12 semester hours of course-work in any combination of the following subjects: wood technology, lumber manufacture, seasoning, logging, forest pathology, wood preservation and treating, wood utilization, wood properties (including mechanical and physical properties), wood structure, and plywood and laminating.

(ii) A total of at least 40 semester hours of course-work in professional, scientific or technical subjects in an accredited college or university with major study in forestry, botany, wood utilization, wood technology, chemistry, physics or closely related subject-matter fields. This course-work must have included a combined total of at least 20 semester hours of course-work in engineering, mathematics and physics and 12 semester hours of course-work in any combination of the following subjects: wood technology, lumber manufacture, seasoning, logging, forest pathology, wood

preservation and treating, wood utilization, wood properties (including mechanical and physical properties), wood structure and plywood and laminating, and have been supplemented by enough additional experience, or education, of an appropriate nature to total 4 years of experience and education or 4 years of education. The quality of this additional experience or education must have been such that, when combined with the required 40 semester hours in professional, scientific or technical subjects, it gives the applicant a technical knowledge comparable to that normally acquired through the successful completion of the full 4-year course of study described in subdivision (i) of this subparagrah.

(2) Applicants for positions which involve highly technical research, design or development, or similar complex scientific functions, must have successfully completed the full 4-year course of study described in subparagraph (1) (i) of this paragraph.

(b) *Duties.* Forest Products Technologists advise on, administer, supervise or perform research or other professional and scientific work in connection with the development, improvement and utilization of wood and wood products. This work deals with such things as the protection of wood and wood products against weathering, decay, insects and fire by treatments or coatings; the development and use of wood veneers, plywood and laminated wood and adhesives used to bond these materials; wood identification; wood structure in relation to growth and properties; and log and lumber grades and grading. It is also concerned with the harvesting and conversion of timber and lumber; the use of wood and wood products for containers and packing materials; the seasoning of wood; the physical properties of wood and wood products; the production and testing on a pilot plant scale of utility items made of wood; and giving consultation and advice on the application of research results to the manufacture and remanufacture of wood and wood products.

(c) *Knowledge and training requisite for performance of duties.* The field of wood and forest products technology is quite complicated and requires an intensive educational background. Forest Products Technologists cannot perform their duties without a full and complete knowledge of the physical and chemical properties of wood, the specific properties of different kinds of wood and wood products, and the methods, techniques and practices involved in the production and manufacture of wood and wood products. The duties of most of these positions are of a research nature and require exacting and detailed knowledge and training. Appointees must have the ability to apply their professional and scientific knowledge to their work in order to solve specific problems, interpret and apply the results of research in this and related fields, or to do research in wood and forest products technology. The knowledge and training required can only be acquired through the successful completion of a directed course of study in an accredited college or university which has scientific libraries, well-equipped laboratories and thoroughly trained instructors, gives expert guidance, and evaluates progress competently.

§ 24.125 *Home Economist, GS–493–5–15*—(a) *Educational requirement.* (1) Applicants must have successfully completed one of the following:

(i) A full 4-year course of study in an accredited college or university leading to a bachelor's or higher degree with major study in home economics or a closely related subject-matter field. This course of study must have included at least 20 semester hours of course-work in home economics which was either in, or directly related to, one of the following fields of home economics: food quality and use, human nutrition, household management and family economics, housing and household equipment, or textiles and clothing.

(ii) A total of at least 30 semester hours of course-work in home economics or a closely related subject-matter field in an accredited college or university, including at least 20 semester hours either in, or directly related to, one of the following fields of home economics: food quality and use, human nutrition, household management and family economics, housing and household equipment or textiles and clothing, plus enough additional experience, or education, of an appropriate nature to total 4 years of experience and education or 4 years of education. The quality of this additional experience or education must have been such that, when combined with the required 30 semester hours in home economics and closely related subjects, it gives the applicant a technical knowledge comparable to that normally acquired through the successful completion of the full 4-year course of study described in subdivision (i) of this subparagraph.

(2) Applicants for positions which involve highly technical research, design or development, or similar complex scientific functions, must have successfully completed the full 4-year course of study described in subparagraph (1) (i) of this paragraph.

(b) *Duties.* Home Economists advise on, administer, supervise or perform research or other professional and scientific work in the field of home economics. This work is concerned with such things as (1) food quality and use, (2) human nutrition, (3) household management and family ecnomics, (4) housing and household equipment, and (5) textiles and clothing. Some positions are largely of a research nature. Others deal with the dissemination of professional and scientific information in connection with extension work or other Federal programs of a similar nature.

(c) *Knowledge and training requisite for performance of duties.* The duties of these positions cannot be performed successfully without a sound basic knowledge of home economics and scientific training in one of the specialized fields of home economics. The duties of research positions require even more exacting and detailed knowledge and training. Appointees must have the ability to apply their professional and scientific knowledge to their work in order to solve specific problems, interpret and apply the results of research, both in the field of home economics and in related fields of science, or to do research in the field of home economics. The knowledge and training required can only be acquired through the successful completion of a directed course of study in an accredited college or university which has scientific libraries, well-equipped laboratories and thoroughly trained instructors, gives expert guidance, and evaluates progress competently.

§ 24.126 *Food Products Technologist, GS–1390–5–15*—(a) *Educational requirement.* (1) Applicants must have successfully completed one of the following:

(i) A full 4-year course of study in an accredited college or university leading to a bachelor's or higher degree with major study in food technology, biology, chemistry, physics or a closely related subject-matter field. This course of study must have included at least 20 semester hours of course-work in food technology and closely related subjects.

(ii) A total of at least 30 semester hours of course-work in an accredited college or university with major study in food technology, biology, chemistry, physics or a closely related subject-matter field, including at least 20 semester hours in food technology and closely related subjects, plus enough additional experience, or education, of an appropriate nature to total 4 years of experience and education or 4 years of education. The quality of this additional experience or education must have been such that, when combined with the required 30 semester hours in food technology, biology, chemistry, physics or closely related subjects, it gives the applicant a technical knowledge comparable to that normally acquired through the successful completion of the full 4-year course of study described in subdivision (i) of this subparagraph.

(2) Applicants for positions which involve highly technical research, design or development, or similar complex scientific functions, must have successfully completed the full 4-year course of study described in subparagraph (1) (i) of this paragraph.

(b) *Duties.* Food Products Technologists advise on, administer, supervise or perform research in connection with the study and analysis of problems relating to the quality and evaluation of food products and their production, utilization and processing. This research deals with such technological problems as (1) the evaluation of raw food products to determine standards of quality; (2) the development of methods for testing and measuring quality changes in food products resulting from biological, chemical or physical changes during handling, storing and processing; (3) the development of techniques to control such quality changes in food products; and (4) the development of improved methods of preserving and processing food products.

(c) *Knowledge and training requisite for performance of duties.* The field of food products technology is quite complicated and requires an intensive and specialized educational background to perform the duties of these positions. Food Products Technologists must have a full and complete knowledge of the physical, chemical and biological properties of various types of food products and a specialized technical knowledge of food technology and must also know the methods, techniques and practices involved in the production and preservation of food and food products. Appointees must have the ability to apply their professional, scientific and technological knowledge to their work in order to solve specific problems, interpret and apply the results of research both in the field of food technology and closely related fields, or to do research in the field of food technology. The knowledge and training required can only be acquired through the successful completion of a directed course of study in an accredited college or university which has scientific libraries, well-equipped laboratories and thoroughly trained instructors, gives expert guidance, and evaluates progress competently.

§ 24.127 *Geophysicist (Earth Physics, Geomagnetics, Seismology), GS–1313–5–15*—(a) *Educational requirement.* Applicants must have completed one of the following:

(1) A full 4-year course in an accredited college or university leading to a bachelor's degree including courses in mathematics and physics (inclusive of geophysics) totaling 24 semester hours, and courses in the physical sciences (engineering, geology, astronomy, electronics, etc.) totaling 6 semester hours; or

(2) Courses in mathematics and physics in an accredited college or university totaling 24 semester hours; plus additional appropriate experience or education in scientific fields which when combined with the 24 semester hours in mathematics and physics will total 4 years of education and experience and give the applicant a technical and professional knowledge, comparable to that which would have been acquired through the successful completion of the 4-year college course described in subparagraph (1) of this paragraph.

In either subparagraph (1) or (2) of this paragraph, the courses must have included a minimum of 10 semester hours in any combination of courses in trigonometry, differential calculus, integral calculus, theory of equations, vector analysis, higher algebra (beyond elementary college algebra), differential equations, advanced calculus; and a minimum of 8 semester hours in physics. All of the courses specified in subparagraph (1) or (2) of this paragraph must have been accepted for credit toward the completion of a standard 4-year professional curriculum leading to a bachelor's degree at an accredited college or university.

(b) *Duties.* Geophysicists apply mathematics and physics to the solution of geophysical problems or the geophysical interpretation of scientific phenomena. The duties deal with: (1) The electric, magnetic and gravitational field of the earth, (2) deformation of the earth, (3) the motion and constitution of the earth, (4) cosmic physics in its relation to the earth and its atmosphere, (5) response of the earth to artificially applied fields of force. The duties include making observations in the field or at fixed stations, interpreting the results, preparing charts and tabulations, and securing other information required for interpretations; designing or assisting in constructing specialized apparatus and equipment for use in connection with geophysical measurements, and the testing and calibrating of such apparatus and equipment; making reports and preparing articles for publication.

(c) *Knowledge and training requisite for performance of duties.* The duties of these positions can not be performed without a sound basic knowledge of fundamental mathematics and physics and broad training in related scientific fields. These duties require exacting knowledge and training. Appointees must have the ability to apply scientific knowledges to the work in order to solve specific problems, interpret and apply the results of research in geophysics and related sciences, and to perform research in geophysics. The knowledge and training required can only be acquired through a planned and directed course of study in an accredited college or university where there are adequate scientific libraries and well-equipped laboratories, where competent instruction and guidance are available, where courses are arranged in a systematic, progressive schedule, and where progress in the acquisition of professional and scientific knowledge is competently evaluated.

PART 25—FEDERAL EMPLOYEES' PAY REGULATIONS

Subpart A—Step-Increases

PERIODIC AND ADDITIONAL STEP-INCREASES

Sec.
25.1 Scope.
25.11 Definitions.
25.12 Conditions of eligibility for periodic step-increases.
25.13 Effective date.

LONGEVITY STEP-INCREASES

25.51 Scope.
25.52 Definitions.
25.53 Conditions of eligibility.
25.54 Miscellaneous provisions.

Subpart B—General Compensation Rules

25.101 Scope.
25.102 Definitions.
25.103 General provisions.
25.104 Special provisions.
25.105 Special adjustments in minimum pay rate of the class.

Subpart C—Overtime, Night, and Holiday Pay Regulations

25.201 Employees to whom this subpart applies.
25.202 Employees to whom this subpart does not apply.
25.203 Definitions.
25.204 General pay computation method.
25.205 Maximum limitation.

ESTABLISHMENT OF BASIC WORKWEEK AND WORK SCHEDULES

25.211 Establishment of basic workweek and regularly scheduled administrative workweek.
25.212 Establishment of work schedules.

OVERTIME PAY

25.221 Authorization of overtime compensation.
25.222 Computation of overtime employment.
25.223 Computation of overtime compensation.
25.224 Compensatory time off for irregular or occasional overtime duty.

NIGHT PAY

25.231 Authorization of night pay differential.
25.232 Computation of night pay differential.

HOLIDAY PAY

25.241 Identification of holidays.
25.242 Authorization of holiday pay.
25.243 Relationship to overtime and night pay.

SPECIAL PROVISIONS FOR CERTAIN TYPES OF WORK—POSITIONS REQUIRING EMPLOYEES TO REMAIN AT THEIR STATIONS DURING LONG DUTY TOURS, A SUBSTANTIAL PART OF WHICH IS STANDBY

25.251 Authorization of additional annual compensation.
25.252 General restrictions.
25.253 Bases for determining positions for which additional compensation under § 25.251 is authorized.
25.254 Rates of additional compensation payable under § 25.251.

SPECIAL PROVISIONS FOR CERTAIN TYPES OF WORK—POSITIONS IN WHICH THE HOURS OF DUTY CANNOT BE CONTROLLED ADMINISTRATIVELY, AND WHICH REQUIRE SUBSTANTIAL AMOUNTS OF IRREGULAR, UNSCHEDULED, OVERTIME, NIGHT, AND HOLIDAY DUTY

25.261 Authorization of additional annual compensation.
25.262 General restriction.
25.263 Bases for determining positions for which additional compensation under § 25.261 is authorized.
25.264 Rates of additional compensation payable under § 25.261.

SPECIAL PROVISIONS FOR CERTAIN TYPES OF WORK—RESPONSIBILITIES OF DEPARTMENTS AND GENERAL RULES GOVERNING PAYMENTS

25.271 Responsibilities of the departments.
25.272 Payment provisions.
25.273 Relationship to other payments.
25.274 Construction and computation of existing aggregate rates.

Subpart D—[Reserved]

Subpart E—Conversion of Employees Together With Their Positions From Classification Act Schedule to Prevailing Wage System, or From Prevailing Wage System to Classification Act Schedule

25.501 Purpose.
25.502 Definitions.
25.503 Conversion from Classification Act to prevailing wage system.
25.504 Conversion from prevailing wage system to Classification Act schedule.
25.505 Continuation of saved compensation.

SUBPART A—STEP-INCREASES

AUTHORITY: §§ 25.1 to 25.54 issued under sec. 1101, 63 Stat. 971; 5 U. S. C. 1072. Interpret or apply secs. 701–704, 63 Stat. 967–969; 5 U. S. C. 1121–1124.

PERIODIC AND ADDITIONAL STEP-INCREASES

§ 25.1 *Scope.* This subpart applies to each civilian officer or employee in or under the departments as defined in section 201 (a) of the Classification Act of 1949, subject to the exemptions speci-

fied in sections 202, 204, and 705 of the act, who meets all of the conditions of eligibility for periodic step-increases.

§ 25.11 *Definitions.* For the purpose of this subpart, definitions are given for words, terms, and phrases as follows:

(a) "Periodic step-increase" is a one-step increase within the grade based on length of service and performance rating requirements.

(b) "Permanent position" is any position compensated on a per annum basis within the scope of scheduled rates of compensation fixed by the Classification Act of 1949, except a position designated as temporary by law or with a definite time limitation.

(c) "Maximum schedule rate" is the maximum rate of any grade under the CPC or General Schedules established under Title VI of the act, exclusive of rates established under regulations governing longevity step-increases.

(d) "Waiting period" is the minimum time requirement of creditable service without an equivalent increase in compensation in order to be eligible for consideration for a periodic step-increase. The waiting period for either full-time or regular part-time employees is 52 calendar weeks for grades with step-increases of less than $200, and 78 calendar weeks for grades with step increases of $200 or more. (A calendar week is a total of any 7 calendar days before, beginning with, or after a specified day.) The waiting period shall not be interrupted where the employee's services are terminated on the last day of his regularly scheduled administrative workweek and his next appointment is made effective on the first day of the next regularly scheduled administrative workweek for his new position. "Creditable service, in the computation of waiting periods, includes:

(1) Continuous paid civilian employment in any branch (executive, legislative, or judicial) of the Federal Government, or in the municipal government of the District of Columbia, including advance annual or sick leave, and service under a temporary appointment or compensated at a per diem or hourly rate, but not including service paid at overtime rates.

(2) Leave without pay, furlough, or suspension not in excess of two work weeks.

(3) Paid civilian employment prior to a non-pay period, including separation, providing such non-pay period was not in excess of fifty-two calendar weeks. Where such prior service is credited, there must be sufficient current creditable service to complete the waiting period.

(4) Service with the armed forces or service in essential non-Government civilian employment, in the public interest, during a period of war or national emergency, when otherwise creditable service was interrupted.

(5) Service in any other Federal department as defined in section 201 (a) of the act where the employee exercises reemployment rights in accordance with the provisions of Part 10 of this chapter.

(6) Not to exceed 120 calendar days between discharge or termination and reemployment under mandatory provisions of any statute, regulations, or Executive order.

(e) "Equivalent increase in compensation" is the total of any increase or increases in basic compensation which is equal to or greater than the smallest step-increase in any grade in which the employee has served during a period under consideration. Step-increases resulting from the application of sections 703 and 802 (b) of the act are equivalent increases in compensation. The following, among others, are not "equivalent increases in compensation":

(1) Any increase in rates of basic compensation provided by Title VI;

(2) An increase made for the specific purpose of correcting an error in a previous demotion or reduction in pay;

(3) Payment of a foreign or a territorial post differential or cost-of-living allowance.

(4) An increase resulting from the establishment of any minimum rate pursuant to section 803 of the Classification Act of 1949, as amended.

(f) "Current performance rating" is the current official performance rating under a performance rating plan which has been approved by the Civil Service Commission.

§ 25.12 *Conditions of eligibility for periodic step-increases.* Each officer and employee in a permanent position receiving less than the maximum scheduled rate for his grade shall receive periodic step-increases successively to the next higher rate within the grade following the completion of the waiting period for his grade, subject to the following conditions:

(a) That his current performance rating is "Satisfactory" or better.

(b) That the benefit of successive step-increases shall be preserved for any officer or employee whose continuous service is interrupted in the public interest by service with the armed forces or by service in essential non-Government civilian employment during a period of war or national emergency. The requirement of a performance rating shall be waived upon the return to Federal civilian duty of any such officer or employee otherwise entitled to the benefit of step-increases.

§ 25.13 *Effective date.* (a) Periodic step-increases shall be made effective at the beginning of the next pay period following the completion of the required waiting period and compliance with the other required conditions of eligibility.

(b) Any step increase becoming due as the result of retroactive corrective action in accordance with the mandatory provisions of any statute or Commission regulation shall be made effective as of the date the officer or employee would have met all the conditions if proper action had been taken originally.

(c) Where a step-increase is delayed beyond its proper effective date, solely through administrative error, delay, or oversight, the step-increase shall be made effective as of the date it was properly due.

LONGEVITY STEP-INCREASES

§ 25.51 *Scope.* Sections 25.51 to 25.54 apply to all officers and employees in or under the departments as defined in section 201 (a) of the Classification Act of 1949, subject to the exemptions specified in sections 202, 204, and 705 of that act, in positions in the CPC Schedule, or not above grade 15 of the General Schedule, who meet all of the conditions of eligibility for longevity step increases.

§ 25.52 *Definitions.* (a) For the purpose of this subpart, the definitions of "permanent position" and "current performance rating" are the same as in § 25.11. Other definitions are provided as follows:

(b) Longevity step increase is a step increase above the maximum scheduled rate of the grade equal to a full step of the grade or an increase in an amount required to complete a full step where the employee's existing rate of basic compensation is not a standard maximum or longevity rate for the grade in which the employee's position is placed.

(c) "Aggregate period" is a total of ten years in the present position, or in the present grade and equivalent or higher grades, of civilian service, including intervening military service which has interrupted civilian service, and excluding all periods of separation from the service and any unpaid absence in excess of 26 workweeks in any calendar year. For the purpose of this definition, an equivalent or higher grade under the Classification Act of 1949 shall be determined by the following table:

CPC-1			SP-1
CPC-2	equivalent to GS-1	equivalent to	SP-2
CPC-3			CAF-1
CPC-4	equivalent to GS-2	equivalent to	CAF-2, SP-3
CPC-5	equivalent to GS-3	equivalent to	CAF-3, SP-4
CPC-6	equivalent to GS-4	equivalent to	CAF-4, SP-5
CPC-7	equivalent to GS-5	equivalent to	CAF-5, SP-6, P-1
CPC-8	equivalent to GS-6	equivalent to	CAF-6, SP-7
CPC-9	equivalent to GS-7	equivalent to	CAF-7, SP-8, P-2
CPC-10	equivalent to GS-8	equivalent to	CAF-8
	GS-9	equivalent to	CAF-9, P-3
	GS-10	equivalent to	CAF-10

Civilian service paid under authority other than the Classification Act of 1923, as amended, or the Classification Act of 1949, shall be deemed to be equivalent to the highest grade in the foregoing table in which the basic rate for such service would have been included at the time of such service.

(d) "Longevity period" is three years, of the aggregate period of continuous service in a Classification Act position: (1) At the maximum scheduled rate of the employee's grade; or (2) at a longevity rate of the employee's grade; or (3) at a rate in excess of such maximum scheduled rate in accordance with a provision of law; or (4) at any of the rates specified in subparagraphs (1), (2), or (3) of this paragraph, in a grade higher than his current grade. Intervening military service interrupting continuous service at one of the above rates is creditable for longevity step increases. A change of grade or rate of basic compensation prescribed by any law of general application does not begin a new longevity period. Any period of creditable service in excess of one or two complete longevity periods (except as otherwise provided in § 25.54 (c)), shall be credited toward the completion of the employee's next longevity step period. A new longevity period begins when a longevity step increase is effected, or after a break in service in excess of four workweeks. The longevity period shall be extended for a sufficient amount of paid service to make up unpaid absences in excess of a total of six workweeks during such period.

§ 25.53 *Conditions of eligibility.* Each officer or employee in a permanent position who has completed the required aggregate period shall be granted a longevity step increase for each longevity period completed in his grade, provided his current performance rating is "Satisfactory" or better. The requirement of a performance rating shall be waived for any period of intervening military service. No officer or employee shall be given more than one longevity step increase for any longevity period, or more than three successive longevity step increases.

§ 25.54 *Miscellaneous provisions.* (a) Any officer or employee receiving a rate of basic compensation in excess of the maximum scheduled rate for his grade in accordance with any provision of law, shall be granted longevity step increases only when they would have been granted under this subpart and section 703 (c) of the Classification Act of 1949, if his salary had been at the maximum scheduled rate of the grade at the time such saving clause first applied to his rate of basic compensation.

(b) Any officer or employee who is otherwise eligible for longevity step-increases shall receive full credit for service at the maximum authorized salary rate specified in the Bacharach Act of May 29, 1928, as amended and supplemented, and the Reed-Jenkins Act of May 29, 1928, as amended, to the same extent as if such service had been at the maximum rate of a grade of the Classification Act of 1923, as amended.

(c) Service immediately prior to the effective date of this subpart shall be counted toward one, two, or three longevity step increases as provided above. In the case of officers and employees in grades 11 to 15, inclusive, of the General Schedule who are receiving compensation at or above the maximum scheduled rates for their respective grades on the date immediately preceding the effective date of section 103 (a) of Public Law 763, approved September 1, 1954, not to exceed three (3) years of service performed immediately preceding such effective date shall be counted toward longevity step increases.

(d) The provisions of § 25.13 for periodic step-increases shall be followed in connection with longevity step-increases. (Public Law 580, 81st Congress, approved June 28, 1950)

SUBPART B—GENERAL COMPENSATION RULES

AUTHORITY: §§ 25.101 to 25.105 issued under sec. 1101, 63 Stat. 971; 5 U. S. C. 1072. Interpret or apply secs. 801–803, 63 Stat. 969; 5 U. S. C. 1131–1132, note.

§ 25.101 *Scope.* This subpart applies to each officer or employee in or under the departments as defined in section 201 (a) of the Classification Act of 1949, subject to the exemptions specified in sections 202 and 204.

§ 25.102 *Definitions.* As used in this subpart, and in making salary adjustments upon change in type of appointment, employment status, or position of the employee, words and terms are defined as follows:

(a) "New appointment" is the first appointment as a Federal civilian officer or employee in any department as defined in section 201 (a) of the Classification Act of 1949, or in a mixed ownership corporation, regardless of the tenure of appointment.

(b) "Reemployment" is any employment, including reinstatement, or any other type of appointment, subsequent to a separation from the Federal service.

(c) "Transfer" means a change of position by an employee from one agency to another, without a break in service of a full workday.

(d) "Reassignment" is a change, without promotion or demotion, from one position to another position, while serving continuously in the same agency.

(e) "Promotion" is the advancement of an employee while continuously employed to a higher Classification Act grade, or from a lower rate paid under authority other than the Classification Act to a higher rate within a Classification Act grade.

(f) "Repromotion" is the advancement of an employee while continuously employed to a higher Classification Act grade formerly held by the employee or to a higher intermediate grade, or from a lower rate paid under authority other than the Classification Act to a higher rate within a Classification Act grade, based on the highest previous rate paid to the employee.

(g) "Demotion" is the reduction of an employee while continuously employed to a lower Classification Act grade or from a higher rate paid under authority other than the Classification Act to a lower rate within a Classification Act grade.

(h) "Higher grade" is any GS or CPC grade, other than an equivalent grade (see tabulation of equivalent grades in § 25.52 (c) of this chapter), the maximum scheduled rate of which is higher than the maximum scheduled rate of the last previous GS or CPC grade held by the employee.

(i) "Existing rate" of basic compensation is the rate received immediately prior to the effective date of the transfer, promotion, repromotion, demotion, or step-increase.

(j) "Highest previous rate" is the highest basic salary rate previously paid to a Federal civilian employee occupying a position in a department as defined in section 201 (a) of the Classification Act of 1949, as amended, or in a mixed ownership corporation, irrespective of whether or not such position is subject to the pay schedules of the Classification Act. The highest previous rate must be based on a regular tour of duty at such rate (1) under an appointment not limited to 90 days or less, or (2) for a continuous period of 90 days under one or more appointments without a break in service. If such highest previous rate was earned in a Classification Act position, it shall be increased by any subsequent amendments to the Classification Act pay schedules. If such highest previous rate was earned in a position not subject to the Classification Act, it shall be increased only by those amendments to the Classification Act which were enacted during a period when the employee was not on the rolls of a department or a mixed ownership corporation as described above.

(k) Area is a geographical subdivision which can be described in terms of boundaries, such as the metropolitan limits of a city, the area within 20 miles of the city limits, a county, several counties, a state, etc.

(l) Location is a specific place of employment within an area, such as a particular shipyard or airbase.

§ 25.103 *General provisions.* (a) All new appointments shall be made at the minimum rate of the grade to which the employee is appointed except where the minimum rate for a class is increased by Commission action. In this case new appointments shall be made to the minimum rate for that specific class.

(b) (1) Subject to the mandatory requirements of paragraph (d) of this section and § 25.104, an employee who is reemployed, transferred, reassigned, promoted, repromoted, or demoted may be paid at any scheduled rate for his grade which does not exceed the employee's highest previous rate. If the employee's highest previous rate falls between two scheduled rates of the new grade, he may be given the higher rate. If the employee's existing rate of basic compensation is less than the minimum scheduled rate of the new grade, his compensation shall be increased to the minimum rate. An employee whose type of appointment is changed in the same position may continue to be paid at his existing rate or may be paid at any higher scheduled rate for his grade which does not exceed his highest previous rate; and if his highest previous rate falls between two scheduled rates of the grade, he may be given the higher rate.

(2) When the grade of a position is reduced on post audit by the Commission, no rate paid as a result of the agency's classification of the position shall be used as the incumbent's highest previous rate if such agency classification was made, without fundamental change in the nature of the position or in position-classification standards of the Commission for such positions, after the Commission (under the Classification Act of 1923, as amended, or the Classification Act of 1949, as amended) had placed the position in a lower grade

or had officially informed the agency that the position belonged in a lower grade (see 30 Comp. Gen. 319). The agency may fix the incumbent's rate of pay at any rate of the grade to which his position is reduced not higher than the rate he would have been receiving if the agency had classified the position in that grade, and may credit him with the service that he would then have had creditable toward his next step increase.

(c) An employee who had earned a rate above the maximum scheduled rate of his grade as the result of one or more longevity step increases in the same or higher grade, may, at the discretion of the department, be given any scheduled rate of his grade, or a comparable step above the maximum rate for his grade, when he is reemployed or transferred in the same or a lower grade or reassigned, repromoted or demoted.

(d) Where an employee occupies a position not subject to the Classification Act, and the employee together with his position is initially brought under the Classification Act of 1949, as amended, pursuant to a Reorganization Act or other legislation, an Executive order of the President, or a decision of the Civil Service Commission under section 203 of the Classification Act of 1949, as amended, the employee's rate of basic compensation shall be determined as follows:

(1) If the employee is receiving a rate of basic compensation less than the minimum scheduled rate of the grade in which his position is placed, his compensation shall be increased to the minimum rate.

(2) If the employee is receiving a rate of basic compensation equal to a scheduled rate of the grade in which his position is placed, his compensation shall be fixed at such scheduled rate.

(3) If the employee is receiving a rate of basic compensation at a rate between two scheduled rates of the grade in which his position is placed, his compensation shall be fixed at the higher of the two rates.

(4) If the employee is receiving a rate of basic compensation in excess of the maximum scheduled rate of the grade in which his position is placed, he shall continue to receive basic compensation without change in rate until he leaves such position or until he is entitled to receive basic compensation at a higher rate by reason of the operation of the Classification Act of 1949, as amended.

(5) After his salary rate has been initially established, an employee may subsequently receive increases in compensation by reason of the operation of Title V, Title VII, or section 802 (b) of Title VIII of the Classification Act of 1949, as amended. An employee whose salary was initially established under the foregoing provisions of this subsection and whose position is later changed to a lower grade without material change of duties and responsibilities, shall be paid at the rate he received immediately prior to the date his position became subject to the act (as increased by section 1 (b) 2 (b) of Public Law 201, 82d Congress, or any similar statutory provision) or at any higher rate authorized by other provisions of this section.

(6) An employee may continue to receive a rate fixed above the maximum scheduled rate of his grade under subparagraph (4) or (5) of this paragraph or under any applicable provision of law so long as he continues to occupy the same position, but the rate of basic compensation of a subsequent appointee to such position shall be fixed in accordance with the other applicable provisions in this subpart.

§ 25.104 *Special provisions.* (a) An employee promoted, repromoted or transferred to a higher grade between Classification Act positions or grades shall receive basic compensation at the lowest rate of such higher grade which exceeds his existing rate of basic compensation by not less than one-step increase of the grade from which he is transferred or promoted, unless a higher rate is authorized under the provisions of § 25.103 (b) or (c). However, if a special minimum rate has been established under § 25.105 for the class of positions, the employee will not receive less than the special minimum pay rate. If there is no rate in such higher grade which is at least a one-step increase above his existing rate of basic compensation, he shall receive the maximum scheduled rate of such higher grade, or his existing rate, whichever is the higher.

(b) When a classification decision is made effective retroactively under § 36.1 (c) (2) of this chapter, corrective personnel action affecting the employee concerned shall be termed a cancellation or correction, as the case may be, of the original action of demotion and the employee concerned shall be entitled to retroactive pay in accordance with the terms of the corrective action.

§ 25.105 *Special adjustments in minimum pay rate of the class.* (a) The Commission may establish the minimum rate of basic compensation for a specific class of positions under the Classification Act of 1949, as amended, in a particular area or location at a step rate of the grade which is higher than the normal minimum if the following two conditions are met:

(1) A sufficient number of qualified eligibles in the given occupational class cannot be secured in the particular area or location at the normal minimum rate, and

(2) There is a possibility that a sufficient number of qualified eligibles can be secured by increasing the minimum rate for such class in the particular area or location to one of the higher step rates within the grade.

(b) The minimum rate shall be increased only to the extent believed necessary to produce sufficient additional appointees.

(c) The agency that initiates a request for an increased minimum rate shall be responsible for submitting complete supporting data including, on the specific request of the Commission, a survey of the prevailing entrance rates paid by non-Federal employers in the area. Information and data obtained from private firms in the course of a salary survey shall be available only to the agencies concerned in evaluating the data.

(d) All Federal activities in the defined area or location shall be notified of the new rate and the effective date when a minimum entrance rate is changed.

(e) As of the effective date of the application of any decision raising a minimum rate under this authority, each Federal activity in the defined area or location shall adjust the basic compensation of its current employees in the specific occupational class or classes to the new minimum rate. Such an adjustment shall not be regarded as an "equivalent increase" in compensation within the meaning of title VII of the Classification Act of 1949 as amended. Pay of employees who are already receiving basic compensation at a rate equivalent to or above the new minimum shall not be affected.

(f) Both the Commission and the agencies shall be responsible for initiating action to discontinue or revise a specially authorized minimum rate whenever the increased rate is no longer needed to meet recruitment needs.

(g) Special minimum rates established under this section may be revised from time to time by the Commission.

(h) When a special increased minimum rate is discontinued or reduced, the pay of employees on the rolls in positions affected by the decision shall not be reduced because of the decision.

(i) A statutory revision of the pay schedules of the Classification Act of 1949 as amended shall automatically change the minimum rate authorized under this section to the nearest step rate of the new schedule which does not result in a decrease of such authorized minimum rate.

SUBPART C—OVERTIME, NIGHT, AND HOLIDAY PAY REGULATIONS

AUTHORITY: §§ 25.201 to 25.274 issued under sec. 605, 59 Stat. 304, 68 Stat. 1111; 5 U. S. C. 945. Interpret or apply secs. 101–604, 59 Stat. 295–304, secs. 208–211, 68 Stat. 1111, 1112; 5 U. S. C. 901–944.

§ 25.201 *Employees to whom this subpart applies.* (a) This subpart applies to all civilian officers and employees in or under the executive branch of the United States Government, including Government-owned or controlled corporations, except those specified in § 25.202.

(b) The sections in this subpart incorporating special provisions for certain types of work (§§ 25.251 to 25.274, inclusive), apply also to those officers and employees of the judicial branch, legislative branch, and the District of Columbia municipal government who are subject to titles II, III, and IV of the Federal Employees Pay Act of 1945, as amended.

§ 25.202 *Employees to whom this subpart does not apply.* (a) This subpart does not apply to:

(1) Elected officials;

(2) Heads of departments or independent establishments or agencies, including Government-owned or controlled corporations; i. e., heads of governmental establishments in the executive branch which are not component parts of any other such establishment;

(3) Officers and employees in the field service of the Post Office Department;

(4) Employees whose basic compensation is fixed and adjusted from time to time in accordance with prevailing rates by wage boards or similar administrative authority serving the same purpose, except that § 25.223 (d) shall be applicable to such employees whose rate of basic compensation is fixed on an annual or monthly basis;

(5) Employees outside the continental limits of the United States, including those in Alaska, who are paid in accordance with local prevailing native wage rates for the area in which employed;

(6) Officers and employees of the Inland Waterways Corporation;

(7) Officers and employees of the Tennessee Valley Authority;

(8) Officers and employees of the Central Intelligence Agency;

(9) Individuals to whom the provisions of section 1 (a) of the act entitled "An act to amend and clarify certain provisions of law relating to functions of the War Shipping Administration, and for other purposes," approved March 24, 1943 (57 Stat. 45, 50 U. S. C. App. 1291) are applicable;

(10) Officers and members of the United States Park Police and the White House Police;

(11) Officers and members of crews of vessels, whose compensation shall be fixed and adjusted from time to time as nearly as is consistent with the public interest in accordance with prevailing rates and practices in the maritime industry;

(12) Civilian keepers of lighthouses and civilians employed on lightships and other vessels of the Coast Guard;

(13) Physicians, dentists, nurses, and other employees in the Department of Medicine and Surgery in the Veterans' Administration, whose compensation is fixed under Public Law 293, Seventy-ninth Congress, approved January 3, 1946, as amended; and

(14) Student nurses, medical or dental interns and residents-in-training, student dietitians, student physical therapists, and student occupational therapists, assigned or attached to a hospital, clinic, or medical or dental laboratory operated by any department, agency, or instrumentality of the Federal Government and any other student-employees, assigned or attached to any such hospital, clinic or laboratory primarily for training purposes, who may be designated by the head of such department, agency, or instrumentality with the approval of the Civil Service Commission.

(15) Employees of the Weather Bureau, Department of Commerce, engaged in the conduct of meteorological investigations in the Arctic region.

NOTE: The list above does not contain positions which are excluded on a year-to-year basis by appropriation acts.

(b) In addition to the exclusions listed in paragraph (a), of this section, the extra pay provisions of this subpart shall not apply to overtime, night, and holiday services for which additional compensation is provided by the following statutes: Act of February 13, 1911, as amended (19 U. S. C. 261, 267) involving inspectors, storekeepers, weighers, and other customs officers and employees; act of July 24, 1919 (41 Stat. 241; 7 U. S. C. 394), involving employees engaged in enforcement of Meat Inspection Act; act of June 17, 1930, as amended (19 U. S. C. 1450, 1451, 1452) involving customs officers and employees; act of March 2, 1931 (46 Stat. 1467; 8 U. S. C. 109a and 109b), involving inspectors and employees, Immigration and Naturalization Service; act of May 27, 1936, as amended (52 Stat. 345; 46 U. S. C. 382b) involving local inspectors of steam vessels and assistants, U. S. shipping commissioners, deputies and assistants, and customs officers and employees; act of March 23, 1941 (55 Stat. 46; 47 U. S. C. 154 (f) (2)) involving certain inspectors of the Federal Communications Commission; act of June 3, 1944 (58 Stat. 269; 19 U. S. C. 1451), involving customs officers and employees; act of August 4, 1949 (63 Stat. 495; 7 U. S. C. 394a), involving employees of the Bureau of Animal Industry who work at establishments which prepare virus, serum, toxin and analogous products for use in the treatment of domestic animals; act of August 28, 1950 (64 Stat. 561; 5 U. S. C. 576) involving employees of the Department of Agriculture performing inspection or quarantine services relating to imports into and exports from the United States.

§ 25.203 *Definitions.* For the purposes of this subpart, definitions are given for words, terms, and phrases as follows:

(a) (1) "Administrative workweek" means a period of seven consecutive calendar days.

(2) "Regularly scheduled administrative workweek" for full-time officers and employees means the period within an administrative workweek, established pursuant to § 25.211, when such officers and employees are required to be on duty regularly. For part-time employees, it means the officially prescribed days and hours within an administrative workweek during which such employees are required to be on duty regularly.

(b) "Basic workweek" for full-time officers and employees means the 40-hour workweek established pursuant to § 25.211.

(c) "Department" means any department, independent establishment or agency in the executive branch of the Federal government, including Government-owned or controlled corporations.

(d) "Head of department" means the head of a department or any official who has been delegated the authority to act for the head of the department in the matter concerned.

(e) "Irregular or occasional overtime duty" means hours of employment not scheduled in the regularly scheduled administrative workweek.

(f) "Night pay differential" means the ten percent increase over the officer's or employee's rate of basic compensation, authorized by section 301 of the Federal Employees Pay Act of 1945, as amended.

(g) "Rate of basic compensation" means the rate of compensation fixed by law or administrative action for the position held by an officer or employee before any deductions and exclusive of additional compensation of any kind. It is exclusive of such additional compensation as overtime pay, extra pay for night or holiday work, additional compensation under section 401 of the Federal Employees Pay Act of 1945, as amended, or allowances or post differentials payable to officers or employees stationed outside the States. It is inclusive of the value of quarters, subsistence, and other maintenance allowances under section 3 of the act of March 5, 1928 (45 Stat. 193; 5 U. S. C. 75a).

§ 25.204 *General pay computation method.* (a) Hereafter for all pay computation purposes per annum rates of basic compensation established by or pursuant to law shall be regarded as payment for employment during 52 basic workweeks of 40 hours.

(b) Whenever, for the purposes of computing overtime, holiday, or night pay or additional pay on an annual basis under this subpart, it is necessary to convert a monthly or annual basic rate to a biweekly, weekly, daily, or hourly basic rate, the following rules shall govern:

(1) A monthly rate shall be multiplied by twelve to derive an annual rate;

(2) An annual rate shall be divided by 52 or 26, as the case may be, to derive a weekly or biweekly rate;

(3) A weekly or biweekly rate shall be divided by 40 or 80, as the case may be, to derive an hourly rate; and

(4) A daily rate shall be derived by multiplying an hourly rate by the number of daily hours of service required.

(5) All rates shall be computed to the nearest cent, counting one-half cent and over as a whole cent.

§ 25.205 *Maximum limitation.* (a) No overtime, night, or holiday compensation or additional compensation on an annual basis provided in this subpart shall be paid to any officer or employee whose rate of basic compensation equals or exceeds the maximum scheduled rate of basic compensation provided for grade GS–15 in the Classification Act of 1949, as amended.

(b) In the case of any officer or employee whose rate of basic compensation is less than the maximum scheduled rate of basic compensation provided for grade GS–15 in the Classification Act of 1949, as amended, such premium compensation may be paid only to the extent that such payment would not cause his aggregate rate of compensation to exceed such maximum scheduled rate with respect to any pay period.

ESTABLISHMENT OF BASIC WORKWEEK AND WORK SCHEDULES

§ 25.211 *Establishment of basic workweek and regularly scheduled administrative workweek.* (a) Heads of departments shall, with respect to each group of full-time officers and employees to whom this subpart applies, establish by regulation:

(1) A basic workweek of 40 hours in length which shall not extend over more than six of any seven consecutive days. Except as provided in paragraphs (b) and (c) of this section, such regulation shall specify the calendar days constituting the basic workweek and the number of hours of employment for each of such calendar days included within the basic workweek.

(2) A regularly scheduled administrative workweek which shall consist of the 40-hour basic workweek established in accordance with subparagraph (1) of this paragraph, plus such period of overtime work as will be regularly required of each group of employees. Except as provided in paragraphs (b) and (c) of this section, the periods of time included in such regularly scheduled administrative workweek which do not constitute a part of the basic workweek shall be identified by calendar days and by number of hours per day for purposes of leave and overtime pay administration.

(b) Whenever it is impracticable to prescribe a regular schedule of definite hours of duty for each workday of a regularly scheduled administrative workweek, the first 40 hours of duty performed within a period of not more than 6 days of the administrative workweek may be established as the basic workweek and all additional hours of officially ordered or approved duty within the administrative workweek shall be treated as overtime.

(c) In the case of officers or employees who are paid additional compensation under section 401 (1) of the Federal Employees Pay Act of 1945, as amended, the length of the regularly scheduled administrative workweek shall be the total number of regularly scheduled hours of duty per week. In the case of other officers and employees whose tours of duty include periods during which they remain at or within the confines of their stations in a standby status rather than performing actual work, the length of the regularly scheduled administrative workweek shall be the total number of regularly scheduled hours of duty per week, including all time in such a standby status except that allowed for sleep and meals by regulation of the department.

§ 25.212 *Establishment of work schedules.* Except where he determines that the department would be seriously handicapped in carrying out its functions or that costs would be substantially increased, the head of each department shall provide that (a) assignments to tours of duty shall be scheduled in advance over periods of not less than one week, (b) the basic 40-hour workweek shall be scheduled on five days, which shall be Monday through Friday, wherever possible, and the two days outside the basic workweek shall be consecutive, (c) the working hours in each day in the basic workweek shall be the same, (d) the basic nonovertime workday shall not exceed eight hours, (e) the occurrence of holidays shall not affect the designation of the basic workweek, and (f) breaks in working hours of more than one hour shall not be scheduled in any basic workday.

OVERTIME PAY

§ 25.221 *Authorization of overtime compensation.* (a) All hours of work officially ordered or approved in excess of 40 hours in any administrative workweek performed by officers and employees to whom this subpart applies shall be considered to be overtime work and, except as otherwise provided in this subpart, shall be compensated as provided in § 25.223.

(b) No overtime in excess of any that may be included in the regularly scheduled administrative workweek shall be ordered or approved except in writing by an officer or employee to whom such authority has been specifically delegated.

§ 25.222 *Computation of overtime employment.* The computation of the amount of overtime employment of an officer or employee shall be subject to the following conditions:

(a) *Leave with pay.* Absence from duty on authorized leave with pay under the annual and sick leave act of October 30, 1951, as amended, during the time when an employee would otherwise have been required to be on duty during the basic workweek (including authorized absence on legal holidays, nonworkdays established by Executive or administrative order, and days of compensatory time off provided for in § 25.224) shall be considered to be employment and shall not have the effect of reducing the amount of overtime compensation to which the employee may be entitled during an administrative workweek. Leave of absence with pay under the act cited shall not be charged for any absence which does not occur during the 40 hours prescribed as the basic workweek.

(b) *Leave without pay.* For any period of leave without pay within an employee's basic 40-hour workweek, an equal period of service performed outside the basic workweek, but during the same administrative workweek, must be substituted and paid for at the rate applicable to his basic workweek, before any remaining periods of service can be paid for at the overtime rate.

(c) *Absence during overtime periods.* Except as expressly authorized by law, as in the case of jury duty under the act of June 29, 1940 (54 Stat. 689), and except to the extent authorized while the employee is in official travel status, no overtime period shall be counted in computing overtime compensation unless the officer or employee performs actual duty during such period or is taking compensatory time off as provided for in § 25.224.

(d) *Night or holiday duty.* Hours of night or holiday duty shall be included in determining for overtime pay purposes the total number of hours of employment within the same administrative workweek.

(e) *Time in travel status.* Time in a travel status away from the official dutystation of any officer or employee shall be considered as hours of employment only (1) when within the days and hours of his regularly scheduled administrative workweek, including regularly scheduled overtime hours, or (2) when the travel involves the performance of actual work while traveling or is carried out under such arduous and unusual conditions that the travel is inseparable from work.

(f) *Call-back overtime.* Any unscheduled overtime work performed by an officer or employee on a day when no work was scheduled for him, or for which he is required to return to his place of employment, shall be considered to be at least two hours in duration for purposes of compensation provided by this subpart, either in money or in time off duty.

§ 25.223 *Computation of overtime compensation.* (a) For each officer or employee whose basic compensation is at a rate which does not exceed the minimum scheduled rate of grade GS-9 of the Classification Act of 1949, as amended, the overtime hourly rate shall be one and one-half times his hourly rate of basic compensation.

(b) For each officer or employee whose basic compensaton is at a rate which exceeds the minimum scheduled rate of grade GS-9 of the Classification Act of 1949, as amended, the overtime hourly rate shall be one and one-half times the hourly rate of basic compensation at the minimum scheduled rate of grade GS-9.

(c) Overtime work performed on Sundays and holidays shall be compensated at the same rates as overtime work performed on other days.

(d) Employees whose rate of basic compensation is fixed on an annual or monthly basis and adjusted from time to time in accordance with prevailing rates by wage boards or similar administrative authority serving the same purpose shall be entitled to overtime pay in accordance with the provisions of section 23 of the act of March 28, 1934 (48 Stat. 522; 5 U. S. C. 673c). The rate of compensation for each hour of overtime employment of any such employee shall be computed as follows:

(1) If the rate of basic compensation of the employee is fixed on an annual basis, divide such rate of basic compensation by two thousand and eighty (2080) and multiply the quotient by one and one-half; and

(2) If the rate of basic compensation of the employee is fixed on a monthly basis, multiply such rate of basic compensation by 12 to derive an annual rate of basic compensation, divide such annual rate of basic compensation by two thousand eighty (2080) and multiply the quotient by one and one-half.

(3) All rates shall be computed to the nearest cent, counting one-half cent and over as a whole cent.

§ 25.224 *Compensatory time off for irregular or occasional overtime duty.* (a) The head of a department may, at the request of any officer or employee, grant such officer or employee compensatory time off from his scheduled tour of duty in lieu of payment under § 25.223 for an equal amount of time spent in irregular or occasional overtime work.

(b) The head of a department may, at his own discretion, provide that any officer or employee whose rate of basic compensation is in excess of the maximum scheduled rate of grade GS-9 of the Classification Act of 1949, as amended, shall be compensated for irregular or occasional overtime work with an equivalent number of hours of compensatory time off duty, in lieu of payment under § 25.223.

(c) The head of a department may fix a time limit within which compensatory time off may be requested or taken, and

may provide that when an officer or employee is entitled to compensatory time off under paragraph (a) or (b) of this section but fails to take it within the prescribed limit, he shall lose his rights both to compensatory time off and to overtime pay unless the failure is due to an exigency of the service beyond his control.

NIGHT PAY

§ 25.231 *Authorization of night pay differential.* (a) Any regularly scheduled work between six o'clock p. m. and six o'clock a. m. shall be considered night work, and, except as otherwise provided in this subpart, any officer or employee to whom this subpart applies shall be paid a night pay differential amounting to 10 percent of his rate of basic compensation as premium compensation for all hours of night work, computed in accordance with § 25.232.

(b) The head of a department may designate any time after six o'clock p. m. or before six o'clock a. m. as the beginning or end, respectively, of night work for the purposes of this section at any post outside the several States and the District of Columbia where the customary hours of business in the locality extend into the period between six o'clock p. m. and six o'clock a. m. Times so designated as the beginning or end of night work shall correspond reasonably with the end or beginning, respectively, of the customary hours of business in the locality.

§ 25.232 *Computation of night pay differential—(a) Absence on holidays or in travel status.* Payment of a night pay differential is authorized during periods when the officer of employee is excused from night work on a holiday or other nonworkday and for all night hours of the employee's regularly scheduled tour of duty while he is in an official travel status, whether performing actual duty or not.

(b) *Absence on leave.* Payment of a night pay differential is not authorized during periods when an officer or employee is on leave, except that any officer or employee may be paid a night differential for periods of paid leave during any pay period in which his total paid leave, inclusive of both night and day hours, is less than eight hours.

(c) *Relation to overtime and holiday pay.* Payment of a night pay differential shall be in addition to any overtime or holiday compensation paid in accordance with this subpart. The amount of the night pay differential which an officer or employee earns for working during a night overtime period is not affected by whether he is paid in cash or granted compensatory time off for such overtime services. The night pay differential shall not be included in the rate of basic compensation in computing any overtime or holiday compensation to which an officer or employee may be entitled.

(d) *Temporary assignment to different tour of duty.* The payment of the night pay differential is authorized for night work performed when an employee is assigned temporarily to a regularly scheduled tour of duty other than his own regular tour of duty.

HOLIDAY PAY

§ 25.241 *Identification of holidays.* The following days shall be holidays:

(a) Subject to the provisions of paragraph (b) of this section, the 1st day of January; the 22d day of February; the 30th day of May; the 4th day of July; the first Monday in September; the 11th day of November; the fourth Thursday in November; the 25th day of December; and any day designated as a holiday by Federal statute or Executive order.

(b) Executive Order 10358 of June 9, 1952 (3 CFR, 1952 Supp.), defines "workday" for holiday purposes to mean those hours which comprise in sequence the employee's regular daily tour of duty within any 24-hour period, whether falling entirely within one calendar day or not, and provides that:

(1) Whenever a holiday falls on a Sunday, Federal offices and establishments shall be closed to public business on the following Monday.

(2) Any employee whose basic workweek does not include Sunday and who would ordinarily be excused from work on a holiday falling within his basic workweek shall be excused from work on the next workday of his basic workweek whenever a holiday falls on Sunday.

(3) Any employee whose basic workweek includes Sunday and who would ordinarily be excused from work on a holiday falling within his basic workweek shall be excused from work on the next workday of his basic workweek whenever a holiday falls on a day that has been designated by the agency as his "regular" weekly nonworkday in lieu of Sunday.

(4) Any employee who would ordinarily be excused from work on a holiday falling within his basic workweek shall be excused from work on the next workday of his basic workweek whenever the first Monday of September or the fourth Thursday of November, or any other holiday which always occurs on a specific day of the calendar week (other than Sunday), falls on a day outside the employee's regular basic workweek.

(5) Any employee whose workday covers portions of two calendar days and who would, except for this section, ordinarily be excused from work scheduled for the hours of any calendar day on which a holiday falls, shall instead be excused from work on his entire workday which commences on any such calendar day, or on a day treated as a holiday under this section.

In the case of employees whose regularly scheduled basic workweek includes both Sunday and Monday, either day, as determined by the head of the department, but not both days, shall be treated as a holiday when a holiday falls on Sunday. In the case of employees whose regularly scheduled basic workweek includes Sunday but not Monday, only Sunday shall be treated as a holiday when a holiday falls on Sunday.

§ 25.242 *Authorization of holiday pay.* (a) Any officer or employee who is excused from duty because of a holiday falling within his basic 40-hour workweek shall be entitled to only his rate of basic compensation for that day.

(b) Except as otherwise provided in this subpart, any officer or employee who is assigned to duty on a holiday which is not overtime work as defined in § 25.221 (a) shall be compensated at his rate of basic compensation plus premium compensation for not more than eight hours of such work at a rate equal to his rate of basic compensation.

(c) Any officer or employee assigned to overtime work, as defined in § 25.221 (a), on a holiday shall be compensated at the same rate as for overtime work performed on other days.

(d) Any officer or employee who is assigned to duty on a holiday shall be compensated for at least two hours of such work.

§ 25.243 *Relationship to overtime and night pay.* (a) The premium pay for holidays authorized by § 25.242 shall not be included in the rate of basic compensation in computing any overtime compensation or night pay differential to which the officer or employee may be entitled.

(b) Such premium pay shall not serve to reduce the amount of overtime compensation to which the officer or employee may be entitled during the administrative workweek in which the holiday occurs, and notwithstanding such premium pay, the number of hours of duty on a holiday shall be included in determining for overtime pay purposes the total number of hours of employment performed in the same administrative workweek.

(c) The number of regularly scheduled hours of duty on a holiday falling within the employee's 40-hour basic workweek on which the employee is excused from duty shall be included as a part of the 40-hour basic workweek for overtime pay computation purposes.

(d) Premium pay authorized by section 25.242 shall be in addition to any night pay differential payable under this subpart, but the night pay differential shall not be included in the rate of basic compensation in computing premium pay for holiday duty.

SPECIAL PROVISIONS FOR CERTAIN TYPES OF WORK—POSITIONS REQUIRING EMPLOYEES TO REMAIN AT THEIR STATIONS DURING LONG DUTY TOURS, A SUBSTANTIAL PART OF WHICH IS STANDBY

§ 25.251 *Authorization of additional annual compensation.* (a) Premium pay on an annual basis may be paid to any officer or employee in a position requiring him to regularly remain at, or within the confines of, his station during longer than ordinary periods of duty, a substantial part of which consists of remaining in a standby status rather than performing work. Such additional compensation on an annual basis takes the place of any other premium compensation prescribed in this subpart. It may not exceed 25 percent of such part of the rate of basic compensation as does not exceed the minimum rate for grade GS-9 in the Classification Act of 1949, as amended.

(b) This permissive authority extends to any department, any judicial or legislative agency to which this section ap-

plies (see § 25.201 (b)), and to the municipal government of the District of Columbia. Payment of such additional compensation on an annual basis is subject to the approval of the Civil Service Commission. The Commission has approved payment of such additional compensation at rates and under conditions specified by this subpart. Departments and other agencies are responsible for individual actions within the provisions of this subpart.

§ 25.252 *General restrictions.* (a) No employee shall be paid additional compensation under § 25.251 if such compensation, over a period of time appropriate to reflect the full cycle of his duties and the full range of conditions in his position, would either:

(1) Be less than the premium pay which would otherwise be payable under other sections of this subpart for the hours of actual work customarily required in his position, excluding standby time during which no work is performed, or

(2) Exceed the premium pay which would otherwise be payable under other sections of this subpart for the total hours of duty required in his position, including standby time during which no work is performed.

§ 25.253 *Bases for determining positions for which additional compensation under § 25.251 is authorized.* (a) The requirement of a position that the employee "regularly remain at or within the confines of his station" must meet all the following conditions:

(1) The requirement must be definite and the employee must be officially ordered to remain at his station. The employee's remaining at his station must not be merely voluntary, desirable, or a result of geographic isolation, or solely because the employee lives on the grounds.

(2) The hours during which the requirement is operative must be included in the employee's regularly scheduled hours of duty and his duty tours must be established on a regularly recurring basis over a substantial period of time, generally at least a few months. The requirement must not be occasional, irregular, or for a brief period.

(3) The requirement must be associated with the regularly assigned duties of the employee's job, either as a continuation of his regular work which includes standby time, or as a requirement to stand by at his post to perform his regularly assigned duties if the necessity arises.

(b) "At or within the confines of his station" means one of the following:

(1) At an employee's regular duty station.

(2) In quarters provided by the Government, which are not the employee's ordinary living quarters, and which are specifically provided for use of personnel required to stand by in readiness to perform actual work when the need arises or when called.

(3) In an employee's living quarters, when designated by the department as his duty station and when his whereabouts is narrowly limited and his activities are substantially restricted. This condition exists only during periods when an employee is required to remain at his quarters and is required to hold himself in a state of readiness to answer calls for his services. This limitation on an employee's whereabouts and activities is distinguished from the limitation placed on an employee who is subject to call outside his regular hours of duty but may leave his quarters, provided he arranges for someone else to respond to calls or leaves a telephone number by which he can be reached should his services be required.

(c) "Longer than ordinary periods of duty" are more than 40 hours a week.

(d) "A substantial part of which consists of remaining in a standby status rather than performing work" refers to the entire tour of duty. This condition is met when either:

(1) A substantial part of the whole period of duty, at least 25 percent, is spent in a standby status which occurs throughout the entire tour, or

(2) If certain hours of the tour of duty are regularly devoted to actual work and others are spent in a standby status, that part of the period of duty devoted to standing by is at least 25 percent of the entire period of duty, or

(3) An employee has a regular 40-hour basic workweek requiring full-time performance of actual work and is required, in addition, to perform standby duty on certain nights, or to perform standby duty on certain days not included in his basic workweek.

(e) An employee is "in a standby status" only at times when he is not required to perform actual work and is free to eat, sleep, read, listen to the radio, or engage in other similar pursuits. An employee is performing actual work, rather than being in a standby status, when his full attention is devoted to his work, even though the nature of his work does not require constant activity (for example, a guard on duty at his post and a technician continuously observing instruments are engaged in the actual work of their positions). Actual work includes both work performed during regular work periods and work performed when called out during periods ordinarily spent in a standby status.

§ 25.254 *Rates of additional compensation payable under § 25.251.* (a) The Civil Service Commission has approved the payment of additional compensation under § 25.251 to officers and employees in such positions meeting the requirements of section 401 (1) of the Federal Employees Pay Act of 1945, as amended, and § 25.253 of these regulations as may be designated by the head of any department, of any judicial or legislative agency to which this section applies (see § 25.201 (b)), or of the municipal government of the District of Columbia, provided that the additional compensation under § 25.251 is paid at the following percentages of such part of the rate of basic compensation as does not exceed the minimum scheduled rate of basic compensation provided for grade GS–9 in the Classification Act of 1949, as amended:

(1) Positions with tours of duty of the 24 hours on duty, 24 hours off duty type and with a schedule of: 60 hours a week—5 percent, unless 25 or more hours of actual work is customarily required, in which event—10 percent; 72 hours a week—15 percent, unless 30 or more hours of actual work is customarily required, in which event—20 percent; 84 hours or more a week—25 percent.

(2) Positions with tours of duty requiring the employee to remain on duty during all daylight hours each day, or for 12 hours each day, or for 24 hours each day, with the employee living at his station during the period of his assignment to such tours, and with a schedule of: 5 days a week—5 percent, unless 25 or more hours of actual work is customarily required, in which event—10 percent; 6 days a week—15 percent, unless 30 or more hours of actual work is customarily required, in which event—20 percent; 7 days a week—25 percent.

(3) Positions in which the employee has a regular 40-hour basic workweek requiring full-time performance of actual work, and is required, in addition, to remain on standby duty: 14 to 18 hours a week on regular workdays, or extending into a nonworkday in continuation of a period of duty within the basic workweek—15 percent; 28 or more hours a week on regular workdays, or extending into a nonworkday in continuation of a period of duty within the basic workweek—25 percent; 7 to 9 hours on one or more of his regular weekly nonworkdays—15 percent; 14 or more hours on one or more of his regular weekly nonworkdays—25 percent.

NOTE: The number of days or hours of duty a week for purposes of this section may be the number each week or the average number a week over a reasonable cycle. For example, an employee is considered to be on duty 84 hours a week if (a) this is his actual tour each week, or (b) he is assigned to a regular two-week cycle of 72 hours one week and 96 hours the next week.

(b) If any such department or other agency wishes to pay additional compensation under § 25.251 to an employee in a position meeting the requirements of section 401 (1) of the Federal Employees Pay Act of 1945, as amended, and these regulations, and no approved rate in paragraph (a) of this section is applicable, or if unusual conditions are present which seem to make the applicable rate unsuitable, the department or other agency should propose a rate of additional compensation for the Commission's approval. The proposal should include full information bearing on the scheduled hours of duty; the number of hours of actual work required and how it is distributed over the time on duty; the number of hours in a standby status required and the extent to which the employee's whereabouts and activities are restricted during standby periods; the extent to which the assignment is made more onerous by night or holiday duty or by hours of duty beyond 40 a week; and any other pertinent conditions.

SPECIAL PROVISIONS FOR CERTAIN TYPES OF WORK—POSITIONS IN WHICH THE HOURS OF DUTY CANNOT BE CONTROLLED ADMINISTRATIVELY, AND WHICH REQUIRE SUBSTANTIAL AMOUNTS OF IRREGULAR, UNSCHEDULED, OVERTIME, NIGHT, AND HOLIDAY DUTY

§ 25.261 *Authorization of additional annual compensation.* (a) Premium pay on an annual basis may be paid to any officer or employee in a position in which the hours of duty cannot be controlled administratively, and which requires substantial amounts of irregular, unscheduled overtime duty and duty at night and on holidays with the officer or employee generally being responsible for recognizing, without supervision, circumstances which require him to remain on duty. Such additional compensation on an annual basis takes the place of any other premium compensation prescribed in this subpart except premium compensation for regularly scheduled overtime duty. It may not exceed 15 percent of such part of the rate of basic compensation as does not exceed the minimum rate for grade GS–9 in the Classification Act of 1949, as amended.

(b) This permissive authority extends to any department, any judicial or legislative agency to which this section applies (see § 25.201 (b)), and to the municipal government of the District of Columbia. Payment of such additional compensation on an annual basis is subject to the approval of the Civil Service Commission. The Commission has approved payment of such additional compensation at the rate and under conditions specified in this subpart. Departments and other agencies are responsible for individual actions within the provisions of this subpart.

§ 25.262 *General restriction.* No employee shall be paid additional annual compensation under § 25.261 if such compensation would, over a period of time appropriate to reflect the full cycle of his duties and the full range of conditions in his position, exceed the premium pay which would otherwise be payable under other sections of this subpart for the hours of duty required in his position, exclusive of regularly scheduled overtime duty.

§ 25.263 *Bases for determining positions for which additional compensation under § 25.261 is authorized.* (a) By the nature of the work of such positions, "the hours of duty cannot be controlled administratively."

(1) One typical job situation in which the hours of duty cannot be controlled administratively: (i) The hours of duty of an investigator of criminal activities are governed by what criminals do and when they do it. He is often required to perform such duties as shadowing suspects, working incognito among those under suspicion, searching for evidence, meeting informers, making arrests, and interviewing persons having knowledge of criminal or alleged criminal activities. His hours on duty and place of work depend on the behavior of the criminals or suspected criminals and cannot be controlled administratively.

(ii) In such a situation, hours of duty cannot be controlled by such administrative devices as hiring additional personnel; rescheduling the hours of duty (which can be done when, for example, a type of work occurs primarily at certain times of the day); or granting compensatory time off duty to offset overtime hours required.

(b) In order to satisfactorily discharge the duties of such positions, employees are required to perform substantial amounts of "irregular, unscheduled, overtime duty, and duty at night and on holidays."

(1) A substantial amount of irregular, unscheduled, overtime duty means an average of at least six hours of such overtime duty a week.

(2) The irregular, unscheduled, overtime duty is a continual requirement, generally averaging more than once a week.

(3) There must be a definite basis for anticipating that the irregular, unscheduled, overtime duty will continue over an appropriate period of time with a duration and frequency sufficient to meet the requirements under subparagraphs (1) and (2) of this paragraph and that night and holiday duty will be performed from time to time.

(c) The employee generally is "responsible for recognizing, without supervision, circumstances which require him to remain on duty."

(1) The responsibility for an employee remaining on duty when required by circumstances must be a definite, official, and special requirement of his position.

(2) The employee must remain on duty not merely because it is desirable, but because of compelling reasons inherently related to continuance of his duties, and of such a nature that failure to carry on would constitute negligence.

(3) "Recognition of circumstances" does not include such clear-cut instances as, for example, when an employee must continue working because a relief fails to report as scheduled.

(4) (i) "Circumstances which require an employee to remain on duty" means requiring the employee to continue on duty in continuation of a full daily tour, or that, after the end of the regular workday, the employee resumes duty in accordance with prearranged plans or an awaited event. Performance of only callback overtime assignments, referred to in § 25.222 (f) of this subpart, does not meet the requirement.

(ii) The requirement is that the employee remain on duty in continuation of a full, regularly scheduled, daily tour of duty. The employee has no choice as to when or where he may perform the work. This differs from a situation in which an employee has the option of taking work home or doing it at the office; or doing it in continuation of his regular hours of duty or later in the evening. It also differs from a situation in which an employee has such latitude in his working hours, as when in a travel status, that he may decide to begin work later in the morning and continue working later at night to better accomplish a given objective.

§ 25.264 *Rates of additional compensation payable under § 25.261.* (a) The Civil Service Commission has approved the payment of additional compensation under § 25.261 to officers and employees in such positions meeting the requirements of section 401 (2) of the Federal Employees Pay Act of 1945, as amended, and § 25.263 as may be designated by the head of any department, of any judicial or legislative agency to which this section applies (see § 25.201 (b)), or of the municipal government of the District of Columbia, provided that the additional compensation under § 25.261 is paid at the rate of 15 percent of such part of the rate of basic compensation as does not exceed the minimum scheduled rate for grade GS–9 in the Classification Act of 1949, as amended.

(b) If any such department or other agency wishes to pay additional compensation under § 25.261 to an employee in a position meeting the requirements of section 401 (2) of the Federal Employees Pay Act of 1945, as amended, and the regulations in this part, and if unusual conditions are present which seem to make the approved rate in paragraph (a) of this section unsuitable, the department or other agency should propose a lesser rate of additional compensation for the Commission's approval. The proposal should include full information bearing on the frequency and duration of irregular, unscheduled, overtime duty and the night and holiday duty required; the nature of the work which prevents hours of duty from being controlled administratively; the necessity for the employee's being generally responsible for recognizing, without supervision, circumstances which require him to remain on duty; and any other pertinent conditions.

SPECIAL PROVISIONS FOR CERTAIN TYPES OF WORK—RESPONSIBILITIES OF DEPARTMENTS AND GENERAL RULES GOVERNING PAYMENTS

§ 25.271 *Responsibilities of the departments.* (a) The head of each department, judicial or legislative agency to which this section applies (see § 25.201 (b)), and the municipal government of the District of Columbia is responsible for:

(1) Fixing tours of duty; ordering employees, as he deems necessary, to remain at their stations in a standby status; and placing responsibility on employees, as he deems necessary, for remaining on duty when required by circumstances.

(2) Determining, in accordance with the provisions of section 401 (1) and section 401 (2) of the Federal Employees Pay Act of 1945, as amended, and these regulations, which employees shall receive additional compensation under § 25.251 or § 25.261. These determinations shall not be retroactive.

(3) Determining the number of hours of actual work to be customarily required in positions involving longer than ordinary periods of duty, a substantial part of which consists of standby duty. This determination shall be based on consideration of the time required by regular, repetitive operations, available records of the time required in the past by other activities, and any other information bearing on the number of hours of actual work which may reasonably be expected to be required in the future.

(4) Determining the number of hours of irregular, unscheduled, overtime duty to be customarily required in positions which require substantial amounts of irregular, unscheduled, overtime duty, and duty at night and on holidays with the employee generally being responsible for recognizing, without supervision, circumstances which require him to remain on duty. This determination shall be based on consideration of available records of the hours of irregular, unscheduled, overtime duty required in the past and any other information bearing on the number of hours of such duty which may reasonably be expected to be required in the future.

(5) Determining the rate of additional compensation approved by the Civil Service Commission that is applicable to each employee compensated under § 25.251 or § 25.261; or if no approved rate is applicable, proposing a rate of additional compensation to the Civil Service Commission for approval.

(6) Reviewing determinations under subparagraphs (2), (3), (4), and (5) of this paragraph at appropriate intervals, and discontinuing payments or revising rates of additional compensation in each instance where such action is necessary to meet the requirements of section 401(1) or section 401(2) of the Federal Employees Pay Act of 1945, as amended, and the regulations in this part.

§ 25.272 *Payment provisions.* (a) Except as otherwise provided in this section, an employee's additional compensation under § 25.251 or § 25.261 shall begin on the date that he enters on duty in the position concerned for purposes of basic compensation, and shall cease on the date that he ceases to be paid basic compensation in the position.

(b) An employee in a position in which conditions warranting additional compensation under § 25.251 or § 25.261 exist only during a certain period of the year, such as during a given season, shall be paid such additional compensation only during the period he is subject to such conditions.

(c) An employee in a position in which he is receiving additional compensation under § 25.251 or § 25.261, temporarily assigned to duties in which conditions do not warrant such additional compensation, shall continue to receive such additional compensation, at the discretion of the head of the department, for not more than 14 consecutive calendar days, and for a total of not more than 30 working days in any calendar year.

(d) During periods when an employee is not entitled to receive additional compensation under § 25.251 or § 25.261, he shall be paid for overtime, night and holiday duty in accordance with other sections of this subpart.

(e) Payments of additional compensation under § 25.251 or § 25.261 shall continue during periods of leave with pay taken during periods in which additional compensation under such sections is payable in accordance with paragraphs (a), (b), and (c) of this section.

§ 25.273 *Relationship to other payments.* (a) Employees receiving additional compensation under § 25.251 shall not receive premium compensation for overtime, night, and holiday duty under any other sections of this subpart.

(b) Employees receiving additional compensation under § 25.261 shall not receive premium compensation for irregular, unscheduled overtime duty or duty at night or on holidays under any other sections of this subpart, but shall be paid under other sections of this subpart for regularly scheduled overtime duty.

(c) Overtime, night, or holiday services compensated under any statute other than the Federal Employees Pay Act of 1945, as amended, shall not be considered as a basis for payment of additional compensation under § 25.251 or § 25.261.

(d) Additional compensation under § 25.251 or § 25.261 is not base pay, and is not included in the base used in computing retirement deductions, foreign and territorial allowances and differentials, or any other benefits or deductions that are computed on base pay alone.

§ 25.274 *Construction and computation of existing aggregate rates.* (a) An employee's existing aggregate rate shall be constructed on the basis of the estimate of earnings which the employee would have received over an appropriate period, generally a year, if his tour of duty immediately prior to the date section 401 of the Federal Employees' Pay Act of 1945, as amended, becomes applicable to him, remained the same.

(b) In constructing such rate, night, holiday, overtime, and basic compensation shall be included. Pay for irregular or occasional overtime work will be considered only if it has been significant in amount in the past and the conditions which required it are expected to continue.

NOTE: Example of a formula which may be used in determining an existing aggregate rate: 72-hour tour of duty—24 hours on, 24 hours off, including standby time:

Basic annual salary	-------
Overtime pay (X-hours a pay period, 24 pay periods at overtime rate for pay period)	-------
Nightwork pay (X-hours a pay period, 24 pay periods at 10 percent of employee's straight-time rate)	-------
Holiday premium pay (6 days at employee's straight-time rate)	-------
Existing aggregate rate, on a per annum basis	(Total of above)
Existing aggregate rate per hours of duty—total aggregate rate divided by 3744 (72 hour tour times 52 weeks), hourly rate.	

For this tour, which includes standby time and during which an allowance of eight hours a day is made for sleep and meals, the employees' pay is computed on the basis of two-thirds of the duty hours, or 48 hours a week. In the above calculation of overtime and night differential pay, the employees are considered to be on leave 20 days in the year, irrespective of individual differences as to leave earned or used. Irregular, occasional overtime duty has been determined to be negligible. Holiday pay is allowed for six holidays. All employees receive the benefit of Labor Day and Thanksgiving. These employees are required to work on all holidays which fall in their tours of duty, and, because of some overlapping of shifts and the celebration on Monday of holidays falling on Sunday, it is estimated that these employees would work four of the remaining six holidays.

(c) An employee's rate of compensation based on the additional annual compensation provisions shall be recomputed upon receiving subsequent increases in basic compensation in order to determine whether or not he will continue to receive a "saved rate" or be paid under the additional annual compensation provisions.

(d) Subsequent increases in basic compensation may not be used to redetermine an employee's "saved rate". However, the increases shall be used for other pay purposes, such as computation of retirement deductions and annuities, payment of overseas allowances and post-differentials, and determination of highest previous rate under the General Compensation Regulations.

(e) When an agency elects to pay an employee additional annual compensation in accordance with § 25.251 or § 25.261 such employee shall continue to be paid basic compensation, night, holiday, and overtime pay under the provisions of section 401 of the Federal Employees' Pay Act of 1945, as amended, unless the aggregate amount of the annual compensation to be paid under § 25.251 or § 25.261 is equal to or greater than the aggregate amount of his compensation as computed under section 401. When such annual compensation computed under § 25.251 or § 25.261 becomes equal to or greater than the aggregate compensation computed under section 401, the employee's rate of compensation shall be computed and paid under the additional annual compensation provisions.

(f) The use of the "saved rate" constructed under paragraph (a) of this section shall continue so long as the employee remains in a position to which the provisions of § 25.251 or § 25.261 are applicable, his tour of duty does not decrease in length, and he continues to perform equivalent night, holiday and irregular overtime work.

(g) In the event an employee entitled to a saved rate under paragraph (a) of this section moves from one position to another position within the same agency, both of which come within the scope of section 401 of the Federal Employees' Pay Act of 1945, as amended, he shall be entitled to a "saved rate" in the new position such as he would have received had he occupied that position when the agency elected to bring it within the scope of § 25.251 or § 25.261.

(h) An employee whose existing aggregate rate was determined prior to the effective date of Public Law 94, 84th Congress, approved June 28, 1955 (the Federal Employees Salary Increase Act of 1955, effective at the beginning of the first pay period after February 28, 1955), is entitled to have his "saved rate" increased by an amount which represents the difference between the former top longevity rate and the current top longevity rate for his grade.

NOTE: For example, an employee in grade GS-5 whose saved rate is $4,100 is entitled to have $350 added to his saved rate. The amount of $350 represents the difference between the former top longevity rate, $4,535 and the current top longevity rate for his grade, $4,885.

SUBPART D—[RESERVED]

SUBPART E—CONVERSION OF EMPLOYEES TOGETHER WITH THEIR POSITIONS FROM CLASSIFICATION ACT SCHEDULE TO PREVAILING WAGE SYSTEM, OR FROM PREVAILING WAGE SYSTEM TO CLASSIFICATION ACT SCHEDULE

AUTHORITY: §§ 25.501 to 25.505 issued under sec. 113, 68 Stat. 1108; 5 U. S. C. 1123. Interpret or apply sec. 114, 68 Stat. 1108; 5 U. S. C. 1132. Other statutory authority interpreted or applied is cited to text in parentheses.

§ 25.501 *Purpose.* The purpose of the regulations in this subpart is to implement Title I, Public Law 763, 83d Congress, by prescribing the conditions for adjusting the rates of compensation when an employee and his position are converted from a Classification Act schedule to a prevailing wage system or, from a prevailing wage system to a Classification Act schedule.

§ 25.502 *Definitions.* As used in this subpart the term:

(a) "Conversion" means the change of an employee together with his position from a Classification Act schedule to a prevailing wage system, or from a prevailing wage system to a Classification Act schedule.

(b) "Classification Act" means the Classification Act of 1949, as amended.

(c) "Rate" means rate of basic compensation.

(d) "Aggregate rate" means the sum of an employee's basic rate of compensation and any applicable foreign or territorial post differential or territorial cost-of-living allowance, or differential payable for night work under the Federal Employees' Pay Act of 1945, as amended.

(e) "Overseas position" means a position in the Territories or possessions of the United States or in foreign areas.

§ 25.503 *Conversion from Classification Act to prevailing wage system.* (a) An employee converted from a Classification Act schedule to a prevailing wage system shall be entitled upon conversion to compensation at a rate under the prevailing wage system which is not less than his rate prior to such conversion. However, if no such rate exists in his prevailing wage position, he shall then be paid at a rate equal to his rate prior to such conversion.

(b) If serving in an overseas position where he was paid an overseas allowance or differential at the time of conversion, such employee shall, in addition to the rate he receives under paragraph (a) of this section, have saved to him the difference between his rate after conversion and his former aggregate rate.

(c) If converted while serving on a night shift, he may, in addition to the night rate he receives under paragraph (a) of this section, have saved to him the difference between his night rate after conversion and his former aggregate rate if his agency determines such action to be in the public interest.

(d) When applying paragraph (b) or (c) of this section, an employee shall in no case receive compensation in excess of his aggregate rate prior to conversion.

§ 25.504 *Conversion from prevailing wage system to Classification Act schedule.* (a) An employee converted from a prevailing wage system to a Classification Act schedule shall be entitled upon conversion to compensation at a scheduled rate in his grade which is not less than his rate prior to such conversion. If no such rate exists in his new grade, he shall then be paid a rate equal to his former rate.

(b) If serving in an overseas position at the time of conversion, such employee shall be paid at the lowest scheduled rate of his Classification Act grade which results in an aggregate rate not less than his rate prior to conversion. If, however, the maximum scheduled rate of the grade results in an aggregate rate less than his rate prior to conversion, he shall then be paid a rate equal to his former rate.

(c) If serving a night shift at the time of conversion, such employee shall be paid at the lowest scheduled rate of his Classification Act grade which results in an aggregate rate not less than his rate prior to conversion. However, if the maximum scheduled rate of the grade results in an aggregate rate less than his rate prior to conversion, he shall be paid a rate equal to his former prevailing night rate.

§ 25.505 *Continuation of saved compensation.* (a) An employee whose position has been converted shall continue to receive compensation in accordance with this subpart so long as he occupies the same position, until he becomes entitled under the normal operations of the pay system to which he has been changed to compensation equal to that which results from the application of the regulations in this subpart.

(b) If the employee moves between Classification Act positions after the initial conversion, he may continue to receive compensation under this subpart, at the discretion of the employing agency, if he would have been entitled to the same or greater total compensation had he occupied the new position at the time of the initial conversion.

PART 27—EXCLUSION FROM PROVISIONS OF THE FEDERAL EMPLOYEES PAY ACT OF 1945, AS AMENDED, AND THE CLASSIFICATION ACT OF 1949, AS AMENDED, AND ESTABLISHMENT OF MAXIMUM STIPENDS FOR POSITIONS IN GOVERNMENT HOSPITALS FILLED BY STUDENT OR RESIDENT TRAINEES

Sec.
27.1 Exclusion from provisions of Federal Employees Pay Act and Classification Act.
27.2 Maximum stipends prescribed.
27.3 Stipends under existing agreements with trainees.
27.4 Stipends of trainees assigned to Federal hospitals as affiliates.
27.5 Exclusion of other trainee positions and establishment of maximum stipends.
27.6 Extent of regulations.
27.7 Inquiries.

AUTHORITY: §§ 27.1 to 27.7 issued under 61 Stat. 727; 5 U. S. C. 1051–1058.

§ 27.1 *Exclusion from provisions of Federal Employees Pay Act and Classification Act.* In accordance with the provisions of section 1 and section 2 of Public Law 330, 80th Congress, approved August 4, 1947, the following positions, in addition to those specifically excluded by section 1 and section 2 of such law, are excluded from the provisions of the Federal Employees Pay Act of 1945 (Public Law 106, 79th Congress), as amended, and the Classification Act of 1949 (Public Law 429, 81st Congress, approved October 28, 1949), as amended:

Residents in hospital administration, second year approved postgraduate training.

Chaplain intern, Department of Health, Education, and Welfare, first year of approved clinical training following completion of three or more years of approved postgraduate theological training.

Chaplain resident, Department of Health, Education, and Welfare, second year of approved clinical training following completion of four or more years of approved postgraduate theological training.

Chaplain student intern, Department of Health, Education, and Welfare, approved training during second year of approved postgraduate theological training.

Interns in clinical psychology, Department of Health, Education, and Welfare, second year approved postgraduate training (predoctoral), third year approved postgraduate training (pre-doctoral), and fourth year approved postgraduate training (pre-doctoral).

Clinical psychology residents, Department of Health, Education, and Welfare, fifth year approved postgraduate training (post-doctoral) and sixth year approved postgraduate training (post-doctoral).

Student laboratory technicians, U. S. Public Health Service and Department of the Army, one year approved training after a minimum of two years college level training.

Student X-ray technicians, U. S. Public Health Service, one year to eighteen months approved training.

Pharmaceutical interns, U. S. Public Health Service, one year approved postgraduate training.

Recreation interns, U. S. Public Health Service, one year approved postgraduate training.

Medical record students, U. S. Public Health Service, one year approved training after two years college level training.

Medical record interns, U. S. Public Health Service, one year approved training after a minimum of three years college level training.

Psychiatric nurse interns (postgraduate student nurses), at St. Elizabeths Hospital and U. S. Public Health Service, one year approved postgraduate training.

Practical nurse affiliate at St. Elizabeths Hospital, three months approved postgraduate training.

Student hospital administration intern, U. S. Public Health Service, approved training prior to first year of postgraduate training in hospital administration.

Hospital administration resident, Freedmen's Hospital, third year approved postgraduate training.

Student practical nurse, U. S. Public Health Service, approved training during clinical affiliation.

Student clinical psychologist, Bureau of Mental Hygiene, Health Department, Government of the District of Columbia, third year approved postgraduate training:

Clinical psychology interns, U. S. Public Health Service, fifth year approved postgraduate training (post-doctoral).

Hospital administration intern, U. S. Public Health Service, first year approved postgraduate training.

Dietetic Resident, second year approved postgraduate training.

Recreation intern, Department of Health, Education, and Welfare, one year approved postgraduate training.

Social Worker Intern (Student Social Worker), U. S. Public Health Service.

Student Pharmacist, U. S. Public Health Service.

Auxiliary medical therapy student positions, Department of Health, Education, and Welfare, as follows: Vocational Guidance Counselor (Student), Recreation Leader (Student), Occupational Therapist (Student), Vocational Rehabilitation Adviser (Student), Teacher (Student) (Educational Administration and Supervision), Teacher (Student) (Business Training), Teacher (Student) (Music), Teacher (Student) (Art), and Chaplain (Student).

Medical student interns, approved training during third and fourth years of medical school.

Student practical nurses, Department of Health, Education, and Welfare, one year approved training.

§ 27.2 *Maximum stipends prescribed.* In accordance with the provisions of section 3 of Public Law 330, 80th Congress, approved August 4, 1947, the following maximum stipends (including overtime pay, maintenance allowances, and other payments in money or kind), except as otherwise provided in § 27.3 are hereby prescribed:

Medical or dental interns and residents:	
Approved internship, per year	$2,800
First year approved residency	3,400
Second year approved residency	3,800
Third year approved residency	4,200
Fourth year approved residency	4,700
Dietetic interns (student dietitians):	
One year approved postgraduate training	2,000
Physical therapy interns (student physical therapists): approved clinical training in affiliation with an approved school of physical therapy, per month	166
Occupational therapy interns (student occupational therapists)—Approved clinical training in affiliation with an approved school of occupational therapy, per month	166
Hospital administration residents—Second year approved postgraduate training	2,200
Chaplain intern, Department of Health, Education, and Welfare—First year of approved clinical training following completion of three or more years of approved postgraduate theological training	2,600
Chaplain resident, Department of Health, Education, and Welfare—Second year of approved clinical training following completion of four or more years of approved postgraduate theological training	2,800
Chaplain student intern, Department of Health, Education, and Welfare—Approved training during second year of approved postgraduate theological training, per month	183
Clinical psychology interns, Department of Health, Education, and Welfare:	
Second year approved postgraduate training (pre-doctoral)	2,200
Third year approved postgraduate training (pre-doctoral)	2,400
Fourth year approved postgraduate training (pre-doctoral)	2,600
Clinical psychology residents, Department of Health, Education, and Welfare:	
Fifth year approved postgraduate training (post-doctoral)	$2,800
Sixth year approved postgraduate training (post-doctoral)	3,400
Student laboratory technicians—U. S. Public Health Service and Department of the Army—1 year approved training, after a minimum of 2 years college level training	1,600
Student X-ray technicians—U. S. Public Health Service:	
First 9 months approved training, per month	100
Subsequent 3 to 9 months approved training, per month	110
Pharmaceutical interns—U. S. Public Health Service: 1 year approved postgraduate training	2,000
Recreation interns—U. S. Public Health Service: 1 year approved postgraduate training	1,470
Medical record students—U. S. Public Health Service: 1 year approved training, after 2 years college level training—no stipend other than any maintenance provided.	
Medical record interns—U. S. Public Health Service: 1 year approved training, after a minimum of 3 years college level training	1,800
Psychiatric nurse interns (postgraduate student nurses)—U. S. Public Health Service and St. Elizabeths Hospital; one year approved postgraduate training	2,000
Practical nurse affiliate—St. Elizabeths Hospital: Three months approved postgraduate training—no stipend other than any maintenance provided.	
Student hospital administration intern—U. S. Public Health Service: Approved training prior to first year of post-graduate training in hospital administration—no stipend other than any maintenance provided.	
Hospital administration resident—Freedmen's Hospital: Third year approved postgraduate training	2,400
Student practical nurse—U. S. Public Health Service: Approved training during clinical affiliation—no stipend other than any maintenance provided.	
Student clinical psychologist—Bureau of Mental Hygiene, Health Department, Government of the District of Columbia: Third year approved postgraduate training	2,000
Hospital administration intern.—U. S. Public Health Service:	
First year approved postgraduate training	2,000
Student practical nurse—U. S. Public Health Service Hospital, New Orleans, Louisiana: Approved training during clinical affiliation, per month	42
Dietetic resident: Second year approved postgraduate training	2,200
Recreation intern, Department of Health, Education, and Welfare: One year approved postgraduate training	2,000
Social Worker Interns (Student Social Workers), U. S. Public Health Service. Part-time approved postgraduate training during program for the Master of Science degree, per month	87.50
Student Pharmacists, U. S. Public Health Service. Part-time approved training after a minimum of three years college level training, per month	22.50
Auxiliary medical therapy student positions, Department of Health, Education, and Welfare, as follows: Vocational Guidance Counselor (Student), Recreation Leader (Student), Occupational Therapist (Student), Vocational Rehabilitation Adviser (Student), Teacher (Student) (Educational Administration and Supervision), Teacher (Student) (Business Training), Teacher (Student) (Music), Teacher (Student) (Art), and Chaplain (Student):	
Part-time approved training after a minimum of one year college-level training, per semester	$200
Medical student interns—Approved training during third year of medical school:	
Full-time, per month	200
Half-time, per month	200
Approved training during fourth year of medical school:	
Full-time, per month	216
Half-time, per month	108
Medical residents, Glenn Dale Hospital, Government of the District of Columbia:	
First year approved residency	4,100
Fourth year approved residency	5,400
Student practical nurses, Department of Health, Education, and Welfare.	
One year approved training, per month	100
Student nurses: Total for three years' training (diploma course)	4,500

§ 27.3 *Stipends under existing agreements with trainees.* Stipends (total amounts paid, including maintenance allowances and other payments in kind) under existing agreements with trainees in accordance with maximum stipends approved by the Commission under the provisions of Executive Order 9750, and which are in excess of maximums in the above schedules, are hereby approved as maximums for the duration of training under such agreements: *Provided,* That statements of the terms of such agreements, with schedules of stipends and allowances, are filed with the Commission before September 1, 1947.

§ 27.4 *Stipends of trainees assigned to Federal hospitals as affiliates.* Trainees at non-Federal hospitals assigned to Federal hospitals as affiliates for part of their training shall receive no stipend from the Federal hospital other than any maintenance provided.

§ 27.5 *Exclusion of other trainee positions and establishment of maximum stipends.* Requests for approval by the Commission of exclusions from the provisions of the Federal Employees Pay Act of 1945, as amended, and the Classification Act of 1949, as amended, of other positions filled by persons employed on a student-employee basis assigned or attached to a hospital, clinic, or medical or dental laboratory, as provided in section 1 and section 2 of Public Law 330, 80th Congress, and for approval of maximum stipends not provided in § 27.2 or § 27.3, should be submitted promptly to the Commission with full supporting information.

§ 27.6 *Extent of regulations.* Maximum stipends provided in § 27.2 and § 27.3 apply to any "hospital, clinic, or medical or dental laboratory, operated by any department, agency, or instrumentality of the Federal Government or by the District of Columbia," unless rates of compensation are otherwise provided by law.

§ 27.7 *Inquiries.* Inquiries concerning this part may be directed, in Washington, D. C., to the Special Studies Section, Personnel Classification Division, telephone extension 625, and, in the field, to the appropriate regional or branch regional office.

PART 29—RETIREMENT

Sec.	
29.1	Administration.
29.2	Evidence.
29.3	Applications.
29.4	Time for filing applications.
29.5	Disability retirement; medical examination.
29.6	Effective date of retirement.
29.7	Computation of interest.
29.8	Military service.
29.9	Designation of beneficiary.
29.10	Designation of agent.
29.11	Disclosure of information.
29.12	Joint and survivorship annuities.
29.13	Making of voluntary deposits.
29.14	Purchase of additional annuity.
29.15	Appeals.
29.16	Exemption from automatic separation.
29.101	Basic records.

AUTHORITY: §§ 29.1 to 29.101 issued under sec. 17, 46 Stat. 478; 5 U. S. C. 709. Statutory provisions interpreted or applied are cited to text in parentheses.

§ 29.1 *Administration.* (a) The Commission shall have charge of the adjudication of all claims arising under the retirement laws, and of all matters directly or indirectly concerned with such adjudication.

(b) In the adjudication of claims arising under the retirement laws, the Commission shall consider and take appropriate action on counterclaims filed by the Government as setoffs against amounts in the retirement fund involved.

(Sec. 18, 46 Stat. 479; 5 U. S. C. 729)

§ 29.2 *Evidence.* (a) Civil Service Commission Form 2806 (Individual Retirement Record) shall be the basic record for action on all claims for annuity or refund, and those pertaining to deceased employees or annuitants.

(b) When loss or destruction or incompleteness of records in the Government offices concerned is shown, a request shall be made through the Commission to the General Accounting Office for such data as may be deemed necessary for a proper determination of the rights of the claimant. When the required information cannot be developed by any official record, inferior or secondary evidence then becomes admissible and should be requested.

§ 29.3 *Applications.* (a) All applications under the Retirement Act shall be filed with the Commission and shall be made on such forms as may be prescribed by the Commission.

(Sec. 13, 46 Stat. 476; 5 U. S. C. 716)

§ 29.4 *Time for filing applications.* (a) An application for annuity on account of age or optional retirement may be filed shortly before or at any time after the employee reaches the requisite retirement age. If the department contemplates reemployment of the employee immediately following retirement, the application must be executed at least 60 days in advance of the separation date and submitted immediately to the Commission with a photo copy of Form 2806 or a complete resume of the employee's service history, salary, and retirement deductions.

(b) An application for immediate or deferred annuity on account of voluntary or involuntary separation from the service should not be filed before the employee's separation nor more than 30 days prior to the commencing date of annuity.

(c) An application for retirement on account of disability must be executed by the employee prior to the applicant's separation from the service or within 6 months thereafter. This time limitation may be waived by the Commission in the cases of employees who are found to have been mentally incompetent at date of separation or within 6 months thereafter, the application in each such case to be filed with the Commission within one year from the date of restoration of any such person to competency or the appointment of a fiduciary, whichever is the earlier. This time limitation may also be waived by the Commission in the cases of employees who at date of separation or within 6 months thereafter are receiving hospital treatment, the application in each such case to be filed with the Commission within 6 months after termination of such hospitalization. An employee whose disabling condition is essentially chronic, deteriorative, or progressive in nature and can reasonably be assumed to have existed at date of separation, may file application within one year after date of separation; should an employee have been separated under such conditions prior to August 8, 1949, he may file application within 6 months after that date. Request or order by the department or other governmental agency for retirement of an employee for disability must be filed prior to the employee's separation from service. If application for retirement is submitted on an inappropriate form, or on an appropriate form inadequately or incompletely executed, such application may be accepted as an informal claim.

(d) An application by or on behalf of a survivor of a deceased employee or annuitant may be filed at any time after the death of the employee or annuitant.

(Sec. 6, 62 Stat. 51; 5 U. S. C. 710)

§ 29.5 *Disability retirement; medical examination.* (a) When an applicant for retirement on account of total disability has established a prima facie case and no legal grounds for rejection exist, such applicant shall be ordered to appear for a medical examination before a medical officer of the United States or a duly qualified physician or surgeon or board of physicians or surgeons designated by the Commission. When the application is accompanied by a report of examination already made by a medical officer of the United States, it may not be necessary to require another examination.

(b) When a medical examination made in compliance with the direction of the Commission shows that the annuitant has recovered and has been restored to an earning capacity which would permit him to be appointed to an appropriate position fairly comparable in compensation to the position occupied at the time of retirement, payments of the annuity shall be continued temporarily to afford the annuitant opportunity to seek such available position. In no case shall the continued payment of the annuity exceed one year from the date of the medical examination showing recovery. If the annuitant shall be reemployed in the Government service within the one year, the annuity shall be discontinued at the close of the day preceding the date of such reemployment.

(c) The Commission, where it appears in any particular case that the nature of the disability is such as to warrant the conclusion that it will continue for a certain period, may, in the exercise of its authority, waive the requirement for regular annual examinations for the period during which there is reasonable expectation of continuation of the disability, but in any case a medical or other examination may be ordered at any time to determine the facts relative to the nature and degree of disability of any employee thus retired.

(d) If the evidence shows that the disability is permanent in character, further examination shall not be ordered, unless warranted, and the annuitant shall be notified accordingly.

(Sec. 6, 62 Stat. 51; 5 U. S. C. 710)

§ 29.6 *Effective date of retirement.* (a) When an employee reaches retirement age on any day within a month, his annuity shall commence on the first day of the succeeding month. The employee will not be subject to automatic separation until the end of the month in which such age is attained, and credit for service shall be given for the period between the date of reaching retirement age and the beginning date of annuity. The head of the employing agency must notify each such employee regarding the fact of separation at least 60 days in advance thereof, but, should the agency head fail, through error, to give timely notification, the employee may not be separated without his consent until the end of the month in which such 60-day notice expires.

(b) When an employee retires on account of disability, the annuity shall commence on the first day of the month succeeding the termination of pay status, or on the first day of any subsequent month, as the case may warrant. In such cases, credit for service may be given for the period between the termination of pay status and the beginning date of annuity if the employee is carried on the rolls of the department during such time.

(c) In cases of optional retirement, or retirement because of involuntary separation after 25 years of service, the annuity shall commence on the first day of the month following separation, or it may start the first day of the month following termination of pay status provided such pay ceased after April 1, 1948,

and the employee met the age and service requirements at the end of the month in which pay ceased.

(d) In cases of discontinued service retirement, the annuity shall commence on the first day of the month following attainment of age 62, or the first day of the month following separation, whichever is later.

(e) The annuity payable under section 12 of the act of May 29, 1930, as amended, to a surviving widow or child shall commence on the first day of the month following the month in which the employee or annuitant dies or the first day of the month following the month in which eligibility for such annuity attaches, whichever is later.

(Secs. 7, 12, 13, 62 Stat. 52, 54, 58; 5 U. S. C. 718, 724, 733)

§ 29.7 *Computation of interest.* (a) The computation of interest shall be on the basis of 30 days to the month. Interest will be computed for the actual time involved in each case, but whenever applicable the rule of average will obtain.

(b) In all cases, interest shall be allowed on current deductions, deposits, and redeposits at the rate of 4 percent to December 31, 1947, and 3 percent thereafter, compounded annually, through all periods of service. When an officer or employee subject to the Retirement Act is transferred to a position wherein he does not retain his retirement status, and is entitled to refund of deductions with interest, the interest will terminate with the last day of service in the former position; and when an employee becomes absolutely separated from the service before completing five years' civilian service, interest on deductions will terminate with the last day in service. A fractional part of a month in the total service in any calendar year shall be disregarded, and no interest shall be allowed unless the service covered by the refund aggregates more than one year. After an employee has completed five years or more of civilian service, interest for refund purposes will terminate with the last day in service.

(c) Service-credit deposits and redeposits made by potential annuitants separated from service after serving at least five years will draw interest at the rate of 3 percent, compounded annually, during the separation period until beginning date of annuity.

(d) Interest at the rate of 3 percent, compounded annually, shall be allowed on voluntary deposits during periods of employment, and, after the employee has completed at least five years' civilian service, during periods of separation until beginning date of annuity; for refund purposes, interest will terminate with the last day in service.

(Secs. 10, 12, as amended, 62 Stat. 53, 54; 5 U. S. C. 719, 719–1, 724)

§ 29.8 *Military service.* (a) Periods of honorable service in the Army, Navy, Marine Corps, Air Force, or Coast Guard of the United States shall, after the employee has completed 5 years' civilian service, be credited under the retirement law. The only exception occurs in case the employee is receiving retired pay awarded for reasons other than (1) service-connected disability incurred in combat with an enemy of the United States, (2) service-connected disability incurred by explosion of an instrument of war, or (3) under Title III of the Act of June 29, 1948, Public Law 810, 80th Congress.

(b) An applicant for annuity who is in receipt of retired pay as above indicated may elect to surrender such retired pay and to have his military service added to his period of civil service for the purpose of obtaining a greater benefit in the form of annuity. Should it appear upon the adjudication of a claim for annuity that the claimant will benefit by the inclusion of military service, and the relinquishment of benefit based thereon, he shall be so advised and permitted to exercise the right of election.

(Sec. 5, 62 Stat. 50; 5 U. S. C. 707)

§ 29.9 *Designation of beneficiary.* (a) The designation of beneficiary shall be in writing, signed and witnessed, and received in the Civil Service Commission prior to the death of the designator.

(b) No change or cancellation of beneficiary in a last will or testament, or in any other document not witnessed and filed as required by this section shall have any force or effect.

(c) A witness to a designation of beneficiary is ineligible to receive payment as a beneficiary.

(d) Any person, firm, corporation, or legal entity may be named as beneficiary.

(e) A change of beneficiary may be made at any time and without the knowledge or consent of the previous beneficiary, and this right cannot be waived or restricted.

(f) All designations received in the Civil Service Commission before September 1, 1950, shall be null and void, except where an application for benefits based on the designator's death is received in the Commission prior to January 1, 1951.

(g) This section shall apply to designations, changes or revocations of beneficiary by employees or former employees subject to the act of May 29, 1930, as amended.

(Sec. 11, 41 Stat. 619, as amended; 5 U. S. C. 724)

§ 29.10 *Designation of agent.* In the case of a claim for amount due a deceased employee or annuitant where no beneficiary has been named and no executor or administrator has been appointed, but claim is made by next of kin, and if there be more than one entitled thereto, it shall be permissible for the others to designate the one who makes the claim to act as agent to receive their distributive shares.

§ 29.11 *Disclosure of information.* (a) (1) Files, records, reports, and other papers and documents pertaining to any claim filed with the Civil Service Commission, whether pending or adjudicated, will be deemed confidential and privileged, and no disclosure thereof will be made except as provided herein.

(2) Disclosure of information from the files, records, reports, and other papers and documents shall be made to a claimant or to his duly authorized representative in matters concerning himself alone when such disclosure would not be injurious to the physical or mental health of the claimant or be regarded as a breach of confidence.

Determination as to when disclosure of information would be injurious to the physical or mental welfare of a claimant will be made by the Medical Division.

(3) By "a duly authorized representative of a claimant" is meant any person who has satisfied the Commission of his authority to act.

(4) The name or address of a beneficiary designated by an employee or annuitant will, during the life of the employee, or annuitant, be furnished only to the designator when request therefor is made in writing over the signature of the designator.

(5) Such information as may properly be disclosed to a claimant personally shall, in the event of his death, be disclosed upon proper request to the duly appointed representative of his estate, or to such person as may be designated by such representative, or to a duly designated beneficiary. Where no representative of the claimant's estate has been appointed, the claimant's next of kin shall be recognized as the representative of his estate.

(6) Where copies of documents or other records are desired by or in behalf of parties to a suit, whether in a court of the United States or in any other court, such copies shall be furnished to the court only, and on an order of the court or subpoena duces tecum, addressed to the President, U. S. Civil Service Commission, requesting the same.

(7) Where a process of a United States court or other court requires the production of documents or records contained in the retirement files of a claimant, such documents will be produced in the court out of which the process has issued. Where original records are produced, they must remain at all times in the custody of a representative of the Civil Service Commission, and if offered or received in evidence, permission should be obtained to substitute a copy so that the original record may remain intact in the file.

(8) The address of a claimant as shown by the Civil Service Commission records may be furnished to duly constituted police or court officials upon proper request or the submission of a certified copy either of the indictment returned against the claimant or of the warrant for his arrest.

(9) Disclosure of the amount of annuity or refund to any claimant may be made to any National, State, county, municipal, or other publicly recognized charitable or social-security administrative agency.

(10) Subject to the limitation regarding name or address of a beneficiary, all records or documents officially required by any department or other agency of the United States Government shall be furnished in response to a proper request, and Senators and Representatives of the United States in their capacity as Members of Congress of the United States shall be furnished for their official use with such records, documents, or other information as may be requested for such use.

(11) Copies of papers, records, etc., the furnishing of which would be prejudicial to the interest of the Government; copies of reports of examining surgeons; or copies of records of departments and other confidential matters will not be furnished.

(b) Certificates of discharge, adoption papers, marriage certificates, decrees of divorce, letters testamentary or of administration, birth or baptismal records, family records, personal letters, diaries, and other personal papers or articles which may have been filed in a claim shall, when no longer needed in the settlement of such claim, be returned to the persons entitled thereto upon written request therefor; and whenever papers so returned constitute part of the material and essential evidence in a claim, photo or other copies of the same, or such parts thereof as may appear to possess evidential value, shall be retained in the case.

§ 29.12 *Joint and survivorship annuities.* (a) The option to receive joint and survivorship annuity may be exercised only by (1) a married employee retiring under any provision (except section 7) of the act of May 29, 1930, as amended, who may designate his or her wife or husband, or (2) an unmarried employee in good health retiring under any provision (except section 6 or 7) of the said act, who may designate a person having an insurable interest in him.

(b) Only a natural person may be designated as survivor annuitant under the joint and survivorship option. No more than one person may be named as survivor annuitant. The designation of a contingent survivor annuitant will not be accepted, and any such designation shall be null and void.

(c) Communication of the choice of option shall be made over the signature of the applicant on Standard Form 2801 for use in filing claim for annuity. Receipt of a communication as set forth in this paragraph shall constitute prima facie evidence of the existence of all the elements of an election. Whenever such prima facie evidence becomes conclusive by final adjudication of the claim by the Commission, an election shall have been made.

(d) In the event of death of the designated survivor annuitant or for other good cause shown prior to final adjudication of the claim by the Commission, a new survivor annuitant may be substituted or the employee may change his election of the type of annuity selected.

(e) In any case in which an election has been conclusively established pursuant to the regulations under this section, the election, including the designation of survivor annuitant, cannot be revoked or changed.

(f) The death of a designated survivor annuitant subsequent to the final adjudication of the claim, shall not operate to cancel the election, and payments to the former employee shall continue as though the death had not occurred.

(g) Where a married employee chooses the joint and survivorship plan, the annuity to the surviving widow or widower shall commence on the first day of the month in which the retired employee's death occurs or on the first day of the month following the widow's or widower's attainment of age 50, whichever is later. In case of an unmarried employee who takes the joint and survivorship option, the annuity to his survivor shall commence on the first day of the month in which the retired employee's death occurs.

(Sec. 4, 62 Stat. 49; 5 U. S. C. 698)

§ 29.13 *Making of voluntary deposits.* (a) The option to make voluntary contributions to the civil-service retirement and disability fund for the purchase of additional annuity shall be limited to those employees serving within the purview of the Retirement Act and shall be made on the form prescribed by the Commission.

(b) No voluntary contributions shall be made by an employee who has not deposited or redeposited amounts covering all civilian service rendered by him since August 1, 1920.

(c) Each voluntary contribution shall be made in the amount of $25 or multiple thereof, not to exceed 10 percent of aggregate annual basic salary, pay, or compensation received since August 1, 1920, by money order, draft, or check made payable to the Treasurer of the United States and forwarded to the U. S. Civil Service Commission, Washington 25, D. C.

(d) Voluntary contributions may be withdrawn only in case of transfer to a position wherein the member does not retain his status under the Retirement Act, absolute separation from the service prior to becoming eligible for retirement on annuity, or death.

(e) The Retirement Division of the Civil Service Commission shall maintain the record and account of voluntary contributions of each employee exercising the option to make such contributions.

(Sec. 10, 62 Stat. 54; 5 U. S. C., 719–1)

§ 29.14 *Purchase of additional annuity.* (a) Voluntary contributions may be used to purchase only one of the following types of annuity:

(1) Life annuity; or

(2) Reduced annuity payable during the life of the employee and after his death one-half of such reduced annuity to be payable to a survivor annuitant designated at time of retirement during the life of such survivor.

(b) Any natural person may be designated as beneficiary under paragraph (a) (2) of this section.

(c) If the employee elects a life annuity at retirement, each $100 credited to his voluntary contribution account, including interest, will purchase additional annuity at the rate of $7 per annum, plus 20 cents for each full year, if any, he is over age 55 at date of retirement.

(d) If he elects to purchase a joint and survivorship annuity, each $100 credited to his voluntary contribution account, including interest, will purchase additional annuity at the rate of $7 per annum, plus 20 cents for each full year, if any, he is over age 55 at date of retirement, multiplied by the following percentages: 90% of such amount if the survivor annuitant is the same age or older than the annuitant, or is less than five years younger than the annuitant; 85% if the survivor annuitant is five but less than ten years younger; 80% if the survivor annuitant is ten but less than fifteen years younger; 75% if the survivor annuitant is fifteen but less than twenty years younger; 70% if the survivor annuitant is twenty but less than twenty-five years younger; and 60% if the survivor annuitant is twenty-five or more years younger.

(Sec. 10, 62 Stat. 54; 5 U. S. C. 719–1)

§ 29.15 *Appeals.* (a) An appeal may be taken to the Civil Service Commission, from the final action or order of the Retirement Division affecting the rights or interest of any person or of the United States under the civil-service retirement law, except as provided in this section.

(b) Appeals must be filed by a claimant or a duly accredited representative, but no appeal shall lie to the Commission's Board of Appeals and Review until action has been completed by the Retirement Division. An appeal taken in behalf of a claimant by or through a representative who is not recognized by the Commission, or whose recognition has been canceled, shall not be entertained.

(c) (1) Except as hereinafter ordered, the time for filing an appeal shall be not later than six months from the date of mailing notice of the final action or order of which complaint is made.

(2) In applications for disability retirement made by a department or establishment of the Government the time for filing an appeal shall be not later than 30 days from date of receipt of notice of final action or order.

(3) In cases of disability annuitants who are found upon medical examination to have recovered, the time allowed for filing an appeal shall be no later than 90 days from the date of final notice of proposed discontinuance of annuity.

(4) In simultaneously contested claims, where one is allowed and one rejected, the time allowed for the filing of an appeal shall be not later than 60 days from the date of receipt of the notice of the Commission's action by the claimant to whom the action is adverse. Upon the filing of an appeal all parties, other than the appellant, whose interests may be adversely affected by the decision shall be notified by registered letter of the filing of the appeal and of the substance thereof and allowed 30 days from the date of the receipt of such notice within which to file brief or argument in answer thereto before the papers are forwarded to the Board of Appeals and Review. The return of a registered letter unclaimed, containing notice, addressed to the last known post-office address, shall constitute sufficient evidence of notice.

(d) Each appeal shall show the name and post-office address of appellant, his retirement claim number, the date and substance of the action from which the appeal is taken, and full reasons for the appeal.

(e) In proceedings before the Commission in which it shall be decided that a party has no right to appeal or that said appeal may not be entertained un-

der the provisions of this section, such party may apply to the Commissioners for an order directing the Retirement Division to forward the record to the Board of Appeals and Review. Such application shall be in writing and shall fully and specifically set forth the grounds upon which the request is based. If upon consideration the application is granted, jurisdiction shall vest in the Board of Appeals and Review to dispose properly of the case.

(f) The mandate of the decision by the Board of Appeals and Review shall be carried into effect within 60 days from the date of the receipt of notice of the decision by the Retirement Division (except as hereinafter provided), unless the decision shall sooner be recalled. A proper explanation of the decision rendered shall be mailed to the appellant and/or his duly authorized representative by the Board of Appeals and Review.

(g) In any case involving conflicting claims of two or more parties wherein the time allowed for appeal is limited to 60 days, there shall be a stay of execution of the decision of the Board of Appeals and Review until the expiration of the period of 30 days within which a motion for reconsideration may be filed.

(h) No appeal will be considered by the Civil Service Commission to review the decisions of the Secretary of the Interior prior to July 21, 1930, or of the Administrator of Veterans' Affairs prior to September 1, 1934, on civil-service retirement cases except where upon the basis of newly discovered material evidence, the case has been reconsidered by the Retirement Division. In the latter event, the provisions of this section shall apply.

§ 29.16 *Exemption from automatic separation.* (a) When a department or agency wishes to secure an exemption from automatic separation for one of its employees, other than a Presidential appointee, the head of such department or agency shall submit recommendation to that effect to the Civil Service Commission.

(b) Such recommendation shall contain, (1) a statement that the employee is willing to remain in service, (2) a recital of facts tending to establish that his retention would be in the public interest, (3) the period for which the exemption is desired, which period may not exceed one year, and (4) the reasons why the simpler method of retiring the employee and immediately reemploying him because of special qualifications is not being used.

(c) Such recommendation shall be accompanied by a medical certificate showing the employee's physical fitness to perform his work.

(d) No exemption will be approved by the Civil Service Commission after the automatic separation date applicable to the employee. For this reason, the recommendation should be forwarded to the Commission at least thirty days in advance of such separation date.

(Sec. 4, 41 Stat. 616, as amended; 5 U. S. C. 709; E. O. 10530, 19 F. R. 2709, 3 CFR, 1954 Supp.)

§ 29.101 *Basic records.* Every Federal department, agency, corporation, or branch, whether executive, legislative, or judicial, and the District of Columbia government, having officers or employees subject to any of the retirement laws administered by the Civil Service Commission, shall initiate and maintain retirement accounts as prescribed in the "Retirement Accounting Manual" issued by the Civil Service Commission.

(Sec. 12, 62 Stat. 54, as amended; 5 U. S. C. 724)

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] WM. C. HULL,
Executive Assistant.

[F. R. Doc. 55-10090; Filed, Dec. 14, 1955; 8:50 a. m.]

TITLE 32—NATIONAL DEFENSE

Chapter XI—National Guard and State Guard, Department of the Army

PART 1101—NATIONAL GUARD REGULATIONS

WARRANT OFFICERS

Sections 1101.7, 1101.8, 1101.9 and 1101.11 are amended to read as follows:

§ 1101.7 *General*—(a) *Purpose.* The regulations of §§ 1101.7 to 1101.11 prescribe the policies and procedures relative to, and qualifications required for Federal recognition of warrant officers.

(b) *Authority.* The National Defense Act, as amended, the Armed Forces Reserve Act of 1952 (PL 476, 82d Cong.), and the Warrant Officer Act of 1954 (PL 379, 83d Cong.).

(c) *Policy.* (1) The appointment of warrant officers, in the National Guard is a function of the appropriate military authorities of the State.

(2) A warrant officer will not become a member of the National Guard of the United States until he has been Federally recognized and has been duly appointed as a Reserve warrant officer of the Army.

(3) Appointments in the Reserve of the Army are for an indefinite period.

§ 1101.8 *Procurement.* (a) Warrant officers may be procured to fill position vacancies in authorized tables of organization with the warrant officer MOS code and title shown therein from the following sources:

(1) Former officers and warrant officers of the Armed Forces and members of the Reserve components holding appointments as officers or warrant officers.

(2) Former enlisted men who have served honorably on active duty in any of the Armed Forces of the United States for a period of at least 6 months and during such service attained one of the upper three enlisted grades.

(3) Applicants who meet the requirements of National Guard regulations.

(b) Applicants described in paragraph (a) (1) of this section, may, if previous service was as a commissioned officer or as a chief warrant officer and if otherwise qualified, be appointed to the grade of chief warrant officer, W-2, in the National Guard. Applicants who presently hold the grade of warrant officer in the Army Reserve may be appointed in the National Guard in the same grade. An applicant whose prior service was as warrant officer, junior grade, or warrant officer, W-1, on active duty, or who holds an appointment equivalent to that of Reserve warrant officer of the Army as a member of another Reserve component, or whose prior service was as an enlisted man of the upper three grades (paragraph (a) (2) of this section), may be appointed warrant officer, W-1, if otherwise qualified.

§ 1101.9 *Eligibility* — (a) *Ineligible persons.* The following persons are ineligible for Federal recognition:

(1) Those who are presently conscientious objectors. If an individual has been a conscientious objector, he will be required to furnish an affidavit which will express his abandonment of such beliefs and principles so far as they pertain to his reluctance to bear arms and to give full and unqualified military service to the United States, or he must have demonstrated that he has changed his views through subsequent actual performance of military service.

(2) Those who have a record of conviction by any type of military or civil court for other than minor traffic violation. The Department of the Army may grant waiver for conviction of minor violations which are non-recurrent and which are not deemed prejudicial to performance of duty as a warrant officer. Waivers of convictions involving moral turpitude or conviction of a felony are not authorized.

(3) Those who have been or are being separated from any of the Armed Forces of the United States:

(i) Under other than honorable conditions.

(ii) For unsatisfactory service.

(iii) By reason of resignation in lieu of court-martial, reclassification, or any form of corrective or disciplinary action.

(iv) As a result of court-martial or reclassification.

(4) Those who are or have been members of any foreign or domestic organization, association, movement, group, or combination of persons advocating a subversive policy or seeking to alter the form of Government of the United States by unconstitutional means.

(5) Those who are in the military service of a foreign government, or those employed by a foreign government unless approval is obtained from the Department of the Army. See section 247, Armed Forces Reserve Act of 1952.

(b) *Release from other Reserve components.* If an applicant is a member of the Army Reserve, Air Force Reserve, U. S. Naval Reserve, U. S. Marine Corps Reserve, or the U. S. Coast Guard Reserve, a conditional release must be obtained from the appropriate Reserve headquarters.

(c) *General requirements.* An applicant for appointment and Federal recognition in the grade of warrant officer in the National Guard must meet the following requirements:

(1) Must be recommended for appointment by his unit commander.

(2) Must be a citizen of the United States. If not native, must present evidence of acquired citizenship.

(3) Must meet the physical requirements prescribed in AR 40-105 (Army Regulations prescribing standards for physical examinations).

(4) If formerly a member of the Armed Forces, must have a document attesting to honorable discharge or certificate of separation under honorable conditions therefrom, covering all periods of prior service.

(5) Must have attained his 21st birthday and must not have attained his 46th birthday, on the date on which Federal recognition is initially extended by the Chief, National Guard Bureau, with the following exceptions: officers and warrant officers of the Army Reserve who apply for Federal recognition in the National Guard may be not less than 18 years of age, provided that State laws so permit; in case of appointment to a position in a State Headquarters and Headquarters Detachment, the maximum age is extended to an applicant's 59th birthday. Warrant officers appointed under the latter exception may not be reassigned to position vacancies in other units.

(6) Must have demonstrated positive qualities of leadership, either in the military service or in a civilian capacity.

(7) Must be of high moral character.

(8) Must possess sufficient general and specialized education and technical knowledge to warrant a reasonable expectation that he can perform the contemplated duties.

(9) Must reside within such distance from the unit of assignment as will permit satisfactory performance of emergency and training duty.

(10) A favorable National Agency Check will be required prior to a warrant officer's appearance before a Federal recognition board.

§ 1101.11 *Federal Recognition*—(a) *Federal recognition examining boards.* Under the provisions of section 75, National Defense Act, as amended, all warrant officers will be examined by a board of officers for determination of general fitness to occupy the position to which appointment has been made or is contemplated.

(b) *Temporary Federal recognition.* (1) Section 704, Armed Forces Reserve Act of 1952, authorizes the Secretary of the Army to prescribe the regulations under which officers, including warrant officers, of the National Guard may be extended temporary Federal recognition of their appointments in the National Guard. Temporary Federal recognition is a status provided for a warrant officer of the National Guard pending final determination by the Chief, National Guard Bureau, of his eligibility for permanent Federal recognition. This status is provided in the case of initial appointments only in the National Guard and is not applicable in the case of promotions or demotions within the authorized warrant officer grades.

(2) The status of temporary Federal recognition is granted by the Secretary of the Army through the duly appointed Federal recognition examining boards when such boards make a finding that a warrant officer of the National Guard:

(i) Has been appointed by a State order in the National Guard of the State to a warrant officer position vacancy in a Federally recognized unit, and

(ii) Has successfully passed the examination prescribed by section 75, National Defense Act, as amended, and

(iii) Has signed an oath that during such temporary Federal recognition he will perform all Federal duties and obligations required of him the same as though appointed as a Reserve warrant officer of the Army.

(c) In the event that permanent Federal recognition is denied a warrant officer, he will be entitled to receive Federal pay and allowances for which he may have qualified by the performance of prescribed duties only for the period during which held temporary Federal recognition and in no case beyond the date on which temporary Federal recognition was withdrawn.

(d) Temporary Federal recognition may be withdrawn at any time, and if not sooner withdrawn or replaced by permanent Federal recognition, it shall automatically terminate 6 months after the effective date thereof. When it is determined by the Chief, National Guard Bureau, that a warrant officer is ineligible for permanent Federal recognition and/or appointment as a Reserve warrant officer of the Army, he will withdraw the temporary Federal recognition conferred upon the person concerned and will notify the appropriate State of his action.

[NGR 22, 4 October 1955] (Sec. 118, 39 Stat. 213, sec. 704, 66 Stat. 502; 32 U. S. C. 17, 50 U. S. C. 1114)

[SEAL] JOHN A. KLEIN,
Major General, U. S. Army,
The Adjutant General.

PROPOSED RULE MAKING

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

[25 CFR Part 130]

OPERATION AND MAINTENANCE CHARGES

NAVAJO INDIAN IRRIGATION PROJECT, ARIZONA AND NEW MEXICO

Notice is hereby given of the intention to modify § 130.41 *Charges* of Title 25, Code of Federal Regulations, Chapter I, Subchapter L, dealing with operation and maintenance assessments against the irrigable lands of the Navajo Indian Irrigation Project, Arizona and New Mexico, by increasing the basic water charges from $1.00 per acre to $2.00 per acre pre annum. The revised section shall read as follows:

§ 130.41 *Charges.* Pursuant to the provisions of the Acts of August 1, 1914 (38 Stat. 583; 25 U. S. C. 385) and March 7, 1928 (45 Stat. 210), the annual basic charges for operation and maintenance assessed against the irrigable lands of the Navajo Indian Irrigation Project, Arizona and New Mexico, to which water can be delivered through the constructed works of the project, are hereby fixed at $2.00 per acre per annum for the year 1956 and thereafter until further notice, for the following units:

Navajo project	Agency	Per acre per annum
Fruitland Unit	Navajo	$2.00
Ganado Unit	do	2.00
Hogback Unit	do	2.00
Many Farms Unit	do	2.00
Red Lake Unit	do	2.00

For domestic water delivered through the project canal system and lateral system to pemittees on the reservation lands, $7.50 for each cistern.

For Tribal lands operated by the Shiprock High School, $2.00 per acre.

For Tribal lands operated as a Nursery by the Branch of Land Operations, Soil and Moisture Conservation Activity, $2.00 per acre.

Interested persons are hereby given opportunity to participate in preparing the proposed amendment by submitting their views and data or argument in writing to William Wade Head, area Director, Gallup Area Office, Gallup, New Mexico, within thirty (30) days from date of publication of this notice of intention in the daily issue of the FEDERAL REGISTER.

[Order No. 2508, Amendment No. 1 (16 F. R. 473-474); Order No. 551, Amendment No. 1 (16 F. R. 5456-5457)]

GLENN L. EMMONS,
Commissioner.

DECEMBER 9, 1955.

[F. R. Doc. 55-10052; Filed, Dec. 14, 1955; 8:45 a. m.]

CIVIL AERONAUTICS BOARD

[14 CFR Ch. I]

[Draft Release No. 55-30]

VOLUNTARY PILOT REPORT OF NEAR MID-AIR ("NEAR-MISS") COLLISION

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that the Civil Aeronautics Board has under considera-

tion the issuance of a Special Civil Air Regulation to encourage pilots and other persons to make voluntary reports of near mid-air collision ("near-miss") information, as hereinafter set forth.

Interested persons may participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should be submitted in duplicate to the Civil Aeronautics Board, attention Bureau of Safety Regulation, Washington 25, D. C. In order to insure their consideration by the Board before taking further action on the proposed rule, communications must be received by January 16, 1956. Copies of such communications will be available after January 18, 1956, for examination by interested persons at the Docket Section of the Board, Room 5412, Department of Commerce Building, Washington, D. C.

The Civil Aeronautics Board has under consideration the establishment of a program whereby pilots of any aircraft, or other interested persons, could voluntarily report incidents during flight where near mid-air collisions ("near-misses") between aircraft occur, in order to obtain information for use in the evaluation and development of air traffic control procedures, separation criteria, and pertinent Civil Air Regulations. The need for such a program is accentuated by the great number of near mid-air collisions informally reported at meetings held in recent years by aviation organizations and by military aviation safety representatives. Increasing sentiment has developed to establish a program to encourage all military and civil pilots to voluntarily report their near mid-air collision experiences wherever they may occur, so that dangerous trends could be discovered and corrective action prepared to meet them.

The seriousness of the near mid-air collision problem is illustrated by the fact that the Air Transport Association and the National Business Aircraft Association, among others, have independently established a program for the anonymous reporting of these incidents to them. It is the Board's understanding, however, that none of these programs has resulted in the full participation of all pilots due, no doubt, to the fear of possible government enforcement or other disciplinary action. It is believed that only through the positive and official assurance which the Civil Aeronautics Board can give under its statutory mandate "* * * to promote safety of flight in air commerce by prescribing * * * reasonable rules and regulations * * *" and by "* * * ascertaining what will best tend to reduce or eliminate the possibility of, or recurrence of, accidents * * *" can a successful program of this type be undertaken. Such a program would contribute valuable basic information required for reviewing air traffic control procedures, separation criteria, and the need for air traffic control and high density areas. Further, it would supply additional information to evaluate present Civil Air Regulations pertaining to air traffic rules.

To accomplish these desired ends, it is essential that all pilots involved in near mid-air collisions report the facts. However, it is appreciated that pilots are reluctant to make voluntary reports of the facts, conditions, and circumstances of these occurrences because of their apprehension that any report they submit might be used against them in an enforcement, remedial, or disciplinary action in the event that violation of the Civil Air Regulations is disclosed by such report.

To induce the pilots to make voluntary reports of near collisions (either anonymously or not, in their discretion) the Board proposes to assure them that the identity of the pilot making the report to the Board, if known, will be held in strict confidence by the Board and that the report will not be used to initiate, aid, or abet any enforcement, remedial, or disciplinary proceedings under the Civil Air Regulations. It should be understood, however, that the fact that a pilot, or other interested person, submits a voluntary report of a near-miss incident to the Board does not preclude enforcement, remedial, and/or other disciplinary proceedings that are initiated on the basis of information obtained from other sources.

In view of the foregoing, notice is hereby given that it is proposed to issue a Special Civil Air Regulation as follows:

Contrary provisions of the Civil Air Regulations notwithstanding, information from a report voluntarily submitted to the Civil Aeronautics Board by any pilot of any aircraft, or by any other person, giving the facts, conditions, and circumstances surrounding any near mid-air collision of aircraft, wherever it might occur, shall not be used to initiate, aid or abet any enforcement, remedial, or disciplinary proceedings under the Civil Air Regulations promulgated by the Board pursuant to the Civil Aeronautics Act of 1938, as amended. The identity of the pilot or person making such report, if known, and any information which might be used to establish such identity, shall be held in strict confidence by the Civil Aeronautics Board, and the information derived therefrom shall be used by the Board in the development of corrective safety measures, notwithstanding that a violation of the Civil Air Regulations is disclosed by such report: *Provided*, That where information of such violation of a Civil Air Regulation is obtained by other means, the fact that the violation was voluntarily reported will not preclude enforcement, remedial, or other disciplinary proceedings that are initiated on the basis of such other information.

This Special Civil Air Regulation is proposed under the authority of Title VI of the Civil Aeronautics Act of 1938, as amended, and may be changed in the light of comments received in response to this notice of proposed rule making.

(Sec. 205 (a), 52 Stat. 984, 49 U. S. C. 425 (a). Interpret or apply secs. 701, 702, 52 Stat. 1012, 1013, as amended, 49 U. S. C. 581, 582; sec. 601 (b), 52 Stat. 1007, 49 U. S. C. 551; sec. 1104, 52 Stat. 1026, 49 U. S. C. 674)

Dated at Washington, D. C., December 12, 1955.

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
Secretary.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 120]

TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

NOTICE OF FILING OF PETITION FOR ESTABLISHMENT OF TOLERANCE FOR RESIDUES OF LINDANE

Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408 (d) (1), 68 Stat. 512; 21 U. S. C. 346a (d) (1)), the following notice is issued:

A petition has been filed by the Benzene Hexachloride Committee, National Agricultural Chemicals Association, Box 333, Falls Church, Virginia, proposing the establishment of a tolerance of 10 parts per million for residues of lindane (gamma isomer of benzene hexachloride) in or on mushrooms.

The analytical method proposed in the petition for determining residues of lindane is as follows: A sample of mushrooms is extracted with *n*-hexane and the solvent evaporated from an aliquot of the extract. The labile chlorine of lindane in this aliquot is removed by refluxing 1½ hours with alcoholic sodium hydroxide and is determined by a microelectrometric titration with silver nitrate. The quantity of labile chlorine found is calculated, by means of the appropriate factor, as lindane.

Dated: December 9, 1955.

[SEAL] JOHN L. HARVEY,
Acting Commissioner of Food and Drugs.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 3]

[Docket No. 11514]

TABLE OF ASSIGNMENTS; TELEVISION BROADCAST STATIONS, WESTON, W. VA.

NOTICE OF FURTHER EXTENSION OF TIME FOR FILING COMMENTS

In the matter of amendment of § 3.606 *Table of assignments*, rules governing Television Broadcast Stations (Weston, West Virginia).

1. The Commission adopted a Notice of Proposed Rule Making on October 5, 1955 (FCC 55-992), instituting a rule making proceeding in the above entitled matter. The Notice specified that comments should be filed by November 7, 1955, with replies due 10 days thereafter. On October 31, 1955, the Commission adopted a Notice extending the time for filing comments to December 3, 1955, with replies due 10 days thereafter.

2. On December 2, 1955, WJPB-TV, Inc., and West Virginia's Research Center, Inc., filed a Joint Request for a Further Extension of Time to File Comments or to Amend the Present Petition. The request for further extension of time is made for the purpose of giving WJPB-TV, Inc., time to prepare and file an amended petition, and West Virginia's Research Center, Inc., time to prepare and file a petition requesting a joint educational-commercial allocation for Channel 5 at Weston, West Virginia. A further extension of 15 days is requested.

3. The Commission believes that an extension of time for filing comments in this proceeding is warranted and that such an extension would be in the public interest.

4. In view of the foregoing: *It is ordered*, That the time for filing comments in the above-entitled proceeding is extended to December 28, 1955, and that the time for filing replies to such comments is extended to 10 days thereafter.

Adopted: December 7, 1955.

Released: December 8, 1955.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

NOTICES

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[Classification Order No. 465]

CALIFORNIA

SMALL TRACT CLASSIFICATION

NOVEMBER 30, 1955.

1. Pursuant to authority delegated to me by the California State Supervisor, Bureau of Land Management, under Part II, Document 4, California State Office, dated November 19, 1954 (19 F. R. 7697), I hereby classify, under the Small Tract Act of June 1, 1938, as amended (43 U. S. C. 682a), the tracts of public land in San Bernardino County described below, for lease and sale for homesite purposes only:

SAN BERNARDINO BASE AND MERIDIAN

T. 3 N., R. 4 E.,
Section 2, E½W½SW¼NE¼, E½SW¼NW¼SE¼, E½NE¼NE¼SW¼;
Section 11, W½SE¼SE¼SW¼, E½SW¼SE¼SW¼;
Section 12, E½NW¼NE¼SE¼, W½SW¼NE¼SE¼, E½NE¼SW¼SE¼, E½W½NW¼SE¼, E½SE¼NE¼SW¼, W½SW¼NE¼SW¼, W½SW¼NW¼SW¼, E½NW¼SW¼SW¼;
Section 13, NE¼NE¼.
T. 3 N., R. 5 E.,
Section 4, SW¼;
Section 8, All;
Section 9, NW¼, S½;
Section 12, E½, SW¼SW¼, NW¼NW¼, N½SW¼NW¼;
Section 13, E½, SW¼, W½NW¼.

The above described lands will be leased and sold in tracts of approximately 5 acres with the tracts oriented with the long axis north and south.

T. 3 N., R. 5 E.,
Section 7, E½E½, SW¼SE¼, S½SW¼;
Section 10, SW¼;
Section 14, S½;
Section 15, S½, NW¼;
Section 17, E½E½, NW¼NE¼, N½NW¼;
Section 18, N½;
Section 20, NE¼NE¼;
Section 21, E½, N½NW¼;
Section 22, All;
Section 23, All;
Section 24, N½N½NE¼, SE¼, SE¼SW¼, NE¼NW¼, W½W½;
Section 26, W½;
Section 27, All;
Section 28, N½, E½SE¼, W½SW¼;
Section 33, N½SW¼NE¼SE¼, N½NW¼SW¼SW¼;
Section 34, S½N½NE¼NE¼, S½NW¼NW¼NE¼, N½SE¼SW¼NW¼.

The above described lands will be leased and sold in tracts of approximately 5 acres with the tracts oriented with the long axis east and west.

2. Classification of the above-described lands by this order segregates them from all appropriations, including location under the mining laws, except as to application under the mineral leasing laws.

3. The above described lands are situated approximately 12 miles due north of Yucca Valley, California, in San Bernardino County. The Victorville Road passes through the southwest quarter of the township for approximately 4 miles. A net work of good secondary roads makes the entire township accessible by the Victorville County road.

The land in general is a low, rolling valley, lying between the Bighorn and Bullio Mountains, with an elevation ranging from 2,500 to 4,000 feet above sea level. The annual precipitation is approximately 5.5 inches, falling mostly in the winter months.

The vegetative cover consists largely of creosote brush, bur-sage, annual weeds and flowers, with a scattering of galleta grass.

Available information indicates that a sufficient supply of ground water is available for domestic purposes.

4. The tracts will be subject to all existing rights-of-way and to rights-of-way 33 feet in width along the boundary of each tract for access roads and public utilities. Such rights-of-way may be utilized by the Federal Government or the State, County, or municipality in which the tract is located, or by any agency thereof. The rights-of-way may, in the discretion of the authorized officer of the Bureau of Land Management, be definitely located prior to issuance of patent. If not so located, they may be subject to location after patent is issued.

5. Leases will be issued to qualified applicants for a term of three (3) years and will contain an option to purchase in accordance with 43 CFR 257.13. The appraised value of the tracts is $150. The minimum rental is $10 per tract per annum, or a total of $30. Therefore, before leases can be issued for applications having statutory preference, an additional payment for advance rental in the amount of $15 is due and payable to the Manager, Land Office, Los Angeles, California. Leases will not be renewable unless failure to construct the required improvements is justified under the circumstances and nonrenewal would work an extreme hardship on the lessee.

6. To maintain their rights under their leases, lessees will be required either (a) to construct substantial improvements on their lands, or (b) file a copy of an agreement with their neighbors binding them to construct substantial improvements on their lands. Such improvements must conform with health, sanitation, and construction requirements of local ordinances and must, in addition, meet the following standards:

The dwelling house must be suitable for year-round use, on a permanent foundation and with a minimum of 400 square feet of floor space. It must be built in a workmanlike manner out of attractive materials properly finished. Adequate disposal and sanitary facilities must be installed. Conventional concrete, concrete slab, or masonry foundations are acceptable. Concrete piers are not acceptable as foundations.

7. Applicants must file in duplicate with the Manager, Land Office, 5th floor Bartlett Building, 215 West Seventh Street, Los Angeles, 14, California, application form 4-776, filled out in compliance with the instructions on the form and accompanied by any showings or documents required by those instructions. Copies of the application form can be secured from the above-named official.

The application must be accompanied by a filing fee of $10 plus the advance rental specified above. Failure to transmit these payments with the application will render the application invalid. Advance rentals will be returned to unsuccessful applicants. All filing fees will be retained by the United States.

8. The lands are now open to filing of drawing-entry cards (Form 4-775) only by persons entitled to veterans' preference. In brief, persons entitled to such preference are (a) honorably discharged veterans who served in the armed forces of the United States for a period of at least 90 days after September 15, 1940, (b) surviving spouse or minor orphan children of such veterans, and (c) with the consent of the veteran, the spouse of living veterans. The 90-day requirement does not apply to veterans who were discharged on account of wounds or disability incurred in the line of duty or the surviving spouse or minor children of veterans killed in the line of duty. Drawing-entry cards (Form 4-775) are available upon request from the Manager, Land Office, 5th floor Bartlett Building, 215 West Seventh Street, Los Angeles 14, California.

Drawing-entry cards will be accepted if filled out in compliance with the instructions on the form and with the above-named official prior to 10:00 a. m. April 10, 1956. A drawing will be held

on that date or shortly thereafter. Any person who submits more than one card will be declared ineligible to participate in the drawing. Tracts will be assigned to entrants in the order that their names are drawn. All entrants will be notified of the results of the drawing. Successful entrants will be sent copies of the lease forms (4–776), with instructions as to their execution and return and as to payment of fees and rentals.

9. All valid applications filed prior to 9:30 a. m. November 30, 1955, will be granted the preference right provided for by 43 CFR 257.5 (a) if the preference right applicants conform to the provisions of this order

R. G. SPORLEDER,
Officer in Charge,
Southern Field Group, Los Angeles.

OREGON

NOTICE OF PROPOSED WITHDRAWAL AND RESERVATION OF LANDS

DECEMBER 5, 1955.

Coos Bay Forest District, Bureau of Land Management, United States Department of the Interior, has filed an application, Serial No. Oregon 04382, for the withdrawal of the lands described below, from all forms of appropriation under the general mining laws and leasing under mineral leasing laws.

The applicant desires the land for hard rock material for surfacing timber access roads in the area.

For a period of 30 days from the date of publication of this notice, persons having cause may present their objections in writing to the undersigned official of the Bureau of Land Management, Department of the Interior, 1001 Lloyd Boulevard, P. O. Box 3861, Portland 8, Oregon.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

The lands involved in the application are:

WILLAMETTE MERIDIAN, COOS COUNTY, OREGON

T. 27 S., R. 12 W.,
Sec. 3: Lots 1, 2, 3 and 4, S½N½, S½.

642.60 acres.

VIRGIL T. HEATH,
State Supervisor.

[F. R. Doc. 55–10054; Filed, Dec. 14, 1955; 8:46 a. m.]

OREGON

NOTICE OF PROPOSED WITHDRAWAL AND RESERVATION OF LANDS

DECEMBER 5, 1955.

Eugene Forest District, Bureau of Land Management, United States Department of the Interior has filed an application, Serial No. Oregon 04041, for the withdrawal of the lands described below, from all forms of appropriation under the general mining laws and leasing under mineral leasing laws.

The applicant desires the land for a source of rock for surfacing and ballast in the construction and maintenance of timber access roads, Siuslaw River and Esmond Creek Roads.

For a period of 30 days from the date of publication of this notice, persons having cause may present their objections in writing to the undersigned official of the Bureau of Land Management, Department of the Interior, 1001 Lloyd Boulevard, P. O. Box 3861, Portland 8, Oregon.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

The lands involved in the application are:

WILLAMETTE MERIDIAN, OREGON, LANE COUNTY

T. 18 S., R. 8 W.,
Sec. 27: All.

640.00 acres.

VIRGIL T. HEATH,
State Supervisor.

COLORADO

NOTICE OF PROPOSED WITHDRAWAL AND RESERVATION OF LANDS

DECEMBER 9, 1955.

The U. S. Forest Service, Department of Agriculture, has filed an application, serial No. Colorado 012204, for the withdrawal from location and entry, under the General Mining Laws, subject to existing valid claims, of the lands described below.

The applicant desires the land for use as camp grounds, summer homes, and administrative site in connection with the Big Creek Lakes recreational area.

For a period of 30 days from the date of publication of this notice, persons having cause may present their objections in writing to the undersigned official of the Bureau of Land Management, Department of the Interior, 357 New Custom House, Box 1018, Denver 1, Colorado.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

The lands involved in the application are:

SIXTH PRINCIPAL MERIDIAN, COLORADO

ROUTT NATIONAL FOREST

Big Creek Lakes Recreation Area:
T. 11 N., R. 82 W.,
Sec. 2: NW¼SW¼;
Sec. 3: S½NE¼, SE¼, S½SW¼;

OREGON

ORDER PROVIDING FOR OPENING OF PUBLIC LANDS

DECEMBER 9, 1955.

Pursuant to Determination DA-422 Oregon, of the Federal Power Commission and in accordance with Order No. 541, Section 2.5, of the Director, Bureau of Land Management; approved April 21, 1954 (19 F. R. 2473), it is ordered as follows:

1. The lands hereinafter described, so far as they are withdrawn and reserved for power purposes in Power Site Reserve No. 662 of December 12, 1917, are hereby restored to disposition under the public land laws, subject to the provisions of Section 24, of the Federal Power Act of June 10, 1920 (41 Stat. 1075; 16 U. S. C. 818) as amended.

WILLAMETTE MERIDIAN, OREGON

T. 32 S., R. 14 W.,
Sec. 11: NE¼SE¼;
Sec. 12: NW¼SW¼.

Total 80.00 acres.

2. The public lands are located along the Sixes River in northwestern Curry County, Oregon. They are rough, rocky and too mountainous for cultivation with a heavy growth of small conifers and underbrush. They are suited for growing of timber.

3. No application will be allowed under the homestead, desert land, small tract, or other nonmineral public land laws, unless the lands have already been classified as valuable or suitable for such type of application or shall be so classified upon consideration of an application. Any application that is filed will be considered on its merits. The lands will not be subject to occupancy or disposition until they have been classified.

4. Any disposition of the lands described herein shall be subject to the stipulation that if and when the land is required in whole or part for power development purposes, any structures or improvements placed thereon which may be found to obstruct or interfere with such development, shall without cost, expense or delay to the United States, its licensees or permittees, be removed or related insofar as may be necessary to eliminate interference with power development.

5. The lands described shall be subject to application by the State of Oregon for a period of 90 days from the date of this order for right of way for public highways or as a source of material for construction of such highways, in accordance with and subject to provisions

of Section 24, of the Federal Power Act, as amended, and the special stipulation provision in the preceding paragraph.

6. Subject to any existing valid rights and the requirements of applicable laws, the lands described in Paragraph 1, are hereby opened to filing of applications, selections, and location in accordance with the following:

a. Applications and selections under the nonmineral public land laws and offers under the mineral leasing laws may be presented to the Manager mentioned below, beginning on the date of this order. Such applications, selections, and offers will be considered as filed on the hour and respective dates shown for various classes enumerated in the following paragraphs:

(1) Applications by persons having prior existing valid settlement rights, preference rights conferred by existing laws, or equitable claims subject to allowance and confirmation will be adjudicated on the facts presented in support of each claim or right. All applications presented by persons other than those referred to in this paragraph will be subject to the applications and claims mentioned in this paragraph.

(2) All valid applications under the Homestead, Desert Land and Small Tract Laws by qualified veterans of World War II or the Korean Conflict, and by others entitled to preference rights under the act of September 27, 1944 (58 Stat. 747; U. S. C. 279–284 as amended), presented prior to 10:00 a. m. on January 14, 1956, will be considered as simultaneously filed at that hour. Rights under such preference right applications filed after that hour and before 10:00 a. m. of April 14, 1956, will be governed by the time of filing.

(3) All valid applications and selections under the nonmineral public land laws, other than those coming under paragraphs (1) and (2) above, and applications and offers under the mineral leasing laws, presented prior to 10:00 a. m. on April 14, 1956, will be considered as simultaneously filed at that hour. Rights under such applications and selections filed after that hour will be governed by the time of filing.

b. The lands will be open to location under the United States mining laws, beginning 10:00 a. m. on January 14, 1956.

7. Persons claiming veteran's preference rights under Paragraph a (2) above must enclose with their application proper evidence of military or naval service, preferably a complete photostatic copy of the certificate of honorable discharge. Persons claiming preference rights based upon valid settlement, statutory preference, or equitable claims must enclose properly corroborated statements in support of their applications, setting forth all facts relevant to their claims. Detailed rules and regulations governing applications which may be filed pursuant to this notice can be found in Title 43 of the Code of Federal Regulations.

8. Inquiries concerning the above lands shall be addressed to Manager, Land Office, Bureau of Land Management, P. O. Box 3861, (1001 NE. Lloyd Boulevard) Portland 8, Oregon.

VIRGIL T. HEATH,
State Supervisor.

DEPARTMENT OF COMMERCE

Bureau of Foreign Commerce

[Case No. 202]

CHEUNG KAM KEE TRADING CO. ET AL.

ORDER REVOKING EXPORT LICENCES AND DENYING EXPORT PRIVILEGES

In the matter of: Cheung Kam Kee Trading Co., and Cheung Yuk Leung, 10 Wing Kut Street, Hong Kong; A. M. M. Van de Looveren, N. V., (formerly known as West Europe Associated Merchants, N. V.), and Anthonius M. M. Van de Looveren, Willemsparkweg 80, Amsterdam C, Netherlands; Erik Jansen Handelsonderneming, and T. Boelaarts, Prins Hendrikkade 125, Amsterdam C, Netherlands; and Garber Export Corporation, and Allen A. Garber, 37 Wall Street, New York, New York: Respondents.

The Director, Investigation Staff, Bureau of Foreign Commerce, having charged

(a) The respondents, Cheung Kam Kee Trading Co. and Cheung Yuk Leung, (hereinafter referred to as Cheung), of Hong Kong, A. M. M. van de Looveren, N. V. and Anthonius M. M. van de Looveren, (hereinafter referred to as van de Looveren), and Erik Jansen Handelsonderneming and T. Boelaarts, (hereinafter referred to as Jansen), all of Amsterdam, the Netherlands, with having made false statements and representations for the purpose of inducing the exportation of goods from the United States and with having diverted or transshipped to unauthorized destinations goods exported from the United States; and

(b) The respondents, Garber Export Corporation and Allen A. Garber of New York City, New York, (hereinafter referred to as Garber), with having failed to disclose to the Office of International Trade, (now the Bureau of Foreign Commerce), material facts of transactions for which Garber filed applications for export licenses; and

The charging letter having been duly served on all the respondents, the Cheung and Jansen respondents failing to answer the same and not demanding an oral hearing; and

The van de Looveren and Garber respondents having answered and denied the charges, only Garber demanding an oral hearing;

This proceeding was duly referred to the Compliance Commissioner, who, in accordance with the practice, has held a hearing in New York City on July 21, 22, 1955, at which hearing the Garber respondents were present and represented by counsel. He has submitted his written report, including findings of fact and findings that violations have occurred.

Now, after reviewing and considering the entire record of this case, the Compliance Commissioner's Report and Recommendation, and the brief and supplemental data submitted on behalf of the Garber respondents, I hereby make the following:

Findings of fact. 1. At all times hereinafter mentioned, Cheung Kam Kee Trading Co. and Cheung Yuk Leung, its Manager, (hereinafter referred to as Cheung), were engaged in the import and export business in Hong Kong; A. M. M. van de Looveren, N. V., (formerly known as West Europe Associated Merchants, N. V.), Anthonius M. M. van de Looveren, its Manager, (hereinafter referred to as WEAM or van de Looveren, interchangeably), Erik Jansen Handelsonderneming, and T. Boelaarts, its Manager, (hereinafter referred to as Jansen), were engaged in the import and export business in Amsterdam, the Netherlands; and Garber Export Corporation and Allen A. Garber, its President, were engaged in the export business in New York City.

2. That in the acts hereinafter found to have been performed by any of the corporate or firm respondents, the individuals associated with them by joint designation in Finding 1 participated equally and were principal actors, and such responsibility as is hereinafter found was and is a joint responsibility of such persons and firms.

3. That on about January 13, 1949, Cheung and Garber commenced a relalationship whereby Garber made numerous sales of American chemicals, drugs and pharmaceuticals to Cheung, made numerous exports to him in Hong Kong, kept him informed as to trade trends, market conditions, availability of American commodities for export and American export control regulations, Cheung from time to time made known to Garber commodity supply and price conditions in Hong Kong, and his needs and requirements for chemicals, drugs and pharmaceuticals in his business, and from all this Garber acquired a general knowledge of Cheung's business and became acquainted with his urgent needs for commodities of the nature mentioned.

4. At all times hereinafter mentioned, with respect to any of the acts found to have been performed by any of the respondents, the respondents and each of them well knew that no commodity could be exported directly from the United States to Hong Kong nor indirectly by transshipment from any other country to Hong Kong, without prior express approval by the Office of International Trade (now the Bureau of Foreign Commerce), whether such exportation was subject to the validated export license procedure or might be accomplished without validated license for certain countries, under the procedure known as General License. Further, the respondents and each of them well knew that statements furnished to American exporters setting forth intended end-use, country of destination and purchaser of commodities sought for exportation or intended to be exported from the United States were furnished for use by such American exporters in support of applications for export licenses or in support

of the privilege of such exporters to make exportations under the General License procedure. Further, the respondents Garber well knew that upon and in connection with applications for validated export licenses they were required to disclose to the Office of International Trade all terms of the order involved in the transaction for which the license was requested, all other facts of the transaction as well as all parties to the transaction, and that they were further required to report promptly to that Office any material or substantive changes in any of the facts of the transaction, whether such changes occurred prior to or after the issuance of the license.

5. That after having been informed by Garber that, although a validated license was required for exportations of certain phamaceuticals to Hong Kong, such exportations could be made under the General License procedure to Taiwan, Formosa, Cheung ordered and purchased from Garber, for ultimate landing in Hong Kong, (a) thirteen cartons of Riboflavin, ten cartons of Amesec Pulvules, and two cartons of Multicebrin Gelseals, (b) eight cartons of Promin Ampules, six cartons of Benadryl Kapseals, and eleven cartons of Combex Parenteral, (c) eight cartons of Vitamin B1, all of an agregate value of approximately $18,000. Each of said orders was ostensibly for a consignee in Taiwan, Formosa, and Cheung specifically directed that the shipments be made via an airline passing through or stopping in Hong Kong. Garber made each of the shipments, as requested and, upon each of the export declarations filed by him in support of the exportations, he designated the Taiwan consignee as the ultimate consignee and provided that the goods must not be discharged at Hong Kong.

6. That after each of the three shipments arrived at Hong Kong, Cheung, by bribing employees of the airline, arranged for and caused the contents to be removed from the original packages during the time that the same were lying in Hong Kong and substituted other commodities for the commodities so removed, thereafter allowing the packages to be carried forward to Taiwan, Formosa, such packages no longer containing the commodities originally exported from the United States.

7. That after the completion of said three shipments, Garber informed Cheung that Customs authorities prohibited additional shipments to Formosa if such shipments required a change of airplane at Hong Kong and that only direct shipments to Formosa were permitted without validated export licenses.

8. Following receipt of this information, Cheung entered into an arrangement with van de Looveren under and pursuant to which van de Looveren became the ostensible purchaser and ultimate consignee in the Netherlands of commodities to be exported from the United States by Garber upon orders from and payments by Cheung. This arrangement was later expanded or extended so that Jansen instead of van de Looveren became such ostensible purchaser and ultimate consignee in the Netherlands.

9. Under and pursuant to this arrangement, Cheung, on or about the 13th day of November, 1951, purchased from Garber 1000 bottles of Multicebrin Gelseals and 2000 bottles of Amesec Pulvules, valued at $7,560., for which amount Garber debited Cheung's account with him, Cheung having a credit balance by reason of certain sales which Garber had theretofore made on Cheung's behalf. Garber then shipped the said commodities to van de Looveren and supported such shipment by an export declaration certifying that van de Looveren was the purchaser or ultimate consignee in Amsterdam, Holland. When the commodities arrived in the Netherlands, Cheung and van de Looveren caused them to be transshipped to Hong Kong without authorization from or permission of the Office of International Trade.

10. On December 3, 1951, Garber offered Cheung 10,000 vials of glucocalcium for $9000., f. o. b. New York, which Cheung accepted, instructing him to ship to van de Looveren and debit his account for the purchase price. Garber did so on December 21, 1951, and supported the exportation with an export declaration in which he certified that the commodity was being shipped under General License to van de Looveren as purchaser or ultimate consignee in Amsterdam, Holland. When this shipment arrived at Rotterdam, Cheung and van de Looveren caused it to be transshipped to Hong Kong, without authorization from or permission of the Office of International Trade.

11. During the time that this glucocalcium transaction was being accomplished and for the purpose of facilitating transshipment of commodities to Hong Kong, van de Looveren instructed Garber that all future shipments were to be consigned to Rotterdam and not through to Amsterdam.

12. On or about May 25, 1952, Cheung ordered another five thousand bottles of glucocalcium, of a value of $4,500, and directed shipment to van de Looveren. Garber informed him that an export license was not required but that he wanted a formal order from the consignee and a certificate that the goods would not be transshipped. Although van de Looveren questioned the necessity for an ultimate consignee statement in cases where no export license was required, he furnished Garber with such a statement, to the effect that Jansen was the purchaser and ultimate consignee in the Netherlands where the goods would be resold and that there would be no transshipment. Jansen signed this statement and also the order which it accompanied. Garber thereupon shipped the glucocalcium to Jansen, at Rotterdam, under an export declaration in which he certified that the shipment was being made under General License, to Jansen, at Amsterdam, for ultimate consumption in the Netherlands. When the glucocalcium arrived at Rotterdam, Cheung and van de Looveren caused it to be transshipped to Hong Kong, after Jansen had endorsed the bill of lading, and without authorization from or permission of the Office of International Trade.

13. On April 2, 1952, after an exchange of preliminary cablegrams, Cheung orderd 10,000 bottles of penicillin, requested Garber to apply for an export license and directed that they be shipped to van de Looveren in Amsterdam. This order was given after Garber had informed him that a validated export license would be necessary before the shipment could be effectuated. Garber thereafter informed van de Looveren in detail as to the statements and representations which were required in an "ultimate consignee statement."

14. On receiving this information, van de Looveren informed Garber that Jansen would act as purchaser and at the same time he furnished Garber with an order and ultimate consignee statement from Jansen for 20,000 bottles of penicillin, among other things. Garber applied to the Office of International Trade for a license to export 20,000 bottles of penicillin, valued at $8,600, to Jansen, as ultimate consignee, and naming Amsterdam, the Netherlands, as the place and country of ultimate destination. He used Jansen's ultimate consignee statement to support the application—Jansen having certified that he was the purchaser and consignee and that the penicillin was to be used in no country other than the Netherlands. He did not disclose to the Office of International Trade that Cheung had ordered the penicillin originally or that van de Looveren had been a participant in the transaction. After having been paid for the penicillin by Cheung, Garber shipped it to Jansen at Amsterdam, pursuant to the authority of the export license issued upon his said application. He did not disclose to the Office of International Trade that, after having received the license and before shipping the penicillin, Cheung had approved the increased order and had paid for the goods. The bill of lading under which the goods were shipped contained a notice that the commodity so shipped was licensed for the Netherlands as the ultimate destination and that diversion contrary to United States law was prohibited. When the shipment arrived at Amsterdam, Cheung and van de Looveren caused its transshipment to Hong Kong without authorization from or permission of the Office of International Trade.

15. With respect to another order of 30,000 boxes of penicillin tablets and 30,000 vials of penicillin in oil, which Cheung had given to Garber with instructions to ship to Jansen, Garber applied to the Office of International Trade for two licenses to export the said commodities, supporting said applications with ultimate consignee statements from Jansen. In connection with such applications, Garber again failed to disclose to the Office of International Trade that the penicillin had been ordered by Cheung and that Cheung was to pay for it as he had been previously informed by van de Looveren. The licenses were duly granted but, after Garber learned that methods of payment for goods exported from the United States might be checked by the Office of International Trade, he returned the licenses to the Office of International Trade, unused.

And, from the foregoing, the following are my

Conclusions. A. The respondents, Cheung Kam Kee Trading Co. and Cheung Yuk Leung, both of Hong Kong, A. M. M. van de Looveren, N. V. (formerly known as West Europe Associated Merchants, N. V.), Anthonius M. M. van de Looveren, Erik Jansen Handelsonderneming, and T. Boelaarts, all of Amsterdam, Netherlands, made and caused to be made false representations and statements as to country of destination and intended end use of commodities sought to be and actually exported from the United States, and concealed and caused to be concealed from the Office of International Trade material facts concerning the country of ultimate destination for the purpose of effecting or causing to be effected exportations from the United States, all in violation of § 381.1 (b) of the export control regulations then in effect;

B. The respondents Cheung Kam Kee Trading Co., Cheung Yuk Leung, A. M. M. van de Looveren, N. V. and Anthonius M. M. van de Looveren diverted, reexported or transshipped and caused the diversion, reexportation and transshipment of commodities exported from the United States to unauthorized destinations, and disposed of and caused the disposition of commodities to a person and place of end-use contrary to the terms of export licenses under which such commodities were exported from the United States, all in violation of §§ 371.4, 381.1 (b), 381.3, 381.4 (b) and 381.4 (d) of the export control regulations then in effect;

C. The respondents Garber Export Corporation and Allen A. Garber, New York, New York, concealed and caused to be concealed from the Office of International Trade material facts in applications submitted for export licenses to export commodities from the United States, in violation of § 381.1 (b) of the export control regulations then in effect.

In making his recommendations, the Compliance Commissioner said,

> In this case, Cheung was the leader and chieftan of all that was done and, except for the Taiwan, Formosa shipments, he was assisted and joined in all the violations by van de Looveren. Their conduct was skillfully and carefully planned and they had almost complete success in all their schemes for diversion. • • •
>
> It is possible that the Jansen respondents were no more than tools for Cheung and van de Looveren. Nevertheless, they did make definite representations and statements which they knew were false and which they knew were to be used to support exportations from the United States. These statements aided and enabled Cheung and van de Looveren to accomplish their unlawful purposes. Because of the less active role of these respondents, I am giving them the benefit of my doubt that they were in the major conspiracy. • • •
>
> Garber • • • is charged in this case with nothing more than a failure to disclose Cheung's interest in the transactions with respect to which three license applications were submitted. Licenses were granted on all the applications but only one was used, 20,000 boxes of penicillin valued at $8,600 having been shipped. These were subsequently diverted to Hong Kong. (The fact that the goods were transshipped was not considered in arriving at the conclusion that there was a concealment.) He voluntarily returned the other two licenses, unused, • • • His entire conduct throughout his relations with Cheung is at strange variance with the fine testimonials submitted by him. If the picture were not as strong as it is against Garber, these testimonals would have persuaded me to make an even more lenient recommendation with respect to him than I shall make. The recommendation I am making is, in my opinion, in the light of all the circumstances, relatively lenient. On the one side we have the composite picture and the fact that the penicillin in Charge II, Count (d), was transshipped to Hong Kong and on the other the testimonals, Garber's sole means of livelihood from the export business, the after-effects and repercussions which the order to be entered herein will cause, its financial impact • • • his apparent cooperation with and complete disclosure to the investigators, and his previous good record and army service.

Now, after careful consideration of the entire record, the answers, the brief, the supplemental data and the report of the Compliance Commissioner, and being of the opinion that the recommendation of the Compliance Commissioner is fair and just, and that this order is necessary to achieve effective enforcement of the law, *It is hereby ordered:*

I. The respondents and each of them be and they hereby are denied all privileges of participating directly or indirectly in any manner or capacity in an exportation of any commodity or technical data from the United States to any foreign destination, including Canada, whether such exportation has heretofore or hereafter been completed. Without limitation of the generality of the foregoing denial of export privileges, participation in an exportation is deemed to include and prohibit participation by any of the respondents, directly or indirectly in any manner or capacity, (a) as a party or as a representative of a party to any validated export license application, (b) in the obtaining or using of any validated or general export license or other export control documents, (c) in the receiving, ordering, buying, selling, using, or disposing in any foreign country of any commodities in whole or in part exported or to be exported from the United States, and (d) in storing, financing, forwarding, transporting, or other servicing of such exports from the United States;

II. Such denial of export privileges shall apply not only to each of the respondents, but also to any person, firm, corporation, or business organization with which any of them may be now or hereafter related by ownership, control, position of responsibility, or other connection in the conduct of trade in which may be involved exports from the United States or services connected therewith;

III. All outstanding validated export licenses held by or issued in the name of Cheung Kam Kee Trading Co. or Cheung Yuk Leung or A. M. M. van de Looveren, N. V. or West Europe Associated Merchants, N. V. or Anthonius M. M. van de Looveren or Erik Jansen Handelsonderneming or T. Boelaarts or Garber Export Corporation or Allen A. Garber or in which they appear or participate as purchaser, intermediate or ultimate consignee, or otherwise, are hereby revoked and shall be returned forthwith to the Bureau of Foreign Commerce for cancellation;

IV. Such denial of export privileges shall be and become effective forthwith but (a) as to the respondents Cheung Kam Kee Trading Co., Cheung Yuk Leung, A. M. M. van de Looveren, N. V., and Anthonius M. M. van de Looveren shall continue and remain in effect so long as exports of goods and commodities from the United States are subject to export control; and (b) as to Erik Jansen Handelsonderneming and T. Boelaarts,, shall continue and remain in effect for a period of one year from the date hereof; and (c) as to Garber Export Corporation and Allen A. Garber, shall continue and remain in effect for a total period of six months as provided and subject to the conditions set forth in Part VI hereof;

V. No person, firm, corporation, partnership, or other business organization, whether in the United States or elsewhere, during any time when any respondent is prohibited under the terms hereof from engaging in any activity within the scope of Part I hereof, shall, without prior disclosure to, and specific authorization from, the Bureau of Foreign Commerce, directly or indirectly in any manner or capacity (a) apply for, obtain, or use any license, shipper's export declaration, bill of lading, or other export control document relating to any such prohibited activity, (b) order, receive, buy, use, dispose of, finance, transport or forward, any commodity on behalf of or in any association with such respondent, or (c) do any of the foregoing acts with respect to any commodity or exportation in which such respondent may have any interest of any kind or nature, direct or indirect;

VI. Upon the expiration of two months from the date of this order, without further action or order, all export privileges shall be restored to the respondents Garber Export Corporation and Allen A. Garber, upon the condition, nevertheless, that such respondents permit freely and without restriction the inspection by agents of the Bureau of Foreign Commerce of all their records relating to the business of exporting in any capacity, answer all reasonable inquiries by such agents concerning export matters, and comply fully with all other requirements of the Export Control Act of 1949, as amended, and all regulations promulgated thereumder; and, if it be found by the Director of the Office of Export Supply, or such other official as may at that time be exercising the duties now exercised by him, after ex parte application, that such respondents or either of them, at any time prior to the expiration of six months from the date hereof, have knowingly failed to comply with this

condition in any respect, such official may, summarily and without notice to the respondents, enter an order against them providing that the denial of their export privileges shall forthwith again become effective and shall continue for up to a full four months following the date of such finding, without prejudice to such other or additional action as may be deemed proper by reason of such new violation.

Dated: December 12, 1955.

JOHN C. BORTON,
Director,
Office of Export Supply.

Foreign-Trade Zones Board

[Order 41]

GRANT TO ESTABLISH, MAINTAIN AND OPERATE FOREIGN-TRADE ZONE NO. 4 AT LOS ANGELES, CALIFORNIA

REVOCATION

Pursuant to authority contained in the Foreign-Trade Zones Act of June 18, 1934, as amended (48 Stat. 998–1003; 19 U. S. C. 81–a–81–u), the Foreign-Trade Zones Board has adopted the following order which is promulgated for the information and guidance of all concerned:

Whereas, on June 27, 1949, the Foreign-Trade Zones Board, by Order No. 18 (14 F. R. 3686, July 2, 1949), issued a grant to the Board of Harbor Commissioners, City of Los Angeles, a municipal corporation, to establish, maintain and operate Foreign-Trade Zone No. 4 in Los Angeles, California, and more particularly described on a map, accompanying the application, marked Exhibit No. 10; and

Whereas, Foreign-Trade Zone No. 4 was duly opened on September 1, 1949, and has remained in continuous operation since that date; and

Whereas, the Board of Harbor Commissioners, City of Los Angeles, under date of September 14, 1955, petitioned the Foreign-Trade Zones Board to revoke said grant and authorize the closing of the zone on the grounds that sufficient business has not been developed to justify continued operation.

Now, therefore, the Foreign-Trade Zones Board, after full consideration and a finding that the revocation of the grant and the closing of the zone is in the public interest, hereby revokes said grant and rescinds Order No. 18 under which this grant was promulgated.

The Grantee shall arrange with the Collector of Customs at Los Angeles for the disposal, according to law, of all merchandise remaining in Foreign-Trade Zone No. 4. The Grantee shall also take appropriate action for closing accounts for Customs service.

This order will become effective sixty (60) days after publication in the FEDERAL REGISTER.

Signed at Washington, D. C., this 8th day of December 1955.

FOREIGN-TRADE ZONES BOARD,
[SEAL] SINCLAIR WEEKS,
Secretary of Commerce; Chairman and Executive Officer, Foreign-Trade Zones Board.

Attest:

JOSEPH M. MARRONE,
Executive Director,
Foreign-Trade Zones Operations.

DEPARTMENT OF LABOR

Wage and Hour Division

[Administrative Order 453]

PUERTO RICO

APPOINTMENTS TO INVESTIGATE CONDITIONS AND RECOMMEND MINIMUM WAGES FOR CERTAIN INDUSTRIES; NOTICE OF HEARING

Pursuant to authority under the Fair Labor Standards Act of 1938 (52 Stat. 1060, as amended, 29 U. S. C., and Sup. 201 et seq.), and Reorganization Plan No. 6 of 1950 (5 U. S. C. 611), I hereby appoint, convene, and give notice of the hearings of Industry Committee No. 19–A for the Corsets, Brassieres, and Allied Garments Industry in Puerto Rico, Industry Committee No. 19–B for the Textile and Textile Products Industry in Puerto Rico, Industry Committee No. 19–C for the Shoe Manufacturing and Related Products Industry in Puerto Rico, and Industry Committee No. 19–D for the Metal Hair Accessories Industry in Puerto Rico.

Industry Committee No. 19–A is composed of the following representatives:

For the public: Leo C. Brown, Chairman, St. Louis, Missouri; A. Cecil Snyder, San Juan, Puerto Rico; Herbert L. Sherman, Pittsburgh, Pennsylvania.

For the employers: Isadore A. Itkowitz, New York, New York; James R. Beverley, San Juan, Puerto Rico; Bernard Rashkin, Bayamon, Puerto Rico.

For the employees: Hipolito Marcano, San Juan, Puerto Rico; John Chupka, East Douglas, Massachusetts; David Dubinsky, New York, New York.

For the purpose of this order the Corsets, Brassieres, and Allied Garments Industry in Puerto Rico is defined as follows:

The manufacture of corsets, brassieres, brassiere pads, girdles, foundation garments, sanitary belts, surgical or abdominal supports, and all similar body-supporting garments.

Industry Committee No. 19–B is composed of the following representatives:

For the public: Leo C. Brown, Chairman, St. Louis, Missouri; A. Cecil Snyder, San Juan, Puerto Rico; Herbert L. Sherman, Pittsburgh, Pennsylvania.

For the employers: Isadore A. Itkowitz, New York, New York; James R. Beverley, San Juan, Puerto Rico; Robert Rodgers, Ponce, Puerto Rico.

For the employees: Hipolito Marcano, San Juan, Puerto Rico; John Chupka, East Douglas, Massachusetts; David Dubinsky, New York, New York.

For the purpose of this order the Textile and Textile Products Industry in Puerto Rico is defined as follows:

The preparation of textile fibers, including the ginning and compressing of cotton; the manufacture of batting, wadding, and filling; the manufacture of yarn, cordage, twine, felt, woven and knitted fabrics, and lace-machine products, from cotton, jute, sisal, coir, maguey, silk, rayon, nylon, wool, or other vegetable, animal, or synthetic fibers, or from mixtures of these fibers; and the manufacture of blankets, textile bags, oil cloth and artificial leather, woven carpets and rugs, mattresses, quilts and pillows: *Provided, however,* That the definition shall not include the chemical manufacturing of synthetic fiber and such related processing of yarn as is conducted in establishments manufacturing synthetic fiber.

Industry Committee No. 19–C is composed of the following representatives:

For the public: Leo C. Brown, Chairman, St. Louis, Missouri; A. Cecil Snyder, San Juan, Puerto Rico; Herbert L. Sherman, Pittsburgh, Pennsylvania.

For the employers: Isadore A. Itkowitz, New York, New York; James R. Beverley, San Juan, Puerto Rico; Luis Benitez Carle, Manati, Puerto Rico.

For the employees: Hipolito Marcano, San Juan, Puerto Rico; John Chupka, East Douglas, Massachusetts; John Mara, Boston, Massachusetts.

For the purpose of this order the Shoe Manufacturing and Related Products Industry in Puerto Rico is defined as follows:

(a) The manufacture or partial manufacture of footwear from any material and by any process except knitting (including crocheting), vulcanizing of the entire article, or vulcanizing (as distinct from cementing) of the sole to the upper. The term "footwear" as used herein includes but without limitation: Athletic shoes, boots, boot tops, burial shoes, custom-made boots and shoes, moccasins, puttees (except spiral puttees), sandals, shoes completely rebuilt in a shoe factory, and slippers.

(b) The manufacture from leather or from any shoe upper material of all cut stock and findings for footwear, including bows, ornaments and trimmings: *Provided, however,* that the production of bows, ornaments and trimmings by a manufacturer not otherwise covered by this definition shall not be included.

(c) The manufacture of the following types of cut stock and findings for footwear from any material (except from rubber or composition of rubber, molded to shape): Outsoles, midsoles, insoles, taps, lifts, rands, toplifts, bases, shanks, boxtoes, counters, stays, stripping, sock linings, and heel pads.

(d) The manufacture of heels from any material except molded rubber, but not including the manufacture of wood-heel blocks.

(e) The manufacture of cut upper parts for footwear, including linings, vamps and quarters.

(f) The manufacture of pasted shoe stock.

(g) The manufacture of boot and shoe patterns.

Industry Committee No. 19–D is composed of the following representatives:

For the public: Leo C. Brown, Chairman, St. Louis, Missouri; A. Cecil Snyder, San Juan, Puerto Rico; Herbert L. Sherman, Pittsburgh, Pennsylvania.

For the employers: Isadore A. Itkowitz, New York, New York; James R. Beverley, San Juan, Puerto Rico; Luis Benitez Carle, Manati, Puerto Rico.

For the employees: Hipolito Marcano, San Juan, Puerto Rico; John Chupka, East Douglas, Massachusetts; John Mara, Boston, Massachusetts.

For the purpose of this order the Metal Hair Accessories Industry in Puerto Rico is defined as follows:

The metal hair accessories industry is defined to include the manufacture of metal bobby pins, metal hair clips, metal hair curlers, and metal hair wavers; but not including costume jewelry hair ornaments.

I hereby refer to each of the above mentioned industry committees the question of the minimum wage rates to be fixed under section 6 (c) of the act for its industry. Each such industry committee shall investigate conditions in its industry, and the committee, or any authorized subcommittee thereof, shall hear such witnesses and receive such evidence as may be necessary or appropriate to enable the committee to perform its duties and functions under the Act.

Industry Committee No. 19–A shall commence its hearing on January 9, 1956, at 2 p. m. in Room 412, New York Department Store Building, Stop 16½, Ponce de Leon Avenue, Santurce, Puerto Rico. Consecutively, at the same place, after the hearing of Industry Committee No. 19–A, Industry Committees Nos. 19–B, 19–C, and 19–D shall hold their hearings in that order.

Each committee will convene at the same place before its hearing to make its investigation and appropriate decisions concerning its hearing. Industry Committee No. 19–A will convene at 10 a. m. and Industry Committees Nos. 19–B, No. 19–C, and No. 19–D will convene at an hour to be designated by the committee chairman.

In order to reach as rapidly as is economically feasible the objective of the minimum wage prescribed in paragraph (1) of section 6 (a) of the act (75 cents an hour prior to March 1, 1956, and $1.00 an hour on and after March 1, 1956), each industry committee shall recommend to the Administrator the highest minimum wage rates for the industry which it determines, having due regard to economic and competitive conditions, will not substantially curtail employment in the industry and will not give any industry in Puerto Rico a competitive advantage over any industry in the United States outside of Puerto Rico. Where the industry committee finds that a higher minimum wage may be determined for employees engaged in certain activities or in the manufacture of certain products in the industry than may be determined for other employees in the industry, the industry committee shall recommend such reasonable classifications within the industry as it determines to be necessary for the purpose of fixing for each classification the highest minimum wage rate that can be determined for it under the principles set out herein which will not substantially curtail employment in such classification and will not give a competitive advantage to any group in the industry. No classification shall be made, however, and no minimum wage rate shall be fixed solely on a regional basis or on the basis of age or sex. In determining whether there should be classification within the industry, in making such classifications, and in determining the minimum wage rates for such classifications, the committee shall consider, among other relevant factors, the following: (1) Competitive conditions as affected by transportation, living and production costs; (2) the wages established for work of like or comparable character by collective labor agreements negotiated between employers and employees by representatives of their own choosing; and (3) the wages paid for work of a like or comparable character by employers who voluntarily maintain minimum wage standards in the industry.

The Administrator shall prepare an economic report containing such data as he is able to assemble pertinent to the matters to be referred to a committee. Copies of these reports may be obtained at the National and Puerto Rican Offices of the Department of Labor as soon as they are completed and prior to the hearing. Each committee will take official notice of the facts stated in the economic report to the extent they are not refuted by evidence received at the hearing.

The procedure of these industry committees will be governed by Title 29 of the Code of Federal Regulations, Part 511, as revised, and published in the November 4, 1955 issue of the FEDERAL REGISTER (20 F. R. 8285), which requires, among other things, notice of intent and other data to be filed at specified times before the hearing by those who would particpate either as witnesses or parties.

Signed at Washington, D. C., this 9th day of December 1955.

JAMES P. MITCHELL,
Secretary of Labor.

FEDERAL COMMUNICATIONS COMMISSION

[Docket Nos. 11284, 11285; FCC 55M-1025]

PACIFIC TELEPHONE AND TELEGRAPH CO. AND RADIOMARINE CORPORATION OF AMERICA

ORDER CONTINUING HEARING

In the matter of The Pacific Telephone and Telegraph Company, Docket No. 11284; Application for construction permit to add transmitter to existing station KOU (File No. 13412–F1–P–G) at San Pedro, California. Radiomarine Corporation of America, Docket No. 11285; Application for construction permit for new public class II–B coast station at San Diego, California (File No. 17229–F1–P–D).

The Hearing Examiner having under consideration a motion filed December 5, 1955, by Radiomarine Corporation of America, requesting that a pre-hearing conference in the above-styled matter be scheduled for December 19, 1955, in place of the hearing presently scheduled for that date, and a new hearing date subsequently be fixed by the Hearing Examiner;

It appearing that a pre-hearing conference has not yet been scheduled and the hearing would be more expeditiously conducted if a pre-hearing conference were held;

It further appearing that counsel for The Pacific Telephone and Telegraph Company, and for the Common Carrier Bureau and Safety and Special Radio Services Bureau have informally agreed to a waiver of the so-called "four-day" rule and have no objection to a grant of the motion;

It is ordered, This 7th day of December 1955, that the motion requesting that a pre-hearing conference in the above-styled matter be scheduled in place of the hearing presently scheduled for December 19th and a new hearing date subsequently fixed, be and it is hereby granted; and the hearing be and it is hereby continued to a date to be fixed at the pre-hearing conference;

It is further ordered, That all parties, or their attorneys, are directed to appear for a pre-hearing conference, pursuant to the provisions of section 1.813 of the rules, in Washington, D. C., at 10:00 a. m., December 19, 1955, for the purpose of considering the following matters:

(1) The necessity or desirability of simplification, clarification, amplification or limitation of the issues;

(2) Admissions of fact and of documents which will avoid unnecessary proof;

(3) The possibility of stipulating with respect to facts;

(4) Need, if any, for depositions;

(5) The order of offer of proof with relationship to docket number; and

(6) Such other matters as will be conducive to an orderly and expeditious conduct of the hearing.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

[Docket No. 11455, etc.; FCC 55M-1027]

ROBERT E. BOLLINGER ET AL.

ORDER FOR THE CONDUCT OF HEARING

DECEMBER 8, 1955.

In re applications of Robert E. Bollinger, Portland, Oregon, Docket No. 11455, File No. BP-9320; Mercury Broadcasting Co., Inc. (KLIQ) Portland, Oregon, Docket No. 11456, File No. BP-9400, and Docket No. 11457, File No. BR-2266; Albert L. Capstaff & H. Quenton Cox a partnership, d/b as Capstaff Broadcasting Co., Oreg. Ltd., Portland, Oregon, Docket No. 11458, File No. BP-9585; for construction permits and renewal of license.

Appearances. Charles V. Wayland and Ben C. Fisher, Washington, D. C., on behalf of Robert E. Bollinger; Howard J. Schellenberg, Jr., Washington, D. C., on behalf of Albert L. Capstaff and H. Quenton Cox, a partnership, d/b as Capstaff Broadcasting Co., Oreg. Ltd.; and Ray Paul, of behalf of the Chief, Broadcast Bureau, Federal Communications Commission.

1. A pre-hearing conference in the above-entitled proceeding was commenced September 22, 1955, adjourned on that date and reconvened on December 6, 1955. The pre-hearing conferences of September 22 and December 6 were held pursuant to written notice served upon all parties to the proceeding in accordance with the Commission's rules. At both hearing conferences, Robert E. Bollinger, Albert L. Capstaff and H. Quenton Cox, a partnership, d/b as Capstaff Broadcasting Co., Oreg. Ltd. and the Chief of the Broadcast Bureau were represented by counsel who entered appearances. No person representing Mercury Broadcasting Company, Inc. appeared pursuant to authority of the officers of that corporation at either the September 22 or the December 6, 1955, hearing conferences.

2. At the December 6, 1955, hearing conference, Thomas P. Kelly appeared and stated that at one time he had been president and controlling stockholder of Mercury Broadcasting Company, Inc.; that he had been improperly ousted from control; and was appearing in this proceeding on his own behalf and to assert his right as the one who should be recognized as being the proper owner of Mercury Broadcasting Company, Inc. It is not the purpose of a pre-hearing conference to resolve questions of ownership of stock and of physical properties in a sovereign state. These are matters which are reserved to the courts of the states wherein the properties are located.

3. It was disclosed that many, if not all, of the exhibits to be offered in evidence by the parties who had appeared and participated at the hearing conferences on September 22 and December 6 had been prepared and were ready for distribution. Counsel requested the Hearing Examiner to specify a date for the exchange of such exhibits and for the start of the evidentiary hearing. All parties present expressed agreement to the proposed procedure. In accordance with such agreement as well as other agreements reached on the record at the December 6, 1954, hearing conference, the following order will govern the subsequent conduct of this hearing.

4. All exhibits to be offered in evidence by any party to this proceeding in support of the affirmative case and in response to any and all issues shall be exchanged with opposing counsel on or before Thursday December 29, 1955.

5. The evidentiary hearing in this proceeding will begin on Monday, January 16, 1956. At this evidentiary hearing, all parties will offer in evidence all of the exhibits which they propose to offer in support of their affirmative cases.

6. It is the intent of the Hearing Examiner to receive in evidence at the hearing which will start on Monday, January 16, 1956, all exhibits offered by the applicants to which no objections are made as well as all exhibits which, after objections, are held to be legally admissible. The exhibits to which this paragraph refers are those which are to be offered in evidence on the affirmative cases of the applicants—those exhibits which are to be exchanged with other parties on or before December 29, 1955.

7. The exhibits exchanged on December 29, 1955, may be offered in evidence without the necessity of having an officer or member of the applicant present for such purpose. After the exhibits have been received, counsel for each applicant will identify the person or persons he wishes to call to present oral testimony to explain and discuss his exhibits. Counsel will also identify the witness or witnesses of the competing applicant he wishes to be made available for cross-examination.

It is so ordered, This the 8th day of December 1955.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

[Docket No. 11570; FCC 55-1207]

OREGON RADIO, INC.

ORDER DESIGNATING APPLICATION FOR HEARING ON STATED ISSUES

In re application of Oregon Radio, Inc., Salem, Oregon (KSLM-TV) Docket No. 11570, File No. BMPCT-1835; for modification of construction permit.

At a session of the Federal Communications Commission, held at its offices in Washington, D. C., on the 7th day of December 1955;

The Commission having under consideration (1) the above-entitled application requesting modification of construction permit (Channel 3, Salem, Oregon) to move transmitter site from a location 5.5 miles from Salem and 44 miles from Portland, Oregon, to a location 35.5 miles from Salem and 22.4 miles from Portland, to increase the height above average terrain from 970 feet to 1,470 feet, to increase visual effective radiated power from 5.5 kw to 100 kw, and to change transmitter and antenna; (2) oppositions to the above application filed by Empire Coil Company, Inc., permittee of television station KPTV, Channel 27, and Mount Hood Radio & Television Broadcasting Corporation, permittee of television station KOIN-TV, Channel 6, both located in Portland, Oregon; (3) the Commission's letter of November 24, 1954, sent to the above-named applicant pursuant to section 309 (b) of the Communications Act of 1934, as amended; and (4) the response to such letter, filed by the applicant on December 29, 1954; and

It appearing that in its letter to the applicant of November 24, 1954, the Commission notified the applicant of all objections to its application; that the Commission was unable to determine that a grant of said application would be in the public interest; and that the applicant was being afforded an opportunity to reply to the Commission's letter; and

It further appearing that upon due consideration of the above-entitled application, the Commission's letter of November 24, 1954, and the applicant's reply thereto of December 29, 1954, the Commission finds that it is unable to determine at this time that a grant of the above-entitled application would be in the public interest; that a hearing thereon is required; and that the applicant is legally, technically, financially and otherwise qualified to construct, own and operate the proposed station except with respect to the matters raised in the issues set forth below; and

It further appearing that Empire Coil Company, Inc., and Mount Hood Radio and Television Broadcasting Corporation have made their interests in the above-entitled application known to the Commission; and that Mount Hood has requested that the application be designated for hearing and that it be named a party therein;

It is ordered, That, pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-entitled application is designated for hearing to commence at 10:00 a. m. on the 23d day of January 1956, in Washington, D. C., upon the following issues:

(1) To determine, in light of the proposed move of transmitter site 35.5 miles from Salem and 22.4 miles from Portland, Oregon, whether the proposed operation is designed to serve the particular needs of Salem, Oregon, and its surrounding areas.

(2) To determine whether, on the basis of the evidence adduced with respect to the above issue, a grant of the above entitled application would serve the public interest, convenience and necessity.

It is further ordered, That Empire Coil Company, Inc., and Mount Hood Radio & Television Broadcasting Corporation are made parties herein.

Released: December 12, 1955.

FEDERAL COMMUNICATIONS COMMISSION,

Secretary.

[F. R. Doc. 55-10069; Filed, Dec. 14, 1955; 8:49 a. m.]

[Docket No. 11571, FCC 55-1215]

JOHNSONVILLE BROADCASTING CO.

ORDER DESIGNATING APPLICATION FOR HEARING ON STATED ISSUES

In re application of Dr. Alexander Leech and William E. Leech d/b as Johnsonville Broadcasting Company, New Johnsonville, Tennessee, Docket No. 11571, File No. BP-9810; for construction permit.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 7th day of December 1955;

The Commission having under consideration the above-entitled application of Dr. Alexander Leech and William E. Leech d/b as Johnsonville Broadcasting Company for a construction permit for a new standard broadcast station to operate on 1450 kilocycles with a power of 250 watts, unlimited time, at New Johnsonville, Tennessee;

It appearing that the applicant is legally, technically, financially and otherwise qualified, except as may appear from the issues specified below, to operate the proposed station, but that the proposed operation may involve interference with Stations WPAD, Paducah, Kentucky, (1450 kc, 250 w, U); and WDHM, McKenzie, Tennessee (1440 kc, 500 w, Day); and that it has not been determined whether the proposed operation will provide satisfactory service to the city of New Johnsonville due to the lack of information regarding the business and industrial areas or city boundaries of that city; and

It further appearing that, pursuant to section 309 (b) of the Communications Act of 1934, as amended, the subject applicant was advised by letter dated August 24, 1955, of the aforementioned deficiencies and that the Commission was unable to conclude that a grant of the application would be in the public interest; and

It further appearing that in a letter dated November 10, 1955, the applicant stated that New Johnsonville is the site of the new Tennessee Valley Authority steam generating plant and that the city has been incorporated so that the improvements necessary in the way of residential and commercial construction will be subject to municipal planning and zoning laws and that New Johnsonville is located ten miles east of Camden, Tennessee, and ten miles west of Waverly, Tennessee, and that the proposed site was selected midway between these two cities so as to provide a local service for both Camden and Waverly (population 2,029 and 1,892, respectively); and

It further appearing that the proposed operation would provide a signal of only 1.5 mv/m, approximately, to either Camden or Waverly; and

It further appearing that in a letter dated October 15, 1955, Station WPAD requested that the subject application be designated for hearing and stated that it would appear and participate; and

It further appearing that the Commission, after consideration of these letters, is of the opinion that a hearing is necessary;

It is ordered, That, pursuant to section 309 (b) of the Communications Act of 1934, as amended, the said application is designated for hearing, at a time and place to be specified in a subsequent order, upon the following issues:

1. To determine the areas and populations which would receive primary service from the proposed operation, and the availability of other primary service to such areas and populations.

2. To determine whether the proposed operation would involve objectionable interference with Stations WPAD, Paducah, Kentucky; and WHDM, McKenzie, Tennessee, or any other existing stations, and, if so, the nature and extent thereof, the areas and populations affected thereby, and the availability of other primary service to such areas and populations.

3. To determine whether the proposed installation and operation would be in compliance with the Commission's Rules and Standards of Good Engineering Practice with particular reference to providing adequate coverage of the city sought to be served.

4. To determine, in the light of the evidence adduced pursuant to the foregoing issues, if a grant of the subject application would serve the public interest, convenience and necessity.

It is further ordered, That Paducah Broadcasting Company, Inc., licensee of Station WPAD, and Tri-County Broadcasting Company, licensee of Station WHDM, are made parties to the proceeding.

Released: December 12, 1955.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

[F. R. Doc. 55-10070; Filed, Dec. 14, 1955; 8:49 a. m.]

FEDERAL POWER COMMISSION

[Docket No. G-2399 etc.]

NORTHERN NATURAL GAS CO.

NOTICE OF APPLICATION, ORDER OF CONSOLIDATION AND FIXING DATE OF HEARING

Take notice that Northern Natural Gas Company (Northern), a Delaware corporation having its principal place of business at 2223 Dodge Street, Omaha, Nebraska, filed on September 12, 1955, an application entitled "Supplement to Application" in Docket Nos. G-2399, G-2458, G-2465, G-4259, G-4260, and G-4261. This "Supplement to Application" is by Rule 1.11 (a) of the Commission's rules of practice and procedure, an amendment to the aforesaid applications. The applications as now amended request a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act authorizing the construction and operation of certain transmission pipeline facilities.

Northern now proposes in the aforesaid Dockets, by this amendment, to construct additions to its present facilities of approximately 654 miles of main and branch pipe lines and additions of 12,640 horsepower to six compressor stations. These additions will enable Northern to increase its system sales capacity by 93,789 Mcf of gas per day of which 36,804 will be delivered to communities presently served; 22,581 Mcf to the Duluth-Superior area including initial service to the following cities and towns in Minnesota: Duluth, Stillwater, Baypoint, Oak Park, White Bear Lake, Birchwood, Dellwood, Mahtomedi, Willernie, Coon Rapids, Anoka, Champlin, Elk River, North Branch, Harris, Rush City, Pine City, Hinckley, Sandstone, Moose Lake, Cloquet, and Proctor, and the following cities and towns in Wisconsin: Superior, Hudson, and North Hudson; 15,028 Mcf to the following cities and towns in South Dakota: Aberdeen, Hartford, Montrose, Salem, Spencer, Alexandria, Mitchell, Madison, Romona, Arlington, Volga, Brookings, Lake Preston, De Smet, Huron, Willow Lake, Vienna, Watertown, Raymond, and Turton; 12,000 Mcf to Allied Chemical and Dye Corporation's La Platte, Nebraska, plant; and 7,376 Mcf for initial service to Kellogg,

Story City, Grundy Center, Hudson, Independence, Manchester, Dyersville and Rockford, all in Iowa, and Winona, Minnesota. Northern's proposed tariff for Zone B (the proposed Duluth-Superior line) provides a base rate of a monthly demand charge of $3.30 per month per Mcf of contract demand and a commodity charge of 22.1 cents per Mcf of firm gas delivered, and also a rate of 22.1 cents per Mcf of gas delivered is provided for interruptible service. The rate to be charged for service off the proposed Aberdeen line will be in accordance with Northern's present Rate Schedules CD–3 and R–3. The estimated cost of the facilities is $27,084,500 to be financed out of cash on hand, the issuance of bonds, preferred and common stock.

On September 12, 1955, Northern filed in Docket No. G–2460 an amendment to its application filed on May 2, 1955, for an amended order in said docket, on which a hearing was convened on July 13, 1955, and recessed on Northern's own motion. The amended application of September 12, 1955, came on for hearing on November 28, 1955, and on November 29, 1955, at the conclusion of Northern's presentation of evidence, the Presiding Examiner, on motion, recessed the hearing and referred said proceeding to the Commission for possible consolidation with Northern's pending amending application in Docket Nos. G–2399, G–2458, G–2465, G–4259, G–4260 and G–4261.

The Commission finds:

(1) The amended application filed on September 12, 1955, in Docket No. G–2460 is dependent upon the aforesaid amending application filed in Docket Nos. G–2399, G–2458, G–2465, G–4259, G–4260 and G–4261, and should be consolidated for hearing therewith.

(2) Interested persons in the aforesaid proposed service should be given further opportunity to be heard.

The Commission orders: (A) The proceeding in Docket No. G–2460 be and the same hereby is consolidated for hearing with the proceeding in Docket Nos. G–2399, G–2458, G–2465, G–4259, G–4260 and G–4261.

(B) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing be held on January 23, 1956, at 10:00 a.m., e. s. t., in a hearing room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by the above-entitled dockets.

(C) Further protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 3, 1956.

Adopted: December 7, 1955.

Issued: December 9, 1955.

By the Commission.

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 55–10058; Filed, Dec. 14, 1955; 8:47 a. m.]

[Docket No. G–8729]

P. R. RUTHERFORD

NOTICE OF APPLICATION AND DATE OF HEARING

DECEMBER 8, 1955.

Take notice that P. R. Rutherford (Applicant), an individual whose address is 1041 Esperson Building, Houston 2, Texas, filed on April 6, 1955, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant proposes to sell natural gas which is produced from the Greta Field, Refugio County, Texas at 7.217976 cents per Mcf to Transcontinental Gas Pipe Line Corporation for transportation in interstate commerce for resale.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on January 11, 1956, at 9:30 a. m., e. s. t., in a hearing room of the Federal Power Commission, 441 G. Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of section 1.30 (c) (1) or (c) (2) of the Commission's rules of practice and procedure. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before December 28, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 55–10059; Filed, Dec. 14, 1955; 8:47 a. m.]

[Docket No. G–1705, etc.]

PANHANDLE EASTERN PIPE LINE CO.

NOTICE OF ORDER

DECEMBER 9, 1955.

In the matters of Panhandle Eastern Pipe Line Company, Docket Nos. G–1705, G–1937, G–2433, G–2475, G–8665; Missouri Public Service Company, Docket No. G–2057; City of Montgomery, Missouri, Docket No. G–2932; Town Gas Company of Illinois, Docket No. G–3158; Missouri Central Natural Gas Company, Docket No. G–4611; Village of Westville, Illinois, Docket No. G–4666; Village of Pleasant Hill, Illinois, Docket No. G–4940; City of Waverly, Illinois, Docket No. G–5139; Village of Rossville, Illinois, Docket No. G–5979; Central Illinois Electric & Gas Company, Docket No. G–8428; City of Winchester, Illinois, Docket No. G–8431; Village of Franklin, Illinois, Docket No. G–8471; City of Hickman, Kentucky, Docket No. G–8526; Trunkline Gas Company, Docket No. G–8664; City of McLeansboro, Illinois, Docket No. G–8676; City of Vienna, Illinois, Docket No. G–8677; City of Clinton, Kentucky, Docket No. G–8771; City of LaCenter, Kentucky, Docket No. G–8888; City of Bardwell, Kentucky, Docket No. G–8939; City of Wickliffe, Kentucky, Docket No. G–8962; Lake County Utility District, Docket No. G–8963.

Notice is hereby given that on November 29, 1955, the Federal Power Commission issued its order adopted November 23, 1955, issuing temporary certificate of public convenience and necessity, permitting temporary tariff changes, and accepting service agreements in the above-entitled matters.

UNIVERSITY OF MICHIGAN
DEC 22 1955
MAIN READING ROOM

THE NATIONAL ARCHIVES 1934

FEDERAL REGISTER

VOLUME 20 NUMBER 244

Washington, Friday, December 16, 1955

TITLE 29—LABOR

Chapter V—Wage and Hour Division, Department of Labor

PART 700—CLAY AND CLAY PRODUCTS INDUSTRY IN PUERTO RICO

WAGE ORDER GIVING EFFECT TO RECOMMENDATIONS

On October 21, 1955, pursuant to section 5 of the Fair Labor Standards Act of 1938 (52 Stat. 1060, as amended; 29 U. S. C. 201 et seq.) (hereinafter called the Act), the Secretary of Labor by Administrative Order No. 449 (20 F. R. 7951) directed Special Industry Committee No. 18–A (hereinafter called the Committee) to recommend the minimum rate or rates of wages to be paid under section 6 of the Act to employees in Puerto Rico engaged in commerce or in the production of goods for commerce in the Clay and Clay Products Industry in Puerto Rico.

Subsequent to an investigation and hearing, conducted pursuant to notice published in the October 21, 1955, issue of the FEDERAL REGISTER (20 F. R. 7951), the Committee filed with the Secretary a report containing its findings of fact and recommendations with respect to the matters referred to it. In this report the Committee divided the Clay and Clay Products Industry in Puerto Rico into three separate classifications, for each of which it made separate recommendations. Accordingly, as authorized and required by section 8 of the Act and General Order No. 45–A of the Secretary—(1) these recommendations are hereby published in the following amendments to the Code of Federal Regulations; and (2) effective December 31, 1955, Part 700 of Title 29, is amended to read as follows:

Sec.
700.1 Definition of the industry.
700.2 Wage rates.
700.3 Application and notice.

AUTHORITY: §§ 700.1 to 700.3 issued under sec. 8, 52 Stat. 1064, as amended; 29 U. S. C. 208. Interpret or apply sec. 5, 52 Stat. 1062, as amended; 29 U. S. C. 205.

§ 700.1 *Definition of the industry.* The clay and clay products industry in Puerto Rico, to which this part shall apply, is defined as follows: The quarrying or other extraction of common clay, shale, kaolin, ball clay, fire clay and other types of clay; and the manufacture of structural clay products, china, pottery, tile, and other ceramic products and refractories.

§ 700.2 *Wage rates.* (a) Wages at a rate of not less than 46 cents an hour shall be paid in the vitreous and semi-vitreous china food utensils classification of the clay and clay products industry in Puerto Rico, and this classification shall be defined as the manufacture of semi-vitreous and vitreous china table and kitchen articles for use in households and hotels, restaurants and other commercial institutions for preparing, serving or storing food or drink, except that the classification does not include products included in the hand-made art pottery classification.

(b) Wages at a rate of not less than 30 cents an hour shall be paid in the hand-made art pottery classification of the clay and clay products industry in Puerto Rico, and this classification shall be defined as the manufacture of hand-made art pottery.

(c) Wages at a rate of not less than 75 cents an hour shall be paid in the structural clay and miscellaneous clay products classification of the clay and clay products industry in Puerto Rico, and this classification shall be defined as the manufacture of structural clay products, sanitary ware, and all other products included in the clay and clay products industry, as defined in § 700.1, except those included in the vitreous and semi-vitreous china food utensils classification and the hand-made art pottery classification, as those classifications are defined in this section.

§ 700.3 *Application and notice.* (a) Wages of not less than the hourly wage rates specified in § 700.2 shall be paid under section 6 of the Fair Labor Standards Act of 1938 by every employer to each of his employees who is engaged in commerce or in the production of goods for commerce in the clay and clay products industry in Puerto Rico.

FEDERAL REGISTER

Published daily, except Sundays, Mondays, and days following official Federal holidays, by the Federal Register Division, National Archives and Records Service, General Services Administration, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U. S. C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President. Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15 cents) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, directly to the Government Printing Office, Washington 25, D. C.

The regulatory material appearing herein is keyed to the CODE OF FEDERAL REGULATIONS, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended August 5, 1953. The CODE OF FEDERAL REGULATIONS is sold by the Superintendent of Documents. Prices of books and pocket supplements vary.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER, or the CODE OF FEDERAL REGULATIONS.

TITLE 14—CIVIL AVIATION

Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 173]

PART 609—STANDARD INSTRUMENT APPROACH PROCEDURES

PROCEDURE ALTERATIONS

The standard instrument approach procedure alterations appearing hereinafter are adopted to become effective when indicated in order to promote safety. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to the public interest, and therefore is not required.

Part 609 is amended as follows:

NOTE: Where the general classification (LFR, VAR, ADF, ILS, GCA, or VOR), location, and procedure number (if any) of any procedure in the amendments which follow, are identical with an existing procedure, that procedure is to be substituted for the existing one, as of the effective date given, to the extent that it differs from the existing procedure; where a procedure is canceled, the existing procedure is revoked; new procedures are to be placed in appropriate alphabetical sequence within the section amended.

1. The low frequency range procedures prescribed in § 609.6 are amended to read in part:

LFR STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, and courses are magnetic. Distances are in statute miles unless otherwise indicated. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation.
If an LFR instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure authorized by the Administrator for Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below.

City and State; airport name, elevation; facility; class and identification; procedure No.; effective date	Initial approach to facility from—	Course and distance (feet)	Minimum altitude (ft.)	Procedure turn (—), side of final approach course, maximum distance (nautical miles) inbound; altitudes; limiting distances	Ceiling and visibility minimums: Condition	Ceiling and visibility minimums: Type aircraft: 75 m. p. h. or less	Ceiling and visibility minimums: Type aircraft: More than 75 m. p. h.	If visual contact not established at authorized landing minimums after passing facility within distance specified, or if landing not accomplished

TITLE 5—ADMINISTRATIVE PERSONNEL

Chapter I—Civil Service Commission

PART 38—MOTOR VEHICLE OPERATOR REGULATIONS

Effective March 15, 1956, a new Part 38 is added, as set out below.

Subpart A—General Provisions

Sec.
38.101 Purpose.
38.102 Definitions.
38.103 Coverage.
38.104 Reports required.

Subpart B—United States Government Motor Vehicle Operators' Identification Card

38.201 Identification Card.
38.202 To whom issued.
38.203 Contents of Identification Card.
38.204 Identification Card in possession.
38.205 Renewal of Identification Cards.

Subpart C—Qualifications, Requirements and Procedures

38.301 Competitive Operator positions.
38.302 Appointment in absence of registers, and noncompetitive actions.
38.303 Details.
38.304 Excepted Operator positions.
38.305 Incidental Operators.
38.306 Commission standards and procedures required.

Subpart D—Adverse Actions

38.401 Adverse actions.

Subpart E—Agency Responsibility for Periodic Testing of Physical Fitness and Issuance of Necessary Directives

38.501 Periodic physical testing.
38.502 Agency orders and directives.

AUTHORITY: §§ 38.101 through 38.602 issued under R. S. 1753, sec. 2, 22 Stat. 403, as amended, sec. 211, 64 Stat. 583, sec. 2, 68 Stat. 1126; 5 U. S. C. 631, 633, 40 U. S. C. 491.

SUBPART A—GENERAL PROVISIONS

§ 38.101 *Purpose.* The purpose of the regulations in this part is to govern executive agencies in authorizing civilian personnel to operate Government-owned motor vehicles for official purposes within the continental United States, its Territories, and possessions.

§ 38.102 *Definitions.* As used in this part, the term (a) "Act" means subsection (j) of section 211 of the Federal Property and Administrative Service Act of 1949, as amended.

(b) "Employee" means any civilian employee or civilian officer in the Executive Branch of the Federal Government both within the competitive and excepted services.

(c) "Operator" means any employee of the Federal Government, whose status regularly requires the operation of motor vehicles. This includes chauffeurs, mounted messengers, truck-drivers, garagemen-drivers, and guard-drivers.

(d) "Incidental Operator" means any employee in other than an operator position who is required to operate a motor vehicle in order properly to carry out his assigned duties.

(e) "Agency" means any department, independent establishment or other unit of the Executive Branch of the Federal Government, including a wholly owned Government corporation, in the continental United States and its Territories and possessions.

(f) "State License" means a driver's license of the State, District of Columbia, Territory, or possession, in which the employee is domiciled or principally employed for operation of the type of Government vehicle he is to use.

(g) "Identification Card" means the United States Government Motor Vehicle Operator's Identification Card, Standard Form 46, which specifies the types of Government-owned vehicles the holder is authorized to operate.

(h) "Practical Road Test" means the Commission's Test No. 347.

(i) "Federal medical officer, designated Federal medical examiner and duly licensed physician" shall have the meanings as defined in Chapter M–1, Federal Personnel Manual.

§ 38.103 *Coverage.* The regulations in this part shall govern all agencies in authorizing their employees to operate Government-owned vehicles for official purposes.

§ 38.104 *Reports required.* Agencies shall submit to the Commission, upon request, (a) a statement of the steps taken to institute this program, (b) a copy of agency orders and directives issued in compliance with these regulations of these regulations may be continued tions, and (c) such other reports as the Commission may require for adequate administration and evaluation of this program.

SUBPART B—UNITED STATES GOVERNMENT MOTOR VEHICLE OPERATORS' IDENTIFICATION CARD

§ 38.201 *Identification Card.* An employee who operates a Government-owned motor vehicle shall have an Identification Card issued in accordance with these regulations: *Provided,* That an agency's credentials issued to motor vehicle drivers prior to the effective date until the date of expiration thereof, but in no event beyond three years after the effective date of the regulations in this part.

§ 38.202 *To whom issued.* Identification Cards shall be issued to employees who qualify for and are assigned to Operator positions; employees who qualify as Incidental Operators; and other employees in accordance with the requirements for Incidental Operators in § 38.305: *Provided,* That Identification Cards may be issued without regard to the requirements in § 38.301:

(a) To employees in Operator positions under temporary employment or detail not exceeding one month.

(b) For one month or less to appointees to Operator positions in order to permit completion of special testing approved by the Commission in a particular selection program.

(c) For one month or less to other employees who may be taking training to satisfy requirements as Operators or Incidental Operators or under such circumstances as in the judgment of the agency may be necessary in the interests of the Government.

(d) To temporary emergency appointees.

Identification Cards issued under the authority of this proviso must clearly indicate the time restriction imposed and will be issued only to employees who are in possession of a valid State license.

§ 38.203 *Contents of Identification Card.* (a) Identification Cards must specifically include the following:

(1) Each type of motor vehicle authorized to be operated by the Identification Card holder.

(2) Any restrictions imposed upon the holder.

(3) Date of expiration.

(b) Agencies may utilize the "Other Records" space on the Identification Card for relevant data such as awards for safe driving and records of arrests.

§ 38.204 *Identification Card in possession.* (a) An Identification Card must be in the Operator's possession at all times while driving a Government-owned motor vehicle.

(b) The Commission may grant exceptions to the requirement for possession of an Identification Card while driving.

(c) The Identification Card must be surrendered when the operator leaves the issuing agency or moves to a position in which no driving is necessary.

§ 38.205 *Renewal of Identification Cards.* Identification Cards shall be valid for not more than three years, and shall be renewable for additional periods of not more than three years.

SUBPART C—QUALIFICATIONS, REQUIREMENTS AND PROCEDURES

§ 38.301 *Competitive Operator positions.* Competitive Motor-Vehicle Operator positions may be filled by any of the methods normally authorized for filling competitive positions. The experience and training requirements for such positions shall include an experience requirement, a safe driving record, a Practical Road Test, and a valid State license. As modifications of the general requirements for each type of appointment the special requirements in § 38.302 apply to Operator positions.

§ 38.302 *Appointment in absence of registers, and noncompetitive actions.* The Commission may, upon agency request, waive the Practical Road Test requirement where qualified examiners or test facilities are not available in the area in: (a) Authorizing agencies to fill positions by appointment in absence of registers, (b) reinstatement and noncompetitive job appointments, and (c) filling positions by position change and transfer.

§ 38.303 *Details.* An employee may be detailed to a Competitive Operator position for 30 days or less provided that he possesses a valid State license. For details exceeding 30 days, the employee must meet the Commission's requirements applicable to Position Change and Transfer.

§ 38.304 *Excepted Operator positions.* In filling Excepted Operator positions

agencies shall use the standards in §§ 38.301 and 38.302 which apply to the filling of Competitive Operator positions by appointment procedures of like nature.

§ 38.305 *Incidental Operators.* To qualify as an Incidental Operator in either the excepted or competitive service, an employee must meet the physical standards established by the Commission; he must qualify on a road test; and he must be in possession of a valid State license. Agency heads or their designated representatives may waive the road test, when, in their opinion, it is impractical to apply it, if the employee's competence as an operator has been established by his past driving record.

§ 38.306 *Commission standards and procedures required.* Agencies must adopt and utilize the Commission's minimum standards and testing procedures unless the Commission authorizes, upon agency request, the use of alternate standards and procedures which will meet the objectives of this program.

SUBPART D—ADVERSE ACTIONS

§ 38.401 *Adverse actions.* Adverse actions against Operators and Incidental Operators shall be in accordance with applicable laws and regulations. Agency orders and directives shall include the following grounds among those constituting sufficient cause for adverse actions against Operators and Incidental Operators:

(a) The employee is convicted of operating under the influence of narcotics.

(b) The employee is convicted of leaving the scene of an accident without making himself known.

(c) A Federal medical officer finds the employee fails to meet the required physical standards.

(d) The employee's State license is revoked.

(e) The employee's State license is suspended. However, the agency may continue the employee in his position for not to exceed forty-five (45) days from the date of suspension of the State license, for operation on other than public highways.

SUBPART E—AGENCY RESPONSIBILITY FOR PERIODIC TESTING OF PHYSICAL FITNESS AND ISSUANCE OF NECESSARY DIRECTIVES

§ 38.501 *Periodic physical testing.* At least once every three years each agency shall provide for testing the physical fitness of all employees who operate motor vehicles in accordance with standards and procedures established by the Commission.

§ 38.502 *Agency orders and directives.* Agencies are responsible for issuing such orders and directives as will comply with this part.

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] WM. C. HULL,
Executive Assistant.

TITLE 7—AGRICULTURE

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

[Grapefruit Reg. 105]

PART 955—GRAPEFRUIT GROWN IN ARIZONA; IN IMPERIAL COUNTY, CALIFORNIA, AND IN THAT PART OF RIVERSIDE COUNTY, CALIFORNIA, SITUATED SOUTH AND EAST OF THE SAN GORGONIO PASS

LIMITATION OF SHIPMENTS

§ 955.366 *Grapefruit Regulation 105*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 55, as amended (7 CFR Part 955), regulating the handling of grapefruit grown in the State of Arizona; in Imperial County, California, and in that part of Riverside County, California, situated south and east of the San Gorgonio Pass, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendations of the Administrative Committee (established under the aforesaid amended marketing agreement and order), and upon other available information, it is hereby found that the limitation of shipments of grapefruit, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than December 18, 1955. Shipments of grapefruit, grown as aforesaid, have been subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order, since October 9, 1955, and will so continue until December 18, 1955; the recommendation and supporting information for continued regulation subsequent to December 17, 1955, were promptly submitted to the Department after an open meeting of the Administrative Committee on December 8; such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including the effective time thereof, are identical with the aforesaid recommendation of the committee and information concerning such provisions and effective time has been disseminated among handlers of such grapefruit; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of grapefruit; compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time thereof.

(b) *Order.* (1) During the period beginning at 12:01 a. m., P. s. t., December 18, 1955, and ending at 12:01 a. m., P. s. t., January 22, 1956, no handler shall ship:

(i) Any grapefruit of any variety grown in the State of Arizona; in Imperial County, California; or in that part of Riverside County, California, situated south and east of the San Gorgonio Pass unless such grapefruit are at least fairly well colored, and otherwise grade at least U. S. No. 2; or

(ii) From the State of California or the State of Arizona (a) to any point outside thereof in the United States, any grapefruit, grown as aforesaid, which are of a size smaller than $3\frac{11}{16}$ inches in diameter, or (b) to any point in Canada, any grapefruit, grown as aforesaid, which are of a size smaller than $3\frac{9}{16}$ inches in diameter ("diameter" in each case to be measured midway at a right angle to a straight line running from the stem to the blossom end of the fruit), except that a tolerance of 5 percent, by count, of grapefruit smaller than the foregoing minimum sizes shall be permitted which tolerance shall be applied in accordance with the provisions for the application of tolerance, specified in the revised United States Standards for Grapefruit (California and Arizona), §§ 51.925 to 51.955 of this title: *Provided,* That, in determining the percentage of grapefruit in any lot which are smaller than $3\frac{11}{16}$ inches in diameter, such percentage shall be based only on the grapefruit in such lot which are of a size $4\frac{2}{16}$ inches in

diameter and smaller; and in determining the percentage of grapefruit in any lot which are smaller than 3$^{9}/_{16}$ inches in diameter, such percentage shall be based only on the grapefruit in such lot which are of a size 3$^{13}/_{16}$ inches in diameter and smaller.

(2) As used in this section, "handler," "variety," "grapefruit," and "ship" shall have the same meaning as when used in said amended marketing agreement and order; and the terms "U. S. No. 2" and "fairly well colored" shall each have the same meaning as when used in the revised United States Standards for Grapefruit (California and Arizona), §§ 51.925 to 51.955 of this title.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: December 13, 1955.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[F. R. Doc. 55–10094; Filed, Dec. 15, 1955; 8:48 a. m.]

PART 1002—MILK IN GREATER WHEELING, W. VA., MARKETING AREA

ORDER SUSPENDING CERTAIN PROVISIONS

Correction

In Federal Register Document 55–9117, published on page 8453 in the issue for Friday, November 11, 1955, the date "July 31, 1955", appearing at the end of the final paragraph, should read "July 31, 1956".

(Sec. 6, 38 Stat. 721; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended, sec. 8, 65 Stat. 179; 15 U. S. C. 45, 69f) [Cease and desist order, Stanley Martin et al., trading as Martin-Balut Fur Factory, Wilkes-Barre, Pa., D. 6379, December 1, 1955]

In the Matter of Stanley Martin, and Stephen Balut, Individuals and as Copartners, Trading as Martin-Balut Fur Factory

This proceeding was heard by John Lewis, hearing examiner, upon the complaint of the Commission—which charged respondent fur dealers with failing to comply with the labeling requirements of the Fur Products Labeling Act; and with disseminating false advertising in newspapers, etc., which failed to disclose the names of the animals producing the fur and other information required by the act, misrepresented selling prices and savings possible to purchasers, and represented fur products falsely as being from the stock of a liquidating business—and an agreement between the parties providing for the entry of a consent order in accordance with the Commission's rules of practice.

Upon this basis, the hearing examiner made his initial decision and order to cease and desist which, by the Commission's order of December 1, 1955, became the "Decision of the Commission".

The order to cease and desist is as follows:

It is ordered, That respondents Stanley Martin, and Stephen Balut, individuals and as copartners, trading as Martin-Balut Fur Factory, and respondents' representatives, agents and employees, directly or through any corporate or other device, in connection with the introduction into commerce, or the sale, advertising, or offering for sale in commerce, or the transportation or distribution in commerce, of fur products, or in connection with the sale, advertising, offering for sale, transportation, or distribution of fur products which have been made in whole or in part of fur which has been shipped and received in commerce, as "commerce," "fur," and "fur products" are defined in the Fur Products Labeling Act, do forthwith cease and desist from:

A. Misbranding fur products by:

1. Falsely or deceptively labeling or otherwise identifying any such product as to the name or names of the animal or animals that produced the fur from which such product was manufactured;

2. Failing to affix labels to fur products showing:

a. The name or names of the animal or animals producing the fur or furs contained in the fur product as set forth in the Fur Products Name Guide and as prescribed under the rules and regulations;

b. That the fur product contains or is composed of used fur when such is a fact;

c. That the fur product contains or is composed of bleached, dyed, or artificially colored fur when such is a fact;

d. That the fur product is composed in whole or in substantial part of paws, tails, bellies or waste fur when such is a fact;

e. The name, or other identification issued and registered by the Commission, of one or more persons who manufactured such fur product for introduction into commerce, introduced it into commerce, sold it in commerce, advertised or offered it for sale in commerce, or transported or distributed it in commerce;

f. The name of the country of origin of any imported furs used in the fur product.

3. Setting forth, on labels attached to fur products, the name or names of any animal or animals other than the name or names provided for in paragraph A (2) (a) above.

4. Setting forth on labels attached to fur products:

a. Non-required information mingled with required information;

b. Required information in handwriting.

B. Falsely or deceptively advertising fur products, through the use of any advertisement, representation, public announcement, or notice which is intended to aid, promote or assist, directly or indirectly, in the sale or offering for sale of fur products, and which:

1. Fails to disclose:

a. The name or names of the animal or animals producing the fur or furs contained in the fur products as set forth in the Fur Products Name Guide and as prescribed under the rules and regulations;

b. That the fur products contain or are composed of bleached, dyed, or otherwise artificially colored fur when such is a fact;

2. Represents directly or by implication:

a. That the regular or usual price of any fur product is any amount which is in excess of the price at which the respondents have usually and customarily sold such products in the recent regular course of their business;

b. That a sale price enables purchasers of fur products to effectuate any savings in excess of the difference between the said price and the price at which comparable products were sold during the time specified or, if no time is specified, in excess of the difference between said price and the current price at which comparable products are sold;

c. The value of fur products when such claims or representations are not true in fact;

d. That any such products are from the stock of a business in a state of liquidation contrary to fact.

By said "Decision of the Commission", report of compliance was required as follows:

It is ordered, That the respondents herein shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with the order to cease and desist.

Issued: December 1, 1955.

By the Commission.

[SEAL] ROBERT M. PARRISH,
Secretary.

[Docket 6404]

PART 13—DIGEST OF CEASE AND DESIST ORDERS

MAYFLOWER TELEVISION CO., INC., ET AL.

Subpart—*Advertising falsely or misleadingly:* § 13.15 *Business status, advantages, or connections:* Qualifications and abilities; § 13.155 *Prices;* § 13.225 *Servicing.* Subpart—*Misrepresenting oneself and goods*—Services: § 13.1837 *Cost;* § 13.1838 *Terms and conditions.* Subpart—*Offering unfair, improper and deceptive inducements to purchase or deal:* § 13.2080 *Terms and conditions.*

(Sec. 6, 38 Stat. 721; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 45) [Cease and desist order, Mayflower Television Company, Inc., et al., Washington, D. C., Docket 6404, December 1, 1955]

In the Matter of Mayflower Television Company, Inc., a Corporation, and Raymond H. Bente, Lowell Ewing, and Lillian Turner, Individually and as Officers of Said Corporation

This proceeding was heard by Everett F. Haycraft, hearing examiner, upon the complaint of the Commision—which charged a corporation and its officers with representing falsely, by advertisements on television and in newspapers and otherwise, that their service charge for servicing and repairing a television set was $1.00 or $1.50; that only parts needed would be replaced and that when parts were replaced, no service charge would be made; that their service men were experts in servicing and repairing; and that nine times out of ten a television set could be repaired in the home—and an agreement between the parties providing for the entry of a consent order.

Upon this basis, the hearing examiner made his initial decision and order to cease and desist, which by the Commission's order of December 1, 1955, became the "Decision of the Commission".

The cease and desist order is as follows:

It is ordered, That respondent Mayflower Television Company, Inc., a corporation, and its officers, and Raymond H. Bente, individually and as an officer of said corporation, and respondents' representatives, agents and employees, directly or through any corporate or other device, in connection with the offering for sale, sale and distribution of replacement parts for television sets and other merchandise, or repair services in connection therewith, in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from representing, directly or by implication:

1. That the charge for servicing or repairing is $1.00 or $1.50 or any amount which is not in accordance with the facts.

2. That only parts which are needed will be replaced unless such is the fact.

3. That in case parts are replaced no service charge will be made.

4. That their servicemen are experts in servicing and repairing.

5. That repairs can or will be made in the home in any specific number of cases which is contrary to the fact.

It is further ordered, That the complaint be, and the same hereby is, dismissed without prejudice as to respondents Lowell Ewing and Lillian Turner as individuals.

By said "Decision of the Commission", report of compliance was required as follows:

It is ordered, That respondent Mayflower Television Company, Inc., a corporation, and Raymond H. Bente, individually and as an officer of said corporation, shall within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with the order to cease and desist.

Issued: December 1, 1955.

By the Commission.

[SEAL] ROBERT M. PARRISH,
Secretary.

[F. R. Doc. 55–10098; Filed, Dec. 15, 1955; 8:49 a. m.]

[Docket 6422]

PART 13—DIGEST OF CEASE AND DESIST ORDERS

JAY GEE FABRICS, INC., ET AL.

Subpart—*Advertising falsely or misleadingly:* § 13.30 *Composition of goods:* Wool Products Labeling Act.[1] Subpart—*Misbranding or mislabeling:* § 13.1190 *Composition:* Wool Products Labeling Act;[2] § 13.1325 *Source or origin:* Maker or seller, etc.: *Wool Products Labeling Act.* Subpart—*Neglecting, unfairly or deceptively, to make material disclosure:* § 13.1845 *Composition:* Wool Products Labeling Act; § 13.1900 *Source or origin:* Wool Products Labeling Act.

(Sec. 6, 38 Stat. 721; 15 U. S. C. 46. Interpret or apply secs. 2–5, 54 Stat. 1128–1130; 15 U. S. C. 45, 68–68c) [Cease and desist order, Jay Gee Fabrics, Inc., et al., New York, N. Y., Docket 6422, December 1, 1955]

In the Matter of Jay Gee Fabrics, Inc., a Corporation; and Jack Grodowitz, Individually and as an Officer of Said Corporation

This proceeding was heard by Abner E. Lipscomb, hearing examiner, upon the complaint of the Commission—which charged a corporation and its officer with falsely labeling bolts of fabric which contained substantial amounts of miscellaneous fur fibers other than guanaco as "70% Guanaco Fur, 30% Virgin Wool" and as "50% Cashmere, 50% Guanaco", and with failing to label such wool products as required by the Wool Products Labeling Act—and an agreement between the parties providing for the entry of a consent order.

Upon this basis, the hearing examiner made his initial decision and order to cease and desist which, by the Commission's order of December 1, 1955, became the "Decision of the Commission".

The order to cease and desist is as follows:

It is ordered, That the respondent, Jay Gee Fabrics, Inc., a corporation, and its officers, and respondent Jack Grodowitz, individually and as an officer of said corporation, and respondents' respective representatives, agents and employees, directly or through any corporate or other device, in connection with the introduction into commerce, or the offering for sale, sale, transportation or distribution in commerce, as "commerce" is defined in the Federal Trade Commission Act and the Wool Products Labeling Act of 1939, of pieces or bolts of wool fabric or other "wool products," as such products are defined in and subject to the Wool Products Labeling Act of 1939, which products contain, purport to contain, or in any way are represented as containing "wool," "reprocessed wool" or "reused wool," as those terms are defined in said act, do forthwith cease and desist from misbranding such products by:

1. Falsely or deceptively stamping, tagging, labeling or otherwise identifying such products as to the character or amount of the constituent fibers included therein;

2. Failing to securely affix to or place on each product a stamp, tag, label or other means of identification showing in a clear and conspicuous manner:

(a) The percentage of the total fiber weight of such wool product, exclusive of ornamentation not exceeding five percentum of said total fiber weight, of (1) wool, (2) reprocessed wool, (3) reused wool, (4) each fiber other than wool where said percentage by weight of such fiber is five per centum or more, and (5) the aggregate of all other fibers;

(b) The maximum percentage of the total weight of such wool product of any non-fibrous loading, filling, or adulterating matter;

(c) The name or the registered identification number of the manufacturer of such wool product or of one or more persons engaged in introducing such wool product into commerce, or in the offering for sale, sale, transportation, distribution or delivery for shipment thereof in commerce, as "commerce" is defined in the Wool Products Labeling Act of 1939.

Provided, That the foregoing provision concerning misbranding shall not be construed to prohibit acts permitted by paragraphs (a) and (b) of Section 3 of the Wool Products Labeling Act of 1939, *And provided further,* That nothing contained in this order shall be construed as limiting any applicable provisions of said

[1] New.
[2] Amended to read as set forth.

Act or the Rules and Regulations promulgated thereunder.

It is further ordered, That respondent Jay Gee Fabrics, Inc., a corporation, and its officers, and respondent Jack Grodowitz, individually and as an officer of said corporation, and respondents' representatives, agents and employees, directly or through any corporate or other device, in connection with the offering for sale, sale or distribution of pieces or bolts of wool fabric or any other wool products in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

Misrepresenting the constituent fibers of which their wool products are composed, or the percentages or amounts thereof, in sales invoices or in any other manner.

By said "Decision of the Commission", report of compliance was required as follows:

It is ordered, That Respondents Jay Gee Fabrics, Inc., a corporation, and Jack Grodowitz, individually and as an officer of said corporation, shall within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with the order to cease and desist.

Issued: December 1, 1955.

By the Commission.

[SEAL] ROBERT M. PARRISH,
Secretary.

TITLE 22—FOREIGN RELATIONS

Chapter II—International Cooperation Administration

PART 202—OCEAN SHIPMENTS OF SUPPLIES BY VOLUNTARY NONPROFIT RELIEF AGENCIES

DECEMBER 1, 1955.

The regulations contained in Part 202, Chapter II, Title 22 of the Code of Federal Regulations are hereby amended to read as follows, effective December 1, 1955.

Sec.
202.1 Definition of terms.
202.2 Scope of the regulations in this part.
202.3 Agencies within scope of the regulations in this part.
202.4 Manner of payment of ocean freight charges.
202.5 Refund by agencies.
202.6 Saving clause.

AUTHORITY: §§ 202.1 to 202.6 issued under sec. 521, 68 Stat. 855; 22 U. S. C. 1781. Interpret or apply secs. 409, 525, 68 Stat. 845, 856; 22 U. S. C. 1928, 1785. E. O. 10575, 19 F. R. 7249, 3 CFR, 1954 Supp. E. O. 10610, 20 F. R. 3179.

§ 202.1 *Definition of terms.* For the purposes of this part:

(a) "The Director" shall mean the Director of the International Cooperation Administration.

(b) "The Committee" shall mean the Advisory Committee on Voluntary Foreign Aid of the International Cooperation Administration.

(c) "Supplies" shall include relief and rehabilitation supplies shipped in support of programs registered with the Committee as well as administrative supplies and equipment shipped in support of such programs. In no case shall such supplies include items for the personal use of representatives of the registered agency.

§ 202.2 *Scope of the regulations in this part.* This part provides the rules under which the Director, in order to further the efficient use of United States voluntary contributions for relief in the nations or areas listed below, may pay ocean freight charges from United States ports to initial foreign ports of entry of such nations or areas on supplies, as well as administrative supplies and equipment, donated to, or purchased by, United States voluntary nonprofit relief agencies registered with the Committee, for distribution or use in Afghanistan, Austria, Bolivia, Ecuador, Egypt, France, the Federal Republic of Germany, Greece, Hong Kong, Honduras, India, Iran, Italy, Jordan, Korea, Pakistan, Peru, Taiwan, Trieste, Yugoslavia, Vietnam, and when the Director determines it necessary and expedient, in any country eligible for economic or technical assistance under the Mutual Security Act of 1954, as amended.

§ 202.3 *Agencies within scope of the regulations in this part.* Any United States voluntary nonprofit relief agency may make application for reimbursement of ocean freight charges on shipments of supplies donated to or purchased by it for distribution within the foreign countries and areas listed in § 202.2, provided:

(a) An agreement for duty-free entry and defrayment of inland transportation costs of relief supplies within the scope of the regulations in this part has been concluded between the United States and the recipient country.

(b) The general program and projects by countries of operation of the agency, and the supplies in support thereof, have been approved by the recipient country in accordance with the agreement referred to in paragraph (a) of this section.

(c) The agency is registered with the Committee, and therefore has met all the requirements of registration as set forth in the regulations "Registration of Agencies for Voluntary Foreign Aid" (Part 203 of this chapter.)

§ 202.4 *Manner of payment of ocean freight charges.* By means of an equitable apportionment of the funds available for this purpose the Director will reimburse agencies qualified under §§ 202.2 and 202.3 to the extent of ocean freight charges paid by them for shipments made in conformity with the regulations in this part: *Provided*, That application for such reimbursement is submitted to the Director of the International Cooperation Administration, Attention: Advisory Committee on Voluntary Foreign Aid, International Cooperation Administration, Washington 25, D. C., within forty-five days of date of shipment, together with receipted invoices for such charges, supported by ocean bills of lading, showing that such charges are limited to the actual cost of transportation of the supplies from end of ship's tackle at the United States port of loading to end of ship's tackle at port of discharge, correctly assessed at the time of loading by the carrier for freight on a weight, measurement, or unit basis, and free of any other charges.

§ 202.5 *Refund by agencies.* Any agency reimbursed under this part will refund promptly to the Director upon demand the entire amount, or any lesser amount specified, of ocean freight charges reimbursed, and to the recipient country upon demand the entire amount, or any lesser amount specified, of inland transportation costs reimbursed, (a) whenever the Director determines that the reimbursements were improper as being in violation of any of the provisions of the Mutual Security Act of 1954 (Pub. Law 665, 83d Congress), any acts amendatory thereof or supplemental thereto, any relevant appropriation acts, or any rules, regulations or procedures of the International Cooperation Administration, and (b) unless such agency files, within sixty days after reimbursement has been made, a certificate stating that all supplies for which such reimbursement was made were admitted by the country of ultimate destination free of all customs duties, other duties, tolls and taxes.

§ 202.6 *Saving clause.* The Director may waive, withdraw, or amend at any time or from time to time any or all of the provisions of the regulations in this part.

JOHN B. HOLLISTER,
Director,
International Cooperation Administration.

[F. R. Doc. 55–10085; Filed, Dec. 15, 1955; 8:47 a. m.]

PART 203—REGISTRATION OF AGENCIES FOR VOLUNTARY FOREIGN AID

DECEMBER 1, 1955.

The following regulations shall supersede, as of their effective date, all existing regulations contained in Part 203, Chapter II, Title 22 of the Code of Federal Regulations.

Sec.
203.1 A register of voluntary foreign aid agencies and of their activities.
203.2 Application for registration.
203.3 Requirements for registration.
203.4 Validation of registration.
203.5 Amendments to registration.
203.6 Validation of programs and projects.
203.7 Representation of registrants.
203.8 Acceptance and termination of registration.
203.9 Saving clause.

AUTHORITY: §§ 203.1 to 203.9 issued under sec. 521, 68 Stat. 855; 22 U. S. C. 1781. Interpret or apply sec. 525, 68 Stat. 856; 22 U. S. C. 1785. E. O. 10610, 20 F. R. 3179.

§ 203.1 *A register of voluntary foreign aid agencies and their activities.* To foster the public interest in the field of voluntary foreign aid and the activities of nongovernmental organizations which serve the public interest therein, the Advisory Committee on Voluntary Foreign Aid of the International Cooperation Administration (referred to in this part as the Committee) is hereby authorized and directed to establish and to maintain, pursuant to the rules set forth in this part, a register of such nongovernmental organizations qualified for and voluntarily accepting registration; such register (a) to serve as a repository of information, including currently recording therein the organization, purposes, programs, finances and other pertinent activities of the registrants for public guidance; (b) to enable the Committee to facilitate the programs and projects of the registrants through the exercise of its good offices and the provisions of facilities authorized by the laws, regulations and procedures related to voluntary foreign aid as administered by the Committee, other United States agencies, or by international governmental agencies supported by the United States; and (c) to provide information and advice, and perform such other functions, as may be necessary in furtherance of the purposes of this section.

§ 203.2 *Application for registration.* Any person or nongovernmental organization or agency carrying on any nonprofit activities in the United States for the purpose of furthering or engaging in voluntary aid in areas outside the United States, including, but not limited to, projects and services of relief, rehabilitation, reconstruction and welfare in the fields of health, education, agriculture and industry, emigration and resettlement, may voluntarily make application for registration to the Chairman, Advisory Committee on Voluntary Foreign Aid, International Cooperation Administration, Washington 25, D. C. Any person, organization, or agency whose application for registration is accepted under this part shall be referred to in this part as a registrant.

§ 203.3 *Requirements for registration.* To establish that the primary purpose to be served is the provision of voluntary foreign aid, an applicant for registration shall submit evidence by its charter, articles of incorporation, constitution, bylaws, and other relevant documents, and a statement upon forms to be provided by the Committee or otherwise as may be required that:

(a) It maintains its principal place of business in the United States;

(b) It is controlled by an active and responsible body composed principally of United States citizens, who serve without compensation, who have accepted the responsibility to carry out the activities of the agency to be reported to the Committee, and who will exercise satisfactory controls to assure that its services and resources are administered competently in the public interest;

(c) It has been authorized by the Internal Revenue Service to inform donors that their contributions may be deducted for Federal income tax purposes;

(d) It is not engaged, or will not be engaged, in any activities or enterprises inconsistent with the fulfillment of the purposes and objectives as set forth in the application, or which may be recorded in the registration, or in any programs or projects thereunder;

(e) The funds and resources of the registrant, will be obtained, expended and distributed in ways which conform to accepted ethical standards without unreasonable cost for promotion, publicity, fund raising and administration at home and abroad;

(f) The Committee will be informed of any plans, including projected publicity, for popular drives for funds or other forms of support to permit the Committee to offer suggestions and where appropriate to lend its good offices. Such popular drives will be timed, insofar as practicable, to avoid conflict with national appeals for public support during the limited periods of the countrywide campaigns of the American National Red Cross, the Community Chests, Savings Bond drives of the United States Treasury, or similar campaigns of accepted general national interest;

(g) It will refer to the Committee for appropriate consideration any proposed programs, procedures or agreements affecting other Federal agencies or international governmental agencies but which also affect the action responsibilities of the Committee before formal steps are concluded with such agencies, and in order that the Committee may lend its good offices and that coordination may be assured pursuant to the President's Directive of May 14, 1946;

(h) Such current and periodic reports and information will be provided as the Committee may require from time to time pertaining to the registrant's organization, programs, projects, and finances, including audits by a certified public accountant, or other pertinent activities. All records pertaining to responsibilities as a registrant and related to activities as such shall be made available for official inspection. Information on registration, organization, periodic reports on programs and finances shall be available for public inspection.

§ 203.4 *Validation of registration.* Certificates of registration will be issued by the Committee to applicants which fulfill the requirements set forth in § 203.3 and upon the finding of the Committee that the general purposes to be served are of a character and fulfill a need that justify appeals for voluntary support, warrant the cooperation of the United States Government, and otherwise are deemed to serve the public interest. Such certificates may be withheld, in the discretion of the Committee, until an initial program has been recorded under the terms set forth in § 203.6. Certificates will be published in the FEDERAL REGISTER.

§ 203.5 *Amendments to registration.* A registrant's certificate of registration shall be amended whenever a material change is made in the registrant's organization, its purposes or governing personnel. The application for amendment shall be supported by a resolution of the controlling body or other evidence certified by an authorized official. Amended certificates will be published in the FEDERAL REGISTER.

§ 203.6 *Validation of programs and projects.* (a) Registrants, to carry out and fulfill the purposes and objectives of their organization and to obtain appropriate official United States support and facilities, will submit applications upon forms provided by the Committee or otherwise as may be required, for the recording of specific country programs or specific projects of relief, rehabilitation, reconstruction and welfare as these are developed in the fields of health, education, agriculture, industry, emigration and resettlement. Notices of acceptance will be issued by the Committee as supplements to certificates of registration: *Provided*, That:

(1) The specific program or specific project is within the scope of any agreement that has been concluded between the United States Government and the government of the country of interest in furtherance of the operations of registrants acceptable to such governments;

(2) In the absence of such an agreement as set forth in subparagraph (1) of this paragraph satisfactory assurances are:

(i) Obtained from the government of the country in question that appropriate facilities are or will be afforded for the necessary and economical operations of the program or project including (*a*) acceptance of the specific program or specific project; (*b*) the supplies approved in support of the program or project are free of customs duties, other duties, tolls, and taxes; (*c*) treatment of supplies as a supplementary resource and not as a substitute for public rations; (*d*) the identification of the supplies, to the extent practicable, as to their United States origin and their free provision by the donor agency; and (*e*) insofar as practicable the reception, unloading, warehousing and transport of the supplies free of cost to points of distribution.

(ii) Provided by the registrant that (*a*) shipments will be made only to consignees reported to the Committee and full responsibility is assumed by such consignees for the noncommercial distribution of the supplies free of cost to the persons ultimately receiving them; and (*b*) distribution is under the supervision of United States citizens specifically charged with the responsibility for the program or project, or by nationals, upon notification to the Committee in justification of their selection on account of the character and economy of the operation, and the degree of cooperation and acceptance of responsibility of the indigenous agency.

(b) Programs and projects which involve the contractual support of United States or international governmental agencies and acceptance of measures of responsibility by the Committee will be recorded following an understanding between the Committee and the contracting official agency to assure correlation in the attainment of common objectives, and pursuant to the President's Directive of May 14, 1946.

§ 203.7 *Representation of registrants.* The Committee, in appropriate

cases, may exercise its good offices or recommend to and appear before United States agencies or international agencies supported by the United States Government, to facilitate the recorded programs of any registrants or committees of such registrants, and to further the provision of facilities authorized by laws, regulations, and procedures in support of voluntary foreign aid.

§ 203.8 *Acceptance and termination of registration.* (a) Registrations shall remain in force until relinquished voluntarily by the registrant upon written notice to the Committee or formal notice from the Committee is published in the FEDERAL REGISTER stating that they are:

(1) Amended in accordance with § 203.5; or

(2) Suspended or terminated.

(b) Acceptance of a notice of relinquishment of registration shall be subject to submittal of final reports to the Committee, including the plans for disposition of the registrant's residual assets acquired in support of its registered programs.

§ 203.9 *Saving clause.* The Director of the International Cooperation Administration may waive, withdraw, or amend from time to time any or all of the provisions of the regulations in this part.

Effective date. The regulations in this part shall become effective as of December 1, 1955, and shall supersede as of their effective date Part 203, Chapter II, Title 22 of the Code of Federal Regulations.

Certificates of registration and amendments thereto heretofore issued by the Advisory Committee on Voluntary Foreign Aid, and which are valid as of the effective date of the regulations in this part, shall continue in force and effect.

JOHN B. HOLLISTER,
Director,
International Cooperation Administration.

TITLE 32A—NATIONAL DEFENSE, APPENDIX

Chapter XIV—General Services Administration

[Revision 3, Amdt. 6]

REG. 7—MICA REGULATION: PURCHASE PROGRAMS FOR DOMESTIC MICA

PRICES AND PAYMENT

Pursuant to the authority vested in me by Executive Order 10480, dated August 14, 1953 (18 F. R. 4939), as amended, this regulation, as revised and amended, is hereby further amended as follows:

In section 5 (e) (3), delete the date "December 14, 1955", and in lieu thereof substitute the date "February 14, 1956".

(Secs. 704, 64 Stat. 816, as amended; 50 U. S. C. App. 2154. Interprets or applies sec. 303, 64 Stat. 801, as amended, sec. 3, 67 Stat. 417; 50 U. S. C. App. 2093, 2182)

All other provisions of this regulation shall remain in full force and effect.

This amendment is effective immediately.

Dated: December 14, 1955.

EDMUND F. MANSURE,
Administrator.

TITLE 39—POSTAL SERVICE

Chapter I—Post Office Department

PART 95—TRANSPORTATION OF MAIL BEYOND THE BORDERS OF THE UNITED STATES

COMPENSATION FOR TRANSPORTATION OF SURFACE MAILS

In § 95.2 *Compensation for transportation of surface mails* make the following changes in paragraph (c):

1. Amend the paragraph caption to read as follows: "(c) *Other exceptions.*"

2. Designate the present text as subparagraph (1) *Free transit provisions.*

3. Add new subparagraph (2) to read as follows:

(2) *Mails dispatched from more than one port in the United States.* When mails are dispatched from more than one port in the United States this section shall not prevent a carrier from accepting the lowest rate applicable from the United States to port of destination.

(R. S. 161, 396, 398, as amended, 4009, as amended; secs. 304, 309, 42 Stat. 24, 25; 5 U. S. C. 22, 369, 372, 39 U. S. C. 654)

[SEAL] ABE MCGREGOR GOFF,
The Solicitor.

TITLE 32—NATIONAL DEFENSE

Chapter XI—Division of Liquidation, Department of Commerce [1]

[Supp. Order 189, Amdt. 9]

PART 1305—ADMINISTRATION

PRESERVATION OF RECORDS

DECEMBER 12, 1955.

Pursuant to the Emergency Price Control Act of 1942, as amended, Executive Orders Nos. 9809, 9841, and 9842, and Department of Commerce Order 75, as amended, it is hereby ordered that section 1 of Supplementary Order 189 issued by the Administrator, Office of Price Administration, on October 23, 1946 (11 F. R. 12568), as amended on November 12, 1946 (11 F. R. 13442), November 6, 1947 (12 F. R. 7327), February 20, 1948 (13 F. R. 1262), June 30, 1949 (14 F. R. 3707), December 27, 1951 (17 F. R. 18), December 11, 1952 (18 F. R. 33), December 17, 1953 (18 F. R. 8698), and December 14, 1954 (19 F. R. 8603), be, and it is hereby, further amended by changing the date January 1, 1956, wherever it occurs in subsection (a) of the said section 1, to January 1, 1957.

(56 Stat. 23, as amended; 50 U. S. C. App. 901 et seq.; E. O. 9802, Dec. 12, 1946, 3 CFR, 1946 Supp.; E. O. 9841, April 23, 1947, 3 CFR, 1947 Supp.; E. O. 9842, April 23, 1947, 3 CFR, 1947 Supp.)

This amendment shall become effective January 1, 1956.

TRUE D. MORSE,
Acting Secretary of Agriculture.

LAURENCE B. ROBBINS,
Assistant Secretary of the Treasury for and on behalf of Reconstruction Finance Corporation.

[SEAL] M. W. KNARR,
Secretary,
Reconstruction Finance Corporation.

SINCLAIR WEEKS,
Secretary of Commerce.

TITLE 43—PUBLIC LANDS: INTERIOR

Chapter I—Bureau of Land Management, Department of the Interior

Subchapter Q—Reclamation and Irrigation

[Circular 1947]

PART 230—RECLAMATION OF ARID LANDS BY THE UNITED STATES

ASSIGNMENTS

Sections 230.35–230.37 are revoked in their entirety and §§ 230.29–230.34 are revised to read as follows:

Sec.
230.29 Statutory authority; when assignments may be made.
230.30 Assignments involving farm units.
230.31 Limitations on and conditions of assignments.
230.32 Showing required.
230.33 When showing is required.
230.34 Requirements for patent.

AUTHORITY: §§ 230.29 to 230.34 issued under sec. 10, 32 Stat. 390, as amended; 43 U. S. C. 373.

§ 230.29 *Statutory authority; when assignments may be made.* The act of June 23, 1910 (36 Stat. 592; 43 U. S. C. 441), authorizes persons who have made or may make homestead entries subject to the reclamation law to assign their entries in whole or in part at any time after filing in the appropriate land office satisfactory proof of the residence, improvements, and cultivation required by the ordinary provisions of the homestead law.

§ 230.30 *Assignments involving farm units.* (a) In cases where the entry involves all or parts of two or more farm units, the entryman may file an election as to which farm unit he will retain and he may assign and transfer to a qualified assignee any farm unit or units or parts of such units which he does not elect to retain. If an election by the entryman to conform to a farm unit be filed and no assignment made of the remainder of the entry, the entry will be conformed to the farm unit selected for retention and canceled as to the remainder.

(b) Where it is desired to assign a part of an established farm unit, an application for the amendment and subdivision of such unit must be filed with the official in charge of the project, together with the showing required by § 230.32. If a survey shall be found necessary to determine the boundaries of the subdivision of any such farm unit, or the division of the irrigable area, a deposit equal to the estimated cost of such survey must be made with the agent cashier, Bureau of Reclamation, on the project by or on behalf of the parties concerned. Any excess over the actual cost will be returned to the depositor or depositors after completion of the survey, and they will also be required to make good any deficiency in their deposit.

§ 230.31 *Limitations on and conditions of assignments.* (a) The law expressly makes assignments "subject to the limitations, charges, terms, and conditions of the Reclamation Act," which, among other things, limits the right of entry to one farm unit, and forbids the holding of more than one farm unit prior to payment of all construction or building and betterment charges.

(b) Assignments must be an absolute sale, divesting the assignor of all interest in the premises assigned. Assignments may be effected by quitclaim or warranty deed or by any other form of conveyance in general use in the State in which the land is located, but a quitclaim or warranty deed is preferred.

(c) Assignees must be more than 21 years of age and must not own, hold, or claim any other farm unit or entry under the reclamation law or one or more parcels of private land up to the limit of single ownership fixed for the project receiving water from the project system upon which all installments of construction or building or betterment charges have not been paid in full. If the assignee is a married woman, she must purchase the assignment with her own separate money, in which her husband has no interest or claim (39 L. D. 504 and 43 L. D. 364). If the assignment involves a partial farm unit which an entryman does not elect to retain in accordance with § 230.30 (a), the assignee must also have an entry or an assignment covering the remainder of such unit.

§ 230.32 *Showing required.* Whenever assignments are presented to the land office in accordance with § 230.33, they must be accompanied by the following:

(a) A showing that the assignment and the assignee meet the requirements of § 230.31.

(b) The original instrument of assignment, or where the instrument is recorded, a copy thereof certified by the officer who has custody of the record, or where the original instrument of assignment is presented to an officer having an official impression seal, a copy of the instrument certified by such officer if accompanied by satisfactory evidence of compliance with the documentary stamp tax provisions of the internal revenue law.

(c) A certificate by the official in charge of the project that water-right application therefor is not receivable or that the assignee has filed in the project office for acceptance a water-right application in due form for the land embraced in the assignment.

(d) Where not all the predecessors in interest to an assignee have had their assignments approved by the land office, such assignee, in addition to the showings required by paragraphs (a), (b), and (c) of this section, must submit satisfactory evidence of title to the land consisting of either the recorded deed or deeds in the chain of title from the original entryman, an abstract of title, or a certificate of title issued by a qualified title company which is acceptable to the Department of the Interior.

§ 230.33 *When showing is required.* The showing required by § 230.32 is required whenever an assignment is presented to the appropriate land office for filing. All assignments should be presented for filing. They must be presented, however, when:

(a) The assignments involve, under § 230.30 (a), all or part of farm units which an entryman does not elect to retain, or under § 230.30 (b), parts of established farm units.

(b) The assignee desires to make proof of full compliance with the reclamation law with the view of receiving patent for the land.

§ 230.34 *Requirements for patent.* Upon the approval of an assignment, the assignee will become entitled to a patent upon payment of the water-right charges and submittal of satisfactory proof of reclamation as would have been required of the original entryman, and after proof of compliance with the law.

CLARENCE A. DAVIS,
Acting Secretary of the Interior.

DECEMBER 12, 1955.

PROPOSED RULE MAKING

DEPARTMENT OF LABOR

Wage and Hour Division

[29 CFR Part 522]

EMPLOYMENT OF LEARNERS IN KNITTED WEAR, GLOVE AND INDEPENDENT TELEPHONE INDUSTRIES

NOTICE OF PROPOSED AMENDMENTS

Pursuant to section 14 of the Fair Labor Standards Act of 1938 (section 14, 52 Stat. 1068, as amended; 29 U. S. C. 214), the Administrator has heretofore issued supplemental industry learner regulations (20 F. R. 2304) providing for the employment of learners in the knitted wear industry (§§ 522.30 through 522.35), glove industry (§§ 522.60 through 522.65), and the independent telephone industry (§§ 522.70 through 522.74), at wages lower than the minimum wage applicable under section 6 of the act.

Such regulations have been reexamined in the light of the Fair Labor Standards Amendments of 1955 (Public Law 381, 84th Congress, 1st Session), recent changes in wage levels, and administrative experience in their operation. Persons affected by them have been consulted. All relevant information available indicates that it is necessary to amend certain sections of the learner regulations applicable to these industries. Primarily, the amendments proposed herein would accomplish the following: (1) Increase the subminimum rates which may be authorized in special certificates isued by the Administrator for learners in the knitted wear, glove, and independent telephone industries; (2) extend presently authorized learner occupations in the knitted glove branch of the glove industry to include hand and machine stitching; (3) change the provision which presently authorizes subminimum rates for telephone exchanges of less than 2,000 stations, and for exchanges of 2,000 or more stations when unusual circumstances are shown to exist, to authorize such rates for exchanges with less than 3,000 stations, and, in exceptional cases, for exchanges with 3,000 or more stations when unusual circumstances are shown to exist; and (4) remove the limitation as to the number of operators that may be hired as learners in cases of abnormal labor turnover during one six-month period within the effective period of the certificate (normally a period not longer than one year) by exchanges employing up to 8 operators, and by exchanges em-

ploying 9 to 18 operators. However, the limitation as to the number of learners that may be employed at any one time is retained.

It is proposed that these amendments shall be made effective March 1, 1956, the effective date of the Fair Labor Standards Amendments of 1955. However, applications under the amended regulations for learner certificates to become effective March 1, 1956, would be entertained by the Administrator prior to such date.

Accordingly, notice is hereby given pursuant to the Administrative Procedure Act (60 Stat. 237; 5 U. S. C. 1001), that under the authority provided in section 14 of the Fair Labor Standards Act of 1938, as amended (section 14, 52 Stat. 1068; 29 U. S. C. 214), the Administrator of the Wage and Hour Division, United States Department of Labor, proposes to amend Part 522, as follows:

1. Paragraph (a) of § 522.35 is amended to read as follows:

(a) The subminimum rate which may be authorized in special certificates issued in the knitted wear industry shall be not less than 85 cents per hour.

2. Section 522.63 is amended to read as follows:

§ 522.63 *Learner occupations.* Special certificates may be issued authorizing the employment of learners at subminimum wage rates in the glove industry in occupations of hand and machine stitching in the leather glove branch of the industry; in the occupation of machine stitching in the woven or knit fabric and work glove branches of the industry; and in the occupations of finger knitting and finger closing, and hand and machine stitching in the knitted glove branch of the industry.

3. Paragraph (a) of § 522.65 is amended to read as follows:

(a) The subminimum rates which may be authorized in special certificates issued in the glove industry shall be not less than 80 cents an hour for the first 320 hours and not less than 90 cents an hour for the remaining 160 hours in the leather glove, woven or knit fabric glove and knitted glove branches of the industry, and not less than 77½ cents an hour for the first 320 hours and not less than 85 cents an hour for the remaining 160 hours in the work glove branch of this industry.

4. Paragraph (b) of § 522.71 is amended to read as follows:

(b) Special certificates authorizing the employment at subminimum wage rates of learners in the occupation of a switchboard operator in the independent telephone industry may be issued to exchanges of less than 3,000 stations to the extent necessary to prevent curtailment of opportunities for employment, and, in exceptional cases, to exchanges of 3000 or more stations when the Administrator or his authorized representative finds unusual circumstances to exist which would curtail opportunities for employment.

5. Paragraph (b) of § 522.72 is amended to read as follows:

(b) Special certificates issued to meet abnormal labor turnover may provide:

(1) In the case of exchanges employing up to 8 operators, two learners may be employed at one time during one period not to exceed six months within the effective period of the certificate.

(2) In the case of exchanges employing 9 to 18 operators, four learners may be employed at one time during one period not to exceed six months within the effective period of the certificate.

6. Section 522.74 is amended to read as follows:

§ 522.74 *Subminimum rates.* (a) For exchanges of less than 3000 stations the subminimum hourly rates to be provided in a special certificate for learners shall be not less than 80 cents an hour for the first 240 hours, and not less than 90 cents an hour for the remaining 240 hours of the learning period.

(b) In exceptional cases where a certificate is issued to an exchange of 3000 stations or more the subminimum hourly rates for learners shall be not less than 85 cents for the first 240 hours, and not less than 95 cents for the remaining 240 hours of the learning period.

(c) The earnings of learners employed on a piece rate basis shall be based on those piece rates if in excess of the authorized subminimum rates, in accordance with § 522.6 (j).

Prior to final adoption of the proposed amendments, consideration will be given to any data, views or arguments pertaining thereto which are submitted in writing to the Administrator of the Wage and Hour Division, United States Department of Labor, Washington 25, D. C., on or before December 31, 1955.

Signed at Washington, D. C., this 13th day of December 1955.

NEWELL BROWN,
Administrator, Wage and Hour and Public Contracts Divisions.

FEDERAL HOME LOAN BANK BOARD

[24 CFR Part 123]

[No. 9090]

FEDERAL HOME LOAN BANK SYSTEM; MEMBERS OF BANKS

RECORDING OF COMMITMENTS AND MONTHLY REPORTS BY MEMBER INSTITUTIONS OTHER THAN INSURANCE COMPANIES

DECEMBER 9, 1955.

Resolved that, pursuant to Part 108 of the general regulations of the Federal Home Loan Bank Board (24 CFR Part 108), it is hereby proposed that, pursuant to section 5A, 47 Stat. 725, as added by section 1, 64 Stat. 256 (12 U. S. C. 1425a), and sections 8, 10 (a), 17, 47 Stat. 731, 736, as amended (12 U. S. C. 1428, 1430 (a), 1437), Part 123 of the regulations for the Federal Home Loan Bank System (24 CFR Part 123) be amended by amendments the substance of which is as follows:

a. The regulations for the Federal Home Loan Bank System are hereby amended by adding to Part 123, immediately after § 123.12, a new heading "Recording of Commitments" and a new section to be numbered § 123.13 and to read as follows:

§ 123.13 *Recording of commitments.* Each institution, other than an insurance company, which is a member of a Federal home loan bank shall establish and maintain as a part of its official records a register in which it shall promptly record each commitment to make, purchase, or repurchase loans, whether such commitment is firm or conditional and whether made in writing or otherwise; as to each commitment, such record shall show the date on which it was made, the amount thereof, the name of the person or concern to whom it was made, the name of the person or persons by whom it was made, the form in which it was made (written or oral), the nature thereof (firm or conditional), and the date at which it expires. For the purposes of this section a conditional commitment shall be deemed to be a commitment that may be canceled at any time by such institution at its discretion, without consent, agreement, or other act by the person or concern to whom such commitment was made, and a firm commitment shall be deemed to be a commitment that is not conditional as herein defined.

(b) The regulations for the Federal Home Loan Bank System are hereby amended by designating the present text of § 123.15 as paragraph (a) and adding a new paragraph (b) to read as follows:

(b) The officers of each institution, other than an insurance company, which is a member of a Federal home loan bank shall make a monthly report to the board of directors of such institution on forms prescribed by the Board; and shall forward one copy of each such report to the Federal home loan bank of which such institution is a member and two copies to the Federal Home Loan Bank Board, Washington, D. C.

Resolved further that all interested persons are hereby given the opportunity to submit written data, views, or arguments on the following subjects and issues: (1) Whether said proposed amendments should be adopted as proposed; (2) whether said proposed amendments should be modified and adopted as modified; (3) whether said proposed amendments should be rejected. All such written data, views, or arguments must be received through the mail or otherwise at the Office of the Secretary, Federal Home Loan Bank Board, Federal Home Loan Bank Board Building, 101 Indiana Avenue NW., Washington 25, D. C., not later than January 16, 1956, to be entitled to be considered, but any received later may be considered in the discretion of the Federal Home Loan Bank Board.

By the Federal Home Loan Bank Board.

[SEAL] J. FRANCIS MOORE,
Secretary.

[24 CFR Parts 144, 145]

[No. 9103]

FEDERAL SAVINGS AND LOAN SYSTEM; OPERATIONS AND BYLAWS

BONUS ON ACCOUNTS

DECEMBER 9, 1955.

Resolved that, pursuant to Part 108 of the general regulations of the Federal Home Loan Bank Board (24 CFR Part 108) and § 142.1 of the rules and regulations for the Federal Savings and Loan System (24 CFR 142.1), it is hereby proposed that, pursuant to section 5 (a), 48 Stat. 132, as amended (12 U. S. C. 1464 (a)), Part 145 of the rules and regulations for the Federal Savings and Loan System (24 CFR Part 145) be amended by amendments the substance of which is as follows: The rules and regulations for the Federal Savings and Loan System are hereby amended as follows:

a. By adding to Part 145 a new section to be numbered § 145.3–1 and to read as follows:

§ 145.3–1 *Bonus on accounts—(a) Thrift incentive and investment incentive.* The board of directors of a Federal association which has a charter and bylaws not inconsistent with the provisions of this section may, by resolution, obligate the association to pay a bonus in the form of the thrift incentive hereinafter set forth in this section or in the form of the investment incentive hereinafter set forth in this section, or both.

(b) *Thrift incentive.* An account eligible for the thrift incentive shall be an account with respect to which the holder has first made to the association a statement in writing of intent to qualify for the thrift incentive and upon which there have been made only regular, periodic payments, on a weekly, biweekly, semimonthly, or monthly basis, beginning on or not later than ninety days after the making of such statement, the amount of which shall be the amount of the first payment (which shall not be less than $5.00), continuously thereafter and for a period of at least three years (or for a period of less than three years expiring on the date of the redemption of the account, if the account is sooner redeemed in whole by the association), without any delay of more than ninety days in the making of any payment and without any prepayment of more than six months, and without the withdrawal of any part of the amount of the payments made on such account. The thrift incentive shall be at the rate of one-fourth of one percent per annum or at such lower rate per annum as shall have been most recently specified therefor by action of the association's board of directors in force at the time when such statement is made. The thrift incentive shall be calculated on the same basis and in the same manner as if it were a dividend at said rate on the account at the respective dividend dates of the association. The first thrift incentive on the account shall be credited to the account (or paid, if directed by the owner) as if it were, in total, a dividend with respect to the dividend period in which there falls the date of the completion of the first three years of eligibility of the account, or the date of the redemption of the account, if the account is sooner redeemed in whole by the association, and any thrift incentive thereafter earned on the account shall be credited to the account (or paid, if directed by the owner) as if it were a periodic dividend on the account.

(c) *Investment incentive.* An account eligible for the investment incentive shall be an account with respect to which the holder has first made to the association a statement in writing of intent to qualify for the investment incentive and which has, beginning on or not later than ninety days after the making of such statement, a lowest balance of at least $1,000 (disregarding any partial redemption or partial redemptions of said account made after the making of such statement) continuously thereafter and for a period of at least three years, or which has had, beginning on or not later than ninety days after the making of such statement, such a lowest balance for a continuous period of less than three years ending on the date of redemption of the account, if the account is sooner redeemed in whole by the association. The investment incentive shall be at the rate of one-fourth of one percent per annum or at such lower rate per annum as shall have been most recently specified therefor by action of the association's board of directors in force at the time when such statement is made. The investment incentive shall be calculated on the same basis and in the same manner as if it were a dividend at said rate on the account at the respective dividend dates of the association, and as if the lowest balance in said account during the period of three years next preceding had been the constant balance therein during said period. The first investment incentive on the account shall be credited to the account (or paid, if directed by the owner) as if it were, in total, a dividend with respect to the dividend period in which there falls the date of the completion of the first three years of the eligibility of the account, or the date of the redemption of the account, if the account is sooner redeemed in whole by the association, and any investment incentive thereafter earned on the account shall be credited to the account (or paid, if directed by the owner) as if it were a periodic dividend on the account.

(d) *Conversion to thrift incentive.* Any account which, at the effective date of a thrift incentive resolution as referred to in paragraph (a) of this section, is in good standing under any bonus plan other than those set forth in this section and which, on the date of the making of the request hereinafter mentioned in this subsection, would be in good standing under paragraph (b) of this section if this section and said resolution had been in force at the date of the making of the first payment on said account and if the statement referred to in paragraph (b) of this section had been in force on that date, may make a request in writing to the association to convert said account to the thrift incentive, and thereafter said account shall be treated as if this section and said resolution had been so in force and as if such statement had been so made, provided, that in such case the reference in the last sentence of paragraph (b) of this section to the date of the completion of the first three years of eligibility of the account shall be construed as a reference to the date of the making of such request, if on the date of the making of such request the date of completion of the first three years of eligibility of the account shall be a date previous to the date of the making of such request.

(e) *Provisions of this section exclusive.* No account shall receive a thrift incentive or an investment incentive under the provisions of this section for or with respect to any period as to which it receives a bonus under any other provision of the regulations in this part or under any provision of the charter of the association.

(f) *Double payments prohibited; conversion from thrift incentive to investment incentive.* No account shall receive an investment incentive under this section for or with respect to any period as to which it receives a thrift incentive under this section. An account may be converted from the thrift incentive to the investment incentive by the making of request in writing to the association for such conversion, and in such case, subject to the provisions of the first sentence of this paragraph, any time during which such account met the requirements for the thrift incentive may be counted toward satisfaction of the requirements for the investment incentive.

b. By adding to § 144.6 a new paragraph (f) reading as follows:

(f) *Bonus in the form of thrift incentive and investment incentive.* If so provided by resolution of its board of directors, the association may be obligated to pay a bonus in the form of the thrift incentive set forth in the rules and regulations made by the Federal Home Loan Bank Board, or in the form of the investment incentive set forth in the rules and regulations made by the Federal Home Loan Bank Board, or both.

Resolved further that all interested persons are hereby given the opportunity to submit written data, views, or arguments on the following subjects and issues: (1) Whether said proposed amendments should be adopted as proposed; (2) whether said proposed amendments should be modified and adopted as modified; (3) whether said proposed amendments should be rejected. All such written data, views, or arguments must be received through the mail or otherwise at the Office of the Secretary, Federal Home Loan Bank Board, Federal Home Loan Bank Board Building, 101 Indiana Avenue NW., Washington 25, D. C., not later than January 16, 1956, to be entitled to be considered, but any received later may be considered in the discretion of the Federal Home Loan Bank Board.

By the Federal Home Loan Bank Board.

[SEAL] J. FRANCIS MOORE,
Secretary.

FEDERAL SAVINGS AND LOAN SYSTEM; OPERATIONS

RECORDING OF COMMITMENTS

DECEMBER 9, 1955.

Resolved that, pursuant to Part 108 of the general regulations of the Federal Home Loan Bank Board (24 CFR Part 108) and § 142.1 of the rules and regulations for the Federal Savings and Loan System (24 CFR 142.1), it is hereby proposed that, pursuant to section 5 (a), 48 Stat. 132, as amended (12 U. S. C. 1464 (a)), Part 145 of the rules and regulations for the Federal Savings and Loan System (24 CFR Part 145) be amended by an amendment the substance of which is as follows:

The rules and regulations for the Federal Savings and Loan System are hereby amended by adding to Part 145 thereof a new section to be numbered § 145.8–3 and to read as follows:

§ 145.8–3 *Recording of commitments.* Each Federal association shall establish and maintain as a part of its official records a register in which it shall promptly record each commitment to make, purchase, or repurchase loans, whether such commitment is firm or conditional and whether made in writing or otherwise; as to each commitment, such record shall show the date on which it is made, the amount thereof, the name of the person or concern to whom it was made, the name of the person or persons by whom it was made, the form in which it was made (written or oral), the nature therof (firm or conditional), and the date at which it expires. For the purposes of this section a conditional commitment shall be deemed to be a commitment that may be canceled at any time by such institution at its discretion, without consent, agreement, or other act by the person or concern to whom such commitment was made, and a firm commitment shall be deemed to be a commitment that is not conditional as herein defined.

Resolved further that all interested persons are hereby given the opportunity to submit written data, views, or arguments on the following subjects and issues: (1) Whether said proposed amendments should be adopted as proposed; (2) whether said proposed amendments should be modified and adopted as modified; (3) whether said proposed amendments should be rejected. All such written data, views, or arguments must be received through the mail or otherwise at the Office of the Secretary, Federal Home Loan Bank Board, Federal Home Loan Bank Board Building, 101 Indiana Avenue NW., Washington 25, D. C., not later than January 16, 1956, to be entitled to be considered, but any received later may be considered in the discretion of the Federal Home Loan Bank Board.

FEDERAL SAVINGS AND LOAN SYSTEM

DISSOLUTION, CONVERSION, MERGER, OR REORGANIZATION OF FEDERAL SAVINGS AND LOAN ASSOCIATIONS

DECEMBER 9, 1955.

Resolved that, pursuant to Part 108 of the general regulations of the Federal Home Loan Bank Board (24 CFR Part 108) and § 142.1 of the rules and regulations for the Federal Savings and Loan System (24 CFR 142.1), it is hereby proposed that, pursuant to section 5, 48 Stat. 132, as amended (12 U. S. C. 1464), Part 146 of the rules and regulations for the Federal Savings and Loan System (24 CFR Part 146) be amended by an amendment the substance of which is as follows:

Part 146 of the rules and regulations for the Federal Savings and Loan System is hereby amended by amending the heading of said part to read "Merger, Dissolution, Reorganization, and Conversion" and by adding to said part a new section to be numbered § 146.5 and to read as follows:

§ 146.5 *Conversion.* Any Federal association may convert to a State mutual association as provided by statute or to a State capital stock association as provided by statute and the regulations in this part. No Federal association shall convert to a State association having permanent non-withdrawable capital stock or any other form of security having voting control of the association or which is entitled to any earnings in excess of those payable to holders of withdrawable accounts unless provision is made for:

(a) A sum to be paid for such permanent nonwithdrawable capital stock or other security having voting control and any preference as to earnings equivalent to at least 5 percent of the total withdrawable accounts;

(b) Withdrawable accounts in the converted institution which shall be an insured institution, equivalent to the full amount which the mutual savings account holders of the Federal association could obtain in the liquidation of the association as determined by the Board after investigation and appraisal at the expense of the association. No merger or reorganization of a Federal association shall be approved unless provision is made for the savings account holders of such association equivalent to the requirement for conversion as herein provided.

Resolved further that all interested persons are hereby given the opportunity to submit written data, views, or arguments on the following subjects and issues: (1) Whether said proposed amendments should be adopted as proposed; (2) whether said proposed amendments should be modified and adopted as modified; (3) whether said proposed amendments should be rejected. All such written data, views, or arguments must be received through the mail or otherwise at the Office of the Secretary, Federal Home Loan Bank Board, Federal Home Loan Bank Board Building, 101 Indiana Avenue NW., Washington 25, D. C., not later than January 16, 1956, to be entitled to be considered, but any received later may be considered in the discretion of the Federal Home Loan Bank Board.

By the Federal Home Loan Bank Board.

[No. 9091]

FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION; OPERATIONS

COMMITMENTS BY INSURED INSTITUTIONS

DECEMBER 9, 1955.

Resolved that, pursuant to Part 108 of the general regulations of the Federal Home Loan Bank Board (24 CFR Part 108) and § 167.1 of the rules and regulations for Insurance of Accounts (24 CFR 167.1), it is hereby proposed that, pursuant to sections 402, 403, 48 Stat. 1256, 1257, as amended (12 U. S. C. 1725, 1726), Part 163 of the rules and regulations for Insurance of Accounts (24 CFR Part 163) be amended by an amendment the substance of which is as follows:

The rules and regulations for Insurance of Accounts are hereby amended by adding to Part 163 thereof a new section to be numbered § 163.9–1 and to read as follows:

§ 163.9–1 *Recording of commitments.* Each insured institution shall establish and maintain as a part of its official records a register in which it shall promptly record each commitment to make purchase, or repurchase loans, whether such commitment is firm or conditional and whether made in writing or otherwise; as to each commitment, such record shall show the date on which it is made, the amount thereof, the name of the person or concern to whom it was made, the name of the person or persons by whom it was made, the form in which it was made (written or oral), the nature thereof (firm or conditional), and the date at which it expires. For the purposes of this section a conditional commitment shall be deemed to be a commitment that may be canceled at any time by such institution at its discretion, without consent, agreement, or other act by the person or concern to whom such commitment was made, and a firm commitment shall be deemed to be a commitment that is not conditional as herein defined.

Resolved further that all interested persons are hereby given the opportunity to submit written data, views, or arguments on the following subjects and issues: (1) Whether said proposed amendments should be adopted as proposed; (2) whether said proposed amendments should be modified and adopted as modified; (3) whether said proposed amendments should be rejected. All such written data, views, or arguments must be received through the mail or otherwise at the Office of the Secretary, Federal Home Loan Bank Board, Federal Home Loan Bank Board Building, 101 Indiana Avenue NW., Washington 25, D. C., not later than January 16, 1956, to be entitled to be considered, but any received later may be considered in the discretion of the Federal Home Loan Bank Board.

By the Federal Home Loan Bank Board.

[No. 9104]

FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

FEDERAL INSURANCE RESERVE ACCOUNT

DECEMBER 9, 1955.

Resolved that, pursuant to Part 108 of the general regulations of the Federal Home Loan Bank Board (24 CFR Part 108) and § 167.1 of the rules and regulations for Insurance of Accounts (24 CFR 167.1), it is hereby proposed that the rules and regulations for Insurance of Accounts (24 CFR Subt. B, Ch. I, Subch. D) be amended in the following particulars:

a. Amend the last sentence of § 163.11 (24 CFR 163.11) to read as follows: "The general reserves of Federal savings and loan associations operating under Charter K, Charter K (rev.) or Charter N are deemed to meet the requirements of this section."

b. Amend § 163.12 (24 CFR 163.12) to read as follows:

§ 163.12 *Definition of "income base."* The term "income base" as used in § 163.13 shall mean, with respect to any insured institution, all income of such insured institution during its fiscal year that remains after deduction of all expenses and taxes charged or paid, and of all losses charged against income, during the fiscal year, but prior to any distribution of earnings or payment of interest on savings accounts, deposits or stock.

c. Amend § 163.13 (24 CFR 163.13) to read as follows:

§ 163.13 *Regular credits—(a) Federal insurance reserve account.* (1) Each insured institution shall credit to its Federal insurance reserve account, during each of its fiscal years, an amount equal to at least 15 percent of its income base: *Provided*, That, if an insured institution does not have in its Federal insurance reserve account an amount equal to at least:

(i) 2 percent of all insured accounts at the end of each of its fifth through its ninth years after the date of insurance of accounts, or

(ii) 3 percent of all insured accounts at the end of each of its tenth through its fourteenth years after the date of insurance of accounts, or

(iii) 4 percent of all insured accounts at the end of each of its fifteenth through its nineteenth years after the date of insurance of accounts,

it shall credit to its Federal insurance reserve account an amount equal to at least 25 percent of its income base for each such fiscal year: *And provided further*, That no allocation to the Federal insurance reserve account is required whenever such account is equal to at least 5 percent of all insured accounts.

(2) In any event, each insured institution shall build its Federal insurance reserve account to not less than 5 percent of all insured accounts by the end of the twentieth year after the effective date of insurance: *Provided*, That, if at the end of any year the Federal insurance reserve account of any insured institution is less than the required percentage but not less than three-fifths of the required percentage of all insured accounts, such institution may earmark undivided profits in an amount which, when combined with the amount in its Federal insurance reserve account, will be equal to the required percentage of all insured accounts.

(3) Undivided profits so earmarked shall be subject to all the limitations that apply to the Federal insurance reserve account: *Provided*, That the amount of such undivided profits may be reduced at any time to the extent that the amount in the Federal insurance reserve account plus earmarked undivided profits exceeds the minimum required percentage of all insured accounts.

(4) If the ratio of the Federal insurance reserve account and the earmarked undivided profits to all insured accounts declines to less than 5 percent after 20 years, the insured institution shall credit to the Federal insurance reserve account an amount equal to at least 25 percent of its income base until the ratio of 5 percent is restored: *Provided, however*, That if the Federal insurance reserve account is equal to at least three-fifths of the required percentage of all insured accounts, undivided profits may be earmarked in an amount sufficient to make the ratio of the Federal insurance reserve account and earmarked undivided profits equal to at least 5 percent of all insured accounts, in lieu of increasing from 15 to 25 the percent of the income base required to be transferred to the Federal insurance reserve account.

(b) *Over-all reserve position.* Whenever the Federal insurance reserve account plus earmarked undivided profits, if any, is equal to not less than 5 percent of all insured accounts, each insured institution shall increase during each fiscal year by an amount equal to at least 15 percent of its income base any one or more of the following types of accounts, at its option—Federal insurance reserve account, loss reserves, undivided profits or surplus—until the total of such accounts, plus nonwithdrawable accounts, if any, is equal to at least 10 percent of all insured accounts; and thereafter if such accounts shall at any time fall below such 10 percent it shall resume such 15 percent credits until such accounts are again equal to at least 10 percent of all insured accounts.

(c) *Permissible adjustments.* In computing the required credits for any fiscal year, each insured institution may give effect to the following adjustments:

(1) During the first fiscal year in which an institution is insured, such insured institution may adjust the required credits to the Federal insurance reserve account to cover only the number of months that it is actually insured in that particular fiscal year.

(2) The credits may be reduced by such amount as the aggregate credits during the the preceding 10 fiscal years that the institution has been insured exceed the aggregate requirements for the same years.

(3) If the total of its cash, United States Government securities and Federal Home Loan Bank bonds or debentures is equivalent to 10 percent or more of total assets, it may reduce the annual 15 or 25 percent of income credits prescribed hereinabove by one percentage point plus one additional percentage point for each 5 percent in excess of the said 10 percent; furthermore, if the total of its loans which are insured or guaranteed under the provisions of the National Housing Act, as now or hereafter amended, or the Servicemen's Readjustment Act of 1944, as now or hereafter amended, is equivalent to 30 percent or more of total assets, it may reduce the annual income credits by one percentage point plus one additional percentage point for each 5 percent in excess of the said 30 percent: *Provided, however*, That the maximum reduction for the two types of adjustment under this subparagraph may not aggregate more than 5 percentage points.

(d) *Dates of compliance.* Compliance with the provisions of this section shall begin January 1, 1956, and the date of compliance with each time requirement in this section shall be not later than the close of the semiannual period within which the respective insurance anniversary of the insured institution falls.

d. Amend § 163.14 (24 CFR 163.14) to read as follows:

§ 163.14 *Charging of losses and payment of dividends.* No insured institution that has charged losses to its Federal insurance reserve account during any year shall declare any dividends or pay any interest on savings for such year unless such declaration or payment has been first approved in writing by the Corporation: *Provided*, That the Corporation hereby approves the declaration of dividends and the payment of interest on savings for any year when losses are charged or are chargeable to such reserve by any insured institution that is in compliance with the provisions of § 163.13.

(Secs. 402, 403, 48 Stat. 1256, 1257; 12 U. S. C. 1725, 1726)

Resolved further that all interested persons are hereby given the opportunity to submit written data, views, or arguments on the following subjects and issues: (1) Whether said proposed amendments should be adopted as proposed; (2) whether said proposed amendments should be modified and adopted as modified; (3) whether said proposed amendments should be rejected. All such written data, views, or

arguments must be received through the mail or otherwise at the Office of the Secretary, Federal Home Loan Bank Board, Federal Home Loan Bank Board Building, 101 Indiana Avenue NW., Washington 25, D. C., not later than January 16, 1956, to be entitled to be considered, but any received later may be considered in the discretion of the Federal Home Loan Bank Board.

By the Federal Home Loan Bank Board.

FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION; MERGER, CONSOLIDATION, OR PURCHASE OF ASSETS

INCREASE OF ACCOUNTS OF AN INSURABLE TYPE AS PART OF MERGER OR CONSOLIDATION OR THROUGH PURCHASE OF BULK ASSETS

DECEMBER 9, 1955.

Resolved that, pursuant to Part 108 of the general regulations of the Federal Home Loan Bank Board (24 CFR Part 108) and § 167.1 of the rules and regulations for Insurance of Accounts (24 CFR 167.1), it is hereby proposed that, pursuant to sections 402, 403, 48 Stat. 1256, 1257, as amended (12 U. S. C. 1725, 1726), § 163.22 of the rules and regulations for Insurance of Accounts (24 CFR 163.22) be amended by an amendment the substance of which is as follows:

Section 163.22 is hereby amended by striking the language "twenty-five percent of such accounts" and inserting in lieu thereof the language "ten percent of such accounts or $100,000, whichever is the lesser".

Resolved further that all interested persons are hereby given the opportunity to submit written data, views, or arguments on the following subjects and issues: (1) Whether said proposed amendments should be adopted as proposed; (2) whether said proposed amendments should be modified and adopted as modified; (3) whether said proposed amendments should be rejected. All such written data, views, or arguments must be received through the mail or otherwise at the Office of the Secretary, Federal Home Loan Bank Board, Federal Home Loan Bank Board Building, 101 Indiana Avenue NW., Washington 25, D. C., not later than the close of business on January 16, 1956, to be entitled to be considered, but any received later may be considered in the discretion of the Federal Home Loan Bank Board.

By the Federal Home Loan Bank Board.

FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION; OPERATIONS

ISSUANCE OF SECURITIES BY INSURED INSTITUTIONS

DECEMBER 9, 1955.

Resolved that, pursuant to Part 108 of the general regulations of the Federal Home Loan Bank Board (24 CFR Part 108) and § 167.1 of the rules and regulations for Insurance of Accounts (24 CFR 167.1), it is hereby proposed that, pursuant to sections 402, 403, 48 Stat. 1256, 1257, as amended (12 U. S. C. 1725, 1726), Part 163 of the rules and regulations for Insurance of Accounts (24 CFR Part 163) be amended by an amendment the substance of which is as follows:

The rules and regulations for Insurance of Accounts are hereby amended by adding to Part 163 thereof a new section to be numbered § 163.31 and to read as follows:

§ 163.31 *Issuance of new securities.* No new securities shall be issued by an insured institution except in a form approved by the Corporation. In the event any State mutual association proposes to issue any permanent non-withdrawable capital stock or any other form of security having voting control of the association or which is entitled to any earnings in excess of those payable to holders of withdrawable accounts, provision shall be made for:

(a) Payment for such securities to be issued of a sum equivalent to at least 5 percent of total withdrawable accounts, and

(b) Cash or credit to withdrawable accounts equivalent to the full amount which the mutual owners could obtain in the event of the sale of the assets of the association or its liquidation as determined by the Corporation after investigation and appraisal at the expense of the association.

Resolved further that all interested persons are hereby given the opportunity to submit written data, views, or arguments on the following subjects and issues: (1) Whether said proposed amendments should be adopted as proposed; (2) whether said proposed amendments should be modified and adopted as modified; (3) whether said proposed amendments should be rejected. All such written data, views, or arguments must be received through the mail or otherwise at the Office of the Secretary, Federal Home Loan Bank Board, Federal Home Loan Bank Board Building, 101 Indiana Avenue NW., Washington 25, D. C., not later than January 16, 1956, to be entitled to be considered, but any received later may be considered in the discretion of the Federal Home Loan Bank Board.

By the Federal Home Loan Bank Board.

[No. 9105]

FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION; TERMINATION OF INSURANCE

PAYMENT OF RETIREMENT OR PENSION BENEFITS AND EMPLOYMENT CONTRACTS

DECEMBER 9, 1955.

Resolved that, pursuant to Part 108 of the general regulations of the Federal Home Loan Bank Board (24 CFR Part 108) and § 167.1 of the rules and regulations for Insurance of Accounts (24 CFR 167.1), it is hereby proposed that, pursuant to sections 402, 403, 407, 48 Stat. 1256, 1257, 1260, as amended (12 U. S. C. 1725, 1726, 1730), Part 165 of the rules and regulations for Insurance of Accounts (24 CFR 165) be amended by an amendment adding two new sections, the substance of which is as follows:

§ 165.3-1 *Contracts for payment of retirement or pension benefits.* It shall be deemed an unsafe and unsound practice within the purview of section 407 of the National Housing Act, as amended, for any insured institution to enter into any contract or to provide any plan or arrangement for payment of retirement or pension benefits unless.

(a) The cost to the insured institution of such contract, plan or arrangement is actuarially determined and is funded through payments to a responsible and properly qualified trustee other than the institution or any officer, director, or employee thereof, or through premium payments on an annuity contract with a duly organized insurance company upon appropriate policies or contracts;

(b) The cost to the institution of such contract, plan or arrangement that accrues during each fiscal period shall be paid or provided for not later than the close of such fiscal period and charged to expense as are other operating costs: *Provided,* That any initial payment representing cost to the institution for periods of service prior to the adoption of the contract, plan or arrangement may be deferred and amortized by charge to expense during subsequent fiscal periods if the unamortized balance is fully offset by a corresponding specific reserve;

(c) Pension or retirement benefits to be paid to any beneficiary under such contract, plan or arrangement are based solely upon and measured by his services as a salaried officer or employee of such institution;

(d) Such contract, plan or arrangement does not attempt to foreclose, or to limit the free and full exercise of, the power, right, or authority of such insured institution's board of directors, or its successors, under the charter or bylaws or the laws under which the institution operates, to terminate the services of any officer or employee;

(e) Such contract, plan or arrangement reserves to such institution's board of directors, or its successors, the right to terminate the contract, plan or arrangement at any time and in such event terminates all obligation and liability of the insured institution thereunder;

(f) Such contract, plan or arrangement provides for its automatic termination upon declaration of default as defined in section 401 (d) of the National Housing Act, as amended, and in such event terminates all obligation and liability of the insured institution thereunder. Notwithstanding the provisions of this paragraph or paragraphs (d) and (e) of this section, such contract, plan or arrangement may provide that in the event of termination under such clauses the beneficiaries shall receive the benefits to which they may be entitled out of amounts funded at the date of such termination.

§ 165.3-2 *Contracts for payment of employment compensation.* It shall be deemed an unsafe and unsound practice within the purview of section 407 of the National Housing Act, as amended, for any insured institution to enter into any contract or agreement under which payment of any part of the compensation of an officer or employee of such institution is to be deferred unless

(a) The amount of such deferred compensation is funded through payments to a responsible and properly qualified trustee other than the insured institution or any officer, director, or employee thereof;

(b) The amount of such deferred compensation that has accrued during each fiscal period shall be paid or provided for not later than the close of such fiscal period and charged to expense as are other operating costs so that none of the costs of such deferred compensation shall be carried as a deferred charge or expense; and

(c) Such contract does not attempt to foreclose, or to limit the free and full exercise of, the power, right, or authority of such insured institution's board of directors, or its successors, under the charter or bylaws or the laws under which the institution operates, to terminate the services of any officer or employee.

Resolved further that all interested persons are hereby given the opportunity to submit written data, views, or arguments on the following subjects and issues: (1) Whether said proposed amendments should be adopted as proposed; (2) whether said proposed amendments should be modified and adopted as modified; (3) whether said proposed amendments should be rejected. All such written data, views, or arguments must be received through the mail or otherwise at the Office of the Secretary, Federal Home Loan Bank Board, Federal Home Loan Bank Board Building, 101 Indiana Avenue NW., Washington 25, D. C., not later than January 16, 1956, to be entitled to be considered, but any received later may be considered in the discretion of the Federal Home Loan Bank Board.

By the Federal Home Loan Bank Board.

[F. R. Doc. 55-10105; Filed, Dec. 15, 1955; 8:50 a. m.]

FEDERAL TRADE COMMISSION

[16 CFR Ch. I]

[File No. 21-422]

TRADE PRACTICE RULES FOR REFRIGERATION AND AIR-CONDITIONING CONTRACTING INDUSTRY

NOTICE OF HEARING AND OF OPPORTUNITY TO PRESENT VIEWS, SUGGESTIONS, OR OBJECTIONS

Opportunity is hereby extended by the Federal Trade Commission to any and all persons, firms, corporations, organizations, or other parties, affected by or having an interest in the proposed trade practice rules for the refrigeration and air-conditioning contracting industry, to present to the Commission their views concerning said rules, including such pertinent information, suggestions, or objections as they may desire to submit, and to be heard in the premises. For this purpose they may obtain copies of the proposed rules upon request to the Commission. Such views, information, suggestions, or objections may be submitted by letter, memorandum, brief, or other communication, to be filed with the Commission not later than January 20, 1956.

Opportunity to be heard orally in the matter will be afforded at the following times and places to any such persons, firms, corporations, organizations, or other parties, who desire to appear and be heard:

Hearing commencing at 10 a. m., e. s. t., January 6, 1956, in the Sheraton-Cadillac Hotel, Washington Boulevard at Michigan Avenue, Detroit, Michigan; and

The second session of such hearing beginning at 10 a. m., e. s. t., January 20, 1956, in Room 332 of the Federal Trade Commission Building, Pennsylvania Avenue at Sixth Street NW., Washington, D. C.

After due consideration of all matters presented in writing or orally, the Commission will proceed to final action on the proposed rules.

The industry for which trade practice rules are sought to be established through this proceeding consists of persons, firms, corporations, and organizations engaged in both the sale and installation of:

(1) Mechanical refrigeration units or systems for commercial or industrial use; or

(2) Mechanical air-conditioning units or systems for commercial, industrial or home use.

NOTE: As above used, the word "installation" makes reference to the performance of services requiring engineering knowledge and skill, and the term "mechanical air-conditioning units or systems" makes reference to units or systems which are capable of lowering, or of both lowering and raising, the temperature of the air within an enclosure and simultaneously effecting a substantial degree of control of the humidity and circulation of the air in such enclosure. Window air-conditioning units and refrigerators which are of a type not requiring the kind of installation above described are not to be considered as products of this industry.

Proceedings looking to the promulgation of trade practice rules for this industry were instituted pursuant to an industry application. The rules are directed to the maintenance of fair competitive conditions in the industry and full protection of the purchasing public. A general trade practice conference was held in Chicago, Illinois, on May 20, 1955, at which rules were proposed for Commission consideration. The announced hearings constitute a further step in the proceedings.

Issued: December 13, 1955.

By direction of the Commission.

[SEAL] ROBERT M. PARRISH, *Secretary.*

NOTICES

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

[No. 72]

YUMA IRRIGATION PROJECT, ARIZONA-CALIFORNIA

PUBLIC NOTICE OF ANNUAL OPERATION AND MAINTENANCE CHARGES AND ANNUAL WATER RENTAL CHARGES

DECEMBER 1, 1955.

1. *Annual operation and maintenance charges for lands under public notice, Reservation Division.* The minimum annual operation and maintenance charge for the calendar year 1956 and thereafter until further notice against all lands of the Reservation Division under public notice shall be $7.50 per irrigable acre, whether water is used or not, payment of which will entitle the water user to 7 acre-feet of water per acre on certain sandy areas shown on the list attached, and to 5 acre-feet of water per irrigable acre on all other lands of the division under public notice. Additional water, if available, will be furnished at the rate of $2.00 per acre-foot payable in advance. Credit equivalent to the amount paid for additional water unused prior to the end of calendar year 1956 will be applied against the minimum charges for water during calendar year 1957. No credit will be given for water purchased during calendar year 1956 at the minimum charge but undelivered at the end of calendar year 1956.

Where in the opinion of the Chief, Operations Division, Yuma Projects Office, it may be done without interference with other project requirements, upon written

request filed in advance by a water user who is not delinquent in the payment of any operation and maintenance charges, water will be furnished free of charge for reclaiming lands by the usual methods: *Provided, however,* That lands for which free water was served during the preceding calendar year will not again be served free water in the absence of evidence satisfactory to the Chief, Operations Division, that although the water so served free of charge during such preceding year was applied to the land in sufficient quantities over a period of not less than 3 months, the results accomplished during such preceding year were not satisfactory.

All minimum annual operation and maintenance charges shall be due and payable on January 1, 1956, and on January 1 of each year thereafter.

2. *Annual water rental charges for other lands, Reservation Division.* Irrigation water will be furnished during the calendar year 1956 and thereafter until further notice for lands in the Reservation Division not under public notice which can be irrigated from the present distribution system without further construction expense by the Bureau, upon a rental basis under approved applications for temporary water service, at the following rates: the minimum annual charge shall be $7.50 per irrigable acre, payment of which will entitle the applicant to 5 acre-feet of water per acre. Additional water, if available, will be furnished at the rate of $2.00 per acre-foot. All charges shall be payable in advance of the delivery of water. Credit will be given for additional water paid for but not used.

3. *Annual water rental charges for lands in the Valley Division not under public notice.* Irrigation water will be furnished during the calendar year 1956 and thereafter until further notice for lands in the Valley Division not under public notice which can be irrigated from the present distribution system without further construction expense by the United States, upon a rental basis under approved applications for temporary water service, at the following rates:

(a) The minimum annual charge shall be $13.00 per irrigable acre, payment of which will entitle the applicant to 5 acre-feet of water per irrigable acre. Additional water, if available, will be furnished at the rate of $1.50 per acre-foot.

(b) The charge per calendar year for each city or town lot having a maximum width not exceeding sixty (60) feet shall be $13.00. Where lots exceed sixty (60) feet in width, each sixty (60) feet of additional width or fractional part thereof shall be considered as one additional lot.

All charges shall be payable in advance of the delivery of water. Credit will be given for additional water paid for under subdivision (a) hereof but not used.

4. *Penalties.* On all payments not made on or before the due dates, there shall be added on the following day a penalty of one-half of one percent of the amount unpaid and a like penalty of one-half of one percent of the amount unpaid on the first day of each calendar month thereafter so long as such default shall continue.

5. *Place of payment.* All payments should be made to the Agent-Cashier, Bureau of Reclamation, Yuma Air Base, or mailed to the Agent-Cashier, Bureau of Reclamation, Bin 151, Yuma, Arizona.

V. E. LARSON,
Acting Regional Director.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

SPECIAL LIVESTOCK LOAN COMMITTEES

NOTICE OF APPOINTMENT

Pursuant to the authority vested in the Secretary of Agriculture by section 2 (c) of the act of April 6, 1949 (63 Stat. 43), as amended by Public Law 115, 83d Congress, and pending the establishment of permanent Special Livestock Loan Committees pursuant to said section 2 (c), it is hereby ordered:

1. Paragraph 1 of the order of the Acting Secretary dated March 31, 1954 (19 F. R. 1940), is amended effective January 1, 1956, by deletion of reference to "Directors of Agricultural Extension," and substitution therefor of "Chairmen of the Farmers Home Administration State Advisory Committees."

2. Designations of persons to act in the stead of those holding the positions named in paragraph 1 of said order dated March 31, 1954, are terminated effective at the close of business on December 31, 1955.

Done at Washington, D. C., this 13th day of December 1955.

[SEAL] TRUE D. MORSE,
Acting Secretary.

DEPARTMENT OF COMMERCE

Bureau of Foreign Commerce

ELECTROEXPORT AND ALBERT OBERMAYER

ORDER TEMPORARILY DENYING EXPORT PRIVILEGES

In the matter of Export Elektrotechnischer Erzeugnisse trading as Electroexport and Albert Obermayer, Rotenturmstrasse 25, Vienna 1, Austria, respondents.

The respondents, Export Elektrotechnischer Erzeugnisse, trading as Electroexport, and Albert Obermayer, hereinafter referred to as Electroexport, are the subject of an investigation concerning an alleged transshipment of paraffin wax to Gdynia, Poland, which wax was exported from the United States under general license to Austria upon Electroexport's representation that it was to be used in Vienna, and the Director, Investigation Staff, Bureau of Foreign Commerce, has applied for an order temporarily denying to them all export privileges pending completion of the investigation and determination of any charges which may be brought against them. The application was made pursuant to § 382.11 (b) of the Export Control Regulations (15 CFR, Chapter III, Subchapter C), and, in accordance with the practice thereunder was referred to the Compliance Commissioner of the Bureau of Foreign Commerce who, after considering evidence in support of the application, has recommended that the application be granted to the extent hereinafter provided.

Now, upon receipt of the Compliance Commissioner's recommendation, after reviewing and considering the evidence submitted in support of the application and being of the opinion that there is reasonable ground to believe that the respondents have unlawfully transshipped to Gdynia, Poland, 350 cartons of paraffin wax exported from the United States under general license permitting such shipment to Austria, and that they have the intention to purchase large additional quantities of such wax which may be similarly transshipped in violation of the regulations under which it may be exported, and having concluded (a) that it is advisable that all United States exporters be informed by publication of this order of the provisions hereafter set forth and (b) that this order is reasonable and necessary to protect the public interest and to achieve effective enforcement of the Export Control Act, it is hereby ordered: (1) All outstanding validated export licenses held by or issued in the names of the respondents, or either of them, or in which they appear or participate as purchaser, intermediate or ultimate consignee, or otherwise, are hereby revoked and shall be returned forthwith to the Bureau of Foreign Commerce for cancellation;

(2) The respondents, and each of them, their successors or assigns, directors, officers, partners, representatives, agents, and employees, are hereby denied all privileges of participating directly or indirectly in any manner, form or capacity in an exportation of any commodity or technical data from the United States to any foreign destination, including Canada. Without limitation of the generality of the foregoing, participation in an exportation shall include and prohibit said respondents and such other persons' and firms' participation (a) as a party or as a representative of a party to any validated export license application; (b) in the obtaining or using of any validated or general export license or other export control document; (c) in the receiving, ordering, buying, selling, using, or disposing in any foreign country of any commodities in whole or in part exported from the United States; and (d) in the financing, forwarding, transporting, or other servicing of exports from the United States;

(3) This denial of export privileges shall apply not only to the named respondents, but also to any person, firm, corporation, or business organization with which they, or either of them, may be now or hereafter related by ownership, control, position of responsibility, or other connection in the conduct of trade involving exports from the United States or services connected therewith;

(4) This order shall be published in the FEDERAL REGISTER, shall be effective forthwith and shall remain in effect for a period of thirty days from the date hereof unless extended as in § 382.11 (b) provided and unless amended or modified hereafter in accordance with part (7) hereof;

(5) No person, firm, corporation, or other business organization within the United States or elsewhere, and whether or not engaged in trade relating to exports from the United States, shall, without prior disclosure of the fact to, and specific authorization from, the Bureau of Foreign Commerce, directly or indirectly in any manner, form, or capacity (a) apply for, obtain, transfer, or use any license, shipper's export declaration, bill of lading, or other export control document relating to any exportation of commodities from the United States, or (b) order, receive, buy, use, dispose of, finance, transport, forward, or otherwise service or participate in an exportation from the United States, or in a reexportation of any commodity exported from the United States, with respect to which any of the persons or companies within the scope of paragraphs (2) and (3) hereinabove have any interest or participation of any kind or nature, direct or indirect;

(6) A certified copy of this order shall be served upon the named respondents by registered mail;

(7) In accordance with the provisions of § 382.11 (c) of the export control regulations, the respondents, or either of them, may move at any time prior to the entry of a final order of suspension to vacate or modify this temporary suspension order by filing an appropriate motion therefor, supported by evidence, with the Compliance Commissioner and may request oral hearing thereon, which, if requested, shall be held before the Compliance Commissioner at Washington, D. C. at the earliest possible date.

Dated: December 13, 1955.

JOHN C. BORTON,
Director,
Office of Export Supply.

[Case No. 203]

UNION EUROPEENNE DE PRODUITS CHIMIQUES AND JEAN RICHARDS

ORDER REVOKING EXPORT LICENSES AND DENYING EXPORT PRIVILEGES

In the matter of export control violations charged against Union Europeenne de Produits Chimiques and Jean Richard, its director, 27, rue des Petites-Ecuries, Paris, France, Respondents.

Union Europeenne de Produits Chimiques and Jean Richard, its director, of Paris, France, having been charged by the Director, Investigation Staff, Bureau of Foreign Comerce of the Department of Commerce with having violated the Export Control Act of 1949, as amended, in that, as alleged, (1) they made and submitted false statements and representations for the purpose of causing to be effected exportations from the United States, and (2) they diverted or caused to be diverted and transshipped to an unauthorized destination a commodity exported from the United States under export control documents limiting its shipment to France; the respondent, Richard, having been served with the charging letter and having failed to answer the same or demand an oral hearing; and the respondent, Union, having been served with the charging letter, having admitted that it had made false representations and certifications and had diverted one shipment from France to Belgium; in accordance with the practice, this case was referred to the Compliance Commissioner.

The Compliance Commissioner heard the charges, read Union's answer and received the evidence in support of the charges. He has made his report and recommendation, which, upon the facts as hereinafter found, appears to be fair and just and is therefore adopted.

Now, after considering the entire record consisting of the charges, the answer of the respondent Union, the evidence submitted in support of the charges and the report and recommendation of the Compliance Commissioner, I hereby make the following findings of fact:

1. At all times hereinafter mentioned, Union Europeenne de Produits Chimiques and Jean Richard, its director, were engaged in the export and import business in Paris, France.

2. That heretofore, on or about the 15th day of July 1954, the said respondents did execute, for the purpose of having the same submitted to the Bureau of Foreign Commerce in support of an application for an export license to export 150 tons of borax to France, a single transaction statement in which they certified that the said borax was for ultimate use in France in the manufacture of soap and cleaning compounds and, in the said statement, they did further agree to send a supplemental statement disclosing any change of facts with respect to the transaction.

3. The export license was granted and, pursuant thereto, 100 tons of borax were exported from the United States to the respondents. In connection with such exportation, the respondents received from the American exporter a bill of lading warning them that the said borax had been licensed for exportation to France as the ultimate destination and that diversion contrary to United States law was prohibited.

4. After the said borax arrived at Antwerp, Belgium, an intermediate port, the said borax, upon instructions of J. M. A. Klaasen & Co. of Rotterdam, to whom the respondents had sold the said borax, was transshipped to Rotterdam, the Netherlands, and from there to Rostock, East Germany. The Klaasen Co. had been permanently denied all export privileges (18 F. R. 7179, Nov. 11, 1953).

5. In support of another application for a validated license to export 500 metric tons of borax, described by the applicant as sodium borate, the respondents again executed another single transaction statement in which they certified that the said "sodium borate" was not to be distributed or used in any country other than France, that it was to be used for the manufacture of soap and cleaning compounds and in the ceramics industry, and they further certified in the said statement that they would report any change of facts or intentions with respect to the transaction.

6. Respondents thereafter offered 150 tons of said "sodium borate" (borax) to the same vendee in Rotterdam, the Netherlands, to whom they had previously sold the 100 tons of borax to which reference is made in Findings 3 and 4.

7. With respect to both statements furnished by respondents for both transactions, the representations and certifications made as to intended use in France were continuing representations and respondents at no time notified their American vendor or the Bureau of Foreign Commerce of the change in facts or circumstances or that it had become their intention to sell and dispose of the commodities involved in the said transactions in a country other than France.

From which I have concluded that respondents did knowingly divert the 100 tons of borax in violation of § 381.6 of the export control regulations and that they made false representations, statements, and certifications and concealed material facts from the Bureau of Foreign Commerce for the purpose of effecting or causing to be effected exportations from the United States in violation of § 381.5 (b) (3) and (c) (3), (4) and (5) of the export control regulations.

In his report the Compliance Commissioner said:

> In this case I do not find any affirmative proof that these respondents deliberately intended that the borax involved was to be transshipped to an Iron Curtain destination. Although they did refuse to give a representative of the U. S. Embassy a complete disclosure of all the facts, the respondent Union has been frank in its answer in that it has admitted the false representations and the diversion. Although knowledge on their part of intended Iron Curtain diversion has not been proven in this case, the fact is that an ultimate consequence of their false representations and the subsequent diversion to Belgium and Rotterdam was the diversion of 100 tons of borax to East Germany.
>
> It may be that Union is under altered management (see its answer) and, in its answer, it says "• • • had we suspected for a minute that the final destinations of the borax might have been behind the Iron Curtain, then of course, we would never have sold it to Belgium." I believe that the sanction in this case should be tempered to take into consideration this statement and to give the respondents an opportunity to demonstrate by their conduct that they are willing to abide and will abide by this country's export control regulations governing the ultimate disposition of commodities exported from this country. In this connection, cosideration should also be given to the fact that respondents have been temporarily denied validated export license privileges since August 17, 1955, and to the further fact that Union has recognized, is aware of, and has admitted its wrongdoing.

Had respondents notified the Department of Commerce of their intention to resell the first lot of borax to the Klaasen firm, the diversion to East Germany could have been prevented. Now, having concluded that the action recommended by the Compliance Commissioner is fair, just and necessary to achieve effective enforcement of the law, it is hereby ordered: I. All outstanding validated export licenses in which Union Europeenne de Produits Chimiques and Jean Richard appear or participate as purchaser, intermediate or ultimate consignee, or otherwise, are hereby revoked and shall be returned forthwith to the Bureau of Foreign Commerce for cancellation.

II. Henceforth, and for a period of one year from the date hereof, each of the said respondents be, and he or it hereby is suspended from and denied all privileges of participating, directly or indirectly in any manner or capacity, in an exportation of any commodity or technical data from the United States to any foreign destination, including Canada, whether such exportation has heretofore or hereafter been completed. Without limitation of the generality of the foregoing denial of export privileges, participation in an exportation is deemed to include and prohibit participation by any of the respondents, directly or indirectly in any manner or capacity, (a) as a party or as a representative of a party to any validated export license application, (b) in the obtaining or using of any validated or general export license or other export control documents, (c) in the receiving, ordering, buying, selling, using, or disposing in any foreign country of any commodities in whole or in part exported or to be exported from the United States, and (d) in storing, financing, forwarding, transporting, or other servicing of such exports from the United States.

III. Such denial of export privileges shall extend not only to each of the respondents, but also to any person, firm, corporation, or business organization with which any of them may be now or hereafter related by ownership, control, position of responsibility, or other connection in the conduct of trade in which may be involved exports from the United States or services connected therewith.

IV. Upon condition that the respondents comply in all respects with this order, and with all other requirements of the Export Control Act of 1949, as amended, and all regulations promulgated thereunder, those respondents so complying, commencing six months following the date hereof, may engage in and enjoy all export privileges permitted by United States laws and regulations.

V. The privileges conditionally restored to any of the respondents under Part IV hereof may be revoked summarily and without notice upon a finding by the Director of the Office of Export Supply, or such other official as may at that time be exercising the duties now exercised by him, that such respondent has, at any time following the date hereof and prior to the expiration of one year from the date hereof, knowingly failed to comply with any of the conditions or provisions upon which or whereby, by Part IV hereof, he or it has been permitted to engage in any phase of the export business otherwise denied to him under Part II hereof, without prejudice to any other action which may be taken by reason of any such new or additional violation. In the event that it be so determined that a respondent has breached the condition of Part IV hereof, the suspension and denial of such respondent's export privileges shall be deemed to commence on the day of such determination and shall continue for up to six months from the date of such determination.

VI. No person, firm, corporation, partnership, or other business organization, whether in the United States or elsewhere, during any time when any respondent is prohibited under the terms hereof from engaging in any activity within the scope of Part II hereof, shall, without prior disclosure to, and specific authorization from the Bureau of Foreign Commerce, directly or indirectly in any manner or capacity (a) apply for, obtain, or use any license, shipper's export declaration, bill of lading, or other export control document relating to any such prohibited activity, (b) order, receive, buy, use, dispose of, finance, transport or forward, any commodity on behalf of or in any association with such respondent, or (c) do any of the foregoing acts with respect to any commodity or exportation in which such respondent may have an interest of any kind or nature, direct or indirect.

Dated: December 13, 1955.

JOHN C. BORTON,
Director,
Office of Export Supply.

SECURITIES AND EXCHANGE COMMISSION

[File No. 70-1850]

BELLOWS FALLS HYDRO-ELECTRIC CORP. ET AL.

ORDER RELEASING JURISDICTION OVER CERTAIN ACCOUNTING MATTERS

DECEMBER 12, 1955.

In the matter of Bellows Falls Hydro-Electric Corporation, Connecticut River Power Company, New England Power Company, New England Electric System.

New England Electric System ("NEES"), a registered holding company, and its subsidiary company, Bellows Falls Hydro-Electric Corporation ("Bellows"), have filed with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("act") Amendment No. 7 to the joint application-declaration of the above-entitled companies. By orders, dated July 13, 1948, and July 21, 1948, the Commission granted and permitted to become effective said joint application-declaration which relates, among other things, to the sale by Bellows of its utility assets to New England Power Company, another subsidiary of NEES.

In said order of July 13, 1948, the Commission authorized NEES and Bellows to allocate consolidated Federal income taxes for the taxable year 1948, in the first instance, so that NEES would receive the full tax credit for the loss claimed to be sustained in connection with said sale and reserved jurisdiction with respect to "(a) the disposition of the proposed reserve account of 'NEES to be entitled 'Reserve Re Tax Allocation', (b) the disposition of the tax credit for the loss claimed to be sustained in connection with the sale by Bellows of its utility assets and to be included in the 1948 consolidated Federal income tax return of NEES and the participating companies, and (c) the disposition of the investment account of NEES in Bellows or any amount recorded therein".

Amendment No. 7 to said joint application-declaration states that final determination of the tax credit for the loss sustained in connection with said sale by Bellows has now been agreed upon with the United States Internal Revenue Service. NEES requests that this Commission (a) release jurisdiction with respect to the above-mentioned matters, (b) grant authority to allocate consolidated Federal income taxes for the taxable year 1948 in a manner other than permitted by Rule U-45 (b) (6), and (c) approve the accounting entries with respect to the disposition of NEES' investment in Bellows as set forth in Amendment No. 7. Bellows proposes that when said accounting entries have been effected, it will take the necessary steps to effect its dissolution.

NEES and Bellows request that the order of this Commission become effective upon issuance.

Notice of the filing of said Amendment No. 7 to said joint application-declaration having been duly given in the manner prescribed by Rule U-23 and no hearing having been ordered by or requested of the Commission, and the Commission finding that the applicable provisions of the Act and the rules thereunder are satisfied and that said joint application-declaration, as further amended by said Amendment No. 7, should be granted and permitted to become effective forthwith and that the jurisdiction heretofore reserved with respect to such matters should be released:

It is ordered, Pursuant to the applicable provisions of the Act and the Rules and Regulations thereunder, that said joint application-declaration, as further amended by Amendment No. 7, be, and the same hereby is, granted and permitted to become effective forthwith, subject to the terms and conditions prescribed by Rule U-24.

It is further ordered, That the jurisdiction heretofore reserved with respect to the aforesaid accounting matters be, and the same hereby is, released.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

[File No. 30-236]

WESTERN KENTUCKY GAS CO.

ORDER DECLARING THAT APPLICANT HAS CEASED TO BE A HOLDING COMPANY

DECEMBER 12, 1955.

On March 7, 1955, this Commission, by order, permitted a declaration to become effective under the Public Utility Holding Company Act of 1935 ("act") regarding a proposed merger into Western Kentucky Gas Company ("Western Kentucky"), a registered holding company and a public utility company, of Shelbyville Gas Company ("Shelbyville"), a public utility subsidiary of Western Kentucky (Holding Company Act Release No. 12813). Thereafter Western Kentucky filed a Certificate of Notification pursuant to Rule U-24 notifying this Commission that the liquidation and dissolution of Shelbyville had been consummated.

Western Kentucky has now filed an application, pursuant to section 5 (d) of the act, seeking an order declaring that Western Kentucky is no longer a holding company.

Notice of the filing of said application having been duly given by this Commission, the Commission not having received a request for a hearing and not having ordered a hearing thereon, and it appearing to the Commission that the only remaining subsidiary of Western Kentucky, Kengas, Inc., is not a gas utility company within the meaning of the act since it distributes only liquefied petroleum gas in containers to its customers, and that, accordingly, Western Kentucky no longer, either directly or indirectly, owns, controls, or holds with power to vote any stock of any public utility or holding company and that it is appropriate to enter an order pursuant to section 5 (d) of the act declaring that Western Kentucky has ceased to be a holding company, the Commission observing no circumstance requiring the imposition of terms and conditions for the protection of investors in connection with the termination of the effectiveness of Western Kentucky's registration as a holding company.

It is ordered and declared, That Western Kentucky has ceased to be a holding company.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

[File No. 70-3431]

NEW ORLEANS PUBLIC SERVICE INC.

NOTICE OF FILING REGARDING ISSUE AND SALE OF PREFERRED STOCK AT COMPETITIVE BIDDING

DECEMBER 12, 1955.

Notice is hereby given that New Orleans Public Service Inc. ("New Orleans"), a public utility subsidiary company of Middle South Utilities, Inc., a registered holding company, has filed with this Commission an application-declaration pursuant to the Public Utility Holding Company Act of 1935 ("act"), and has designated section 6 (a), the third sentence of section 6 (b), and section 7 of said act, and Rule U-50 promulgated thereunder, as applicable to the proposed transactions, which are summarized as follows:

New Orleans, a Louisiana corporation, proposes to issue and sell, pursuant to the competitive bidding requirements of Rule U-50, 60,000 shares of -- percent Preferred Stock (Cumulative, $100 Par Value). The dividend rate for such preferred stock (which shall be a multiple of 1/25th of 1 percent, and the price, exclusive of accumulated dividends, per share to be paid to New Orleans, which price shall be not less than $100 and not more than $102.75, will be fixed by the competitive bidding. New Orleans also proposes to amend its Consolidation Agreement to authorize such Preferred Stock and to establish the characteristics thereof.

The application-declaration states that the net proceeds to be received by New Orleans from the sale of the Preferred Stock will be applied toward the cost of constructing additions and betterments to its properties. It is further stated that New Orleans' construction program for the last two months of 1955 and the year 1956 is estimated to result in expenditures of approximately $21,014,000.

The application-declaration further states that the issue and sale of such preferred stock has been expressly authorized by the Council of the City of New Orleans, a State commission, as defined in the act, of the State in which New Orleans is organized and doing business.

Notice is further given that any interested person may, not later than December 29, 1955 at 5:30 p. m., request the Commission in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law, if any, raised by said application-declaration which he desires to controvert, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D. C. At any time after said date said application-declaration, as filed or as amended, may be granted and permitted to become effective as provided in Rule U-23 of the Rules and Regulations promulgated under the act, or the Commission may grant exemption from its rules as provided in Rules U-20 (a) and U-100, or take such other action as it may deem appropriate.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster Area 77]

OREGON

DECLARATION OF DISASTER AREA

Whereas it has been reported that on or about November 11 through November 14, 1955, because of the disastrous effects of unseasonable freeze damage resulted to plant and shrub growers located in certain areas in the State of Oregon; and

Whereas the Small Business Administration has investigated and has received other reports of investigations of conditions in the areas affected; and

Whereas after reading and evaluating reports of such conditions, I find that the conditions in such areas constitute a catastrophe within the purview of the Small Business Act of 1953, as amended:

Now, therefore, as Administrator of the Small Business Administration, I hereby determine that:

1. Applications for disaster loans under the provisions of section 207 (b) (1) of the Small Business Act of 1953, as amended, may be received and considered by the Offices below indicated from plant and shrub growers whose property situated in the following Counties (including any areas adjacent to the Counties below named) suffered damage or other destruction as a result of the catastrophe above referred to:

Counties of: Clatsop, Polk, Columbia, Tillamook, Washington, Multnomah, Yamhill, Clackamas, Lincoln, Marion, Benton, Linn, Lane, Douglas, Coos, Curry, Josephine, Jackson.

Small Business Administration Regional Office, Burke Building, 905 Second Avenue, Seattle, Washington.

Small Business Administration Branch Office, Old U. S. Courthouse, 520 S. W. Morrison Street, Portland 4, Oregon.

2. A special field office to receive such applications will not be established at this time.

3. Applications for disaster loans under the authority of this declaration will not be accepted subsequent to June 30, 1956.

Dated: December 8, 1955.

WENDELL B. BARNES,
Administrator.

TITLE 7—AGRICULTURE

Chapter VII—Commodity Stabilization Service (Farm Marketing Quotas and Acreage Allotments), Department of Agriculture

PART 728—WHEAT

SUBPART — REGULATIONS PERTAINING TO WHEAT MARKETING QUOTAS FOR THE 1956 CROP OF WHEAT

GENERAL

Sec.
728.650 Basis and purpose.
728.651 Definitions.
728.652 Instructions and forms.
728.653 Normal yields.

IDENTIFICATION AND MEASUREMENT OF FARMS

728.654 Identification of farms.
728.655 Measurement of farms.
728.656 Reports and records of farm measurements.

FARM MARKETING QUOTA AND FARM MARKETING EXCESS

728.657 Marketing quotas in effect.
728.658 Farm marketing quota.
728.659 Farm marketing excess.
728.660 Notice of farm marketing excess.
728.661 Farms for which proper notice of the 1956 farm marketing quota and farm marketing excess of wheat was not issued.
728.662 Farm marketing excess adjustment.
728.663 Publication of the farm acreage allotments, marketing quotas, and marketing excesses.
728.664 Marketing quotas not transferable.
728.665 Successors in interest.
728.666 Review of quotas

MARKETING CARDS AND MARKETING CERTIFICATES

728.667 Issuance of marketing cards.
728.668 Issuance of marketing certificates.
728.669 Lost, destroyed, or stolen marketing cards or marketing certificates.
728.670 Cancellation of marketing cards and marketing certificates issued in error.

IDENTIFICATION OF WHEAT

728.671 Time and manner of identification.
728.672 Identification by marketing card.
728.673 Identification by marketing certificate.
728.674 Identification by intermediate buyer's record and report.
728.675 Wheat identified as subject to the penalty and lien for the penalty.

PENALTY

728.676 Rate of penalty.
728.677 Lien for penalty.
728.678 Payment of penalties by producers.
728.679 Payment of penalties by buyers.
728.680 Remittance of penalties to the treasurer of the county committee.
728.681 Deposit of funds.
728.682 Refunds of money in excess of the penalty.
728.683 Stored farm marketing excess.
728.684 Delivery of the farm marketing excess to the Secretary.
728.685 Refund of penalty erroneously, illegally, or wrongfully collected.
728.686 Report of violations and court proceedings to collect penalty.

RECORDS AND REPORTS

728.687 Record to be kept and reports to be made by warehousemen, elevator operators, feeders, or other processors and buyers other than intermediate buyers.
728.688 Record to be kept and reports to be made by intermediate buyers.
728.689 Buyer's special reports.
728.690 Penalty for failure or refusal to keep records and make reports.
728.691 Records to be kept and reports to be made by producers.
728.692 Data to be kept confidential.
728.693 Enforcement.

SPECIAL PROVISIONS AND EXEMPTIONS

728.694 Farms on which the wheat acreage is not in excess of 15 acres.
728.695 Farms on which the normal production of the wheat acreage is less than 200 bushels.
728.696 Experimental wheat farms.
728.697 Federal and State Wildlife Refuge Farms.
728.698 Erroneous notice of wheat acreage allotment.
728.699 Redelegation of authority.

AUTHORITY: §§ 728.650 to 728.699 issued under sec. 375, 52 Stat. 66, as amended; 7 U. S. C. 1375. Interpret or apply secs. 301, 331–339, 362–368, 372–376, 52 Stat. 38, as amended; 55 Stat. 203, as amended; 7 U. S. C. 1301, 1331–1340, 1362–1368, 1372–1376.

GENERAL

§ 728.650 *Basis and purpose.* The regulations contained in §§ 728.650 to 728.699, inclusive, are issued pursuant to and in accordance with the Agricultural Adjustment Act of 1938, as amended, and govern the identification and measurement of farms; the amount, adjustment, and review of the farm marketing quota and farm marketing excess; the issuance of marketing cards and certificates; the identification of marketings of wheat as subject to or not subject to the penalty and lien for the penalty; the rate of the penalty and the manner in which penalties shall be paid by producers and buyers; the refunding of penalty overpay-

ments; the postponement or avoidance of penalty on excess wheat by storage, by delivery to the Secretary of Agriculture, or, in a subsequent year, by underplanting the allotment or producing a less than normal crop; the records and reports required to be made by wheat producers and handlers; and special provisions and exemptions applicable to farms on which 15 acres or less of wheat are planted, to farms on which the normal production of the wheat acreage is less than 200 bushels, to wheat produced by publicly-owned experiment stations, and to wheat grown on Federal and State Wildlife Refuge Farms. Prior to preparing §§ 728.650 to 728.699 inclusive, public notice (20 F. R. 5974) of the Secretary's intention to formulate and issue the regulations was given in accordance with the Administrative Procedure Act (5 U. S. C. 1003).

§ 728.651 *Definitions.* As used in this subpart and in all forms and documents in connection therewith, unless the context or subject matter otherwise requires, the following terms shall have the following meanings:

(a) "Department" means the United States Department of Agriculture.

(b) "Act" means the Agricultural Adjustment Act of 1938 and any amendments or supplements thereto.

(c) "Secretary" means the Secretary of Agriculture of the United States, or the officer of the Department acting in his stead pursuant to delegated authority.

(d) "Director" means the Director of the Grain Division, Commodity Stabilization Service, United States Department of Agriculture.

(e) "Committee" means according to context, one of the several committees defined as follows:

(1) "State committee" means the persons designated by the Secretary as the State Agricultural Stabilization and Conservation Committee of the Commodity Stabilization Service.

(2) "County committee" means the persons elected within a county as the county committee, pursuant to the regulations governing the selection and functions of the Agricultural Stabilization and Conservation county and community committees.

(3) "Community committee" means the persons elected within a community as a community committee pursuant to the regulations governing the selection and functions of the Agricultural Stabilization and Conservation county and community committees.

(4) "Review committee" means the committee appointed by the Secretary of Agriculture to review farm marketing quotas as provided in section 363 of the act.

(f) "Person" means an individual, partnership, association, corporation, estate, trust, or other business enterprise or legal entity, and wherever applicable, a State, political subdivision of a State, the Federal Government, or any agency thereof.

(g) "County office manager" means the person employed by the county committee to execute the policies of the county committee and be responsible for the day-to-day operations of the ASC county office, or the person acting in such capacity.

(h) "Landlord" or "owner" means a person who owns land.

(i) "Tenant" means a person other than a sharecropper who rents land from another person, whether or not he rents such land or part thereof to another person.

(j) "Sharecropper" means a person who works a farm in whole or in part under the general supervision of the operator and is entitled to receive for his labor a share of a crop produced thereon or of the proceeds thereof.

(k) "Operator" means the person who is in charge of the supervision and conduct of the farming operations on the entire farm.

(l) "Producer" or "farmer" means a person who as owner, landlord, tenant, or sharecropper is entitled to all or a share of the 1956 wheat crop or of the proceeds thereof.

(m) "Buyer" means a person who buys wheat.

(n) "Transferee" means a person who acquires wheat from a producer or any other person by barter, exchange or gift.

(o) "Intermediate buyer" means any buyer or transferee who purchases or acquires any wheat prior to the time the wheat so purchased or acquired has been marketed either (1) to a warehouseman, elevator operator, feeder, or processor, or (2) to any other grain dealer who conducts his business in a manner substantially the same as a warehouseman or elevator operator.

(p) "Farm" means all adjacent or nearby farm or range land under the same ownership which is operated by one person, including also:

(1) Any other adjacent or nearby farm or range land which the county committee determines is operated by the same person as a part of the same unit in producing range livestock, or with respect to the rotation of crops and with workstock, farm machinery, and labor, substantially separate from that for any other land; and

(2) Any field-rented tract (whether operated by the same or another person) which, together with any other land included in the farm, constitutes a unit with respect to the rotation of crops.

A farm shall be regarded as located in the county or administrative area in which the principal dwelling is situated or, if there is no dwelling thereon, it shall be regarded as located in the county or administrative area in which the major portion of the farm is located.

(q) "Farm acreage allotment" means the wheat acreage allotment established for the farm under §§ 728.610 through 728.624 as published in the FEDERAL REGISTER under date of March 18, 1955 (20 F. R. 1632), and amendments thereto, including any limitations with respect to any class of wheat established for the farm for 1956.

(r) "Wheat cover crop" means the acreage of wheat which does not reach maturity because it is while still green, turned under, cut off or pastured off, to the extent that wheat will not mature as grain, not later than 30 days prior to the date wheat harvest normally begins in the county or areas within the county (such date to be established by the Secretary upon recommendation of the county and State committees).

The dates in each county or areas of a county by which the acreage of wheat on the farm must be utilized in the prescribed manner as wheat cover crop are as follows:

ARKANSAS

May 20, 1956: All counties.

CALIFORNIA

May 1, 1956: Imperial.

May 15, 1956: Fresno, Kern (except for Tehachapi and Temblor Districts), Kings, Madera, Merced, Tulare.

June 1, 1956: Kern (Tehachapi and Temblor Districts), Los Angeles, Mariposa, Nevada, Orange, Placer, Riverside, San Bernardino, San Diego, San Joaquin, Stanislaus, Ventura.

June 15, 1956: Alameda, Amador, Calaveras, El Dorado, Contra Costa, Lake, Marin, Monterey, Napa, San Benito, San Luis Obispo, San Mateo, Santa Clara, Santa Cruz, Sonoma, Butte, Colusa, Glenn, Sacramento, Solano, Sutter, Tehama, Yola, Yuba, Santa Barbara, Shasta (for Cottonwood and Anderson Districts), Tuolumne.

July 1, 1956: Alpine, Inyo, Mono.

July 15, 1956: Siskiyou (for Shasta Valley), Mendocino.

August 1, 1956: Lassen, Modoc, Plumas, Siskiyou (except for Shasta Valley), Trinity, Shasta (except for Cottonwood and Anderson Districts), Sierra.

COLORADO

June 5, 1956: Baca, Bent, Cheyenne, Crowley, Kiowa, Kit Carson, Lincoln, Otero, Prowers, Elbert (all land E. Range 63W).

June 10, 1956: Adams, Arapahoe, Logan, Morgan, Phillips, Sedgwick, Washington, Weld, Yuma.

June 15, 1956: Boulder, Douglas, El Paso, Huerfano, Jefferson, Larimer, Las Animas, Pueblo, Elbert (all land W. Range 62W).

June 20, 1956: Custer, Delta, Dolores, Fremont, La Plata, Mesa, Montezuma, Montrose, Ouray, San Miguel.

July 15, 1956: Alamosa, Archuleta, Chaffee, Conejos, Costilla, Eagle, Garfield, Grand, Gunnison, Jackson, Moffat, Park, Pitkin, Rio Blanco, Rio Grande, Routt, Saguache, Teller.

DELAWARE

May 31, 1956: All counties.

GEORGIA

April 25, 1956: Area I—Quitman, Randolph, Terrell, Lee, Crisp, Wilcox, Dodge, Wheeler, Montgomery, Toombs, Candler, Bulloch, Screven and all counties south thereof.

May 10, 1956: Area II—Haralson, Paulding, Cobb, Fulton, Gwinnett, Barrow, Jackson, Madison, Franklin and all counties south to Area I.

May 25, 1956: Area III—Polk, Bartow, Cherokee, Forsyth, Hall, Banks, Stephens, and all countries north thereof.

IDAHO

NONIRRIGATED

July 1, 1956: Ada, Canyon, Gem, Owyhee, Payette, Cassia, Lincoln, Minidoka, Twin Falls, Washington.

July 15, 1956: Gooding, Jerome, Bannock, Bingham, Caribou, Franklin, Oneida, Power, Bonneville, Jefferson, Blaine.

August 1, 1956: Adams, Boise, Elmore, Camas, Bear Lake, Butte, Custer, Clark, Fremont, Lemhi, Madison, Teton.

August 15, 1956: Valley.

IRRIGATED

July 1, 1956: Ada, Canyon, Elmore, Gem, Owyhee, Payette, Washington, Twin Falls.

July 15, 1956: Cassia, Gooding, Jerome, Lincoln, Minidoka, Bannock, Franklin, Oneida, Power.

August 1, 1956: Adams, Boise, Blaine, Camas, Bingham, Caribou, Bonneville, Clark, Jefferson.

August 15, 1956: Valley, Bear Lake, Butte, Custer, Fremont, Lemhi, Madison, Teton.

ELEVATION UNDER 3,500 FEET

July 15, 1956: Boundary, Kootenai, Nez Perce.

August 1, 1956: Benewah, Bonner, Clearwater, Idaho, Latah, Lewis.

ELEVATION OVER 3,500 FEET

August 1, 1956: Boundary, Nez Perce.

August 15, 1956: Benewah, Bonner, Clearwater, Idaho, Kootenai, Latah, Lewis.

ILLINOIS

May 25, 1956: Alexander, Bond, Calhoun, Christian, Clark, Clay, Clinton, Coles, Crawford, Cumberland, Douglas, Edgar, Edwards, Effingham, Fayette, Franklin, Gallatin, Green, Hamilton, Hardin, Jackson, Jasper, Jefferson, Jersey, Johnson, Lawrence, Macoupin, Madison, Marion, Massac, Monroe, Montgomery, Morgan, Moultrie, Perry, Pike, Pope, Pulaski, Randolph, Richland, St. Clair, Saline, Sangamon, Scott, Shelby, Union, Wabash, Washington, Wayne, White, Williamson.

June 10, 1956: Adams, Boone, Brown, Bureau, Carroll, Cass, Champaign, Cook, DeKalb, DeWitt, DuPage, Ford, Fulton, Grundy, Hancock, Henderson, Henry, Iriquois, Jo Daviess, Kane, Kankakee, Kendall, Knox, Lake, LaSalle, Lee, Livingston, Logan, McDonough, McHenry, McLean, Macon, Marshall, Mason, Menard, Mercer, Ogle, Peoria, Piatt, Putnam, Rock Island, Schuyler, Stark, Stephenson, Tazewell, Vermillion, Warren, Whiteside, Will, Winnebago, Woodford.

INDIANA

June 15, 1956: Allen, De Kalb, Elkhart, Fulton, Jasper, Kosciusko, La Grange, Lake, La Porte, Marshall, Newton, Noble, Porter, Pulaski, St. Joseph, Starke, Steuben, Whitley.

June 1, 1956: All other counties.

IOWA

WINTER WHEAT

June 1, 1956: All counties.

SPRING WHEAT

June 10, 1956: All counties.

KANSAS

May 25, 1956: Allen, Barber, Bourbon, Butler, Chautauqua, Cherokee, Comanche, Cowley, Crawford, Elk, Greenwood, Harper, Harvey, Kingman, Labette, Montgomery, Neosho, Pratt, Reno, Sedgwick, Sumner, Wilson, Woodson.

June 1, 1956: Anderson, Atchison, Barton, Brown, Chase, Clark, Cloud, Clay, Coffey, Dickinson, Doniphan, Douglas, Edwards, Ellsworth, Ford, Franklin, Geary, Grant, Gray, Haskell, Hodgeman, Jackson, Jefferson, Johnson, Kiowa, Leavenworth, Lincoln, Linn, Lyon, McPherson, Marion, Marshall, Meade, Miami, Morris, Morton, Nemaha, Osage, Ottawa, Pawnee, Pottawatomie, Republic, Rice, Riley, Rush, Saline, Seward, Shawnee, Stafford, Stanton, Stevens, Wabaunsee, Washington, Wyandotte.

June 5, 1956: Decatur, Ellis, Finney, Gove, Graham, Greeley, Hamilton, Jewell, Kearny, Lane, Logan, Mitchell, Ness, Norton, Osborne, Phillips, Rooks, Russell, Scott, Sheridan, Smith, Trego, Wallace, Wichita.

June 10, 1956: Cheyenne, Rawlins, Sherman, Thomas.

KENTUCKY

June 1, 1956: All counties.

MARYLAND

June 1, 1956: Anne Arundel, Calvert, Charles, Caroline, Cecil, Dorchester, Kent, Prince Georges, St. Marys, Somerset, Queen Annes, Talbot, Wicomico, Worcester.

June 10, 1956: Baltimore, Carroll, Frederick, Harford, Howard, Montgomery, Washington.

June 20, 1956: Allegany and Garrett.

MICHIGAN

June 10, 1956: All counties south of and including: Oceana, Newaygo, Mecosta, Isabella, Midland, Bay, Huron.

June 15, 1956: All other counties in the lower Peninsula.

June 25, 1956: Upper Peninsula counties.

MINNESOTA

June 30, 1956: All counties.

MISSOURI

June 1, 1956: All counties south of the Missouri River.

June 10, 1956: All counties north of the Missouri River.

MONTANA

WINTER WHEAT

July 11, 1956: All counties.

SPRING WHEAT

July 21, 1956: All counties.

NEBRASKA

June 1, 1956: Adams, Burt, Butler, Cass, Clay, Colfax, Cuming, Dodge, Douglas, Fillmore, Franklin, Frontier, Furnas, Gage, Gosper, Hall, Hamilton, Harlan, Jefferson, Johnson, Kearney, Lancaster, Nemaha, Nuckolls, Otoe, Pawnee, Phelps, Red Willow, Richardson, Saline, Sarpy, Saunders, Seward, Thayer, Thurston, Washington, Webster, York.

June 15, 1956: Antelope, Arthur, Blaine, Boone, Boyd, Brown, Buffalo, Cedar, Chase, Cherry, Custer, Dakota, Dawson, Dixon, Dundy, Garfield, Grant, Greeley, Hayes, Hitchcock, Holt, Hooker, Howard, Keith, Keya Paha, Knox, Lincoln, Logan, Loup, McPherson, Madison, Merrick, Nance, Perkins, Pierce, Platte, Polk, Rock, Sherman, Stanton, Thomas, Valley, Wayne, Wheeler.

June 20, 1956: Banner, Box Butte, Cheyenne, Dawes, Deuel, Garden, Kimball, Morrill, Scotts Bluff, Sheridan, Sioux.

NEW JERSEY

June 1, 1956: Atlantic, Burlington, Camden, Cape May, Cumberland, Gloucester, Ocean, Salem.

June 8, 1956: Mercer, Middlesex, Monmouth, Somerset, Union.

WASHINGTON

COUNTY, AREA AND TYPE OF WHEAT, AND DATES

Adams: Winter Wheat, June 30, 1956; Spring Wheat, July 20, 1956.

Asotin: All wheat: 1 and 4, July 30, 1956; 2, July 1, 1956; 3, July 20, 1956; 5, July 15, 1956.

Benton: Winter Wheat, June 25, 1956; Spring Wheat (irrigated), July 15, 1956.

Chelan: Area A—Winter Wheat, August 25, 1956; Spring Wheat, September 1, 1956. Area B—Winter Wheat, July 25, 1956; Spring Wheat, August 10, 1956.

Clallam: All wheat, July 15, 1956.

Clark: All wheat, July 20, 1956.

Columbia: McKay and Harmony communities—Winter Wheat, June 25, 1956; Spring Wheat, July 10, 1956. Huntsville, Columbia, Dayton, Whitstone and Turner communities—Winter Wheat, July 5, 1956; Spring Wheat, July 20, 1956. Dittemore and Star communities—Winter Wheat, July 10, 1956; Spring Wheat, July 30, 1956.

Cowlitz: All wheat, July 20, 1956.

Douglas: Winter Wheat, July 15, 1956; Spring Wheat, August 10, 1956.

Ferry: Winter Wheat, August 15, 1956; Spring Wheat, August 30, 1956.

Franklin: All wheat, June 25, 1956.

Garfield: Central Ferry area, June 15, 1956. Dodge, Ping, Gould City area, June 25, 1956. Mayview, Pataha Flat, Zumwalt, Dutch Flat and Lower Alpowa areas, July 10, 1956. Upper Alpowa, Peola, Columbia Center and Scoggin area, July 25, 1956.

Grant: All areas except sub-irrigated section of Wilson Creek community, June 30, 1956. Wilson Creek sub-irrigated section, August 10, 1956.

Grays Harbor: All wheat, July 15, 1956.

Island: All wheat, July 15, 1956.

Jefferson: All wheat, July 15, 1956.

King: All wheat, July 15, 1956.

Kitsap: All wheat, July 15, 1956.

Kittitas: All wheat, August 10, 1956.

Klickitat: East of Rock Creek and the Goodnoe Hills Area—Winter Wheat, June 30, 1956; Spring Wheat, July 10, 1956. West of Rock Creek and West of Goodnoe Hills Area—Winter Wheat, July 10, 1956; Spring Wheat, July 30, 1956.

Lewis: All wheat, July 20, 1956.

Lincoln: North of Highway No. 2 and Davenport-Harrington-Tokio Road East, July 25, 1956. South of Highway No. 2, July 15, 1956.

Mason: All wheat, July 1, 1956.

Okanogan: A, B, H, M, communities—Winter Wheat, July 10, 1956; Spring Wheat, July 30, 1956. C, D, E, F, G, I, J, K, L, N, O, communities—Winter Wheat, August 1, 1956; Spring Wheat, August 20, 1956.

Pacific: All wheat, July 15, 1956.

Pend Oreille: All wheat, August 15, 1956.

Pierce: All wheat, August 1, 1956.

San Juan: All wheat, August 15, 1956.

Skagit: All wheat, July 15, 1956.

Skamania: All wheat, July 15, 1956.

Spokane: Area due west on north boundary of township 24 to where it intercedes the east boundary of range 42 and then due south to county line, August 5, 1956. All the remainder of the county, July 20, 1956.

Stevens: Winter Wheat, July 15, 1956; Spring Wheat, August 15, 1956.

Thurston: All wheat, July 15, 1956.

Wahkiakum: All wheat, July 31, 1956.

Walla Walla: Dryland areas below elevation of Airport, July 1, 1956. All other dryland areas and irrigated section, August 1, 1956.

Whatcom: All wheat, July 15, 1956.

Whitman: Eastern Whitman, July 25, 1956; Western Whitman, July 10, 1956.

Yakima: Lower Valley and Glade, June 30, 1956; Central Area, August 10, 1956; Upper Valley, August 31, 1956.

WEST VIRGINIA

June 5, 1956: All counties.

WISCONSIN

June 20, 1956: Adams, Columbia, Crawford, Dane, Dodge, Dunn, Eau Claire, Fond du Lac, Grant, Green, Greenlake, Iowa, Jackson, Jefferson, Juneau, Kenosha, La Crosse, Lafayette, Marquette, Milwaukee, Monroe, Ozaukee, Pepin, Portage, Racine, Richland, Rock, Sauk, Trempealeau, Vernon, Walworth, Washington, Waukesha, Waushara, Winnebago.

July 5, 1956: Barron, Brown, Buffalo, Burnett, Calumet, Chippewa, Clark, Door, Kewaunee, Langlade, Lincoln, Manitowoc, Marathon, Marinette, Oconto, Oneida, Outagamie, Pierce, Polk, Price, Rusk, St. Croix, Sawyer, Shawano, Sheboygan, Taylor, Vilas, Washburn, Waupaca, Wood.

July 15, 1956: Ashland, Bayfield, Douglas, Florence, Forest, Iron.

WYOMING

WINTER WHEAT

June 20, 1956: Goshen, Laramie, Platte.

June 25, 1956: Converse.

July 1, 1956: Carbon, Fremont, Hot Springs, Johnson, Natrona, Niobrara, Sheridan, Washakie.

July 15, 1956: Albany, Big Horn, Campbell, Crook, Park, Weston.

August 1, 1956: Lincoln, Sublette, Sweetwater, Teton, Unita.

SPRING WHEAT

July 10, 1956: Converse.

July 15, 1956: Johnson, Niobrara, Sheridan.

August 1, 1956: Crook, Weston.

(s) "Wheat mixture" means a mixture of wheat and other small grains (excluding vetch, Austrian winter peas, rough peas, and flax) containing, when seeded, less than 50 percent by weight of wheat and which when harvested produced less than 50 percent of wheat by weight. An acreage will not be considered as having been devoted to a wheat mixture if the crops other than wheat fail to reach maturity and the wheat is permitted to reach maturity.

(t) "Wheat mixture exemption counties" means counties in which the seeding of wheat mixtures is a normal farming practice determined to be as follows: All counties in the States of Arkansas, Georgia, Kentucky, Minnesota, North Carolina, South Carolina, Tennessee, Virginia and Wisconsin; in the State of Idaho the counties of Ada, Bannock, Bingham, Blaine, Boise, Bonneville, Butte, Camas, Canyon, Caribou, Cassia, Clark, Elmore, Fremont, Gem, Gooding, Jefferson, Jerome, Lincoln, Madison, Minidoka, Oneida, Owyhee, Payette, Power, Teton, Twin Falls and Washington; in the State of Oregon the counties of Benton, Clakamas, Douglas, Lane, Linn, Malheur, Marion, Polk, Washington and Yamhill; and in the State of West Virginia, Monroe county.

(u) "Wheat acreage" means any acreage of seeded or self-seeded (volunteer) wheat excluding any acreage (1) of a wheat mixture in wheat-mixture counties, (2) of wheat cover crop, (3) in case of a delayed notice of 1956 acreage of wheat, of unharvested wheat plowed or disced under within 15 days after such notice has been mailed to the operator of the farm, and (4) of unharvested wheat in excess of the allotment which is completely destroyed by some cause beyond the control of the operator prior to 30 days before the date wheat harvest normally begins in the county (as determined under paragraph (r) of this section), or within 15 days after notice of the acreage of wheat is mailed to the operator of the farm, unless the operator or his representative indicates to the county ASC office or to an authorized representative thereof that such destroyed acreage should be classified as

wheat acreage. Notice of 1956 Acreage of Wheat (Form CSS–597), if practicable, should be mailed to the operator of the farm on which the first inspection shows there is an excess acreage of wheat at least 15 days prior to the date established under paragraph (r) of this section for utilizing wheat acreage as wheat cover crop; however, if for any reason the notice is not so mailed it shall be mailed as soon thereafter as possible and upon mailing shall be fully effective and construed as a delayed notice under this paragraph. The acreage of wheat as determined by the first inspection and as stated on Form CSS–597 shall be considered as "wheat acreage" if the farm operator or his representative fails to notify the ASC county office by the date specified on Form CSS–597 of his intention to adjust the wheat acreage to the farm allotment and pay the cost of remeasurement, except where a farm is to be revisited because of an acreage of volunteer wheat as provided in § 728.655 (e) (2). The date specified on the Form CSS–597 for notifying the county office of an intention to adjust shall coincide with the latest date on which the adjustment may be made.

(v) "Excess wheat acreage" means the acreage of wheat determined for the farm which is in excess of the farm acreage allotment, except that there shall be no excess wheat acreage for any farm on which (1) the wheat acreage does not exceed 15 acres, (2) the normal yield times the wheat acreage is less than 200 bushels, (3) the wheat is grown for experimental purposes only by a publicly-owned experiment station, or (4) the wheat is produced on a Federal or State wildlife refuge farm solely for wildlife feed and for seed for the production of wildlife feed on such wildlife refuge farm.

(w) "Normal yield" means the number of bushels of wheat established as the normal yield per acre for the farm under § 728.653.

(x) "Actual yield" means the number of bushels of wheat determined by dividing the number of bushels of wheat produced on the farm in 1956 by the 1956 wheat acreage on the farm.

(y) "Normal production" of any number of acres means the normal yield of wheat for the farm times such number of acres.

(z) "Actual production" of any number of acres means the actual yield of wheat per acre for the farm times such number of acres.

(aa) "Farm marketing quota" means the wheat marketing quota established under the Act for the farm for the 1956 crop.

(bb) "Farm marketing excess" means the amount of wheat determined for any farm under § 728.659 or § 728.662, whichever is applicable.

(cc) "Marketing year" means the period beginning July 1, 1956, and ending June 30, 1957, both dates inclusive.

(dd) "Market" means to dispose of wheat, in raw or processed form, by voluntary or involuntary sale, barter, or exchange, or by gift, or by feeding (in any form) to poultry or livestock which, or the products of which, are sold, bartered, or exchanged, or are to be so disposed of.

(1) The term "sale" means any transfer of title to wheat by a producer by any means other than barter, exchange, or gift. The penalty on excess wheat is due regardless of what use is made of the excess wheat.

(2) The terms "barter" and "exchange" mean transfer of title to wheat by a producer in return for wheat or any other commodity, service, or property, in cases where the value of the wheat or such other commodity, service or property is not considered in terms of money, or the transfer of title to wheat by a producer in payment of a fixed rental or other charge for land, or the payment of an amount of wheat in lieu of a cash charge for harvesting or milling wheat (commonly called "toll wheat").

(3) The term "gift" means any transfer of title to wheat accompanied by delivery of the wheat by a producer which takes effect immediately and irrevocably and is made without any consideration or compensation therefor.

(4) "Marketed," "marketing," and for "market" shall have meaning corresponding to the term "market" in the connection in which they are used.

(ee) "Penalty" means the penalty provided in paragraph (2) of Public Law No. 74, 77th Congress, as amended by section 3 of Public Law No. 117, 83d Congress.

(ff) "Treasurer of the county committee" means the county office manager or the person designated by him to act as treasurer of the ASC county committee.

§ 728.652 *Instructions and forms.* The Director shall cause to be prepared and issued such forms as are necessary and shall cause to be prepared such instruction with respect to internal management as are necessary for carrying out the regulations in this part. Such forms and instructions shall be approved by, and the instructions shall be issued by, the Deputy Administrator for Production Adjustment, Commodity Stabilization Service.

§ 728.653 *Normal yields*—(a) *Farms for which normal yields will be determined.* The county committee will determine a normal yield for each farm for which a farm marketing excess is determined for the 1956 crop, for each farm for which a request is made to the county committee by the operator prior to seeding, and for each farm as required for the purposes of the provisions of § 728.683 (h) and (i). Farm normal yields shall be determined and documented in a manner approved by the State committee and such determinations shall be subject to review and revision by or on behalf of the State committee.

(b) *Yields based on reliable records.* Where reliable records of the actual average yield per acre for all of the ten calendar years immediately preceding the calendar year in which the yield is determined are presented by the farmer or are available to the county committee, the normal yield per acre of wheat for the farm shall be determined to be the average of such yields, adjusted for abnormal weather conditions and trends in yields.

(c) *Appraised yields.* If for any year of such 10-year period records of the actual average yield are not available, or there was no actual yield, the normal yield per acre of wheat for the farm shall be appraised by the county committee, taking into consideration abnormal weather conditions during such 10-year period, the normal yield for the county, and the yields in years for which data were available. Where the normal yield for the county is not considered representative of the normal yield for the farm, the county committee in appraising the normal yield for the farm shall take into consideration in lieu thereof the yields obtained on farms in the same locality which are similar with respect to types of soil, topography, and farming practices associated with the production of wheat.

IDENTIFICATION AND MEASUREMENT OF FARMS

§ 728.654 *Identification of farms.* Each farm as operated for the 1956 crop of wheat shall be identified by a farm serial number, assigned by the county committee, which shall not be changed, and all records pertaining to marketing quotas for the 1956 crop of wheat shall be identified by the farm serial number.

§ 728.655 *Measurement of farms.* The county committee shall provide for the measurement of all farms in the county having a 1956 wheat acreage allotment and any other farms in the county on which the committee has reason to believe there is wheat which could be available for harvest in 1956, regardless of its intended use, for the purposes of ascertaining with respect to each of such farms the acreage of wheat and whether such acreage is in excess of the farm wheat acreage allotment for 1956. A farm will be considered as being located in the county in which is located the county ASC office from which the 1956 wheat farm acreage allotment notice was sent to the operator and shall be retained in such status until the next crop year. Measurement shall be made under the general supervision of the county committee in accordance with the following provisions:

(a) *Reporter.* The measurement on the farm shall be made by an employee of the county committee who has been designated as a reporter and determined to be qualified to carry out the duties of a reporter by the county office manager. A reporter may be assisted in measurement of a farm by another reporter, community, county or State committeeman, State committee representative, any employee of the county ASC office when authorized by the county office manager, or by any employee of the Department when authorized by the Deputy Administrator for Production Adjustment, Commodity Stabilization Service. The reporter may request the operator or producer, or his representative, to designate all fields on the farm being utilized for growing wheat and otherwise to assist in measuring the farm. If requested,

the operator or producer, or his representative, shall so designate all fields being utilized for growing wheat and may otherwise assist in measuring the farm. The reporter may utilize any such assistance from the operator or producer, or his representative.

(b) *Assignment.* The county office manager shall have responsibility for assigning in writing the farms in the county to be measured by a reporter. Upon request of any interested producer the reporter shall obtain certification from the county office manager that the reporter is the county office representative appointed to determine the wheat acreage on the farm in which the producer is interested.

(c) *Farm visit.* A reporter shall visit each farm assigned to him for measurement and enter thereon if such entry will facilitate measurement. Upon request he will exhibit to the farm operator, producer, or owner, his assignment to measure the farm.

(d) *Methods of measurement.* Measurement may be made by identification of fields or parts of fields by use of a map, aerial photograph, or by means of a steel or metallic tape or chain, or rod and chain, or by use of a measuring wheel when authorized by the Deputy Administrator for Production Adjustment, Commodity Stabilization Service, or by a combination of one or more of the foregoing methods. Measurement shall also be deemed to include an estimate when made in compliance with the provisions of paragraph (e) (1) of this section. The measurement will be entered by the reporter on the Form CSS–578 and filed in the county ASC office. Computations of acreages shall be made by an employee in the county ASC office from the data so obtained and the use of a planimeter or rotometer in connection therewith is authorized.

(e) *Measurement of wheat acreage.* (1) Upon his first visit to the farm for purposes of measurement the reporter assigned thereto shall (i) estimate the acreage planted to wheat including volunteer wheat and wheat mixtures in wheat-mixture counties where the total acreage of wheat is obviously less than 10 acres and all producers of wheat on the farm or their authorized representatives indicate that they will not apply for price support on 1956 wheat produced on the farm; and (ii) in all other cases measure all acreages on which wheat is growing except fields or parts of fields which are identified by the operator or producer as being fields of volunteer wheat. The acreages of volunteer wheat may be measured, and if not measured shall be estimated.

(2) Farms required to be measured under the provisions of subparagraph (1) (ii) of this paragraph which from such measurement are found to have acreage on which wheat is growing in excess of the 1956 farm wheat acreage allotment shall be revisited by a reporter for the purposes of a second measurement after the period for adjusting excess acreage prior to harvest has expired, except that a revisit shall not be made to any such farm if the farm operator or his representative fails to notify the ASC county office by the date specified on Notice of 1956 Acreage of Wheat (Form CSS–597) of his intention to adjust the excess acreage on the farm, unless such excess acreage is due solely to an acreage of volunteer wheat in which case the farm shall be revisited by a reporter without such notice from the operator or his representative. The cost of any remeasurement under this paragraph shall be borne by the producer, except that no charge for remeasurement shall be made for the second visit to those farms where the first inspection shows an excess acreage due solely to an acreage of volunteer wheat. The cost to the producer shall not exceed the cost of the remeasurement as estimated by the county committee and the producer shall be notified of the cost of the remeasurement. On this visit all acreage devoted to wheat which has not been adjusted prior to harvest so as not to qualify as wheat acreage in accordance with the regulations in this subpart or which does not qualify as a wheat mixture in wheat-mixture exemption counties shall be measured. In making such measurements, measurement data acquired on the first visit may be utilized.

(f) *Prior measurements.* Measurements made prior to the effective date of the regulations in this subpart, and in accordance with procedures then in effect may be utilized where pertinent for the purpose of ascertaining with respect to any farm the 1956 wheat acreage and the wheat acreage in excess of the 1956 farm wheat acreage allotment.

§ 728.656 *Reports and records of farm measurements.* A record shall be kept in the ASC county office of the measurements made on all farms. There shall be filed with the ASC State office a written report setting forth for each farm for which a farm marketing excess is determined (a) the farm serial number, (b) the name of the operator, (c) the total acreage in cultivation, (d) the farm acreage allotment, and (e) the wheat acreage.

FARM MARKETING QUOTA AND FARM MARKETING EXCESS

§ 728.657 *Marketing quotas in effect.* Marketing quotas for the 1956 crop of wheat shall be applicable in the 1956 commercial wheat-producing area which comprises all States in the continental United States except the States of Arizona, Alabama, Connecticut, Florida, Louisiana, Massachusetts, Mississippi, Maine, New Hampshire, Nevada, Rhode Island and Vermont. Wheat marketing quotas shall be applicable to all wheat of the 1956 crop in the commercial wheat-producing area notwithstanding that it may be available for marketing prior to the beginning of the marketing year or subsequent to the end of the marketing year. Notwithstanding the inapplicability of wheat marketing quotas outside the 1956 commercial wheat-producing area, the regulations in this subpart shall be applicable to buyers and transferees outside such area.

§ 728.658 *Farm Marketing quota.* The farm marketing quota for any farm for the 1956 crop of wheat shall be that number of bushels of wheat produced less the amount of the farm marketing excess for the farm.

§ 728.659 *Farm marketing excess.* The farm marketing excess for the 1956 crop of wheat for any farm shall be the normal production of the wheat acreage on the farm in excess of the farm acreage allotment therefor. The farm marketing excess for any crop shall not be larger than the amount by which the actual production of such crop of wheat on the farm exceeds the normal production of the farm wheat acreage allotment if the producer establishes such actual production to the satisfaction of the Secretary.

§ 728.660 *Notice of farm marketing excess.* Written notice of the farm marketing excess for a farm shall be mailed to the operator of each farm for which a farm marketing excess is determined. Notice so given shall constitute notice to each producer having an interest in the 1956 wheat crop produced or to be produced on the farm. A copy of such notice shall also be mailed on the same date to each other wheat producer on the farm. Each notice shall contain a brief statement of the procedure whereby application for a review of the farm marketing quota, farm marketing excess, or any determination made in connection therewith may be had in accordance with section 363 of the act. A record of each notice containing the date of mailing the notice to the operator of the farm shall be kept among the permanent records in the ASC county office and upon request a copy thereof shall be furnished without charge to any person who as operator, landlord, tenant, or sharecropper is interested in the wheat produced in 1956 on the farm for which the notice is given. Each notice shall contain the information necessary in each case to inform the producer as to the basis for the determination set forth in the notice and the effect thereof and shall be on Form MQ–93—Wheat (1956).

§ 728.661 *Farms for which proper notice of 1956 farm marketing quota and farm marketing excess of wheat was not issued.* Where, for any reason, proper notice of the farm marketing quota and farm marketing excess and of the producer's right to obtain a downward adjustment in the farm marketing excess for his farm on account of actual production, and of his right to store or deliver to the Secretary the farm marketing excess of wheat established for the farm was not issued to the producer in sufficient time to allow him 30 days prior to the time in which he was required to make application for a downward adjustment, or to store or deliver to the Secretary the farm marketing excess, as prescribed by §§ 728.660, 728.662, 728.683 and 728.684, the producer shall be so notified by the county committee on Form MQ–93—Wheat (1956) and the producer may, within 30 days from the date such notice is mailed to him apply to the county committee for a downward adjustment in the amount of the farm marketing excess and may, within 30 days from the date such notice is mailed store or deliver to the Secretary the farm marketing excess as provided in §§ 728.662, 728.683 and 728.684. In the event application for downward adjustment in the farm marketing excess is made by the producer, a revised notice on Form MQ–93—Wheat (1956) with a copy of the determination of the county committee as provided in § 728.662 (b) shall be mailed to the operator of the farm, to the applicant if he is not such operator, and to all other interested producers.

§ 728.662 *Farm marketing excess adjustment*—(a) *Adjustment in the amount of the farm marketing excess.* Any producer having an interest in the wheat produced in 1956 on any farm for which there is a farm marketing excess may (1) within 60 days after the harvesting of wheat is normally substantially completed in the county in which the farm is situated apply to the county office for a downward adjustment in the amount of the farm marketing excess on the basis of the amount of wheat produced in 1956 on the farm, or (2) apply to the county office at any time prior to the institution of court proceedings to collect the penalty for a determination that there was no farm marketing excess for the farm because the actual production on the farm was not in excess of the normal production of the acreage allotment. The date on which the harvesting of wheat is normally substantially completed in the county shall be determined by the State committee with the approval of the Secretary, taking into consideration recommendations which the county committee may make and, unless application for an adjustment in the farm marketing excess is made prior to the expiration of 60 calendar days next succeeding that date, or unless prior to the institution of court proceedings to collect the penalty with respect to the farm it is determined that there was no farm marketing excess for the farm, the farm marketing excess for any farm in the county as determined on the basis of the normal production of the excess wheat acreage for the farm shall be final as to the producers on the farm. The producer must furnish satisfactory proof to the county committee of his actual production. The county office shall keep a record of each application so made and the date thereof. The county committee shall establish a time and place at which each application will be considered and shall notify the applicant of the time and place of the hearing. Insofar as practicable, applications shall be considered in the order in which made. The established dates on which wheat harvest is normally, substantially completed are as follows:

ARKANSAS

June 25, 1956: All counties.

CALIFORNIA

July 1, 1956: Imperial.

August 15, 1956: Butte, Colusa, Fresno, Glenn, Kern, Kings, Los Angeles, Madera, Merced, Orange, Riverside, Sacramento, San Bernardino, San Diego, San Joaquin, Santa Barbara, Solano, Stanislaus, Sutter, Tehama, Tulare, Ventura, Yola, Yuba.

September 1, 1956: Alameda, Contra Costa, Lake, Marin, Monterey, Napa, San Benito, San Mateo, Santa Clara, Santa Cruz, Sonoma.

(b) *Procedure in connection with an application for an adjustment in the farm marketing excess.* The county committee shall consider each application on the basis of facts known by or made available to it and on the basis of such evidence as may be presented to it by the applicant. The actual production of any farm shall be determined in view of the relevant facts, including past production on the farm; the actual yields during the same year of other farms in the community; the actual and normal yields of other farms in the community which are similar with regard to farming practices followed, type of soil, and productivity; the harvesting, processing, and sales of the commodity produced on the farm; farming practices followed on the farm; and weather and other factors affecting the production of wheat on the farm and in the locality in which the farm is situated. In the consideration of any application for an adjustment in the farm marketing excess, the producer shall have the burden of proof. The evidence presented by the applicant may be in the form of written statements or other documentary evidence or of oral testimony in a hearing before the county committee during its consideration of the application. In order to expedite the consideration of applications, the county committee shall receive, in advance of the time fixed for consideration of the application, any written statement or documentary evidence offered by or on behalf of the applicant, and the application may be disposed of upon the basis of such statement or evidence, together with other information bearing on or establishing the facts which is available to the county committee, unless the applicant appears before the county committee at the time fixed for considering the application and requests a hearing for the purpose of offering documentary evidence or oral testimony in support of the application. Every such hearing shall be open to the public. The county committee shall make its determination in connection with each application not later than five calendar days next succeeding the day on which the consideration of the application was concluded. The determination of the county committee shall be in writing and shall contain (1) a concise statement of the grounds upon which the applicant sought an adjustment in the amount of the farm marketing excess, (2) a concise statement of the findings of the county committee upon the questions of fact, and (3) the determinaion of the county committee as to the farm marketing quota and farm marketing excess. A revised notice on Form MQ–93—Wheat (1956) with a copy of the determination made as aforesaid shall be mailed to the operator of the farm, to the applicant if he is not such operator, and to all other interested producers. All county committee determinations made in connection with applications for adjustment in the farm marketing excess shall be subject to review and revision by or on behalf of the State committee.

§ 728.663 *Publication of the farm acreage allotments, marketing quotas, and marketing excesses.* A record of the farm acreage allotments, farm marketing quotas, and farm marketing excesses established for farms in the county shall be made and kept freely available for public inspection in the ASC county office.

§ 728.664 *Marketing quotas not transferable.* A farm marketing quota established for a farm may not be assigned or otherwise transferred in whole or in part to any other farm.

§ 728.665 *Successors in interest.* Any person who succeeds to the interest of a producer in a farm or in a wheat crop produced on a farm for which a farm marketing quota and farm marketing excess were established, shall, to the same extent as his predecessor, be entitled to all the rights and privileges incident to such marketing quota and marketing excess and be subject to the restrictions on the marketing of wheat.

§ 728.666 *Review of quotas*—(a) *Right to review by a review committee.* Any producer who is dissatisfied with the farm acreage allotment, normal yield, farm marketing quota, farm marketing excess, or other determination for his farm in connection with marketing quotas may, within 15 calendar days after the notice thereof was mailed to him apply in writing for a review by a review committee of such acreage allotment, normal yield, farm marketing quota, farm marketing excess or other determination in connection therewith: *Provided*, That if a review hearing has been held and determination made by a review committee with respect to the acreage allotment, normal yield, farm marketing quota, farm marketing excess, or other determination in connection therewith, no application by a producer for further review by a review committee with respect to such determination may be filed. Unless application for review is made within such period, the acreage allotment, normal yield, farm marketing quota, farm marketing excess, or other determination, as the case may be, shall be final as to the producers on the farm. Application for review and the review committee proceedings shall be in accordance with the review regulations (Form MQ–51) as issued by the Secretary (Part 711 of this chapter).

(b) *Court review.* If a producer is dissatisfied with the determination of the review committee, he may, within 15 days after notice of such determination is mailed to him by registered mail, institute proceedings against the review committee to have the determination of the review committee reviewed by a court in accordance with section 365 of the act.

MARKETING CARDS AND MARKETING CERTIFICATES

§ 728.667 *Issuance of marketing cards*—(a) *Producers eligible to receive marketing cards.* The operator and all other producers on a farm shall be eligible to receive a marketing card (MQ–76—Wheat (1956) if (1) no farm marketing excess is determined for the farm, (2) an amount equal to the penalty on the farm marketing excess has been received from the producer or any buyer as provided in § 728.678 or § 728.679, (3) the farm marketing excess is stored, as provided in § 728.683, or (4) the amount of the farm marketing excess has been delivered to the Secretary, as provided in § 728.684. Upon request a marketing card will be issued to any wheat producer for a farm outside the commercial wheat-producing area. Each marketing card shall be serially numbered and shall show the names of the State and county and code number thereof and the serial number of the farm, the signature of the county office manager or his designee, the name and address of the producer to whom issued, and the counter-signature of the producer to whom the card is issued, or his duly authorized agent, or a statement by the county office manager or his designee giving an explanation of the reason for which the counter-signature cannot be made. The producers on a farm shall be ineligible to receive marketing cards if any producer on the farm owes any penalty for 1954 or 1955 excess wheat, or if determination of the 1956 wheat acreage is prevented by any producer on the farm.

(b) *Multiple farm producers eligible to receive marketing cards.* Any producer who is a wheat producer on more than one farm in a county shall not be eligible to receive a marketing card for any such farm in the county until, in accordance with the provisions of paragraph (a) of this section, he is eligible to receive a marketing card for each of such farms. However, only one wheat marketing card need be issued to a producer who has an interest in the wheat crop on more than one farm in the county, provided (1) the farm serial numbers of all such farms are entered on the marketing card, (2) the producer is eligible to receive a marketing card on each farm in the county in which he has an interest in the wheat crop, and (3) the producer's liability has not been reduced to a proportionate share of any such farm. The other producers on a farm for which the multiple farm producer would otherwise be eligible to receive a marketing card shall receive marketing cards with respect to the farm notwithstanding the ineligibility of the multiple farm producer. Where a producer is engaged in the production of wheat in more than one county (in the same State or in two or more States), the regulations outlined in this section for issuing marketing cards for multiple farms in a county may be followed with respect to all such farms, wherever situated, if the county committees of the respective counties or if the State committee determines that the procedure would be necessary to enforce the provisions of the act. The State committee may require any multiple farm producer to file with it a list of all farms on which he is engaged in the production of wheat, together with any other information deemed necessary to enforce the act.

(c) *Use of marketing cards.* The serial number of the farm or farms for which a marketing card is issued shall be entered on the marketing card. A marketing card shall not be used to identify wheat produced on any farm, the serial number of which is not entered on the card. A marketing card shall not be used to market any wheat which was not produced on a farm the serial number of which appears on the marketing card.

§ 728.668 *Issuance of marketing certificates.* The county office manager or his designee shall, upon request, issue a marketing certificate, Form MQ–94—Wheat, to any producer (a) who is eligible to receive a marketing card and who desires to market wheat by telegraph, telephone, mail, or by any means or method other than directly to and in the presence of the buyer or transferee, (b) whose liability has been reduced to a proportionate share of the entire penalty and discharged in accordance with the provisions of § 728.678 (c), or (c) who is ineligible to receive a marketing card solely because of penalties owed for 1954 or 1955 excess wheat. Upon request, a marketing certificate will be issued to any wheat producer outside the commercial wheat-producing area. Each marketing certificate shall show (1) the name and address of the producer to whom issued, (2) the names of the State and county and the code number thereof and the serial number for the farm, (3) the serial number of the marketing card assigned to the producer for the farm, (4) the signature of the county office manager or his designee, (5) the name of the buyer or transferee, (6) the number of bushels of wheat involved in the transaction, and (7) the signature of the producer. The original of the marketing certificate shall be issued to the producer for delivery to the buyer or transferee and the duplicate copy shall be retained in the ASC county office. A marketing certificate shall not be used to identify wheat produced on any farm the serial number of which is not entered on the certificate.

§ 728.669 *Lost, destroyed, or stolen marketing cards or marketing certificates*—(a) *Report of loss, destruction, or theft.* In case a marketing card or marketing certificate delivered to a producer is lost, destroyed, or stolen, any person having knowledge thereof shall, insofar as he is able, immediately notify the ASC county office of the following: (1) The name of the operator of the farm for which such marketing card or marketing certificate was issued; (2) the name of the producer to whom the marketing card or marketing certificate was issued, if someone other than the operator; (3) the serial number of the marketing card or marketing certificate; and (4) whether in his knowledge or judgment it was lost, destroyed, or stolen and by whom.

(b) *Investigation and findings of county committee.* The county committee shall make or cause to be made a thorough investigation of the circumstances of such loss, destruction, or theft. If the county committee finds, on the basis of its investigation, that such marketing card or marketing certificate was in fact lost, destroyed, or stolen, it shall cause to be cancelled such marketing card or marketing certificate and instruct the county office manager to give notice to the producer to whom the marketing card or marketing certificate was issued that it is void and of no effect. The notice to that effect shall be in writing, addressed to the producer at his last-known address, and deposited in the United States mails. If the county committee also finds that there has been no collusion in connection therewith on the part of the producer to or for whom the marketing card or marketing certificate was issued, it shall cause to be issued to or for him a marketing card or marketing certificate to replace the lost, destroyed, or stolen marketing card or marketing certificate. Each marketing card or marketing certificate issued under this section shall bear across its face in bold letters the word "Duplicate". In case a marketing card or marketing certificate is cancelled, as provided in this section, the county office manager or his designee shall immediately notify the buyers, elevator operators, or warehousemen who serve the county, or in the immediate vicinity, that the marketing card or marketing certificate is cancelled and of the issuance of any duplicate. Any person coming into possession of a cancelled marketing card or marketing certificate shall immediately return it to the ASC county office from which it was issued.

§ 728.670 *Cancellation of marketing cards and marketing certificates issued in error.* Any marketing card or marketing certificate erroneously issued shall, immediately upon discovery of the error, be cancelled by the county office manager. The producer to whom such marketing card or marketing certificate was issued shall be notified in the manner prescribed in § 728.669 (b) that the marketing card or marketing certificate is void and of no effect and that it shall be returned to the ASC county office. Upon the return of such marketing card or marketing certificate, the county office manager shall cause to be endorsed thereon the notation "cancelled". In the event that such marketing card or marketing certificate is not returned immediately, the county office manager shall immediately notify the elevator operators, warehousemen, and buyers who serve the county, or in the immediate vicinity, that the marketing card or marketing certificate is cancelled. A copy of each notice provided for in this section, containing a notation thereon of the date of mailing shall be kept among the records of the ASC county office.

IDENTIFICATION OF WHEAT

§ 728.671 *Time and manner of identification.* Each producer of wheat and each intermediate buyer shall, at the time he markets any wheat, identify the wheat to the buyer or transferee, in the manner hereinafter provided, as being subject to or not subject to the penalty and the lien for the penalty.

§ 728.672 *Identification by marketing card.* A marketing card (MQ–76—Wheat (1956)) shall, when presented to the buyer by the producer to whom it was issued, be evidence to the buyer that the wheat for which the marketing card was issued may be purchased without the payment of any penalty by him and that such wheat is not subject to the lien for the penalty.

§ 728.673 *Identification by marketing certificate.* A marketing certificate (MQ–94—Wheat), properly executed by the county office manager or his designee and the producer to whom it is issued, shall, when delivered to the buyer by the producer, be evidence that the amount of wheat shown thereon may be purchased without the payment of any penalty by him and that such wheat is not subject to the lien for penalty.

§ 728.674 *Identification by intermediate buyer's record and report.* The original and copy of an intermediate buyer's record and report (MQ–95—Wheat (1956)), properly executed by the first intermediate buyer and the producer of the wheat and any subsequent buyer in the manner outlined in §§ 728.687 (d) and 728.688 shall be evidence to any buyer that the wheat covered thereby is not subject to the lien for penalty and may be purchased by him without payment of any penalty in the event either (a) the MQ–95—Wheat (1956) shows the serial number of the marketing card or marketing certificate by which the wheat was identified and the signatures of the producer and intermediate buyer, or (b) the original MQ–95—Wheat (1956) bears the endorsement "Penalty Satisfied" and the signature and title of a treasurer of a county committee and the date thereof.

§ 728.675 *Wheat identified as subject to the penalty and lien for the penalty.* All wheat marketed by a producer or by an intermediate buyer which is not identified in the manner prescribed in § 728.672, § 728.673, or § 728.674 shall be taken by the buyer thereof as wheat subject to penalty and the lien for the penalty and the buyer of such wheat shall pay the penalty thereon at the rate prescribed in § 728.676.

PENALTY

§ 728.676 *Rate of penalty.* The rate of penalty shall be 45 percent of the parity price of wheat as of May 1, 1956.

§ 728.677 *Lien for penalty.* The entire amount of wheat produced in 1956 on any farm for which a farm marketing excess is determined shall be subject to a lien in favor of the United States for the amount of the penalty until the producers on the farm, in accordance with § 728.683, § 728.684, § 728.678, or § 728.679, store the farm marketing excess or deliver it to the Secretary, or until the amount of the penalty is paid.

§ 728.678 *Payment of penalties by producers*—(a) *Producers liable for payment of penalties.* Each producer having an interest in the wheat produced in 1956 on any farm for which a farm marketing excess is determined shall be liable to pay the amount of the penalty on the farm marketing excess as provided in this section. The amount of the penalty which any producer shall pay shall nevertheless be reduced by the amount of the penalty which is paid by another producer or a buyer of wheat produced on the farm.

(b) *Time when penalties become due.* The farm marketing excess for any farm shall be regarded as available for marketing and the penalty thereon shall become due at the time any wheat produced on the farm is harvested. The amount of the penalty on the farm marketing excess for any farm shall be remitted not later than 60 calendar days after the date on which the harvesting of wheat is normally substantially completed in the county in which the farm is situated, as determined by the State committee in accordance with § 728.662 (b), or not later than 30 calendar days after notice of the farm marketing excess of wheat is mailed to the producer as provided in § 728.661: *Provided, however,* That the penalty on that amount of the farm marketing excess delivered to the Secretary pursuant to § 728.684 or 728.661 shall not be remitted: *And provided further,* That the penalty on that amount of the farm marketing excess which is stored pursuant to § 728.683 or § 728.661 shall not be remitted until the time, and to the extent, of any depletion in the amount of wheat so stored not authorized as provided in § 728.683 (g).

(c) *Apportionment of the penalty.* The county committee may, upon application of any producer made prior to the expiration of the time allowed for the remittance of the penalty on the farm marketing excess, determine his proportionate share of the penalty on the farm marketing excess, if pursuant to the application, the producer establishes the facts that he is unable to arrange with the other producers on the farm for the payment of the penalty on the entire farm marketing excess or for the disposition of the farm marketing excess in accordance with § 728.683 or § 728.684, that his share of the wheat crop produced on the farm is marketed or disposed of by him separately and that he exercises no control over the marketing or disposition of the shares of the other producers in the wheat crop. The producer's proportionate share of the penalty on the farm marketing excess shall be that proportion of the entire penalty on the farm marketing excess which his share in the wheat produced in 1956 on the farm bears to the total amount of wheat produced in 1956 on the farm. When the producer pays his proportionate share of the penalty, or, in accordance with § 728.683 or § 728.684, stores or delivers to the Secretary the number of bushels required to postpone or avoid the payment of the penalty on his proportionate share, he shall not be liable for the remainder of the penalty on the farm marketing excess and he shall be entitled to receive marketing certificates issued in accordance with § 728.668 to be used by him only in the marketing of his proportionate share of the wheat crop produced in 1956 on the farm.

§ 728.679 *Payment of penalties by buyer*—(a) *Buyers liable for payment of penalties.* Each person within the United States who buys from the producer any wheat subject to the lien for the penalty shall be liable for and shall pay the penalty thereon. Wheat shall be taken as subject to the lien for the penalty unless the producer presents to the buyer a marketing card (MQ–76—Wheat (1956)) or a marketing certificate (MQ–94—Wheat) as prescribed in §§ 728.672 and 728.673.

(b) *Payment of penalties on account of the lien for the penalty.* Each person within the United States who buys wheat which is subject to the lien for the penalty shall pay the amount of the penalty on each bushel thereof in satisfaction of the lien thereon. Wheat purchased from any intermediate buyer shall be taken as subject to the lien for the penalty unless, at the time of sale, the intermediate buyer delivers to the purchaser the original and a copy of an intermediate buyer's record and report, MQ–95—Wheat (1956), properly executed by the producer of the wheat and the first intermediate buyer, which show (1) the serial number of marketing card or marketing certificate by which the wheat covered thereby was identified when marketed, or (2) on the reverse side the statement "Penalty satisfied" and the signature and title of a treasurer of the county committee and the date thereof.

(c) *Time when penalties become due.* The penalty to be paid by any buyer pursuant to paragraph (a) or (b) of this section shall be due at the time the wheat is purchased and shall be remitted not later than 15 calendar days thereafter.

(d) *Manner of deducting penalties and issuance of receipts.* The buyer may deduct from the price paid for any wheat an amount equivalent to the amount of the penalty to be paid by the buyer pursuant to paragraph (a) or (b) of this section. Any buyer who deducts an amount equivalent to the penalty shall issue to the person from whom the wheat was purchased a receipt for the amount so deducted which shall be, in the case of wheat purchased from the producer by an intermediate buyer, on MQ–95—Wheat) 1956, and, in all other cases, on MQ–81—Wheat (1956).

§ 728.680 *Remittance of penalties to the treasurer of the county committee.* The treasurer of any county committee, for and on behalf of the Secretary, shall receive the penalty. The penalty shall be remitted only in legal tender, or by check, draft, or money order drawn payable to the order of the Treasurer of the United States. All checks, drafts, and money orders tendered in payment of the penalty shall be received by the treasurer of the county committee subject to collection and payment at par. If the penalty is remitted by an intermediate buyer, the treasurer of the county committee shall show that the penalty is paid by entering on the reverse side of the original and first copy of the intermediate buyer's record and report, MQ–95—Wheat (1956), the statement "Penalty satisfied" and his signature and title and the date thereof.

§ 728.681 *Deposit of funds.* All funds received by the treasurer of the county committee in connection with penalties for wheat shall be scheduled and transmitted by him on the day received or not later than the next succeeding business day, to the State committee, which shall cause such funds to be deposited to the credit of a special deposit account with the Treasurer of the United States in the name of the Chief Disbursing Officer of the Treasury Department (herein referred to as "special deposit account") to be held in escrow. In the event the funds so received are in the form of cash, the treasurer of the county committee shall deposit such funds in the ASC county committee bank account and issue a check in the amount thereof, payable to the order of the Treasurer of the United States. The treasurer of the county committee shall make and keep a record of each amount received by him, showing the name of the person who remitted the funds, the identification of the farm or farms in connection with which the funds were received, and the name of the person who marketed the wheat in connection with which the funds were remitted.

§ 728.682 *Refunds of money in excess of the penalty*—(a) *Determination of refunds.* The county committee and the treasurer of the county committee upon their own motion or upon the request of any interested person shall review the amount of money received in connection with the penalty for any farm to determine for each producer the amount thereof, if any, which is in excess of the security required for stored excess wheat or the penalty due. Any excess amount shall be refunded. Any refund shall be made only to persons who bore the burden of the payment and who have not been reimbursed therefor. The excess amount shall first be applied, insofar as the sum will permit, so as to make refunds to eligible persons other than producers and the remainder, if any, shall be applied so as to make refunds to the eligible producers. The amount to be refunded to each producer shall be either (1) the amount determined by apportioning the excess amount among the producers on the farm in the proportion that each contributed toward the payment, avoidance,

or security of the penalty on the farm marketing excess, or (2) the amount which is in excess of the security required for stored excess wheat and the penalty due on that portion of the farm marketing excess for which the producer is separately liable. No refund shall be made to any buyer or transferee of any amount which he collected from the producer or another, deducted from the price or consideration paid for the wheat, or for which he was liable.

(b) *Certification of refunds.* The county office manager or the treasurer of the county committee shall notify the State committee of the amount which the county committee and its treasurer determine may be refunded to each person with respect to the farm, and the State committee shall cause to be certified to the Chief Disbursing Officer of the Treasury Department for payment such amounts as are approved by it. No refund of money shall be certified under this section unless the money has been remitted to the treasurer of the county committee and transmitted by him to the State committee.

§ 728.683 *Stored farm marketing excess*—(a) *Amount of wheat to be stored.* The number of bushels of wheat in connection with any farm which may be stored in order to postpone the payment of the penalty or with a view to avoiding such penalty shall be that portion of the farm marketing excess which has not been delivered to the Secretary. The amount of the farm marketing excess for the purpose of storage shall be the amount of the farm marketing excess as determined, at the time of storage, under § 728.659 or § 728.662, whichever is applicable.

(b) *Storage of excess wheat.* Stored excess wheat shall be kept in a place adapted to the storage of wheat. The wheat so stored shall be subject to the condition that it may be inspected at any time by officers or employees of the United States Department of Agriculture or members, officers, or employees of the State or county committee.

(c) *Deposit of warehouse receipts in escrow.* The storage of wheat in an elevator or warehouse in order to postpone the payment of the penalty or with a view to avoiding such penalty shall be effective when a warehouse receipt covering the amount of wheat so stored is deposited with the treasurer of the county committee to be held in escrow. The warehouse receipt shall be a negotiable receipt or a non-negotiable receipt as to which the warehouseman or elevator operator is notified in writing by the owner of such receipt and the treasurer of the county committee that it is being so deposited in escrow and that delivery of the wheat covered thereby is to be made under the terms of its deposit in escrow while such receipt remains so deposited. Any warehouse receipt so deposited shall be accepted only upon the condition that the producers by or for whom the wheat is stored shall be and shall remain liable for all charges incident to the storage of the wheat and that the county committee and the United States in no way be responsible for or pay any such charges. Whenever the penalty with respect to wheat covered by warehouse receipt is paid or satisfied from any cause, the warehouse receipt shall be returned to the person who deposited it.

(d) *Bond of identity.* The storage of excess wheat in order to postpone the payment of the penalty or with a view to avoiding such penalty shall also be effective when a good and sufficient bond of indemnity on a form prescribed for this purpose is executed and filed with the treasurer of the county committee in an amount not less than the amount of the penalty on that portion of the farm marketing excess so stored. Each bond given pursuant to this paragraph shall be executed as principal by the producer storing the wheat and either (1) as sureties by two persons who are not producers on the farm each owning real property with an unencumbered value of double the principal sum of the bond, or (2) as surety by a corporate surety authorized to do business in the State in which the farm is situated and listed by the Secretary of the Treasury of the United States as an acceptable surety on bonds in favor of the United States. Each bond of indemnity shall be subject to the conditions that the penalty on the amount of wheat stored shall be paid at the time, and to the extent, of any depletion of the amount stored which is not authorized under paragraph (g) of this section and that if at any time any producer on the farm prevents the inspection of any wheat so stored the penalty on the entire amount stored shall be paid forthwith. Whenever the penalties secured by the bond of indemnity are paid or reduced from any cause, the treasurer of the county committee shall furnish the principal and the sureties with a written statement to that effect. A bond shall not otherwise be cancelled or released. The bond of indemnity provided for in this paragraph may be waived by the county committee with the approval of the State committee, if the excess wheat was produced by a State or State institution or other agency of a State or Federal agency: *Provided,* That as a condition of the waiver of the bond of indemnity the head of the State institution or other State agency or Federal agency shall agree in writing to comply with all other provisions of the regulations in §§ 728.650 to 728.699 with respect to the stored farm marketing excess.

(e) *Deposit of funds in escrow.* The storage of wheat in order to postpone the payment of the penalty or with a view to avoiding such penalty shall also be effective when an amount of money not less than the penalty on that portion of the farm marketing excess so stored is deposited with the Treasurer of the United States to be held in escrow to secure the payment of such penalty. The treasurer of the county committee shall issue a receipt to the person who tenders such funds which shall be received subject to collection and payment at par. Funds in escrow shall be subject to the condition that the penalty on the amount of wheat stored shall be paid at the time, and to the extent, of any depletion of the amount stored which is not authorized under paragraph (g) of this section and that if at any time any producer on the farm prevents inspection of any wheat so stored, the penalty on the entire amount stored shall be paid forthwith.

(f) *Time of storage.* Storage of wheat in connection with any farm in order to postpone the payment of the penalty or with a view to avoiding such penalty shall not be effective unless the provisions of paragraph (a) and (b) and (c), (d) or (e) of this section are complied with prior to the expiration of the period allowed, in accordance with § 728.678 (b), or § 728.661, for the remittance of the penalty with respect to the farm marketing excess for the farm.

(g) *Depletion of stored excess wheat.* The penalty on the amount of excess wheat stored shall be paid by the producers on the farm at the time and to the extent of any depletion in the amount of wheat stored except as provided in paragraphs (h) and (i) of this section and except to the extent of the following: (1) The amount by which the stored excess wheat exceeds the farm marketing excess for the farm as determined in accordance with § 728.659 or § 728.662, (2) the amount by which the stored excess wheat exceeds the amount of the farm marketing excess as determined by a review committee or as a result of a court review of the review committee determination, and (3) the amount of any wheat destroyed by fire, weather conditions, theft, or any other cause beyond the control of the producer, provided the producer shows beyond a reasonable doubt that the depletion resulted from such cause and not from his negligence nor from any affirmative act done or caused to be done by him.

(h) *Underplanting the farm acreage allotment for a subsequent crop.* Whenever the wheat acreage on any farm for the 1957 or subsequent crop of wheat is less than the farm acreage allotment therefor, the producers on the farm who stored excess wheat in accordance with the foregoing provisions of this section shall, upon application made by them to the county committee, be entitled to remove from storage without penalty any wheat so stored by them, whether produced in a prior year on the farm or another farm, to the extent of the normal production of the number of acres by which the acreage planted to wheat is less than the farm acreage allotment. The amount of wheat which would otherwise be authorized to be removed from storage in connection with the farm under this paragraph shall be reduced to the extent that stored excess wheat from any other crop is authorized to be removed from storage in connection with the farm. The amount of wheat authorized to be removed from storage shall be apportioned among the several producers on the farm who have stored excess wheat to the extent of their need therefor in accordance with their shares in the acreage which was or could have been planted to wheat or in accordance with their agreement as to the apportionment to be made. A

producer shall not be entitled to remove wheat from storage under this paragraph in connection with any farm unless, at the time the determination is made under this paragraph, the wheat is stored and owned by the producer and, at the end of the wheat seeding season for the crop for the area in which the farm is situated, the producer is entitled to share in the wheat crop which was or could have been planted on the farm. The acreage planted to wheat for the purpose of this paragraph shall be the wheat acreage on the farm.

(i) *Producing a subsequent crop which is less than the normal production of the farm acreage allotment.* Whenever the actual production of wheat in 1957 or any subsequent year on any farm is less than the normal production of the farm acreage allotment therefor, the producers on the farm who stored excess wheat in accordance with the foregoing provisions of this section shall, upon application made by them to the ASC county office, be entitled to remove from storage without penalty, any wheat so stored by them, whether produced in the prior year on the farm or another farm, to the extent of the amount by which the normal production of the farm acreage allotment, less the normal production of the underplanted acreage for the farm which was or could have been determined under paragraph (h) of this section exceeds the amount of wheat produced on the farm in that year. The amount of wheat which would otherwise be authorized to be removed from storage in connection with the farm under this paragraph shall be reduced to the extent that stored excess wheat from any other crop is authorized to be removed from storage in connection with the farm. The amount of wheat which is authorized to be removed from storage shall be apportioned among the several producers on the farm who have stored excess wheat to the extent of their need therefor in accordance with their proportionate shares in the wheat crop planted on the farm or in accordance with their agreement as to the apportionment to be made. The determination of the amount of wheat produced on the farm shall be made in accordance with the marketing quota regulations applicable to the crop. A producer shall not be entitled to remove wheat from storage under this paragraph for any farm unless, at the time the determination is made under this paragraph, the wheat is stored and owned by the producer and, at the time of harvest, the producer is entitled to a share in the wheat crop on the farm.

§ 728.684 *Delivery of the farm marketing excess to the Secretary*—(a) *Amount of wheat to be delivered.* The amount of wheat delivered to the Secretary in order to avoid the payment of the penalty in connection with any farm shall not exceed the amount of the farm marketing excess as determined, at the time of delivery, in accordance with § 728.659 or § 728.662, whichever is applicable.

(b) *Conditions and methods of delivery.* For and on behalf of the Secretary, the treasurer of the county committee for the county in which the farm for which the marketing excess is determined is situated shall accept the delivery of any wheat tendered to avoid the payment of the penalty. The delivery of the wheat for this purpose shall be effective only when the producers having an interest in the wheat to be so delivered convey to the Secretary all right, title, and interest in and to the wheat by executing a form provided for this purpose, and (1) deliver the wheat to a wheat elevator or warehouse and tender to the treasurer of the county committee, the elevator or warehouse receipts for the amount of the wheat, or (2) if the producer shows to the satisfaction of the county committee that it is impracticable to deliver the wheat to an elevator or warehouse and receive an elevator or warehouse receipt therefor, deliver the wheat at a point within the county or nearby and within such time or times as may be designated by the county office manager. None of the wheat so delivered shall be returned to the producer. Insofar as practicable, the wheat so delivered shall be delivered to the Commodity Credit Corporation of the United States Department of Agriculture, and any wheat which it is impracticable to deliver to such Corporation shall be distributed to such one or more of the following classes of agencies or organizations as the State committee selects, which delivery the Secretary hereby determines will divert it from the normal channels of trade and commerce: Any Federal relief organization, the American Red Cross, State or county or municipal relief organization, Federal or State wildlife refuge project, or any voluntary relief organization registered with the Advisory Committee on Voluntary Foreign Aid of the Foreign Operations Administration.

(c) *Time of delivery.* Excess wheat may be delivered to the Secretary at any time within 60 calendar days after the date on which the harvesting of wheat is normally substantially completed in the county as determined by the State committee in accordance with § 728.662 (a), or pursuant to § 728.661. Excess wheat may be delivered to the Secretary after such period only if the excess wheat was stored in accordance with the provisions of § 728.683 (a) through (f) and the wheat has not gone out of condition through any fault of the producer.

§ 728.685 *Refund of penalty erroneously, illegally, or wrongfully collected.* Whenever, pursuant to a claim filed with the Secretary within two calendar years after payment to him of the penalty collected from any person, pursuant to the act, the Secretary finds that the penalty was erroneously, illegally, or wrongfully collected, and the claimant bore the burden of such penalty, he shall certify to the Secretary of the Treasury of the United States for payment to the claimant, in accordance with regulations prescribed by the Secretary of the Treasury of the United States, such amount as the claimant is entitled to receive as a refund of all or a portion of the penalty. Any claim filed pursuant to this section shall be made in accordance with regulations prescribed by the Secretary.

§ 728.686 *Report of violations and court proceedings to collect penalty.* It shall be the duty of the county office manager to report in writing to the State Administrative officer, the employee of the State committee who carries out its policies and the day-to-day operations of the ASC State office, each case of failure or refusal to pay the penalty or to remit the same as provided in §§ 728.678 through 728.680. It shall be the duty of the State administrative officer to report each such case in writing to the Office of the General Counsel of the United States Department of Agriculture, with a view to the institution of proceedings by the United States Attorney for the appropriate district, under the direction of the Attorney General of the United States, to collect the penalties, as provided in section 376 of the act.

RECORDS AND REPORTS

§ 728.687 *Records to be kept and reports to be made by warehousemen, elevator operators, feeders, or processors, and buyers other than intermediate buyers*—(a) *Necessity for records and reports.* Each warehouseman, elevator operator, feeder, or processor, and each buyer other than an intermediate buyer, who buys, acquires, or receives wheat from the producer or intermediate buyer thereof shall, in conformity with section 373 (a) of the act, keep the records and make the reports prescribed by this section, which the Secretary hereby finds to be necessary to enable him to carry out with respect to wheat the provisions of the act.

(b) *Nature and availability of records.* Each warehouseman, elevator operator, feeder, or processor, and each buyer other than an intermediate buyer, shall keep, as a part of or in addition to the records maintained by him in the conduct of his business, a record which shall show with respect to the wheat purchased, acquired, or received by him from the producers or the intermediate buyers thereof the following information:

(1) The name and address of the producer of the wheat, (2) the date of the transaction, (3) the amount of the wheat, (4) the serial number of the marketing card (MQ–76—Wheat (1956)), or marketing certificate (MQ–94—Wheat), or intermediate buyer's record and report (MQ–95—Wheat (1956)) by which the wheat was identified, or the report and penalty receipt (MQ–81—Wheat (1956)), and (5) the amount of any lien for the penalty or of any penalty incurred in connection with the wheat purchased, acquired, or received by him. The record so made shall be kept available for examination by the county office manager or any authorized representative of the State Administrative Officer or of the Director, Compliance and Investigation Division, Commodity Stabilization Service, United States Department of Agriculture, for two calendar years beyond the calendar year in which the marketing year ends. The records shall be examined only for the purpose of ascertaining the correctness of any report made or record kept pursuant to the regulations in this subpart, or of obtaining the information required to be furnished in any report pursuant to the regulations in this subpart but not so furnished. The county office manager shall furnish, without cost, blank copies of MQ–97—Wheat which may be used for the purpose of keeping the record required under this section.

(c) *Records and reports in connection with wheat subject to penalty.* Each warehouseman, elevator operator, feeder, or processor, and each buyer other than an intermediate buyer who purchases any wheat from the producer or intermediate buyer thereof which is not identified at the time the wheat is purchased in the manner provided in §§ 728.672, 728.673, and 728.674 shall, with respect to each such transaction, execute the report and penalty receipt on MQ–81—Wheat (1956) and report to the treasurer of the county committee the following information: (1) The name and address of the producer or intermediate buyer from whom the wheat was purchased or acquired, (2) the date of the transaction, (3) the amount of the wheat, and (4) the amount of the penalty incurred in connection with the transaction, and whether an amount equivalent to the penalty was deducted from the price or consideration paid for the wheat. Each record and report on MQ–81—Wheat (1956) shall be executed in triplicate. The person who executes MQ–81—Wheat (1956) shall retain one copy, give the original to the producer or intermediate buyer, as the case may be, which shall be the receipt to him for the amount of the penalty in connection with wheat, and mail or deliver the remaining copy to the treasurer of the county committee. It shall be presumed that wheat was not identified by MQ–76—Wheat (1956) as provided in § 728.672, or MQ–94—Wheat as provided in § 728.673 or MQ–95—Wheat (1956) as provided in § 728.674, if the serial number of the marketing card or marketing certificate or intermediate buyer's record and report does not appear on the records required to be kept pursuant to paragraph (b) of this section.

(d) *Records and reports in connection with wheat identified by intermediate buyer's records and reports.* Whenever wheat is identified by the intermediate buyer's record and report (MQ–95—Wheat (1956)), executed in accordance with § 728.688, the warehouseman, elevator operator, feeder, or processor, or the buyer other than an intermediate buyer, who purchases or acquires the wheat covered thereby shall retain the first copy as a record of the transaction and forward the original to the treasurer of the county committee as a report on the transaction in every case where he purchases or acquires all or the remainder of the wheat covered by the record and report. In all other cases, where the warehouseman, elevator operator, feeder or processor, or the buyer other than an intermediate buyer, purchases or acquires only a portion of the wheat covered by the intermediate buyer's record and report, he shall make a record and report of the transaction by endorsing on the reverse side of both the original and first copy his name and signature, the amount of wheat purchased or acquired, and the date of the transaction and return the forms so endorsed to the intermediate buyer to be delivered to the person who finally purchases or acquires the remainder of the wheat.

(e) *Records in connection with wheat identified by marketing certificates.* Whenever wheat is identified by a marketing certificate (MQ–94—Wheat), the warehouseman, elevator operator, feeder, or processor, or the buyer other than an intermediate buyer, who purchases the wheat so identified shall retain the marketing certificate as a record of the transaction.

(f) *Time and place of submitting reports.* Each report required by this section shall be submitted not later than 15 calendar days next succeeding the day on which the wheat was marketed to a warehouseman, elevator operator, feeder, or processor, or a buyer other than an intermediate buyer, to the treasurer of the county committee for the county in which the wheat was produced.

§ 728.688 *Records to be kept and reports to be made by intermediate buyers*—(a) *Necessity for records and reports.* Each intermediate buyer shall, in conformity with section 373 (a) of the act, keep the records and make the reports prescribed by this section, which the Secretary hereby finds to be necessary to enable him to carry out, with respect to wheat, the provisions of the act.

(b) *Form of record and report in connection with wheat purchased or acquired from producers.* Each intermediate buyer who purchases or acquires any wheat from the producer thereof shall, with respect to each such transaction, keep a record and make a report on the intermediate buyer's record and report (MQ–95—Wheat (1956)) of the following information: (1) The name and address of the producer from whom the wheat was purchased or acquired, (2) the names of the county and State in which the wheat was produced, (3) the date of the transaction, (4) the number of bushels of wheat, and (5) the serial number of the marketing card or marketing certificate by which the producer identified the wheat at the time it was marketed, or if the wheat is not so identified, the amount of the penalty, and whether an amount equivalent to the penalty was collected or deducted from the price or consideration paid for the wheat. The record and report shall be executed in quadruplicate and, after the entries described above are made, the intermediate buyer and producer shall certify to the correctness of the entries by signing the MQ–95—Wheat (1956). One copy of MQ–95—Wheat (1956) so executed shall be retained by the producer as a record of the transaction and as a receipt for the amount equivalent to the penalty, if any, which was deducted from the price or consideration paid for the wheat. One copy of MQ–95—Wheat (1956) so executed shall be retained by the intermediate buyer as his record in connection with the transaction. Whenever wheat is identified by a marketing certificate (MQ–94—Wheat), the intermediate buyer shall attach the original of the marketing certificate to the first copy of MQ–95—Wheat (1956) to be delivered to the warehouseman, elevator operator, feeder, or processor, or buyer other than an intermediate buyer, who finally acquires the wheat covered by MQ–95—Wheat (1956) and marketing certificate MQ–94—Wheat. Whenever the intermediate buyer markets or deliveres a portion of the wheat covered by a single MQ–95—Wheat (1956) to another and retains a portion of the wheat, the intermediate buyer shall obtain from the person to whom the portion of the wheat is marketed or delivered an endorsement on the reverse side of both the original and first copy of MQ–95—Wheat (1956) showing the name and signature of the person, the number of bushels of wheat marketed or delivered to him, and the date of the transaction.

(c) *Manner of making reports.* The intermediate buyer shall deliver the original and copy of the intermediate buyer's record and report (MQ–95—Wheat (1956)) to the warehouseman, elevator operator, feeder, or processor, or the buyer other than an intermediate buyer, to whom all of the remainder of the wheat covered thereby is marketed. When wheat is marketed or delivered by one intermediate buyer to another intermediate buyer, the original and first copy of MQ–95—Wheat (1956) shall be transmitted by one intermediate buyer to another and the last intermediate buyer shall deliver them to the warehouseman, elevator operator, feeder, or processor, or buyer other than an intermediate buyer. If all or the remainder of the wheat is not marketed or delivered to a warehouseman, elevator operator, feeder, or processor, or buyer other than an intermediate buyer, the last intermediate buyer shall within 15 days mail or deliver the original and first copy of the intermediate buyer's record and report to the treasurer of the county committee.

(d) *Reports to the treasurer of the county committee.* Each intermediate buyer shall, within 15 days after all Forms MQ–95—Wheat (1956) contained in a book have been executed or on December 31, 1956, whichever is the earlier, mail or deliver to the treasurer of the county committee from whom the book was obtained the executed copies and unexecuted sets of Form MQ–95—Wheat (1956) which were retained by him.

§ 728.689 *Buyer's special reports.* In the event that the county committee or State committee has reason to believe that any buyer has failed or refused to comply with the these regulations, the buyer shall within 15 days after a written request therefor made by the county committee or State committee and deposited in the United States mails, registered and addressed to him at his last-known address, make a report verified as true and correct by affidavit, on MQ–97—Wheat to such committee with respect to all wheat purchased or acquired by him during the period of time as specified in the request. The report

shall include the following information for each lot of wheat purchased or acquired from the persons specified or during the period specified: (a) The name and address of the producer of the wheat, (b) the date of the transaction, (c) the amount of wheat, (d) the serial number of the marketing card (MQ–76—Wheat (1956)), marketing certificate (MQ–94—Wheat), or intermediate buyer's record and report (MQ–95—Wheat (1956)), or the report and penalty receipt (MQ–81—Wheat (1956)), and (e) the amount of the lien for the penalty or the amount of penalty incurred in connection with the wheat purchased or acquired.

§ 728.690 *Penalty for failure or refusal to keep records and make reports.* Any person required to keep the records or make the reports specified in § 728.687, § 728.688 or § 728.689 and who fails to keep any such record or make any such report or who makes any false report or keeps any false record shall, as provided in section 373 (a) of the act, be deemed guilty of a misdemeanor and, upon conviction thereof, shall be subject to a fine of not more than $500 for each such offense.

§ 728.691 *Records to be kept and reports to be made by producers.* Each producer with respect to the 1956 wheat crop shall keep the records and make the reports prescribed by this section, which the Secretary hereby finds to be necessary to enable him to carry out with respect to wheat the provisions of the act. Upon written request of the county committee any producer shall, within 15 days from the date the request was mailed to him file with the treasurer of the county committee for the county in which the farm is situated a farm operator's report on MQ–98—Wheat (1956) showing for the farm the following information: (a) The total number of bushels of wheat produced thereon in 1956, (b) the name and address of each buyer or transferee of any wheat, (c) the amount of the wheat sold to each buyer, (d) the amount equivalent to the penalty which was deducted from the price or consideration for the wheat, (e) the amount of wheat of the 1956 crop disposed of other than by sale and the manner of disposition, (f) the amount of wheat of the 1956 crop on hand, and (g) wheat acreage for 1956.

§ 728.692 *Data to be kept confidential.* Except as otherwise provided herein, all data reported to or acquired by the Secretary pursuant to and in the manner provided in the regulations in this subpart shall be kept confidential by all officers and employees of the United States Department of Agriculture, members of county committees, other local committees, and State committees, county agents, and officers and employees of such committees or county agents' offices, and shall not be disclosed to anyone not having an interest in or responsibility for any wheat, farm, or transaction covered by the particular data, such as records, reports, forms, or other information, and only such data so reported or acquired as the Secretary deems relevant shall be disclosed by them to anyone not having such an interest or not being employed in the administration of the act and then only in a suit or administrative hearing under Title III of the act.

§ 728.693 *Enforcement.* It shall be the duty of the county office manager to report in writing to the State administrative officer forthwith each case of failure or refusal to make any report or keep any record as required by §§ 728.689 through 728.691, and to so report each case of making any false report or record. It shall be the duty of the State administrative officer to report each such case in writing, in quintuplicate, to the Office of the General Counsel of the United States Department of Agriculture, in accordance with instructions issued by the Deputy Administrator for Production Adjustment, with a view to the institution of proceedings by the United States Attorney for the appropriate district, under the direction of the Attorney General of the United States, to enforce the provisions of the act.

SPECIAL PROVISIONS AND EXEMPTIONS

§ 728.694 *Farms on which the wheat acreage is not in excess of 15 acres*—(a) *Conditions of exemption.* A farm marketing quota for wheat for the 1956 crop shall not be applicable to any farm on which the wheat acreage for the 1956 crop is not in excess of 15 acres.

(b) *Issuing marketing cards.* The county office manager or his designee shall, for each farm to which the provisions of this section are applicable, issue marketing cards and marketing certificates to the producers on the farm in the manner and subject to the conditions specified in §§ 728.667 to 728.670, inclusive.

§ 728.695 *Farms on which the normal production of the wheat acreage is less than 200 bushels*—(a) *Conditions of exemption.* A farm marketing quota for wheat of the 1956 crop shall not be applicable to any farm on which the normal production of the 1956 wheat acreage is less than 200 bushels.

(b) *Issuing marketing cards.* The county office manager or his designee shall, for each farm to which the provisions of this section are applicable issue marketing cards and marketing certificates to the producers on the farm in a manner and subject to the conditions specified in § 728.667 to 728.670.

§ 728.696 *Experimental wheat farms*—(a) *Conditions of exemption.* The penalty shall not apply to the marketing of any wheat of the 1956 crop grown for experimental purposes only on land owned or leased by any publicly-owned agricultural experiment station, and is produced at public expense by employees of the experiment station, or to wheat produced for experimental purposes only by farmers pursuant to an agreement with a publicly-owned experiment station whereby the experiment station bears the costs and risks incident to the production of the wheat and the proceeds from the crop inure to the benefit of the experiment station: *Provided*, That such agreement is approved by the State committee prior to the issuance of a marketing card for the farm. The production of foundation, registered or certified seed wheat will not be considered produced for experimental purposes only.

(b) *Issuing marketing cards.* The county office manager shall, upon the written application of a responsible executive officer of any publicly-owned agricultural experiment station to which the exemption referred to in paragraph (a) of this section is applicable, issue a marketing card for the experiment station in the manner and subject to the conditions specified in §§ 728.667 to 728.670 inclusive.

§ 728.697 *Wildlife refuge farms.* The penalty shall not apply to the wheat produced on any farm operated by any Federal or State wildlife refuge farm where all the wheat on the farm is produced solely for wildlife feed or seed for the production of wildlife feed on such wildlife refuge farm. No marketing card or marketing certificate shall be issued to any producer on any such farm except under the provisions of §§ 728.667 and 728.668, 728.694, and 728.695 but the exemption from penalty shall be granted by the county office manager upon the written application of the operator or responsible executive officer on any such farm stating that all the wheat produced on the farm will be used solely for wildlife feed and for seed for the production of wildlife feed on such wildlife refuge farm.

§ 728.698 *Erroneous notice of wheat acreage allotment.* In any case where through error in a county or State office the producer was officially notified in writing of a wheat acreage allotment for the 1956 crop larger than the finally approved acreage allotment and the State and county committees find that the producer, acting solely on the information contained in the erroneous notice, planted an acreage to wheat in excess of the finally approved acreage allotment, the producer will not be considered to have exceeded the acreage allotment unless he planted an acreage in excess of the allotment shown on the erroneous notice. The farm marketing quota and the farm marketing excess for the farm under the foregoing circumstances will be based on the acreage allotment contained in the erroneous notice, and if the acreage planted to wheat on the farm is adjusted to the allotment contained in the erroneous notice within the time limits for utilization of excess acreage as provided for in § 728.651 (r) or (u) (3) the farm will not be considered to be overplanted. Before a producer can be said to have relied upon the erroneous notice, the circumstances must have been such that the producer had no cause to believe that the acreage allotment notice was in error. To determine this fact, the date of any corrected notice in relation to the time of planting; the size of the farm; the amount of wheat customarily planted; and all other pertinent facts should be taken into consideration. If the county committee determines that the producer was justified in relying on the erroneous notice of wheat acreage allotment for the farm, such determination shall be subject to review and approval by the State committee before the erroneous allotment is used by the county committee to determine the farm marketing quota and farm marketing excess for the farm.

§ 728.699 *Redelegation of authority.* Any authority delegated to the State committee by §§ 728.650 to 728.699 may be redelegated by the State committee.

Issued this 13th day of December 1955.

[SEAL] TRUE D. MORSE,
Acting Secretary of Agriculture.

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

[Navel Orange Reg. 66]

PART 914—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

LIMITATION OF HANDLING

§ 914.366 *Navel Orange Regulation 66*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 14, as amended (7 CFR Part 914; 19 F. R. 2941), regulating the handling of navel oranges grown in Arizona and designated part of California, effective September 22, 1953, under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Navel Orange Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such navel oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The Navel Orange Administrative Committee held an open meeting on December 15, 1955, after giving due notice thereof, to consider supply and market conditions for navel oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein was promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such navel oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed on or before the effective date hereof.

(b) *Order.* (1) The quantity of navel oranges grown in Arizona and designated part of California which may be handled during the period beginning at 12:01 a. m., P. s. t., December 18, 1955, and ending at 12:01 a. m., P. s. t., December 25, 1955, is hereby fixed as follows:

(i) District 1: 369,600 cartons;

(ii) District 2: 37,140 cartons;

(iii) District 3: Unlimited movement;

(iv) District 4: Unlimited movement.

(2) Navel oranges handled pursuant to the provisions of this section shall be subject to any size restrictions applicable thereto which have heretofore been issued on the handling of such oranges and which are effective during the period specified herein.

(3) As used in this section, "handled," "District 1," "District 2," "District 3," and "District 4" have the same meaning as when used in said amended marketing agreement and order; and "carton" means the standard one-half orange, grapefruit, or lemon box set forth as standard container number 58 in section 828.83, as amended, of the Agricultural Code of California.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: December 16, 1955.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[Grapefruit Reg. 233]

PART 933—ORANGES, GRAPEFRUIT, AND TANGERINES GROWN IN FLORIDA

LIMITATION OF SHIPMENTS

§ 933.759 *Grapefruit Regulation 233*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 33, as amended (7 CFR Part 933), regulating the handling of oranges, grapefruit, and tangerines grown in the State of Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of grapefruit, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than December 19, 1955. Shipments of grapefruit, grown in the State of Florida, are presently subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order, and will so continue until December 19, 1955; the recommendation and supporting information for continued regulation subsequent to December 18, 1955, were promptly submitted to the Department after an open meeting of the Growers Administrative Committee on December 13; such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including the effective time hereof, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such grapefruit; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of grapefruit; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time hereof.

(b) *Order.* (1) During the periods beginning at 12:01 a. m., e. s. t., December 19, 1955, and ending at 12:01 a. m., e. s. t., December 23, 1955, and beginning at 12:01 a. m., e. s. t., December 28, 1955, and ending at 12:01 a. m., e. s. t., January 9, 1956, no handler shall ship:

(i) Any seeded grapefruit, grown in the State of Florida, which are not mature and do not grade at least U. S. No. 1 Russet;

(ii) Any seedless grapefruit, grown in Regulation Area I, which are not mature and do not grade at least U. S. No. 1 Russet;

(iii) Any seedless grapefruit, grown in Regulation Area II, which are not mature and do not grade at least U. S. No. 2;

(iv) Any seedless grapefruit, grown in Regulation Area II, which are mature and which grade U. S. No. 2 or U. S. No. 2 Bright unless such seedless grapefruit (*a*) are in the same container with seedless grapefruit which grade at least U. S. No. 1 Russet and (*b*) are not in excess of 50 percent, by count, of the number of all seedless grapefruit in such container;

(v) Any white seeded grapefruit, grown in the State of Florida, which are of a size smaller than a size that will

pack 70 grapefruit, packed in accordance and with the requirements of a standard pack, in a standard nailed box;

(vi) Any pink seeded grapefruit, grown in the State of Florida, which are of a size smaller than a size that will pack 80 grapefruit, packed in accordance with the requirements of a standard pack, in a standard nailed box; or

(vii) Any seedless grapefruit, grown in the State of Florida, which are of a size smaller than a size that will pack 96 grapefruit, packed in accordance with the requirements of a standard pack, in a standard nailed box.

(2) During the period beginning at 12:01 a. m., e. s. t., December 23, 1955, and ending at 12:01 a. m., e. s. t., December 28, 1955, no handler shall ship any grapefruit, grown in the State of Florida.

(3) As used herein, "handler," "ship," "Growers Administrative Committee," "Regulation Area I," and "Regulation Area II," shall have the same meaning as when used in said amended marketing agreement and order; the terms "U. S. No. 1 Russet," "U. S. No. 2," "U. S. No. 2 Bright," "standard pack," and "standard nailed box" shall have the same meaning as when used in the revised United States Standards for Florida Grapefruit (7 CFR 51.750–51.790); and the term "mature" shall have the same meaning as set forth in section 601.16 Florida Statutes, Chapters 26492 and 28090, known as the Florida Citrus Code of 1949, as supplemented by section 601.17 (Chapters 25149 and 28090) and also by section 601.18, as amended on June 2, 1955 (Chapter 29760).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: December 14, 1955.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[Orange Reg. 287]

PART 933—ORANGES, GRAPEFRUIT, AND TANGERINES GROWN IN FLORIDA

LIMITATION OF SHIPMENTS

§ 933.760 *Orange Regulation 287*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 33, as amended (7 CFR Part 933), regulating the handling of oranges, grapefruit, and tangerines grown in the State of Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order and upon other available information, it is hereby found that the limitation of shipments of all Florida oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than December 19, 1955. Shipments of all oranges, grown in the State of Florida, are presently subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order, and will so continue until December 19, 1955; the recommendation and supporting information for continued regulation subsequent to December 18, 1955, were promptly submitted to the Department after an open meeting of the Growers Administrative Committee on December 13; such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including the effective time hereof, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of all oranges, and compliance with this section will not require any special preparation on the part of the persons subject thereto which cannot be completed by the effective time hereof.

(b) *Order.* (1) During the periods beginning at 12:01 a. m., e. s. t., December 19, 1955, and ending at 12:01 a. m., e. s. t., December 23, 1955, and beginning at 12:01 a. m., e. s. t., December 28, 1955, and ending at 12:01 a. m., e. s. t., January 9, 1956, no handler shall ship:

(i) Any oranges, including Temple oranges, grown in the State of Florida, which do not grade at least U. S. No. 1 Russet; or

(ii) Any oranges, except Temple oranges, grown in the State of Florida, which are of a size smaller than a size that will pack 252 oranges, packed in accordance with the requirements of a standard pack, in a standard 1⅗ bushel nailed box.

(2) During the period beginning at 12:01 a. m., e. s. t., December 23, 1955, and ending at 12:01 a. m., e. s. t., December 28, 1955, no handler shall ship any oranges, including Temple oranges, grown in the State of Florida.

(3) As used herein, the terms "handler," "ship," and "Growers Administrative Committee" shall each have the same meaning as when used in said amended marketing agreement and order; and the terms "U. S. No. 1 Russet," "standard pack," and "standard 1⅗ bushel nailed box" shall have the same meaning as when used in the United States Standards for Florida Oranges and Tangelos (§§ 51.1140–51.1184 of this title, 20 F. R. 7205).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: December 14, 1955.

[Tangerine Reg. 164]

PART 933—ORANGES, GRAPEFRUIT, AND TANGERINES GROWN IN FLORIDA

LIMITATION OF SHIPMENTS

§ 933.761 *Tangerine Regulation 164*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 33, as amended (7 CFR Part 933), regulating the handling of oranges, grapefruit, and tangerines grown in the State of Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of tangerines, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than December 19, 1955. Shipments of tangerines, grown in the State of Florida, are presently subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order, and will so continue until December 19, 1955; the recommendation and supporting information for continued regulation subsequent to December 18, 1955, were promptly submitted to the Department after an open meeting of the Growers Administrative Committee on December 13; such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including the effective time hereof, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such tangerines; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of tangerines; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed on or before the effective time hereof.

(b) *Order.* (1) During the periods beginning at 12:01 a. m., e. s. t., December 19, 1955, and ending at 12:01 a. m., e. s. t., December 23, 1955, and beginning at 12:01 a. m., e. s. t., December 28, 1955, and ending at 12:01 a. m., e. s. t., January 9, 1956, no handler shall ship:

(i) Any tangerines, grown in the State of Florida, that do not grade at least U. S. No. 1 Russet; or

(ii) Any tangerines, grown in the State of Florida, that are of a size smaller than the size that will pack 210 tangerines, packed in accordance with the requirements of a standard pack, in a half-standard box (inside dimensions 9½ x 9½ x 19⅛ inches; capacity 1,726 cubic inches).

(2) During the period beginning at 12:01 a. m., e. s. t., December 23, 1955, and ending at 12:01 a. m., e. s. t., December 28, 1955, no handler shall ship any tangerines grown in the State of Florida.

(3) As used in this section, "handler," "ship," and "Growers Administrative Committee" shall have the same meaning as when used in said amended marketing agreement and order; and the terms "U. S. No. 1 Russet" and "standard pack" shall have the same meaning as when used in the revised United States Standards for Florida Tangerines (7 CFR 51.1810–51.1836).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

[Lemon Reg. 620]

PART 953—LEMONS GROWN IN CALIFORNIA AND ARIZONA

LIMITATIONS OF SHIPMENTS

§ 953.727 *Lemon Regulation 620*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 53, as amended (7 CFR Part 953; 20 F. R. 8451), regulating the handling of lemons grown in the State of California or in the State of Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of the quantity of such lemons which may be handled, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. Shipments of lemons, grown in the State of California or in the State of Arizona, are currently subject to regulation pursuant to said amended marketing agreement and order; the recommendation and supporting information for regulation during the period specified herein was promptly submitted to the Department after an open meeting of the Lemon Administrative Committee on December 14, 1955, such meeting was held, after giving due notice thereof to consider recommendations for regulation, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time thereof.

(b) *Order.* (1) The quantity of lemons grown in the State of California or in the State of Arizona which may be handled during the period beginning at 12:01 a. m., P. s. t., December 18, 1955, and ending at 12:01 a. m., P. s. t., December 25, 1955, is hereby fixed as follows:

(i) District 1: Unlimited movement;

(ii) District 2: 148,800 cartons;

(iii) District 3: Unlimited movement.

(2) As used in this section, "handled," "District 1," "District 2," and "District 3" have the same meaning as when used in the said amended marketing agreement and order; and "carton" means the standard one-half orange, grapefruit or lemon box set forth as standard container number 58 in section 828.83, as amended, of the Agricultural Code of California.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: December 15, 1955.

TITLE 39—POSTAL SERVICE

Chapter I—Post Office Department

PART 16—BULK MAILINGS

PART 110—RATES AND SHIPPING REQUIREMENTS

MISCELLANEOUS AMENDMENTS

1. In § 16.2 *Third class mailings* amend paragraph (b) (1) to read as follows:

(1) *Direct package.* When there are 10 or more pieces for any one post office (or station or branch if its name forms part of the address), face all addresses one way. Do not label direct packages.

(R. S. 161, 396, secs. 304, 309, 42 Stat. 24, 25, sec. 3, 65 Stat. 673; 5 U. S. C. 22, 369, 39 U. S. C. 290 a–1)

2. In § 110.1 *Rates and shipping requirements* amend the country item "Ireland (Eire)" by changing the weight limit from 15 pounds to 22 pounds.

(R. S. 161, 396, 398; secs. 304, 309, 42 Stat. 24, 25, 48 Stat. 943; 5 U. S. C. 22, 369, 372)

TITLE 18—CONSERVATION OF POWER

Chapter I—Federal Power Commission

[Docket No. R-148, Order 181]

PART 125—PRESERVATION OF RECORDS OF PUBLIC UTILITIES AND LICENSEES

SCHEDULE OF RECORDS AND PERIODS OF RETENTION

In this proceeding the Commission has under consideration the amendment of its General Rules and Regulations, Part 125—Preservation of Records of Public Utilities, § 125.2—Schedule of Records and Periods of Retention, as heretofore amended by Order No. 156, issued October 25, 1950 and effective January 1, 1951 (18 CFR § 125.2). The purpose of the revision is to reduce in certain instances the time for which records are required to be retained and to permit in other instances such retention in the form of microfilms after the elapse of a specified period where such retention is acquired.

General public notice of this proposed rule-making was given by publication in the FEDERAL REGISTER on August 23, 1955 (20 F. R. 6140–6141). Such notice was also served on public utilities and licensees known or presumed to be subject to

the Federal Power Act, all state commissions and interested Federal Agencies. In giving notice of the proposed amendments, the Commission invited all interested persons to submit data, views and comments in writing. Eight responses have been received to the rule-making notice, of which three make an unqualified recommendation for adoption of all the proposed changes, and all of which have been carefully considered.

No request has been made for a hearing on the proposed amendments in the responses received to the rule-making notice or otherwise.

The Commission finds:

(1) It is necessary and appropriate for the purposes of administration of the Federal Power Act that § 125.2, Schedule of Records and Periods of Retention, as heretofore amended, be amended as hereinafter provided.

(2) The proposed amendments represent matters of practice and procedure which do not require a hearing under Section 4 of the Administrative Procedure Act.

(3) Good cause exists that these amendments become effective as hereinafter provided.

The Commission, acting pursuant to authority granted by the Federal Power Act, as amended (49 Stat. 838; 16 U. S. C. 791a–825r) and particularly Sections 301 (a), 301 (b), 302 (b), 303, 304 (b) and 309 (49 Stat. 854, 855, 858; 16 U. S. C. 825 (a), 825 (b), 825a (b), 825b, 825c, 825h), and subject to the provisions of Section 4 of the Administrative Procedure Act (60 Stat. 238; 5 U. S. C. 1003), orders:

(A) Section 125.2, Schedule of Records and Periods of Retention, as heretofore amended, is hereby further amended as shown below.

(B) The amendments prescribed by this order shall become effective January 1, 1956.

(Sec. 309, 49 Stat. 858; 16 U. S. C. 825h)

Adopted: December 7, 1955.

Issued: December 13, 1955.

By the Commission.

[SEAL] LEON M. FUQUAY, *Secretary.*

PART 106—HEARINGS IN CONNECTION WITH SCHOOL CONSTRUCTION AND FINANCIAL ASSISTANCE IN FEDERALLY IMPACTED AREAS

PART 107—FEDERAL ASSISTANCE IN THE CONSTRUCTION OF MINIMUM SCHOOL FACILITIES IN AREAS AFFECTED BY FEDERAL ACTIVITIES

PART 108—FEDERAL ASSISTANCE BEGINNING JULY 1, 1954, IN THE CONSTRUCTION OF MINIMUM SCHOOL FACILITIES IN AREAS AFFECTED BY FEDERAL ACTIVITIES

MISCELLANEOUS AMENDMENTS

1. In view of the pending republication of the volume containing Title 45 of the Code of Federal Regulations in revised form so as to present the complete text of the regulations therein duly promulgated on or before December 31, 1955, and effective as to facts arising on and after January 1, 1956, Part 103, 45 CFR (16 F. R. 2706); Part 104, 45 CFR (16 F. R. 679, 2840, 4619, 5022, 10558, 17 F. R. 3210, 9106); Part 107, 45 CFR (18 F. R. 6708, 19 F. R. 2212, 3491); Part 108, 45 CFR (19 F. R. 6647) inclusive, of the above parts are hereby deleted without affecting in any way rights accrued or obligations incurred under any of these parts.

2. Subpart A of Part 105, 45 CFR (18 F. R. 6704, October 22, 1953) issued pursuant to Public Law 874, 81st Cong. (64 Stat. 1100), as amended by the 83d Cong. by Public Law 11 (67 Stat. 13), Public Law 170 (67 Stat. 250), and Public Law 248 (67 Stat. 530), is hereby amended by recognition, in § 105.1 and paragraph (a), of further amendatory enactments by the 83d Congress and the first session of the 84th Congress. The amended section and paragraph reads as follows:

§ 105.1 *Definitions.* All terms used in this part which are defined in Public Law 874, 81st Cong. (64 Stat. 1100), as amended by the 83d Cong. by Public Law 11 (67 Stat. 13), Public Law 170 (67 Stat. 250), Public Law 248 (67 Stat. 530), and Public Law 732 (68 Stat. 1006), and by the 84th Cong. by Public Law 204 (69 Stat. 433), Public Law 221 (69 Stat. 471),

and Public Law 382 (69 Stat. 713), and not defined in this section shall have the meaning given to them in Public Law 874, as amended. As used in this part, and for the purposes of this part and determinations under Public Law 874, as amended, the following terms shall have the meaning indicated in paragraphs (a) to (k) of this section:

(a) *Act.* "The act" means Public Law 874, 81st Congress (64 Stat. 1100), as amended by the 83d Cong. by Public Law 11 (67 Stat. 13), Public Law 170 (67 Stat. 250), Public Law 248 (67 Stat. 530), and Public Law 732 (68 Stat. 1006), and by the 84th Cong. by Public Law 204 (69 Stat. 433), Public Law 221 (69 Stat. 471), and Public Law 382 (69 Stat. 713).

* * * * *

3. The title of Part 106, 45 CFR (18 F. R. 6707, October 22, 1953), the definitions, and the provision granting opportunity for a hearing, issued pursuant to Public Law 815, 81st Congress (64 Stat. 967) as amended, and Public Law 874, 81st Congress (64 Stat. 1100) as amended, are hereby amended to conform with recent amendments.

The amended title reads as set forth above and the sections read as follows:

§ 106.1 *Definitions.* Terms defined in Public Law 815, 81st Cong. (64 Stat. 967), as amended, and Public Law 874, 81st Cong. (64 Stat. 1100), as amended, and not defined in this section shall have the meaning given such terms in such public laws. As used in this part, the following terms shall have the meaning indicated in paragraphs (a) to (g) of this section:

(a) *Commissioner.* The "Commissioner" means the Commissioner of Education, Department of Health, Education, and Welfare.

(b) *Public Law 815.* "Public Law 815" means Public Law 815, 81st Cong. (64 Stat. 967), as added by Public Law 246, 83d Cong. (67 Stat. 522), and as amended by Public Law 731 (68 Stat. 1005), and Public Law 382, 84th Cong. (69 Stat. 713).

(c) *Public Law 874.* "Public Law 874" means Public Law 874, 81st Cong. (64 Stat. 1100), as amended by Public Law 11, 83d Cong. (67 Stat. 13), Public Law 170 (67 Stat. 250), Public Law 248 (67 Stat. 530), Public Law 732 (68 Stat. 1006), Public Law 204, 84th Cong. (69 Stat. 433), Public Law 221 (69 Stat. 482 and 485), and Public Law 382 (69 Stat. 713).

(d) *Title III.* "Title III" means title III of Public Law 815 and such provisions of title II as are applicable to title III.

(e) *Title IV.* "Title IV" means title IV of Public Law 815, and such provisions of title II as are applicable to title IV.

(f) *Applicant.* "Applicant" means a local educational agency which has filed an application under titles III or IV and regulations issued thereunder; or a local educational agency which has filed an application under Public Law 874 and Part 105 of this chapter as the context may indicate.

(g) *Application.* "Application" means a complete application under title III or title IV, as defined in regulations issued thereunder; or an application under Public Law 874 as defined in the applicable provisions of Part 105 of this chapter.

§ 106.2 *Opportunity for hearing.*

* * *

(c) In the event the Commissioner has reason to believe that clause (1), (2), or (3), of section 311 of title III is applicable to an applicant; or that any condition established by title IV or any condition required by the Commissioner in connection therewith has not been complied with by an applicant; he shall so notify the applicant. Such notice, a copy of which shall likewise be sent to the State educational agency, shall either (1) advise the applicant of the specific provision under which the Commissioner's action is taken and the basis for his belief and fix a date not less than 20 days, nor more than 60 days, after the date of such notice within which the applicant may request that the matter be scheduled for hearing in due course; or (2) advise the applicant that the matter in question has been set down for hearing at a stated place and time. The time and place so fixed shall be subject to change for cause. The failure of an applicant without the consent of the Commissioner to request a hearing under clause (1) or to appear at a hearing for which a date has been set, shall be deemed to be a waiver of the right to a hearing under this subsection and consent to the Commissioner making a decision on the basis of such information as is available to him.

(Sec. 208, 64 Stat. 975; 20 U. S. C. 278)

Dated: December 6, 1955.

[SEAL] S. M. BROWNELL,
United States Commissioner of Education.

Approved: December 13, 1955.

M. B. FOLSOM,
Secretary of Health, Education, and Welfare.

TITLE 19—CUSTOMS DUTIES

Chapter I—Bureau of Customs, Department of the Treasury

[T. D. 53975]

PART 8—LIABILITY FOR DUTIES; ENTRY OF IMPORTED MERCHANDISE

INVOICES

A study of the necessity for customs purposes of requiring certified extracts of invoices in connection with the entry for consumption of portions of zone lots of merchandise for which merchandise the original invoice has already been filed at the same port in connection with a prior entry for consumption of a portion thereof has shown that eliminating the requirement of certified extracts in such cases will be beneficial to all parties.

To incorporate this change, the Customs Regulations are amended as follows:

Section 8.11 (a) is amended by adding a new sentence to read: "However, an extract from the invoice filed with the first entry for consumption from a foreign-trade zone of a portion of the merchandise shown on the invoice will not be required for any subsequent entry for consumption from that zone at the same port of a portion of the merchandise covered by such invoice, if a pro forma invoice is filed and identifies the entry first made and the invoice then filed."

(Sec. 624, 46 Stat. 759; 19 U. S. C. 1624. Interprets or applies sec. 484, 46 Stat. 722, as amended; 19 U. S. C. 1484)

[SEAL] RALPH KELLY,
Commissioner of Customs.

Approved: December 7, 1955.

DAVID W. KENDALL,
Acting Secretary of the Treasury.

[F. R. Doc. 55-10126; Filed, Dec. 16, 1955; 8:48 a. m.]

[T. D. 53976]

PART 16—LIQUIDATION OF DUTIES

PART 17—PROTESTS AND REAPPRAISEMENTS

NOTICE OF LIQUIDATION

It has been decided to issue a new form, customs Form 4335, for use in giving notice of the liquidation of free consumption entries liquidated "As Entered." It has also been decided that notice of the liquidation of free informal and free mail entries need not be given.

To give importers more timely notice of the liquidation of informal, mail, and baggage entries, the forms used for giving receipts for duties and any internal-revenue taxes collected on such entries are being amended to include such notice. No informal, mail, or baggage entry will be listed on a bulletin notice of liquidation unless it is reliquidated.

Accordingly, the Customs Regulations are hereby amended as follows:

1. Section 16.2 is amended as follows:

a. Paragraph (d) is amended by deleting the first three sentences and substituting therefor: "After liquidation by the collector, formal entries, except free consumption entries liquidated 'As Entered', shall be scheduled promptly on a bulletin notice of liquidation, customs Form 4333. Free consumption entries liquidated 'As Entered' shall be scheduled promptly on a bulletin notice of liquidation, customs Form 4335. When free consumption entries in an unbroken series of numbers are liquidated free on the same day, the first and last entry numbers may be shown on the bulletin notice, e. g., '567/863,' instead of listing every number in the unbroken series."

and by substituting "16.12." for "16.12 (a)." in the fourth sentence.

b. Paragraph (e) is amended by deleting "the notice thereof" and substituting therefor "notice thereof on customs Form 4333".

c. Paragraph (f) is amended by inserting "on customs Form 4333" after the word "Notices" where it first appears.

d. Paragraph (g) is amended by deleting the comma after the figure "4333" and substituting therefor "or 4335,".

(Secs. 505, 624, 46 Stat. 732, 759; 19 U. S. C. 1505, 1624)

2. Section 16.12 is amended as follows:

a. Paragraph (a) is amended by deleting ", informal, mail, or baggage" in the first sentence.

b. Paragraph (b) is redesignated (c) and a new paragraph (b) is inserted as follows:

(b) The effective date of liquidation of informal, mail, and baggage entries shall be the date of payment by the importer of duties and any internal-revenue taxes thereon, or if the articles are released under such an entry free of duty and tax, the date of release of the articles by customs or the postmaster, as the case may be. Notice of liquidation of informal, mail, and baggage entries is furnished by a suitable printed statement appearing on the receipts issued for duties and any internal-revenue taxes collected on such entries and no other notice of the liquidation shall be given, but notice of reliquidation of any such entries shall be given on customs Form 4333 posted or lodged in the place and manner specified in § 16.2 (d).

c. Redesignated paragraph (c) is amended to read as follows:

(c) The release of merchandise under a free informal, free mail, or free baggage entry shall constitute notice of the liquidation of the entry free of duty and tax. No further notice of the liquidation of free baggage entries, whether originals or certified duplicates, on customs Form 5123, 6059, 6059–A, 6059–B, or 6063, free informal entries on customs Form 5119 or 5119–A, and free mail entries on customs Form 3419 or 3420, shall be given.

(Sec. 624, 46 Stat. 759; 19 U. S. C. 1624. Interpret or apply sec. 505, 46 Stat. 732; 19 U. S. C. 1505)

3. Section 17.1 (c) is amended to read as follows:

(c) The date of liquidation for the purpose of computing the time for filing a protest under section 514, Tariff Act of 1930, shall be the date of posting or lodging a notice of the liquidation in accordance with § 16.2 (d) or § 16.12 (a) of this chapter, except that, in the case of baggage, informal, and mail entries, the date of liquidation shall be the date of payment of duties and internal-revenue taxes thereon or the date of release, as set forth in § 16.12 (b) of this chapter.

(Sec 624, 46 Stat. 759; 19 U. S. C. 1624. Interprets or applies sec. 514, 46 Stat. 734; 19 U. S. C. 1514)

These amendments shall be effective as soon as customs Form 4335 and the forms used to give receipts for duties and any internal-revenue taxes collected on informal, mail, and baggage entries have been printed, or revised to conform to the changed procedure, and are available for use.

[SEAL] RALPH KELLY,
Commissioner of Customs.

Approved: December 13, 1955.

DAVID W. KENDALL,
Acting Secretary of the Treasury.

[T. D. 53978]

PART 23—ENFORCEMENT OF CUSTOMS AND NAVIGATION LAWS

FORFEITURE; NOTICE OF SEIZURE AND SALE

In order to increase from $100 to $250 the limitation on the value of property for which notice of seizure and intention to forfeit may be given by posting such notice, § 23.16 (a) of the Customs Regulations is hereby amended by substituting "$250" for "$100" in each of the last two sentences.

(Secs. 624, 46 Stat. 759; 19 U. S. C. 1624. Interprets or applies sec. 607, 46 Stat. 754, as amended; 19 U. S. C. 1607)

[SEAL] RALPH KELLY,
Commissioner of Customs.

Approved: December 13, 1955.

DAVID W. KENDALL,
Acting Secretary of the Treasury.

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Parts 904, 934, 996, 999]

MILK IN GREATER BOSTON, MERRIMACK VALLEY, SPRINGFIELD, AND WORCESTER, MASSACHUSETTS, MARKETING AREAS

NOTICE OF OPPORTUNITY TO SUBMIT DATA, VIEWS, AND ARGUMENTS IN CONNECTION WITH PROPOSED AMENDMENT TO RULES AND REGULATIONS

Notice is hereby given that pursuant to the authority contained in Orders Nos. 4, 34, 96, and 99, as amended, regulating the handling of milk in the Greater Boston, Merrimack Valley, Springfield, and Worcester, Massachusetts, marketing areas, respectively (7 CFR Parts 904, 934, 996, and 999), the market administrator is considering the issuance, as hereinafter proposed, of an amendment to the rules and regulations (7 CFR 904.101 et seq., 934.101 et seq., 996.101 et seq., 999.101 et seq.) issued to effectuate the terms and provisions of the said orders.

All persons who desire to submit data, views, or arguments in connection with the proposed amendment to the rules and regulations should submit them in writing to the market administrator at Room 403, 230 Congress Street, Boston 10, Massachusetts, by mail or otherwise, in time to be received not later than 5:15 p. m., December 22, 1955.

The proposed amendment is as follows:

Amend the table of standard weights in §§ 904.141, 934.141, 996.141, and 999.141, to provide the following standard weights for half and half, to be used in the absence of specific weights:

Product	Butterfat test	Weight (pounds)	
		Per quart container	Per 40-quart container
Half and half	Any test	2.14	84.5

Issued at Boston, Massachusetts, this 8th day of December 1955.

[SEAL] RICHARD D. APLIN,
Market Administrator.

[F. R. Doc. 55-10134; Filed, Dec. 16, 1955; 8:49 a. m.]

[7 CFR Part 953]

LEMONS GROWN IN CALIFORNIA AND ARIZONA

NOTICE OF PROPOSED RULE MAKING WITH RESPECT TO EXPENSES AND FIXING OF RATE OF ASSESSMENT FOR 1955–56 FISCAL YEAR

Consideration is being given to the following proposals submitted by the Lemon Administrative Committee, established pursuant to the marketing agreement, as amended, and Order No. 53, as amended (7 CFR, Part 953; 20 F. R. 8451), regulating the handling of lemons grown in the State of California or in the State of Arizona, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), as the agency to administer the terms and provisions thereof: (1) That the Secretary of Agriculture find that expenses not to exceed $134,995.00 will be necessarily incurred during the fiscal year ending October 31, 1956, for the maintenance and functioning of the committee established under the aforesaid amended marketing agreement and order, and (2) that the Secretary of Agriculture fix, as the pro rata share of such expenses which each handler who first handles lemons shall pay in accordance with the aforesaid amended marketing agreement and order during the aforesaid fiscal year, the rate of assessment at seven eighths (⅞) cents per carton of lemons, or an equivalent quantity of lemons, handled by him as the first handler thereof during said fiscal year.

All persons who desire to submit written data, views, or arguments in connection with the aforesaid proposals should file the same with the Director, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, Room 2077, South Building, Washington 25, D. C., not later than the close of business on the 10th day after the publication of this notice in the FEDERAL REGISTER. All documents should be filed in quadruplicate.

Terms used herein shall have the same meaning as when used in said amended marketing agreement and order; and "carton" shall mean the standard one-half orange, grapefruit, or lemon box set forth as standard container number

58 in section 828.83, as amended, of the Agricultural Code of California.

Dated: December 13, 1955.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

[25 CFR Part 130]

OPERATION AND MAINTENANCE CHARGES

CERTAIN INDIAN IRRIGATION PROJECTS

Pursuant to section 4 (a) of the Administrative Procedure Act of June 11, 1946 (60 Stat. 238) and by virtue of authority delegated by the Secretary of the Interior to the Commissioner of Indian Affairs, September 14, 1946 (11 F. R. 10297), and delegation by the Commissioner to the Area Director by Order No. 551, Amendment No. 1, dated June 5, 1951, notice is hereby given of the intention to modify § 130.105 *Charges*, of Title 25 CFR, Chapter 1, Subchapter L, Part 130, dealing with operation and maintenance assessments against irrigable lands of Miscellaneous Indian Irrigation Projects, by increasing the partial payment of water charges from $0.80 per acre to $3.40 per acre at the Duck Valley Irrigation Project, Nevada, and from $0.50 per acre to $5.15 per acre at the Pyramid Lake Project, Nevada. The revised section will read as follows:

§ 130.105 *Charges.* Pursuant to the acts of August 1, 1914 and March 7, 1928 (38 Stat. 583, 45 Stat. 210; 25 U. S. C. 385, 387), a part of the reimbursable cost of operating and maintaining the irrigation projects named in this section is apportioned on a per-acre basis against the irrigable lands of the respective projects for the calendar year 1956 and for each succeeding calendar year until further order, in the amounts designated below for each project, and there is assessed against each acre of irrigable land to which water can be delivered through the constructed works of the respective projects, the amounts designated for each project, to be applied in the reimbursement of such apportionments:

Project and agency	Per acre (per annum)
Duck Valley, Western Shoshone	$3.40
Miscellanous Units, Navajo	.50
Pyramid Lake Unit, Carson	5.15
San Carlos Reservation Unit, San Carlos	.50
San Xavier Unit, Sells	1.00
Tongue River Unit, Tongue River	.25
Warm Springs Unit, Warm Springs	2.00

Interested persons are hereby given opportunity to participate in preparing the proposed amendments by submitting their views and data or argument in writing to F. M. Haverland, Area Director, Phoenix Area Office, P. O. Box 7007, Phoenix, Arizona, within thirty (30) days from date of publication of this notice of intention in the daily issue of the FEDERAL REGISTER.

F. M. HAVERLAND,
Area Director.

NOTICES

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

ALASKA

NOTICE OF PROPOSED WITHDRAWAL AND RESERVATION OF LANDS

DECEMBER 9, 1955.

The Bureau of Land Management has filed an application, Serial No. Anchorage 026736, for the withdrawal of the lands described below, from all forms of appropriation including the mining laws, but not including the mineral-leasing laws, the Materials Act, the Grazing Act, the Timber Act, the Small Tract Act, the Alaska Public Sale Act, or the Recreation and Public Purposes Act. The applicant desires the land for Forestry Management Purposes.

For a period of 60 days from the date of publication of this notice, persons having cause may present their objections in writing to the undersigned official of the Bureau of Land Management, Department of the Interior, Box 480, Anchorage, Alaska.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

The lands involved in the application are:

Aggregating approximately 104,559 acres.

ROGER R. ROBINSON,
Operations Supervisor.

[F. R. Doc. 55-10118; Filed, Dec. 16, 1955; 8:47 a. m.]

Bureau of Reclamation

OWYHEE PROJECT, IDAHO

ORDER OF REVOCATION

DECEMBER 8, 1953.

Pursuant to the authority delegated by Departmental Order No. 2515 of April 7, 1949 (14 F. R. 1937), I hereby revoke Departmental Order of March 26, 1930, in so far as said order affects the following-described land; provided, however, that such revocation shall not affect the withdrawal of any other lands by said order or affect any other orders withdrawing or reserving the land hereinafter described:

BOISE MERIDIAN, IDAHO

T. 9 N., R. 3 E.,
Sec. 21, Lots 1, 2, 3, 4, 5 and 6, S½NE¼ and NW¼SE¼;
Sec. 22, All;
Sec. 27, Lots 1, 2 and 3, and SE¼NW¼.
T. 9 N., R. 4 E.,
Sec. 29, SW¼.

The above area contains approximately 1,002 acres of vacant public land.

H. F. MCPHAIL,
Acting Commissioner.

[1372850]

DECEMBER 13, 1955.

I concur. The records of the Bureau of Land Management will be noted accordingly.

The following-described lands, which comprise a part of the Boise National Forest, shall be opened, subject to any valid existing rights and the requirements of applicable law, to such applications, selections, and locations as are permitted on national forest lands effective at 10:00 a. m. on January 18, 1956:

BOISE MERIDIAN

T. 9 N., R. 3 E.,
Sec. 21, Lots 1 to 6, incl., S½NE¼, NW¼ SE¼;
Sec. 22, Lots 1 and 2.

The areas described aggregate 293.49 acres.

The following-described lands have been patented:

BOISE MERIDIAN

T. 9 N., R. 3 E.,
Sec. 22, Lots 11, 12, NE¼NE¼;
Sec. 27, Lots 1 and 3.

The areas described aggregate 175.28 acres.

Most of the remaining lands are in power site withdrawals. They are located near Banks and Garden Valley, Boise County, Idaho. The lands are mainly of rough and mountainous topography. In addition to their range, forest, and water values, many of the lands have significant aesthetic, recreational, and small tract values. Most of the lands have some timber cover and they are located on or relatively near to either the North Fork or the South Fork of the Payette River. Some of the subdivisions are traversed by State Highway No. 17. Because of their rough and mountainous topography they have no significant value for agricultural development and use.

No application for the restored lands may be allowed under the homestead, desert-land, small tract, or any other nonmineral public-land law unless the lands have already been classified as valuable or suitable for such type of application, or shall be so classified upon the consideration of an application. Any application that is filed will be considered on its merits. The lands will not be subject to occupancy or disposition until they have been classified.

Subject to any valid existing rights and the requirements of applicable law, the restored lands are hereby opened to filing of applications, selections, and locations in accordance with the following:

a. Applications and selections under the nonmineral public-land laws may be presented to the Manager mentioned below, beginning on the date of this order. Such applications and selections will be considered as filed on the hour and respective dates shown for the various classes enumerated in the following paragraphs:

(1) Applications by persons having prior existing valid settlement rights, preference rights conferred by existing laws, or equitable claims subject to allowance and confirmation will be adjudicated on the facts presented in support of each claim or right. All applications presented by persons other than those referred to in this paragraph will be subject to the applications and claims mentioned in this paragraph.

(2) All valid applications under the Homestead, Desert Land, and Small Tract Laws by qualified veterans of World War II or of the Korean Conflict, and by others entitled to preference rights under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279-284 as amended), presented prior to 10:00 a. m. on January 18, 1956, will be considered as simultaneously filed at that hour. Rights under such preference right applications filed after that hour and before 10:00 a. m. on April 18, 1956, will be governed by the time of filing.

(3) All valid applications and selections under the nonmineral public-land laws, other than those coming under paragraphs (1) and (2) above, presented prior to 10:00 a. m. on April 18, 1956, will be considered as simultaneously filed at that hour. Rights under such applications and selections filed after that hour will be governed by the time of filing.

b. The lands have been open to applications and offers under the mineral-leasing laws. They will be open to location under the United States mining laws beginning at 10:00 a. m. on April 18, 1956.

Persons claiming veterans preference rights must enclose with their applications proper evidence of military or naval service, preferably a complete photostatic copy of the certificate of honorable discharge. Persons claiming preference rights based upon valid settlement, statutory preference, or equitable claims must enclose properly corroborated statements in support of their claims. Detailed rules and regulations governing applications which may be filed pursuant to this notice can be found in Title 43 of the Code of Federal Regulations.

Inquiries concerning the lands shall be addressed to the Manager, Land Office, Bureau of Land Management, Boise, Idaho.

EDWARD WOOZLEY,
Director,
Bureau of Land Management.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

MCLAUGHLIN COMMISSION CO.

POSTING OF STOCKYARD

The Secretary of Agriculture has information that the McLaughlin Commission Company, McLaughlin, South Dakota, is a stockyard as defined in Section 302 of the Packers and Stockyards Act, 1921, as amended (7 U. S. C. 202), and should be made subject to the provisions of that act.

Therefore, notice is hereby given that the Secretary of Agriculture proposes to issue a rule designating the stockyard named above as a posted stockyard subject to the provisions of the Packers and Stockyards Act, 1921, as amended (7 U. S. C. 181 et seq.), as is provided in section 302 of that act. Any interested person who desires to do so may submit, within 15 days of the publication of this notice, any data, views or arguments, in writing, on the proposed rule to the Director, Livestock Division, Agricultural Marketing Service, United States Department of Agriculture, Washington 25, D. C.

Done at Washington, D. C., this 13th day of December 1955.

[SEAL] H. E. REED,
Director, Livestock Division, Agricultural Marketing Service.

Commodity Stabilization Service and Commodity Credit Corporation

LENDING AGENCY AGREEMENT FOR COMMODITY LOANS ON GRAIN, SEED AND OTHER COMMODITIES SIMILARLY HANDLED

COMPENSATION

The offer made by the Commodity Credit Corporation, published in 20 F. R. 6477, covering rates of compensation to lending agencies who are party signatories to and operating under the CCC Form 322 (4-22-54) Lending Agency Agreement (for commodity loans on grain, seed and other commodities similarly handled) is hereby amended to offer the payment of compensation for loans made pursuant to CCC commodity loan programs for 1955 crops and for loans made pursuant to CCC reseal loan programs for 1954 crops as follows:

1. If the Agency invests its funds in notes evidencing loans made by Agency under said Agreement or made by another lending agency under a Lending Agency Agreement with CCC, the Agency shall receive compensation for interest on the funds invested and for the servicing of such loans as follows:

(a) On loan repayments received by the Agency on or after December 1, 1955, compensation shall be at the per annum rates of 2¾ percent from the respective dates of disbursement through November 30, 1955 and 3 percent thereafter on the principal amount repaid: *Provided*, That with respect to each repayment either partial or in full on each such loan, the Agency shall be entitled to a minimum return of $5.00 or the full amount of the interest collected on the repayment at the rate of 3½ percent per annum, whichever is smaller.

(b) On notes purchased by CCC which are tendered on or after December 1, 1955, at the option of the Agency, compensation shall be computed on the outstanding principal balance at the per annum rates of 2¾ percent from the respective dates of disbursement of the loans through November 30, 1955 and 3 percent thereafter to date of purchase by CCC.

(c) On notes purchased by CCC which are tendered on or after December 1, 1955, upon demand by CCC, (1) on maturity of the notes except where CCC otherwise directs or (2) upon receipt of knowledge of any defect or irregularity in the note or loan agreement or ineligibility of the commodity as security for loans, or knowledge of damage, destruction, or other impairment of the commodity, compensation shall be computed on the outstanding principal balance at the per annum rates of 2¾ percent from the respective dates of disbursement of the loans through November 30, 1955 and 3 percent thereafter to date of purchase by CCC: *Provided*, That on each note purchased the Agency shall be entitled to a minimum return of $5.00 or the full amount of accrued interest computed at 3½ percent per annum, whichever is smaller.

This offer may be amended or terminated upon the giving of notice thereof published in the FEDERAL REGISTER but

any reduction in interest will not be made retroactive and in no event will the interest be reduced below that specified in said Agreement as originally executed.

Issued this 1st day of December 1955.

[SEAL] WALTER C. BERGER,
Acting Executive Vice President,
Commodity Credit Corporation.

[F. R. Doc. 55-10135; Filed, Dec. 16, 1955; 8:50 a. m.]

LENDING AGENCY AGREEMENT FOR FINANCING 1955 COTTON LOAN PROGRAM

COMPENSATION

A. The offer made by Commodity Credit Corporation, published in 20 F. R. 6478, covering rates of compensation under the CCC Cotton Form D (6-15-54) Lending Agency Agreement—Cotton, is hereby amended to offer the payment of compensation for loans made pursuant to the 1955 Cotton Loan Program as follows:

1. The compensation to be included in the purchase price of notes tendered on or after December 1, 1955, and accepted by CCC for purchase pursuant to said Agreement shall consist of:

(a) A fee for services performed, computed at the rate of eight cents for each bale of cotton covered by the notes, and

(b) Interest on the principal amount of the notes at the per annum rates of 2¼ percent from the respective dates of disbursement of the loans through November 30, 1955, and 2½ percent thereafter to the date of purchase by CCC: *Provided*, That a fee computed at the rate of three cents for each bale of cotton covered by the notes shall be allowed in lieu of interest if Agency obtains payment by drawing a draft on CCC.

2. The compensation to be included in the face amount of Certificates of Interest issued for notes accepted for pooling pursuant to this Agreement shall be a fee for services performed, computed at the rate of eight cents for each bale of cotton covered by the notes.

3. Certificates of Interest issued for notes tendered and accepted for pooling pursuant to said Agreement shall bear interest from the respective dates of the Certificates at the per annum rates of 2¼ percent through November 30, 1955 and 2½ percent thereafter.

B. CCC hereby offers to pay to holders of Certificates of Interest issued or to be issued under Agreement to Make Loan Advances to Cotton Cooperative Marketing Associations, notwithstanding the provisions of said Agreement, interest on such Certificates from the respective dates of the Certificates at the per annum rates of 2¼ percent through November 30, 1955, and 2½ percent thereafter.

C. This offer may be amended or terminated upon the giving of notice thereof published in the FEDERAL REGISTER but any reduction in interest will not be made retroactive and in no event will the interest be reduced below that specified in said Agreements as originally executed.

Issued this 1st day of December 1955.

[SEAL] WALTER C. BERGER,
Acting Executive Vice President,
Commodity Credit Corporation.

CIVIL AERONAUTICS BOARD

[Docket No. 7420]

ARTHUR VINING DAVIS

NOTICE OF HEARING ON PETITION FOR DISCLAIMER OF JURISDICTION

In the matter of the petition of Arthur Vining Davis for disclaimer of jurisdiction of the applicability of section 408 of the Civil Aeronautics Act of 1938, as amended, or, in the alternative, application for approval thereunder.

Notice is hereby given, pursuant to the provisions of the Civil Aeronautics Act of 1938, as amended, that hearing in the above-entitled proceeding is assigned to be held on December 22, 1955, at 10:00 a. m., e. s. t., in Room E-206, Temporary Building No. 5, Sixteenth Street and Constitution Avenue NW., Washington, D. C., before Examiner Joseph L. Fitzmaurice.

Dated at Washington, D. C., December 14, 1955.

[SEAL] FRANCIS W. BROWN,
Chief Examiner.

[F. R. Doc. 55-10129; Filed, Dec. 16, 1955; 8:48 a. m.]

[Docket No. 1705 et al.; Order No. E-9845]

SLICK AIRWAYS, INC.

ORDER ASSIGNING FOR HEARING PETITION TO AMEND THE MINIMUM RATE ORDER

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 14th day of December 1955.

The Board on June 2, 1948, entered an order[1] in this proceeding prescribing lawful minimum rates for the transportation of property by air (except for property carried in the air express service), and providing that the record be held open for any party in interest to petition for modification of the minimum rates prescribed by such order.

Slick Airways, Inc. (Slick), by petition filed October 20, 1955, has requested that Order No. E-1639, as amended, be amended so as to include air freight forwarders within its scope so that the same minimum rates which are applicable to direct air carriers will be applicable to air freight forwarders.

American Airlines, Inc. (American), and United Air Lines, Inc. (United), have filed papers in support of Slick's petition.

The Air Freight Forwarder Association has filed a Petition to Intervene and Answer to Petition of Slick, asserting in its answer that the application of the same minimum rates to air freight forwarders as to direct air carriers would upset the proper competitive relationship between direct and indirect air carriers. The Association, however, alleges that minimum rates for air freight forwarders are necessary, and that separate minimum rates should be prescribed for the forwarders.

American Shippers, Inc. (American Shippers), in Petition to Intervene, asserts that Slick is seeking to reverse the Board's recent order in the Air Freight Forwarder Investigation[2] and requests that if the Board determines to act on Slick's petition, that the hearing be placed in its normal position on the Board's docket.

Shulman, Inc., in Motion to Dismiss, filed November 25, 1955, contends that Slick's petition is a collateral attack on the finding of the Board on an issue in which a final decision and order was entered in the Air Freight Forwarder Investigation. Counsel for Shulman, Inc., requests to be heard in oral argument upon the motion, and in event the motion is denied, requests reasonable time to answer Slick's petition on its merits.[3]

The Board, upon consideration of the foregoing petitions and answers and of the record and orders previously entered in this proceeding, finds that the present fares of the air freight forwarders may be unjust and unreasonable, unjustly discriminatory, unduly preferential, unduly prejudicial, or otherwise unlawful, and that the petition of Slick states facts that warrant an investigation herein.

With respect to the Motion of Shulman, Inc., to Dismiss the Petition of Slick Airways, Inc., the Board has not had before it, nor did it in the Air Freight Forwarder Investigation consider the specific question of whether minimum rates should be prescribed for air freight forwarders. The Air Freight Forwarder Investigation was instituted primarily to determine the operating authority of air freight forwarders, including authority to enter into joint rate or compensation agreements with direct air carriers, and it does not appear that it would have been appropriate in that proceeding to have included therein the issue as to minimum rates for forwarders. We therefore find no merit to the contention of Shulman that Slick by intervening in the Air Freight Forwarder Investigation and not requesting minimum rates for air freight forwarders is thereby precluded from now requesting such action by the Board.

The Board finds that its action herein is necessary and appropriate in order

[1] Order No. E-1639, 9 CAB 340.

[2] Docket 5947, Order No. E-9532 dated August 30, 1955.

[3] While this motion was not filed within the seven days prescribed by Rule 6 of the Board's rules of practice, or within the ten days provided in Order No. E-1639 dated June 2, 1948, 9 CAB 340, 362, for any party to file answer to a petition to modify the minimum rates prescribed by the Board, we find that such petition on its merits must be dismissed.

to carry out the provisions and objectives of the Civil Aeronautics Act of 1938, as amended, particularly sections 205 (a), 403, 404 and 1002 thereof.

It is ordered, That: 1. An investigation be and is hereby instituted to determine whether the minimum freight rates and charges previously prescribed herein, or separate minimum rates and charges, should be prescribed for air freight forwarders.

2. The proceeding ordered herein be assigned for hearing before an examiner of the Board at a time and place hereafter to be designated.

3. The petition of Air Freight Forwarders Association for leave to intervene be and is hereby granted.

4. The Motion of Shulman, Inc., to Dismiss the Petition of Slick Airways, Inc. and the request for oral argument on such motion be and the same is hereby denied.

5. All domestic air freight forwarders currently holding letters of registration, not heretofore parties to this proceeding, be and are hereby made parties hereto and are hereby granted ten days from the date of service of this order to file answers.

6. A copy of this order be served upon each person holding a letter of registration as an air freight forwarder, upon all parties to this proceeding and upon all parties to the Air Freight Forwarder Investigation, Docket 5947, et al.

7. This order be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
Secretary.

FEDERAL POWER COMMISSION

[Docket No. G-9536]

NORTHERN NATURAL GAS CO.

NOTICE OF APPLICATION FOR CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

DECEMBER 13, 1955.

Take notice that Northern Natural Gas Company (Northern), a Delaware corporation with its principal place of business at 2223 Dodge Street, Omaha, Nebraska, filed on October 24, 1955, an application in Docket No. G-9536 for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, to construct and operate metering and regulating facilities near Rosemont, Minnesota, on its main transmission line, for the purpose of selling natural gas directly to St. Paul Ammonia Products, Inc. Northern proposes to sell interruptible gas to the ammonia plant in quantities approximating 2,930,000 Mcf annually and 11,500 Mcf on a maximum day at an average charge of 26 cents per Mcf. Northern's proposed facilities are estimated to cost $7,000. The gas supply for this service is to come from gas reserves presently available to Northern.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 3d day of January 1956. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 55-10121; Filed, Dec. 16, 1955; 8:47 a. m.]

[Project No. 2136]

MIDDLE FORK OF FEATHER RIVER DEVELOPMENT AND PACIFIC GAS AND ELECTRIC CO.

NOTICE OF LAND WITHDRAWAL; CALIFORNIA

DECEMBER 15, 1955.

Conformable to the provisions of section 24 of the Act of June 10, 1920, as amended, notice is hereby given that the lands herein described, insofar as title thereto remains in the United States are included in Power Project No. 2136 (Middle Fork of Feather River Development) for which completed application for preliminary permit was filed May 29, 1953, by The Pacific Gas and Electric Company of San Francisco, California. Under said section 24 these lands are, from said date of filing reserved from all forms of disposal under the laws of the United States until otherwise directed by the Commission or by Congress.

INTERSTATE COMMERCE COMMISSION

FOURTH SECTION APPLICATIONS FOR RELIEF

DECEMBER 14, 1955.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the General Rules of Practice (49 CFR 1.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

LONG-AND-SHORT HAUL

FSA No. 31412: *Commodities between points in Texas.* Filed by J. F. Brown, Agent, for interested rail carriers. Rates on diapers or bed liners, less carloads, fertilizer and materials, carloads, and rice bran, carloads, between points in Texas over interstate routes.

Grounds for relief: Competition of Texas intrastate rates, short-line distance formula, and circuity.

Tariff: Supplement 9 to Agent Brown's I. C. C. 865.

FSA No. 31414: *Iron and steel articles—Texas to the South.* Filed by F. C. Kratzmeir, Agent, for interested rail carriers. Rates on iron and steel articles, including pipe, carloads, from Bellaire, Dallas, Medio, Pierce Jct., Stella, Streets Spur and West Jct., Tex., to specified points in southern territory, including lower Mississippi River crossings, Virginia cities and Florida peninsula points.

Grounds for relief: Short-line distance formula and circuity.

Tariff: Supplement 23 to Agent Kratzmeir's I. C. C. 4170.

FSA No. 31415: *Grain and grain products—Arkansas and Missouri points to Louisiana.* Filed by F. C. Kratzmeir, Agent, for interested rail carriers. Rates on grain and grain products, carloads, from specified points in Arkansas and Missouri to specified points in western Louisiana.

Grounds for relief: Circuitous routes through higher-rated destination groups.

Tariff: Supplement 55 to Agent Kratzmeir's I. C. C. 3940.

FSA No. 31416: *Canned goods—New Orleans, La., to Pensacola, Fla.* Filed by R. E. Boyle, Jr., Agent, for interested rail carriers. Rates on canned goods and related articles, carloads, from New Orleans, La., to Pensacola, Fla.

Grounds for relief: Circuitous route.

Tariff: Supplement 70 to Agent C. A. Spaninger's I. C. C. 1354.

FSA No. 31417: *Glycols—Orange, Tex., to Chicago, Ill., Outer Zone District Points.* Filed by F. C. Kratzmeir, Agent, for interested rail carriers. Rates on ethylene and diethylene glycol, tank-car loads, from Orange, Tex., to points in the outer zone of the Chicago, Ill., switching district.

Grounds for relief: Competition of barge lines, destination group rate relations, and circuitous routes.

Tariff: Supplement 85 to Agent Kratzmeir's I. C. C. 4064.

FSA No. 31419: *Newsprint from Calhoun, Tenn., Cosa Pines and Childersburg, Ala.* Filed by R. E. Boyle, Jr., Agent, for interested rail carriers. Rates on Newsprint paper, carloads, from Calhoun, Tenn., Coosa Pines and Childersburg, Ala., to specified points in southern and official territories.

Grounds for relief: Short-line distance formula and circuity.

Tariff: Supplement 23 to Agent C. A. Spaninger's I. C. C. 1466.

FSA No. 31420: *Pulpboard or fibreboard—Port Wentworth, Ga., to New Orleans, La.* Filed by R. E. Boyle, Jr., Agent, for interested rail carriers. Rates on pulpboard or fiberboard, noibn, carloads, from Port Wentworth, Ga., to New Orleans, La.

Grounds for relief: Circuitous routes.

Tariff: Supplement 23 to Agent C. A. Spaninger's I. C. C. 1466.

FSA No. 31421: *Plumbers' goods—Chattanooga, Tenn., to Pacific Coast.* Filed by R. E. Boyle, Jr., Agent, for interested rail carriers. Rates on plumbers' goods and related articles, carloads, from Chattanooga, Tenn., to Pacific coast terminals and intermediate points described.

Grounds for relief: Circuitous routes.

Tariff: Supplement 85 to Agent W. J. Prueter's I. C. C. 1564.

FSA No. 31422: *Coal—Chesapeake and Ohio Railway mines to Chattanooga, Tenn.* Filed by R. E. Boyle, Jr., Agent, for interested rail carriers. Rates on coal, bituminous, also cannel coal and coal briquettes, carloads, from mines on The Chesapeake and Ohio Railway Company in groups 1, 2, 3, 4, and 5 of its tariff I. C. C. 12837, to Chattanooga, Tenn.

Grounds for relief: Circuitous routes.

AGGREGATE-OF-INTERMEDIATES

FSA No. 31413: *Commodities between points in Texas.* Filed by J. F. Brown, Agent, for interested rail carriers. Rates on various commodities, carloads and less carloads, as described in the application, between points in Texas over interstate routes.

Grounds for relief: Maintenance of rates proposed between points in Texas not applicable as factors in constructing combination rates lower than through one-factor rates from or to beyond Texas.

Tariff: Supplement 9 to Agent Brown's I. C. C. 865.

FSA No. 31418: *Glycols—Orange, Tex., to Chicago, Ill., Outer Zone District Points.* Filed by F. C. Kratzmeir, Agent, for interested rail carriers. Rates on ethylene and diethylene glycol, tank-car loads, from Orange, Tex., to points in outer zone of Chicago, Ill., switching district.

Grounds for relief: Maintenance of proposed water competition rates restricted as not applicable to effect reductions in present through one-factor rates from or to more distant points.

Tariff: Supplement 85 to Agent Kratzmeir's I. C. C. 4064.

By the Commission.

[SEAL] HAROLD D. McCOY,
Secretary.

FEDERAL REGISTER

Published daily, except Sundays, Mondays, and days following official Federal holidays, by the Federal Register Division, National Archives and Records Service, General Services Administration, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U. S. C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President. Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15 cents) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, directly to the Government Printing Office, Washington 25, D. C.

The regulatory material appearing herein is keyed to the CODE OF FEDERAL REGULATIONS, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended August 5, 1953. The CODE OF FEDERAL REGULATIONS is sold by the Superintendent of Documents. Prices of books and pocket supplements vary.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER, or the CODE OF FEDERAL REGULATIONS.

TITLE 7—AGRICULTURE

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

PART 914—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

EXPENSES AND FIXING OF RATE OF ASSESSMENT FOR 1955–56 FISCAL YEAR

On November 23, 1955, notice of proposed rule making was published in the FEDERAL REGISTER (20 F. R. 8640) regarding the expenses and rate of assessment for the 1955–56 fiscal year under Marketing Agreement No. 117, as amended, and Order No. 14, as amended (19 F. R. 2941) regulating the handling of Navel oranges grown in Arizona and designated part of California, effective September 22, 1953, under the applicable provisions of The Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.). After consideration of all relevant matters presented, including the proposals set forth in the aforesaid notice which were submitted by the Navel Orange Administrative Committee (established pursuant to the marketing agreement and order), it is hereby found and determined that:

§ 914.203 *Expenses and rate of assessment for the 1955–56 fiscal year.* (a) The expenses necessary to be incurred by the Navel Orange Administrative Committee, established pursuant to the provisions of the aforesaid marketing agreement and order, for its maintenance and functioning during the period November 1, 1955, through October 31, 1956, will amount to $156,832.83; and the rate of assessment to be paid by each handler who first handles oranges shall be seven and one-half mills ($0.0075) per carton of oranges handled by such handler as the first handler thereof during the 1955–56 fiscal year. Such rate of assessment is hereby fixed as each such handler's pro rata share of the aforesaid expenses.

It is hereby further found that it is impracticable and contrary to the public interest to postpone the effective time hereof until 30 days after publication in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that (1) in accordance with the provisions of said marketing agreement and order, the rate of assessment is applicable to all fresh oranges handled during the aforesaid fiscal year; (2) shipments of Navel oranges are now being made; (3) the provisions hereof do not impose any obligations on a handler until such handler handles Navel oranges; and (4) it is essential that the specification of the assessment rate be issued immediately so that the aforesaid assessments may be collected and thereby enable the Navel Orange Administrative Committee to perform its duties and functions in accordance with said marketing agreement and order.

As used in this section, "handle," "handler," "oranges," and "fiscal year" shall have the same meaning as is given to each such term in said amended marketing agreement and order; and "carton" shall mean the standard one-half orange, grapefruit, or lemon box set forth as standard container number 58 in section 828.83, as amended, of the Agricultural Code of California.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: December 15, 1955.

[SEAL] ROY W. LENNARTSON,
Deputy Administrator.

[F. R. Doc. 55–10188; Filed, Dec. 19, 1955; 8:53 a. m.]

TITLE 16—COMMERCIAL PRACTICES

Chapter I—Federal Trade Commission

[Docket 6319]

PART 13—DIGEST OF CEASE AND DESIST ORDERS

ADMIRAL CORP.

Subpart—*Advertising falsely or misleadingly:* § 13.20 *Comparative data or merits;* § 13.230 *Size or weight.* Subpart—*Misrepresenting oneself and goods—goods:* § 13.1575 *Comparative data or merits;* § 13.1743 *Size or weight.*[1]

(Sec. 6, 38 Stat. 721; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 45) [Cease and desist order, Admiral Corporation, Chicago, Ill., Docket 6319, December 3, 1955]

This proceeding was heard by Earl J. Kolb, hearing examiner, upon the complaint of the Commission—which charged a corporate manufacturer of television sets with representing falsely by radio and television broadcasts, advertisements in magazines, newspapers, etc., and advertising material furnished to its distributors, that the screen area of its television sets which were equipped with its Giant 21" picture tube was 20 percent larger than that of its competitors' television sets likewise equipped—and an agreement between the parties providing for the entry of a consent order.

Upon this basis, the hearing examiner made his initial decision and order to cease and desist, which by the Commission's order of December 2, 1955, became, on December 3, 1955, the "Decision of the Commission".

The order to cease and desist is as follows:

It is ordered, That respondent, Admiral Corporation, a corporation, and its officers, agents, representatives, and employees, directly or through any corporate or other device, in connection with the offering for sale, sale, or distribution of television sets in commerce, do forthwith cease and desist from: Misrepresenting directly or by implication the screen area of its television sets as compared with the screen area of its competitors' television sets.

By said "Decision of the Commission", report of compliance was required as follows:

[1] New.

It is ordered, That the respondent herein shall within sixty (60) days after service upon it of this order, file with the Commission a report in writing setting forth in detail the manner and form in which it has complied with the order to cease and desist.

Issued: December 2, 1955.

By the Commission.

[SEAL] ROBERT M. PARRISH, *Secretary.*

[F. R. Doc. 55-10140; Filed, Dec. 19, 1955; 8:45 a. m.]

TITLE 20—EMPLOYEES' BENEFITS

Chapter III—Bureau of Old-Age and Survivors Insurance, Social Security Administration, Department of Health, Education, and Welfare

[Reg. 1, Further Amended]

PART 401—DISCLOSURE OF OFFICIAL RECORDS AND INFORMATION

ENFORCEMENT OF IMMIGRATION AND NATIONALITY ACT

On October 5, 1955, there was published in the FEDERAL REGISTER (20 F. R. 7398) a notice of proposed rule making incorporating the requirements of section 290 (c) of the Immigration and Nationality Act into a proposed amendment to Social Security Administration Regulation No. 1, as amended (20 CFR 401.1 et seq.). Interested persons were thereby given opportunity to present their data, views and arguments relative to such proposed amendment within 30 days from the date of such publication.

Expressions of views and objections to the proposed amendment have been received pursuant to this notice, and due consideration has been given them. The proposed amendment, however, is based upon the provision of section 290 (c) of the Immigration and Nationality Act which requires the Secretary of Health, Education, and Welfare to disclose certain information, and merely serves the purpose of incorporating the statutory requirement into the regulation so that the regulation will fully set forth all circumstances under which information contained in old-age and survivors insurance records is released. Consequently, it is decided that the regulation shall be amended substantially in accordance with the notice of proposed rule making.

Section 401.3 of Regulation No. 1, as amended (20 CFR 401.3), is, accordingly, further amended by adding thereto a new paragraph (p) reading:

§ 401.3 *Information which may be disclosed and to whom.* Disclosure of any such file, record, report or other paper, or information, is hereby authorized in the following cases and for the following purposes:

• • • • •

(p) Pursuant to the provisions of section 290 (c) of the Immigration and Nationality Act, to any officer or employee of the Department of Justice of the United States lawfully charged with the administration of title II of such act available information required to be furnished by such section, for the purpose of such administration only, upon written request of the Attorney General of the United States or of an official of the Department of Justice duly authorized by him to make such request.

(Secs. 205, 1102, 49 Stat. 624, 647 as amended; 42 U. S. C. 405, 1302. Interprets or applies sec. 1106, 53 Stat. 1398, as amended; 42 U. S. C. 1306)

[SEAL] CHARLES I. SCHOTTLAND, *Commissioner of Social Security.*

Approved: December 14, 1955.

M. B. FOLSOM, *Secretary of Health, Education, and Welfare.*

TITLE 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

REPUBLICATION OF REGULATIONS

CROSS REFERENCE: For republication of the regulations of the Food and Drug Administration, see Part II of this issue.

Chapter II—Bureau of Narcotics, Department of the Treasury

REDESIGNATION OF PARTS

EDITORIAL NOTE: Parts 201, 202, 203, 204, and 205 of this chapter are redesignated Parts 301, 302, 303, 304, and 305, respectively.

TITLE 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

Chapter I—Veterans Administration

PART 14—LEGAL SERVICES, GENERAL COUNSEL

MISCELLANEOUS AMENDMENTS

1. Section 14.627 is revised to read as follows:

§ 14.627 *Accredited representatives.* Recognized organizations shall file with the Veterans Administration on the prescribed form furnished by the Veterans Administration (VA Form 2–21, Recommendation for Accreditation of Representative of an Organization), the name of any person whom they desire recognized as accredited representative thereof. In recommending a person for recognition as a representative, the organization, through its appropriate officer, shall certify to the following: (1) That the designee is a citizen of the United States, of good character and reputation, that he is qualified by ability and experience to present claims, that he is a member of such organization in good standing, or a full-time, paid employee thereof; and that the major portion of his time will be devoted to the preparation or presentation of claims for that organization or other organizations to which he may be accredited or that he is a national officer of the organization requesting accreditation; (2) whether accredited to any other recognized organizations, and, if so, the name or names thereof; (3) that he is not now employed in any civil or military department or agency of the United States and was or was not so employed within 2 years next preceding the date of recommendation for accreditation; (4) if a veteran, the nature of his discharge or separation from the active service. Recommendations for accreditation of representatives of national service organizations will be accepted only if approved by the national certifying officer of such organization; those of State organizations only if approved by the director or higher officer of the organization.

(a) The recommendation for accreditation (VA Form 2–21) executed by a national organization or by a recognized State organization will be filed with the Office of the General Counsel. A recommendation received in Central Office may be sent to the appropriate regional office, if necessary, to secure sufficient facts to justify a determination whether the designee is qualified. The report of the Chief Attorney, including the recommendation, if any, of the Manager, together with VA Form 2–21 will be transmitted to the General Counsel, who will approve or disapprove the recommendation. If the designee is approved, FL 2–3, Notice to Designee of Recognition, will be issued by the General Counsel.

(b) Letters of recognition (FL 2–3) or card issued by the General Counsel (VA Form 2–3192, Service Organization Representative Identification Card) will constitute authorization for the recognition of accredited representatives designated therein, in all offices (including hospitals and domiciliaries) of the Veterans Administration. Record will be maintained in the office of the General Counsel of all recognitions issued.

(c) Recognition of an accredited representative will be canceled at the request of the organization. A manager may suspend recognition in any case for cause, sending a report to Central Office, attention of the General Counsel, for final determination.

(d) An information bulletin will be issued monthly by the office of the General Counsel listing all new accreditations and cancellations. This will constitute notice to all concerned on this subject.

2. In § 14.629 paragraphs (a), (b), and (d) are amended to read as follows:

§ 14.629 *Recognition of attorneys and agents.* (a) Claim agents will be granted recognition and certified by the office of the General Counsel upon satisfactory evidence of qualification, including good reputation and knowledge of applicable law and procedure. Upon presentation to the General Counsel of a properly executed application on the form prescribed by the Administrator, VA Form 3187, Application for recognition as Agent, any competent person of good moral character and of good repute who is a citizen of the United States, or who has declared his intention to become such a citizen, and who is not engaged in the practice of law may be recognized as an agent to represent claimants before the Veterans Administration, if his recognition is not precluded by any statutory or regulatory provision and he has never been convicted, whether on trial or plea, of a serious penal offense, or of any violation of any penal provisions respecting fees. Applicants for recognition as agents may be required to prove their fitness to render substantial service by undergoing a written examination testing their knowledge of the laws administered by the Veterans Administration and regulations promulgated thereunder.

(b) Recognition of attorneys may be granted by a chief Attorney or by the General Counsel. Any member in good standing of the bar of a State, territory, or possession of the United States, or of the bar of the District of Columbia, wherein he resides or maintains a law office, who is a citizen of the United States or who has declared his intention to become such a citizen, may apply for recognition as attorney on VA Form 2–3186, Application for Recognition as Attorney. Such attorney will be presumed to have such knowledge of the law and regulations as to qualify him to render substantial service. If his recognition is not precluded by any statutory or regulatory provision, and he has never been convicted, whether on trial or plea, of a serious penal offense, or of any violation of any penal provisions respecting fees, his application will be approved and he will be notified by letter. Any duly recognized attorney will be accorded recognition in any case by Central Office or by any other office of the Veterans Administration, including hospitals and domiciliaries, to which he presents a duly certified or attested copy of his notification of recognition as attorney or VA Form 2–3192a, Identification Card, together with the original or exemplified copy of power of attorney. (See § 14.639 as to recognition in individual cases.) VA Form 2–3192a, Identification Card, will be issued only by the General Counsel.

• • • • •

(d) Any cause considered sufficient to reject the application of an attorney or agent or to cancel recognition previously granted will be reported by the Chief Attorney to the General Counsel for final determination. Recognition shall be canceled automatically if an attorney or agent is convicted of charging illegal fees contrary to the provisions of the Federal Statutes (38 U. S. C. 101–103, 551, or similar provision). There shall also be applied the provisions of section 6 (a), Public Law 404, 79th Congress (Administrative Procedure Act), (5 U. S. C. 1005).

3. Sections 14.631 and 14.633 are revoked:

§ 14.631 *Knowledge of laws.* [Revoked.]

§ 14.633 *Agents; requirements for recognition.* [Revoked.]

4. Section 14.634 is revised to read as follows:

§ 14.634 *Recognition of attorneys by field stations.* When the Chief Attorney approves an application for recognition as an attorney, he will notify the attorney by letter and inform him that VA Form 2–3192a, Identification Card, will be issued by the General Counsel. The approved application will be retained in the files of the approving office. A 3 x 5 card will be prepared showing the attorney's name, address, and date of recognition. A copy of this card will be forwarded to the office of the General Counsel for record and issuance of VA Form 2–3192a, Identification Card, and to any other office in which the attorney requests that his recognition be recorded. When an attorney has been recognized by the General Counsel, no copy of the 3 x 5 card will be sent to any office unless the attorney specifically requests that his recognition be recorded in a certain office.

(Sec. 5, 43 Stat. 608, as amended, sec. 2, 46 Stat. 1016, sec. 7, 48 Stat. 9; 38 U. S. C. 11a, 426, 707. Interpret or apply secs. 200–203, 49 Stat. 2031, as amended, 2032; 38 U. S. C. 101–104)

This regulation is effective December 20, 1955.

[SEAL] J. C. PALMER, *Assistant Deputy Administrator.*

PART 17—MEDICAL

MISCELLANEOUS AMENDMENTS

1. Section 17.30 is revised to read as follows:

§ 17.30 *Refusal of treatment by unnecessarily breaking appointments.* A patient under outpatient medical treatment who breaks an appointment without a reasonable excuse for such action, will be informed that a repetition of the offense will be deemed to be a refusal of Government treatment. If such patient breaks a second appointment, without at least 24 hours' notice, or a reasonable excuse, it will be deemed that he has refused Government treatment. Thereafter no further treatment will be furnished until he has made a specific formal application therefor and has satisfactorily evinced a willingness to accept Government treatment and to cooperate with the Government agency providing the treatment, by keeping his appointments, or by giving at least 24 hours' notice where an appointment must necessarily be broken. Where an appointment is broken without notice and satisfactory reasons are shown for the breaking of the appointment, and it is also satisfactorily shown that circumstances attending the breaking of the appointment were such that notice could not be given, the patient will not be deemed to have refused treatment. Nothing in this section will be construed to prevent a patient from receiving the benefit of treatment for an emergency condition that may arise during the time when he has been determined to be "Not entitled to treatment" as a result of refusal.

2. In § 17.60, that portion of paragraph (a) preceding subparagraph (1) is amended to read as follows:

§ 17.60 *Outpatient treatment.* (a) Outpatient treatment, medical or dental, including necessary medicines, prosthetic appliances, and other supplies, may be rendered to the following applicants under the conditions stated, except that applicants for dental treatment as defined in subparagraphs (1), (3), (4), and (9), of this paragraph, must also meet the applicable provisions of § 17.123:

• • • • • •

3. In § 17.120, paragraph (a) is amended to read as follows:

§ 17.120 *Authorization of dental examinations.* • • •

(a) Those having a dental disability adjudicated as incurred or aggravated in military or naval service in war or peacetime, or those requiring examination to determine whether the dental disability is service-connected. The word "peacetime" as used in this paragraph does not include service on or after June 27, 1950, and prior to February 1, 1955.

• • • • • •

4. Sections 17.123, 17.124, and 17.129 are revised to read as follows:

§ 17.123 *Authorization of outpatient dental treatment.* Outpatient dental treatment may be authorized by the chief, dental service, or his professional designee, for beneficiaries defined in § 17.60 (a) (1) to (5), inclusive, (8), (9), and (b), to the extent prescribed and in accordance with the applicable classification and provisions set forth in this section:

(a) *Class I.* Those having a service-connected compensable dental disability or condition, may be authorized any dental treatment indicated as reasonably necessary to maintain oral health and masticatory function. There is no time limitation for making application for treatment and no restriction as to the number of repeat episodes of treatment.

(b) *Class II.* Those having a service-connected noncompensable dental condition or disability shown to have been in existence at time of discharge or release from active service may be authorized any treatment indicated as reasonably necessary for the one-time correction of the service-connected noncompensable dental disability or condition, but only if application for treatment is made within 1 year after discharge or release, or by December 31, 1954. When the services rendered on a one-time basis, as provided in this class, are found unacceptable within the limitations of good professional standards, such additional services may be afforded as are required to complete professionally acceptable treatment. The foregoing limitations in this class II as to existence of disability at time of separation from service, time of filing claim, and one-time completion of treatment are not applicable to Classes II (a) and (b).

(c) *Class II (a).* Those having a service-connected noncompensable dental condition or disability adjudicated as resulting from combat wounds or service trauma may be authorized any treatment indicated as reasonably necessary for the correction of such service-connected noncompensable condition or disability.

(d) *Class II (b).* Those having a service-connected noncompensable dental condition or disability and former prisoner of war status may be authorized any treatment indicated as reasonably necessary for the correction of such service-connected dental condition or disability.

(e) *Class III.* Those having a dental condition not service connected but professionally determined to be aggravating disability from an associated service-connected condition or disability may be authorized dental treatment for only those dental conditions which, in sound professional judgment, are having a direct and material detrimental effect upon the associated basic condition or disability.

(f) *No Class IV.*

(g) *Class V.* Those pursuing a course of vocational training authorized under Public Law 16, 78th Congress, as amended and extended, may be authorized dental treatment indicated as reasonably necessary to prevent the interruption of an authorized course of vocational training.

(h) *Class VI.* Those who served in the active military or naval forces during the Spanish-American War, Philippine Insurrection, or Boxer Rebellion, may be authorized any dental treatment indicated as reasonably necessary to maintain oral health and masticatory function. There is no time limit for making application for treatment and no restriction as to the number of repeat episodes of treatment.

§ 17.124 *Emergency dental treatment.* Emergency dental treatment may be furnished persons hospitalized or receiving domiciliary care pursuant to the provisions of §§ 17.35, 17.45 to 17.47, inclusive; Veterans Administration employees; and persons defined in § 17.60, when eligibility therefor has been established or there is prima facie evidence of eligibility. Emergency dental treatment may be furnished for humanitarian reasons in Veterans Administration clinics for persons not otherwise eligible. However, in providing emergency dental treatment for humanitarian reasons, a rigid interpretation of emergency dental treatment as defined in this section will be followed and charges at prescribed rates will be made for the services rendered. Emergency dental treatment will be restricted to the alleviation of pain or extreme discomfort, or the adequate remediation of a dental condition which is determined to be immediately endangering the life or health of the individual. The rendering of such emergency treatment will not, in itself, entitle the applicant to further dental treatment that may be indicated unless and until eligibility for such continuous treatment is duly determined. Emergency dental treatment rendered on a fee basis may only be authorized if eligibility therefor has been established under the provisions of § 17.123; if Veterans Administration clinical facilities were not feasibly available; and if the treatment rendered on an emergency basis is promptly reported.

§ 17.129 *Dental services for hospital patients and domiciled members.* Persons hospitalized or domiciled pursuant to the provisions of §§ 17.46 and 17.47, will be furnished such dental services as are professionally determined necessary to the patients' or members' overall hospital or domiciliary care.

5. Section 17.135 *Replacement of dental prosthesis* is revoked.

(Sec. 5, 43 Stat. 608, as amended, sec. 2, 46 Stat. 1016, sec. 7, 48 Stat. 9; 38 U. S. C. 11a, 426, 707. Interpret or apply secs. 1, 6, 48 Stat. 9, 301, 53 Stat. 652, as amended; 38 U. S. C. 706, 706a)

This regulation is effective December 20, 1955.

[SEAL] J. C. PALMER,
Assistant Deputy Administrator.

TITLE 43—PUBLIC LANDS: INTERIOR

Chapter I—Bureau of Land Management, Department of the Interior

Appendix—Public Land Orders

[Public Land Order 1261]

[Misc. 29637]

UTAH

WITHDRAWING PUBLIC LANDS FOR USE OF GEOLOGICAL SURVEY AS SEDIMENT TESTING LABORATORY SITE

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Subject to valid existing rights, the following-described public lands in Utah are hereby withdrawn from all forms of appropriation under the public-land laws, including the mining and mineral-leasing laws, and reserved under the jurisdiction of the Department of the Interior for use of the Geological Survey as a site for a sediment testing laboratory:

SALT LAKE MERIDIAN

T. 34 S., R. 13 E.,
Sec. 35, S½S½NE¼NE¼;
Sec. 36, lot 1.

The areas described aggregate 44.90 acres.

The use of the lands by the Geological Survey shall be subject to existing withdrawals for power purposes, and to the condition that should the lands be required for power purposes, any structures placed thereon which interfere therewith will be removed by the Geological Survey.

This order shall take precedence over but otherwise affect the Departmental order of May 7, 1935, establishing Utah Grazing District No. 5.

WESLEY A. D'EWART,
Assistant Secretary of the Interior.

DECEMBER 14, 1955.

TITLE 39—POSTAL SERVICE

Chapter I—Post Office Department

PART 41—SERVICE IN POST OFFICES

POST OFFICE BOXES

In § 41.3 *Post office boxes* make the following changes:

1. Amend paragraph (c) to read as follows:

(c) *Rental rates*—(1) *Post office.* Box rent rates are based on the gross receipts of the office for the calendar year.

(2) *Rates.* No change in existing rates will be made by postmasters without authority from the Bureau of Finance, Division of Postal Funds.

(3) *Schedule.*

Gross receipts of post office	Rate per quarter						
	Call boxes—Size No.		Lock boxes and drawers—Size No.				
	1	2	1	2	3	4	5
	Cubic inch capacity		Cubic inch capacity				
	To 225	225 to 500	To 225	225 to—	500 to—	900 to—	3,000 and over
To $1,500	$0.15	$0.20	$0.35	$0.50	$0.65	$0.90	$1.10
$1,500 to	.20	.30	.50	.65	.90	1.10	1.50
$8,000 to	.35	.50	.75	1.00	1.35	2.00	2.75
$40,000 to	.65	.90	1.10	1.50	2.25	3.00	4.50
$100,000 to	.90	1.10	1.50	2.25	3.00	4.50	6.00
$300,000 to	1.10	1.50	2.25	3.00	4.50	6.00	7.50
$1,000,000 to	1.50	2.25	3.00	4.50	6.00	7.50	9.00
$5,000,000 to	2.25	3.00	4.50	6.00	7.50	9.00	10.50
$15,000,000 and over	3.00	4.50	6.00	7.50	9.00	10.50	12.00

2. Amend paragraph (f) to read as follows:

(f) *Keys*—(1) *Regular.* A patron renting a key-lock box must be supplied with one or two keys, according to his needs. Renters of lock boxes are not permitted to use any keys except those issued through the post office.

(2) *Additional.* Keys in excess of two may be secured by a patron upon completion of Form 1094 (application for additional keys to post office box) and payment of a 50 cents fee for each key.

(3) *Duplicate.* Duplicates of lost keys may be secured by payment of a 50 cents fee for each key.

(4) *Fees not refundable.* Fees for duplicate and additional keys are not refundable.

(5) *Worn and broken.* Worn or broken keys shall be replaced without charge if the damaged key is surrendered.

(6) *Return.* All keys must be returned when the box is surrendered. If the patron has lost a regular key, he must pay a fee of 50 cents for each missing key.

(R. S. 161, 396; secs. 304, 309, 42 Stat. 24, 25; 5 U. S. C. 22, 369)

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 908]

[Docket No. AO-243-A1]

MILK IN CENTRAL ARKANSAS MARKETING AREA

NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS THERETO WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND PROPOSED AMENDMENTS TO ORDER

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.) and the applicable rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of the filing with the Hearing Clerk of the recommended decision of the Deputy Administrator, Agricultural Marketing Service, United States Department of Agriculture, with respect to proposed amendments to the tentative marketing agreement and to the order, regulating the handling of milk in the Central Arkansas marketing area.

Interested parties may file written exceptions to the decision with the Hearing Clerk, United States Department of Agriculture, Washington 25, D. C., not later than the close of business on the 5th day after publication of this decision in the FEDERAL REGISTER. Exceptions should be filed in quadruplicate.

Preliminary statement. The hearing on the record of which the proposed amendment to the tentative marketing agreement and to the order was formulated was conducted at Little Rock, Arkansas, on November 22, 1955, pursuant to notice thereof which was issued on November 15, 1955 (20 F. R. 8547).

The material issues of the hearing relate to:

(1) The pricing of Class I milk; and

(2) The need for emergency action with respect to Issue No. 1.

Findings and conclusions. The order should be amended to correlate Class I price changes in the Central Arkansas marketing area with those resulting under Order No. 52 regulating the handling of milk in the Memphis, Tennessee, marketing area.

The pricing provisions of the Central Arkansas Order No. 8 became effective December 1, 1955. Class I prices under the Central Arkansas and Memphis orders are established by adding identical differentials to basic prices for manufacturing milk. The monthly price resulting from the price formula under the Memphis order, however, is subject to an adjustment based on the relationship of Class I sales to receipts of producer milk under that order. During the months of July through November, 1955, an average of 19 cents was added to the Class I price by the operation of this supply-demand adjustment. No adjustment resulted in prices for the months of May and June or for December of this year. Thus, the Class I prices under the two orders are the same for the month of December.

Starting in April of 1955 and continuing until the pricing provisions of the Central Arkansas order became effective (December 1, 1955), the Central Arkansas Milk Producers Association had an arrangement with the principal handlers of the Central Arkansas marketing area to furnish their total milk requirements at the class prices prevailing under the Memphis order. Thus, in effect the order continues the pricing arrangement negotiated by producers and handlers prior to the effective date of the order.

Under the association's full supply agreement with the handlers, it was necessary for the association to import milk from outside sources starting in July. During the months of shortest supply namely September and October, 1.6 and 2.1 million pounds of milk, respectively, were furnished from outside sources.

The Central Arkansas Milk Producer's proposal would provide for an automatic adjustment of the Class I price of the Central Arkansas order based upon the supply-demand adjustment provided in the Class I pricing provisions of the Memphis order.

On the basis of the present deficit condition of the market and increasing costs of production, producers contended at the hearing that the Class I price under the Central Arkansas order should be increased 20 to 30 cents per hundredweight. They further argued that this should be accomplished either through an increase in the Class I price differentials or through a supply-demand provision identical to that contained in the Memphis order but by the application of the receipts and utilization of milk in the Central Arkansas marketing area.

Neither this record nor the promulgation hearing record contains data which fully reflect the receipts and sales of fluid milk in the Central Arkansas area. It is not possible to develop a "normal" or "standard" relationship of sales to receipts. The evidence does not indicate that the adoption of the Memphis supply-demand relationship in the Central Arkansas order is justified. Furthermore, it is not possible to appraise the production responses which can be ex-

pected under an order with the present pricing arrangement.

It was previously concluded in the Secretary's decision of October 7, 1955, (20 F. R. 7669) with respect to the proposed order for the Central Arkansas marketing area, that because the previous price and supply history of the market could not be fully relied upon, it was not possible to arrive at an appropriate Class I price for this area on the basis of local experience alone. It was further concluded, that because of the large degree of sales competition, the location of the Central Arkansas market in relation to the Memphis market and the relationship of both markets to other supply and sales areas, the stated Class I differentials in the Memphis and the Central Arkansas orders should be the same. The record evidence of the price and supply experience in this market since the promulgation hearing was held shows an even closer relationship between these two markets. Class I prices, as previously indicated heretofore, have been the same during the past several months. It is concluded, therefore, that for the immediate future Class I prices in the two markets should be the same.

This should be accomplished by providing that through March of 1957 the Class I price for the Central Arkansas marketing area shall be the same as the Class I price resulting under the Memphis Order No. 18 including any adjustments resulting from the supply-demand adjustment of that order. Sufficient experience and marketing data will be available by March of 1957 to provide a basis for a more complete appraisal of the pricing arrangement for the Central Arkansas marketing area.

In view of the fact that Class I prices are identical under both the Memphis and Central Arkansas orders for the month of December 1955 and no substantial differences in prices between the two markets, which would be avoided through the attached decision, are indicated in the near future, there appears to be no need for emergency action as requested on the record of hearing.

General findings. (a) The proposed marketing agreement and the order as hereby proposed to be amended, and all of the terms and conditions thereof will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(c) The proposed order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as and will be applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

Rulings on proposed findings and conclusions. A brief filed on behalf of the producer organization contained proposed findings, conclusions, and arguments with respect to the provisions of the proposed amendment. Every point covered in the brief was carefully considered along with the evidence in the record in making the findings and reaching conclusions hereinbefore set forth. To the extent that the findings and conclusions proposed in the brief are inconsistent with the findings and conclusions contained herein, the request to make such findings or to reach such conclusions is denied on the basis of the facts found and stated in connection with the conclusions in this recommended decision.

Recommended marketing agreement and amendment to the order. The following order, amending the order, is recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out. The proposed marketing agreement is not included in this decision because the regulatory provisions thereof would be identical with those contained in the order, as hereby proposed to be amended.

Delete § 908.51 (a) and substitute therefor the following:

(a) *Class I milk price.* From the effective date hereof through March 1957, the Class I milk price shall be the price for Class I milk established pursuant to Federal Order No. 18, regulating the handling of milk in the Memphis, Tennessee marketing area.

Filed at Washington, D. C., this 15th day of December 1955.

[SEAL] ROY W. LENNARTSON, *Deputy Administrator.*

Food and Drug Administration

[21 CFR Part 120]

TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

NOTICE OF FILING OF PETITION FOR ESTABLISHMENT OF TOLERANCE FOR RESIDUES OF SODIUM-O-PHENYLPHENATE

Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408 (d) (1), 68 Stat. 512; 21 U. S. C. 346a (d) (1)), the following notice is issued:

A petition has been filed by The Dow Chemical Company, Midland, Michigan, proposing the establishment of a tolerance of 10 parts per million for residues of sodium-o-phenylphenate, determined as orthophenylphenol, in or on citrus fruits.

The analytical method proposed in the petition for determining residues of orthophenylphenol is as follows: An acidified sample of orange peel or pulp is steam distilled. Orthophenylphenol is extracted from the distillate with petroleum ether. The petroleum ether solution obtained is washed with sodium hydroxide, and the orthophenylphenol in the alkaline extract is determined colorimetrically by the 4-aminoantipyrine method.

NOTICES

DEPARTMENT OF THE TREASURY

United States Coast Guard

[CGFR 55-51]

TERMINATION OF APPROVAL OF EQUIPMENT

By virtue of the authority vested in me as Commandant, United States Coast Guard, by Treasury Department Order No. 120, dated July 31, 1950 (15 F. R. 6521), and Treasury Department Order 167-14, dated November 26, 1954 (19 F. R. 8026), and in compliance with the authority cited with each item of equipment, the following approvals of equipment are terminated because (1) the manufacturer is no longer in business; or (2) the manufacturer does not desire to retain the approval; or (3) the item is no longer being manufactured; or (4) the item of equipment no longer complies with present Coast Guard requirements; or (5) the approval has expired. Except for those approvals which have expired, all other terminations of approvals made by this document shall be made effective upon the thirty-first day after the date of publication of this document in the FEDERAL REGISTER. Notwithstanding this termination of approval of any item of equipment as listed in this document, such equipment in service may be continued in use so long as such equipment is in good and serviceable condition.

DAVITS, LIFEBOATS

Termination of Approval No. 160.032/120/0, mechanical davit, Quadrant Type G30D, approved for maximum working load of 6,000 pounds per set (3,000 pounds per arm) using not less than 4-part falls, identified by general arrangement dwg. No. 2372 dated September 15, 1942, and revised November 10, 1942, submitted by Welin Davit and Boat Division of Continental Copper & Steel Industries, Inc., Perth Amboy, N. J. (Approved FEDERAL REGISTER November 11, 1950. Termination of approval effective November 11, 1955.)

(R. S. 4405, as amended, and 4462, as amended, 46 U. S. C. 375, 416. Interpret or apply R. S. 4417a, as amended, 4426, as amended, 4481, as amended, 4488, as amended, 4491, as amended, secs. 1 and 2, 49 Stat. 1544, as amended, sec. 3, 54 Stat. 346, as amended, and sec. 3 (c), 68 Stat. 676; 46 U. BUOYANT CUSHIONS, KAPOK OR FIBROUS GLASS

Termination of Approval No. 160.048/14/0, special approval for 14" x 44" x 2" rectangular kapok buoyant cushion, 55 oz. kapok, dwg. Nos. A-38, and C-48, dated July 6, 1955, manufactured by The American Pad & Textile Co., Greenfield, Ohio. (Approved FEDERAL REGISTER August 13, 1955.)

Termination of Approval No. 160.048/15/0, special approval for 14" x 48" x 2" rectangular kapok buoyant cushion, 60 oz. kapok, dwg. Nos. A-39, and C-48, dated July 6, 1955, manufactured by The American Pad & Textile Co., Greenfield, Ohio. (Approved FEDERAL REGISTER August 13, 1955.)

Termination of Approval No. 160.048/16/0, special approval for 14" x 54" x 2" rectangular kapok buoyant cushion, 67 oz. kapok, dwg. Nos. A-40, and C-48, dated July 6, 1955, manufactured by The American Pad & Textile Co., Greenfield, Ohio. (Approved FEDERAL REGISTER August 13, 1955.)

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interpret or apply secs. 8, 17, 54 Stat. 164, 166, as amended; 46 U. S. C. 526e, 526p; 46 CFR 160.048)

BOILER, HEATING

Termination of Approval No. 162.003/61/2, size 3824-8C vertical fire tube hot water heating boiler, welded steel plate construction, oil fired, 30 pounds per square inch maximum pressure, dwg. No. H-110-5, Rev. 3, dated January 3, 1951, manufactured by Way-Wolff Associates, Inc., 33 Fulton Street, New York 38, N. Y. (Approved FEDERAL REGISTER March 21, 1951.)

Termination of Approval No. 162.003/85/0, size 380-10E vertical fire tube steam or hot water heating boiler, welded steel plate construction, oil fired, 30 pounds per square inch maximum pressure, dwg. No. H-110-2, Rev. 4, dated January 3, 1951, manufactured by Way-Wolff Associates, Inc., 33 Fulton Street, New York 38, N. Y. (Approved FEDERAL REGISTER March 21, 1951.)

Termination of Approval No. 162.003/86/0, size 4536-12E vertical fire tube steam or hot water heating boiler, welded steel plate construction, oil fired, 30 pounds per square inch maximum pressure, dwg. No. H-110-2, Rev. 4, dated January 3, 1951, manufactured by Way-Wolff Associates, Inc., 33 Fulton Street, New York 38, N. Y. (Approved FEDERAL REGISTER March 21, 1951.)

Termination of Approval No. 162.003/87/0, size 6642-14E vertical fire tube steam or hot water heating boiler, welded steel plate construction, oil fired, 30 pounds per square inch maximum pressure, dwg. No. H-110-2, Rev. 4, dated January 3, 1951, manufactured by Way-Wolff Associates, Inc., 33 Fulton Street, New York 38, N. Y. (Approved FEDERAL REGISTER March 21, 1951.)

Termination of approval of hot water heating boilers, copper tube construction, 30 pounds per square inch maximum pressure, manual control, dwg. No. 6-1000-A dated August 17, 1950, manufactured by The Heat Exchanger Co., 415 Denny Way, Seattle 9, Wash., for the following model numbers:

Approval No.	Model	Water output B. t. u./hour
162.003/110/0	B-1	120,000
162.003/111/0	B-2	180,000
162.003/112/0	B-7	240,000
162.003/113/0	B-10	300,000
162.003/114/0	SH	90,000

(Approved FEDERAL REGISTER November 11, 1950. Termination of approval effective November 11, 1955.)

[CGFR 55–50]

Approval of Equipment and Change in Manufacturer's Address

By virtue of the authority vested in me as Commandant, United States Coast Guard, by Treasury Department Order No. 120, dated July 31, 1950 (15 F. R. 6521), and Treasury Department Order 167–14, dated November 26, 1954 (19 F. R. 8026), and in compliance with the authority cited with each item of equipment: *It is ordered*, That:

(a) All the approvals listed in this document which extend approvals previously published in the Federal Register are prescribed and shall be in effect for a period of five years from their respective dates as indicated at the end of each approval, unless sooner canceled or suspended by proper authority; and,

(b) All the other approvals listed in this document (which are not covered by paragraph (a) above) are prescribed and shall be in effect for a period of five years from the date of publication of this document in the Federal Register, unless sooner canceled or suspended by proper authority; and,

(c) The change in the name of the manufacturer of approved equipment shall be made as indicated below.

LIFE PRESERVERS, KAPOK, ADULT AND CHILD (JACKET TYPE) MODELS 2, 3, 5, AND 6

Approval No. 160.002/52/0, Model 2, adult kapok life preserver, U. S. C. G. Specification Subpart 160.002, manufactured by The Safegard Corp., Box 66, Station B, Cincinnati 22, Ohio, for Sears, Roebuck and Co., 925 South Homan Avenue, Chicago 7, Ill.

Approval No. 160.002/53/0, Model 6, child kapok life preserver, U. S. C. G. Specification Subpart 160.002, manufactured by The Safegard Corp., Box 66, Station B, Cincinnati 22, Ohio, for Sears, Roebuck and Co., 925 South Homan Avenue, Chicago 7, Ill.

(R. S. 4405, as amended, and 4462, as amended, 46 U. S. C. 375, 416. Interpret or apply R. S. 4417a, 4426, 4481, 4482, 4488, 4491, 4492, as amended, sec. 11, 35 Stat. 428, secs. 1, 2, 49 Stat. 1544, secs. 6, 17, 54 Stat. 164, 166, and sec. 3, 54 Stat. 346, as amended, and 3 (c), 68 Stat. 676; 46 U. LIFE FLOATS

Approval No. 160.027/36/0, 7.67′ x 4.17′ (12″ dia. body section) rectangular hollow aluminum life float, 15-person capacity, general arrangement dwg. No. 80031, dated July 6, 1955, revised August 25, 1955, manufactured by Welin Davit and Boat Division of Continental Copper & Steel Industries, Inc., Perth Amboy, N. J.

(R. S. 4405, as amended, and 4462, as amended, 46 U. S. C. 375, 416. Interpret or apply R. S. 4417a, as amended, 4426, as amended, 4481, as amended, 4488, as amended, 4491, as amended, secs. 1 and 2, 49 Stat. 1544, as amended, sec. 3, 54 Stat. 346, as amended, and sec. 3 (c), 68 Stat. 676; 46 U. S. C. 391a, 404, 474, 481, 489, 367, 1333, 50 U. S. C. 198; E. O. 10402, 17 F. R. 9917, 3 CFR, 1952 Supp.; 46 CFR 160.027)

SIGNAL PISTOLS FOR PARACHUTE RED FLARE DISTRESS SIGNALS

Approval No. 160.028/6/1, signal pistol, dwg. No. SP–150 dated March 5, 1950, manufactured by Signal Pyrotechnic Co., 4041 Whiteside Steet, Los Angeles 63, Calif. (Extension of the approval published in Federal Register November 11, 1950, effective November 11, 1955.)

(R. S. 4405, as amended, and 4462, as amended, 46 U. S. C. 375, 416. Interpret or apply R. S. 4417a, as amended, 4426, as amended, 4488, as amended, 4491, as amended, secs. 1 and 2, 49 Stat. 1544, as amended, sec. 3, 54 Stat. 346, sec. 2, 54 Stat. 1028, as amended, and sec. 3 (c), 68 Stat. 676; 46 U. S. C. 391a, 404, 481, 489, 367,

1333, 50 U. S. C. 198; E. O. 10402, 17 F. R. 9917, 3 CFR, 1952 Supp.; 46 CFR 160.028)

DAVITS, LIFEBOAT

Approval No. 160.032/68/1, mechanical davit, straight boom sheath screw, Type B–61 (formerly Type C), approved for maximum working load of 12,200 pounds per set (6,100 pounds per arm), using not less than two part falls, identified by arrangement dwg. No. 2549 dated March 13, 1943, and revised September 1, 1955, manufactured by Welin Davit and Boat Division of Continental Copper & Steel Industries, Inc., Perth Amboy, N. J. (Reinstates and supersedes Approval No. 160.032/68/0 terminated in Federal Register October 1, 1952.)

(R. S. 4405, as amended, and 4462, as amended, 46 U. S. C. 375, 416. Interpret or apply R. S. 4417a, as amended, 4426, as amended, 4481, as amended, 4488, as amended, 4491, as amended, secs. 1 and 2, 49 Stat. 1544, as amended, sec. 3, 54 Stat. 346, as amended, and sec. 3 (c), 68 Stat. 676; 46 U. S. C. 391a, 404, 474, 481, 489, 367, 1333, 50 U. S. C. 198; E. O. 10402, 17 F. R. 9917, 3 CFR, 1952 Cum. Supp.; 46 CFR 160.032)

LIFEBOATS

Approval No. 160.035/335/0, 28.0′ x 9.79′ x 4.13′ steel, motor-propelled lifeboat without radio cabin (Class B), 63-person capacity, identified by construction and arrangement dwg. No. 28–2B dated May 31, 1955, and revised July 14, 1955, manufactured by Marine Safety Equipment Corp., Point Pleasant, N. J.

(R. S. 4405, as amended, and 4462, as amended, 46 U. S. C. 375, 416. Interpret or apply R. S. 4417a, as amended, 4426, as amended, 4481, as amended, 4488, as amended, 4491, as amended, 4492, as amended, sec. 11, 35 Stat. 428, as amended, secs. 1 and 2, 49 Stat. 1544, as amended, sec. 3, 54 Stat. 346, as amended, and sec. 3 (c), 68 Stat. 676; 46 U. S. C. 391a, 404, 474, 481, 489, 490, 396, 367, 1333, 50 U. S. C. 198; E. O. 10402, 17 F. R. 9917, 3 CFR, 1952 Supp.; 46 CFR 160.035)

BUOYANT VESTS, KAPOK OR FIBROUS GLASS, ADULT AND CHILD MODELS AK, CKM, CKS, AF, CFM, AND CFS

Note: Approved for use on motorboats of Classes A, 1, or 2 not carrying passengers for hire.

Approval No. 160.047/43/0, Model AK, adult kapok buoyant vest, U. S. C. G. Specification Subpart 160.047, manufactured by Billy Boy Products, Inc., Quincy, Mich.

Approval No. 160.047/44/0, Model CKM, child kapok buoyant vest, U. S. C. G. Specification Subpart 160.047, manufactured by Billy Boy Products, Inc., Quincy, Mich.

Approval No. 160.047/45/0, Model CKS, child kapok buoyant vest, U. S. C. G. Specification Subpart 160.047, manufactured by Billy Boy Products, Inc., Quincy, Mich.

Approval No. 160.047/46/0, Model CKM, child kapok buoyant vest, U. S. C. G. Specification Subpart 160.047, manufactured by The Holiday Line, Inc., 54 Greene Street, New York 13, N. Y.

Approval No. 160.047/47/0, Model CKS, child kapok buoyant vest, U. S. C. G. Specification Subpart 160.047, manufactured by The Holiday Line, Inc., 54 Greene Street, New York 13, N. Y.

Approval No. 160.047/51/0, Model AK, adult kapok buoyant vest, U. S. C. G. Specification Subpart 160.047, manufactured by The American Pad & Textile Co., Greenfield, Ohio, for The Firestone Tire & Rubber Co., Akron 17, Ohio.

Approval No. 160.047/52/0, Model AK, adult kapok buoyant vest, U. S. C. G. Specification Subpart 160.047, manufactured by The Safegard Corp., Box 66, Station B, Cincinnati 22, Ohio, for Sears, Roebuck and Co., 925 South Homan Avenue, Chicago 7, Ill.

Approval No. 160.047/53/0, Model CKM, child kapok buoyant vest, U. S. C. G. Specification Subpart 160.047, manufactured by The Safegard Corp., Box 66, Station B, Cincinnati 22, Ohio, for Sears, Roebuck and Co., 925 South Homan Avenue, Chicago 7, Ill.

Approval No. 160.047/54/0, Model CKS, child kapok buoyant vest, U. S. C. G. Specification Subpart 160.047, manufactured by The Safegard Corp., Box 66, Station B, Cincinnati 22, Ohio, for Sears, Roebuck and Co., 925 South Homan Avenue, Chicago 7, Ill.

Approval No. 160.047/55/0, Model CKS, child kapok buoyant vest, U. S. C. G. Specification Subpart 160.047, manufactured by Atlas Products, 2459 University Avenue, St. Paul 14, Minn.

Approval No. 160.047/56/0, Model AK, adult kapok buoyant vest, U. S. C. G. Specification Subpart 160.047, manufactured by Noble Products Co., Box 327, Caldwell, Ohio.

Approval No. 160.047/57/0, Model CKM, child kapok buoyant vest, U. S. C. G. Specification Subpart 160.047, manufactured by Noble Products Co., Box 327, Caldwell, Ohio.

Approval No. 160.047/58/0, Model CKS, child kapok buoyant vest, U. S. C. G. Specification Subpart 160.047, manufactured by Noble Products Co., Box 327, Caldwell, Ohio.

Approval No. 160.047/59/0, Model AK, adult kapok buoyant vest, U. S. C. G. Specification Subpart 160.047, manufactured by Atlantic-Pacific Manufacturing Corp., 124 Atlantic Avenue, Brooklyn 1, N. Y., for Montgomery Ward & Co., Inc., 619 West Chicago Avenue, Chicago 7, Ill.

Approval No. 160.047/60/0, Model CKM, child kapok buoyant vest, U. S. C. G. Specification Subpart 160.047, manufactured by Atlantic-Pacific Manufacturing Corp., 124 Atlantic Avenue, Brooklyn 1, N. Y., for Montgomery Ward & Co., Inc., 619 West Chicago Avenue, Chicago 7, Ill.

Approval No. 160.047/61/0, Model CKS, child kapok buoyant vest, U. S. C. G. Specification Subpart 160.047, manufactured by Atlantic-Pacific Manufacturing Corp., 124 Atlantic Avenue, Brooklyn 1, N. Y., for Montgomery Ward & Co., Inc, 619 West Chicago Avenue, Chicago 7, Ill.

Approval No. 160.047/62/0, Model AK, adult kapok buoyant vest, U. S. C. G. Specification Subpart 160.047, manufactured by International Cushion Co., 1110 Northeast Eighth Avenue, Fort Lauderdale, Fla.

Approval No. 160.047/63/0, Model CKM, child kapok buoyant vest, U. S. C. G. Specification Subpart 160.047, manufactured by International Cushion Co., 1110 Northeast Eighth Avenue, Fort Lauderdale, Fla.

Approval No. 160.047/64/0, Model CKS, child kapok buoyant vest, U. S. C. G. Specification Subpart 160.047, manufactured by International Cushion Co., 1110 Northeast Eighth Avenue, Fort Lauderdale, Fla.

Approval No. 160.047/65/0, Model CKM, child kapok buoyant vest, U. S. C. G. Specification Subpart 160.047, manufactured by Atlas Products, 2459 University Avenue, St. Paul 14, Minn.

Approval No. 160.047/66/0, Model AK, adult kapok buoyant vest, U. S. C. G. Specification Subpart 160.047, manufactured by Atlas Products, 2459 University Avenue, St. Paul 14, Minn.

Approval No. 160.047/67/0, Model CKS, child kapok buoyant vest, U. S. C. G. Specification Subpart 160.047, manufactured by The American Pad & Textile Co., Greenfield, Ohio, for Gamble-Skogmo, Inc., 15 North Eighth Street, Minneapolis 3, Minn.

Approval No. 160.047/68/0, Model CKM, child kapok buoyant vest, U. S. C. G. Specification Subpart 160.047, manufactured by The American Pad & Textile Co., Greenfield, Ohio, for Gamble-Skogmo, Inc., 15 North Eighth Street, Minneapolis 3, Minn.

Approval No. 160.047/69/0, Model AK, adult kapok buoyant vest, U. S. C. G. Specification Subpart 160.047, manufactured by The American Pad & Textile Co., Greenfield, Ohio, for Gamble-Skogmo, Inc., 15 North Eighth Street, Minneapolis 3, Minn.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interpret or apply secs. 6, 17, 54 Stat. 164, 166, as amended; 46 U. S. C. 526e, 526p; 46 CFR 160.047)

BUOYANT CUSHIONS, KAPOK OR FIBROUS GLASS

Note: Approved for use on motorboats of Classes A, 1, or 2 not carrying passengers for hire.

Approval No. 160.048/26/0, group approval for rectangular and trapezoidal kapok buoyant cushions, U. S. C. G. Specification Subpart 160.048, sizes and weights of kapok filling to be as per Table 160.048–4 (c) (1) (i), manufactured by Red Head Brand Co., 4311 Belmont Avenue, Chicago 41, Ill.

Approval No. 160.048/28/0, group approval for rectangular or trapezoidal kapok buoyant cushions, U. S. C. G. Specification Subpart 160.048, sizes and weights of kapok filling to be as per Table 160.048–4 (c) (1) (i), manufactured by The Holiday Line, Inc., 54 Greene Street, New York 13, N. Y.

Approval No. 160.048/32/0, group approval for rectangular and trapezoidal kapok buoyant cushions, U. S. C. G. Specification Subpart 160.048, sizes and weights of kapok filling to be as per Table 160.048–4 (c) (1) (i), manufactured by Elvin Salow Co., 31–33 South Street, Boston 11, Mass.

Approval No. 160.048/33/0, group approval for rectangular or trapezoidal kapok buoyant cushions, U. S. C. G. Specification Subpart 160.048, sizes and weights of kapok to be as per Table 160.048–4 (c) (1) (i), manufactured by

Noble Products Company, Box 327, Caldwell, Ohio.

Approval No. 160.048/34/0, group approval for rectangular and trapezoidal kapok buoyant cushions, U. S. C. G. Specification Subpart 160.048, sizes and weights of kapok filling to be as per Table 160.048–4 (c) (1) (i), manufactured by The American Pad & Textile Co., Greenfield, Ohio, for The Firestone Tire & Rubber Co., Akron 17, Ohio.

Approval No. 160.048/35/0, group approval for rectangular and trapezoidal kapok buoyant cushions, U. S. C. G. Specification, Subpart 160.048, sizes and weights of kapok filling to be as per Table 160.048–4 (c) (1) (i), manufactured by International Cushion Co., 1110 Northeast Eighth Avenue, Fort Lauderdale, Fla.

Approval No. 160.048/36/0, group approval for rectangular and trapezoidal kapok buoyant cushions, U. S. C. G. Specification Subpart 160.048, sizes and weights of kapok to be as per Table 160.048–4 (c) (1) (i), manufactured by The Safeguard Corp., Box 66, Station B, Cincinnati 22, Ohio, for Sears, Roebuck and Co., 925 South Homan Avenue, Chicago 7, Ill.

Approval No. 160.048/37/0, group approval for rectangular and trapezoidal kapok buoyant cushions, U. S. C. G. Specification Subpart 160.048, sizes and weights of kapok filling to be as per Table 160.048–4 (c) (1) (i), manufactured by The American Pad & Textile Co., Greenfield, Ohio, for Montgomery Ward & Co., 619 West Chicago Avenue, Chicago 7, Ill.

Approval No. 160.048/38/0, special approval for 14" x 19" x 2" rectangular ribbed-type kapok buoyant cushion, 24 oz. kapok, American Pad & Textile Co., dwg. Nos. A–409, dated Sept. 28, 1955, and B–245, dated Feb. 15, 1955, manufactured by The American Pad & Textile Co., Greenfield, Ohio, for Montgomery Ward & Co., 619 West Chicago Avenue, Chicago 7, Ill.

Approval No. 160.048/39/0, group approval for rectangular and trapezoidal kapok buoyant cushions, U. S. C. G. Specification Subpart 160.048, sizes and weights of kapok filling to be as per Table 160.048–4 (c) (1) (i), manufactured by Atlantic-Pacific Manufacturing Corp., 124 Atlantic Avenue, Brooklyn 1, N. Y., for Montgomery Ward & Co., Inc., 619 West Chicago Avenue, Chicago 7, Ill.

Approval No. 160.048/40/0, group approval for rectangular or trapezoidal kapok buoyant cushions, U. S. C. G. Specification Subpart 160.048, sizes and weights of kapok filling to be as per Table 160.048–4 (c) (1) (i), manufactured by Fortier Upholstering Co., Manistee, Mich.

Approval No. 160.048/41/0, special approval for 13" x 18" x 2" rectangular ribbed-type kapok buoyant cushion, 21 oz. kapok, dwg. No. 1, dated September 28, 1955, manufactured by Noble Products Co., Box 327, Caldwell, Ohio.

Approval No. 160.048/45/0, group approval for rectangular and trapezoidal kapok buoyant cushions, U. S. C. G. Specification Subpart 160.048, sizes and weights of kapok filling to be as per Table 160.048–4 (c) (1) (i), manufactured by A. L. Robertson, Inc., 113 South Gay Street, Baltimore 2, Md.

Approval No. 160.048/47/0, group approval for rectangular and trapezoidal kapok buoyant cushions, U. S. C. G. Specification Subpart 160.048, sizes and weights of kapok filling to be as per Table 160.048–4 (c) (1) (i), manufactured by The American Pad & Textile Co., Greenfield, Ohio, for Gamble-Skogmo, Inc., 15 North Eighth Street, Minneapolis 3, Minn.

Approval No. 160.048/48/0, special approval for 14" x 17" x 2" rectangular ribbed-type kapok buoyant cushion, 21 oz. kapok, American Pad & Textile Co. dwg. Nos. A–766, dated October 24, 1955, and B–245, dated February 15, 1955, manufactured by The American Pad & Textile Co., Greenfield, Ohio, for Gamble-Skogmo, Inc., 15 North Eighth Street, Minneapolis 3, Minn.

Approval No. 160.048/49/0, group approval for rectangular and trapezoidal kapok buoyant cushions, U. S. C. G. Specification Subpart 160.048, sizes and weights of kapok filling to be as per Table 160.048–4 (c) (1) (i), manufactured by Style-Crafters, Inc., Box 3277, Station A, Greenville, S. C., for Montgomery Ward & Co., Inc., 619 West Chicago Avenue, Chicago 7, Ill.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interpret or apply secs. 6, 17, 54 Stat. 164, 166, as amended; 46 U. S. C. 526e, 526p; 46 CFR 160.048)

BUOYANT CUSHIONS, UNICELLULAR PLASTIC FOAM

NOTE: Approved for use on motorboats of Classes A, 1, or 2 not carrying passengers for hire.

Approval No. 160.049/4/0, group approval for rectangular and trapezoidal unicellular plastic foam buoyant cushions, U. S. C. G. Specification Subpart 160.049, sizes to be as per Table 160.049–4 (c) (1), manufactured by Iowa Fibre Products, Inc., 316 Court Avenue, Des Moines 9, Iowa.

Approval No. 160.049/8/0, group approval for rectangular and trapezoidal unicellular plastic foam buoyant cushions, U. S C. G. Specification Subpart 160.049, sizes to be as per Table 160.049–4 (c) (1), manufactured by The Safegard Corp., Box 66, Station B, Cincinnati 22, Ohio, for Sears, Roebuck and Co., 925 South Homan Avenue, Chicago 7, Ill.

Approval No. 160.049/9/0, group approval for rectangular and trapezoidal unicellular plastic foam buoyant cushions, U. S C. G. Specification Subpart 160.049, sizes to be as per Table 160.049–4 (c) (1), manufactured by Iowa Fibre Products Inc., 316 Court Avenue, Des Moines 9, Iowa, for Hawkeye Sporting Goods Co, P. O. Box 613, Des Moines, Iowa.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interpret or apply secs. 6, 17, 54 Stat. 164, 166, as amended; 46 U. S. C. 526e, 526p; 46 CFR 160.049)

VALVES, SAFETY (POWER BOILERS)

Approval No. 162.001/137/1, Style HNA–MS–55 carbon steel body pop safety valve, flanged nozzle type, exposed spring fitted with spring cover, 1,500 p. s. i. primary service pressure rating, 650° F. maximum temperature, dwg. No. HV–25–MS issued June 3, 1950, and dwg. No. D–28167 issued March 11, 1947, approved for sizes 1½", 2", 2½", 3" and 4", manufactured by Crosby Steam Gage & Valve Co., Wrentham, Mass. (Reinstates and supersedes Approval No. 162.001/137/0 terminated in the FEDERAL REGISTER September 29, 1955.)

Approval No. 162.001/138/1, Style HNA–MS–56 carbon steel body pop safety valve, flanged nozzle type, exposed spring fitted with spring cover, 1500 p. s. i. primary service pressure rating, 750° F. maximum temperature, dwg. No. HV–25–MS issued June 3, 1950, and dwg. No. D–28167 issued March 11, 1947, approved for sizes 1½", 2", 2½", 3", and 4", manufactured by Crosby Steam Gage & Valve Co., Wrentham, Mass. (Reinstates and supersedes Approval No. 162.001/138/0 terminated in the FEDERAL REGISTER September 29, 1955.)

Approval No. 162.001/139/1, Style HNA–MS–57 alloy steel body pop safety valve, flanged nozzle type, exposed spring fitted with spring cover, 1500 p. s. i. primary service pressure rating, 900° F. maximum temperature, dwg. No. HV–26–MS, issued June 5, 1950 and dwg. No. D–28167 issued March 11, 1947, approved for sizes 1½", 2", 2½", 3" and 4", manufactured by Crosby Steam Gage & Valve Co., Wrentham, Mass. (Reinstates and supersedes Approval No. 162.001/139/0 terminated in the FEDERAL REGISTER September 29, 1955.)

Approval No. 162.001/140/1, Style HNA–MS–58 alloy steel body pop safety valve, flanged nozzle type, exposed spring fitted with spring cover, 1,500 p. s. i. primary service pressure rating, 1,000° F. maximum temperature, dwg. No. HV–26–MS, issued June 5, 1950, and dwg. No. D–28167 issued March 11, 1947, approved for sizes 1½", 2", 2½", 3" and 4", manufactured by Crosby Steam Gage & Valve Co., Wrentham, Mass. (Reinstates and supersedes Approval No. 162.001/140/0 terminated in the FEDERAL REGISTER September 29, 1955.)

(R. S. 4405, as amended, and 4462, as amended, 46 U. S. C. 375, 416. Interpret or apply R. S. 4417a, as amended, 4418, as amended, 4426, as amended, 4433, as amended, 4491, as amended, secs. 1 and 2, 49 Stat. 1544, as amended, sec. 3, 54 Stat. 346, as amended, and sec. 3 (c), 68 Stat. 676; 46 U. S. C. 391a, 392, 404, 411, 489, 367, 1333, 50 U. S. C. 198; E. O. 10402, 17 F. R. 9917, 3 CFR, 1952 Supp.; 46 CFR 162.001)

BOILERS, HEATING

Approval No. 162.003/65/2, size #1920–8C, steel plate heating boiler, steam or hot water, assembly & detail dwg. No. H–187 Rev. C. dated January 3, 1955, max. design pressure 30 p. s. i. approval limited to bare boiler, manufactured by Way-Wolff Associates, Inc., 33 Fulton Street, New York 38, N. Y. (Supersedes Approval No. 162.003/65/1 published in FEDERAL REGISTER March 21, 1951.)

(R. S. 4405, 4417a, 4418, 4426, 4433, 4434, 4491, as amended, secs. 1 and 2, 49 Stat. 1544, sec. 3, 54 Stat. 346, as amended, and sec. 3 (c), 68 Stat. 676; 46 U. S. C. 367, 375, 391a, 392, 404, 411, 412, 489, 1333, 50 U. S. C. 198; 46 CFR Part 52)

FIRE EXTINGUISHERS, PORTABLE, HAND, VAPORIZING LIQUID TYPE

Approval No. 162.004/82/1, Kidde Model 2VG (Symbol GEN), 1-qt. carbon tetrachloride vaporizing liquid pump type hand portable fire extinguisher, assembly dwg. No. BT–185–XK, Rev. C dated December 8, 1952, name plate dwg. No. T–185–A15 dated May 6, 1955 (Coast Guard classification: Type B, Size I; and Type C, Size I), manufactured for Walter Kidde & Co., Inc., Belleville 9, N. J., by The National Fireguard Corp., 1685 Shermer Road, Northbrook, Ill. (Supersedes Approval No. 162.004/82/0 published in FEDERAL REGISTER May 12, 1954.)

Approval No. 162.004/83/1, Kidde Model 3VG (Symbol GEN), 1½-qt. carbon tetrachloride vaporizing liquid pump type hand portable fire extinguisher, assembly dwg. No. BT–195–XK, Rev. D dated December 8, 1952, name plate dwg. No. T–195–A15 dated May 6, 1955 (Coast Guard classification: Type B, Size I; and Type C, Size I), manufactured for Walter Kidde & Co., Inc., Belleville 9, N. J., by The National Fireguard Corp., 1685 Shermer Road, Northbrook, Ill. (Supersedes Approval No. 162.004/83/0 published in FEDERAL REGISTER May 12, 1954.)

(R. S. 4405, 4417a, 4426, 4479, 4491, 4492, as amended, 49 Stat. 1544, and 54 Stat. 165, 166, 346, 1028, as amended, and sec. 3 (c), 68 Stat. 676; 46 U. S. C. 367, 375, 391a, 404, 463a, 472, 489, 490, 526g, 526p, 1333, 50 U. S. C. 198; 46 CFR 25.30, 34.25–1, 76.50, 95.50)

VALVES, RELIEF, HOT WATER HEATING BOILERS

Approval No. 162.013/4/1, Type No. 175 relief valve for hot water heating boilers, relieving capacity of 175,000 B. t. u. per hour at maximum set pressure of 30 p. s. i. dwg. No. RA3–11 dated September 2, 1955, approved for ¾" inlet size, manufactured by Bell & Gossett Co., 8200 North Austin Avenue, Morton Grove, Ill. (Supersedes Approval No. 162.013/4/0 published in FEDERAL REGISTER February 17, 1951.)

Approval No. 162.013/5/1, Type No. 250 relief valve for hot water heating boilers, relieving capacity 250,000 B. t. u. per hour at maximum set pressure of 30 p. s. i., dwg. No. RA3–12 dated September 2, 1955, approved for ¾" inlet size, manufactured by Bell & Gossett Co., 8200 North Austin Avenue, Morton Grove, Ill. (Supersedes Approval No. 162.013/5/0 published in FEDERAL REGISTER February 17, 1951.)

Approval No. 162.013/17/1, Type No. 175–15 relief valve for hot water heating boilers, relieving capacity 150,000 B. t. u. per hour at a maximum set pressure of 15 p. s. i., dwg. No. RA3–11, dated September 2, 1955, approved for ¾" inlet size, manufactured by Bell & Gossett Co., 8200 North Austin Avenue, Morton Grove, Ill. (Supersedes Approval No. 162.013/17/0 published in FEDERAL REGISTER March 18, 1953.)

Approval No. 162.013/18/1, Type No. 1050 relief valve for hot water heating boilers, relieving capacity, 1,050,000 B. t. u. per hour at maximum set pressure of 30 p. s. i., dwg. No. RA–20, Rev. 1, dated September 21, 1955, approved for 1¼" inlet size, manufactured by Bell & Gossett Co., 8200 North Austin Avenue, Morton Grove, Ill. (Supersedes Approval No. 162.013/18/0 published in FEDERAL REGISTER March 18, 1953.)

Approval No. 162.013/21/0, Type No. 250–15 relief valve for hot water heating boilers, relieving capacity 200,000 B. t. u. per hour at a maximum set pressure of 15 p. s. i., dwg. No. RA3–12, dated September 2, 1955, approved for ¾" inlet size, manufactured by Bell & Gossett Co., 8200 North Austin Avenue, Morton Grove, Ill.

Approval No. 162.013/22/0, Type No. 350–15 relief valve for hot water heating boilers, relieving capacity 220,000 B. t. u. per hour at a maximum set pressure of 15 p. s. i., dwg. No. RA2–19, dated September 2, 1955, approved for ¾" inlet size, manufactured by Bell & Gossett Co., 8200 North Austin Avenue, Morton Grove, Ill.

Approval No. 162.013/23/0, Type No. 350 relief valve for hot water heating boilers, relieving capacity 350,000 B. t. u. per hour at a maximum set pressure of 30 p. s. i., dwg. No. RA2–19, dated September 2, 1955, approved for ¾" inlet size, manufactured by Bell & Gossett Co., 8200 North Austin Avenue, Morton Grove, Ill.

Approval No. 162.013/24/0, Type No. 480–15 relief valve for hot water heating boilers, relieving capacity 300,000 B. t. u. per hour at a maximum set pressure of 15 p. s. i., dwg. No. RA–23, dated September 26, 1955, approved for ¾" inlet size, manufactured by Bell & Gossett Co., 8200 North Austin Avenue, Morton Grove, Ill.

Approval No. 162.013/25/0, Type No. 480 relief valve for hot water heating boilers, relieving capacity 480,000 B. t. u. per hour at a maximum set pressure of 30 p. s. i., dwg. No. RA–23, dated September 26, 1955, approved for ¾" inlet size, manufactured by Bell & Gossett Co., 8200 North Austin Avenue, Morton Grove, Ill.

Approval No. 162.013/26/0, Type No. 750–15 relief valve for hot water heating boilers, relieving capacity 500,000 B. t. u. per hour at a maximum set pressure of 15 p. s. i., dwg. No. RA–24, dated September 23, 1955, approved for 1" inlet size, manufactured by Bell & Gossett Co., 8200 North Austin Avenue, Morton Grove, Ill.

Approval No. 162.013/27/0, Type No. 750 relief valve for hot water heating boilers, relieving capacity 750,000 B. t. u. per hour at a maximum set pressure of 30 p. s. i., dwg. No. RA–24, dated September 23, 1955, approved for 1" inlet size, manufactured by Bell & Gossett Co., 8200 North Austin Avenue, Morton Grove, Ill.

Approval No. 162.013/28/0, Type No. 1050–15 relief valve for hot water heating boilers, relieving capacity 650,000 B. t. u. per hour at a maximum set pressure of 15 p. s. i., dwg. No. RA–20, Rev. 1, dated September 21, 1955, approved for 1¼" inlet size, manufactured by Bell & Gossett Co., 8200 North Austin Avenue., Morton Grove, Ill.

Approval No. 162.013/29/0, Type No. N74 relief valve for hot water heating boilers, relieving capacity of 690,000 B. t. u. per hour at a maximum set pressure of 30 p. s. i., dwg. No. N74–N174 P. D., dated October 7, 1952, approved for ¾" inlet size, manufactured by Watts Regulator Co., Lawrence, Mass.

Approval No. 162.013/30/0, Type No. N174 relief valve for hot water heating boilers, dwg. No. N74–N174 P. D., dated October 7, 1952, approved for the following sizes and relieving capacities:

Inlet size (inches):	*Relieving capacity (B. t. u. per hr. at 30 p. s. i.)*
¾	470,000
1	870,000
1¼	1,345,000
1½	2,020,000
2	3,815,000

manufactured by Watts Regulator Company, Lawrence, Mass.

FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 11029; FCC 55M-1031]

VOICE OF LAKE TAHOE

ORDER SCHEDULING HEARING

In re application of Charles E. Halstead, tr/as Voice of Lake Tahoe, Zephyr Cove, Nevada, Docket No. 11029, File No. BP-9108; for construction permit.

The Hearing Examiner having under consideration a Motion to Fix Date for Hearing filed November 29, 1955, on behalf of the Chief, Broadcast Bureau, Federal Communications Commission; and

It appearing that the hearing in this proceeding was continued by Hearing Examiner's order of September 21, 1954, until such time as may be established by a subsequent order pending Commission action on (1) another application that might be designated for hearing in consolidation with the above application, and (2) a Petition to the Full Commission for Reconsideration and Grant of the instant application; and

It further appearing that the Commission's records indicate that the application referred to in (1) above was dismissed at the applicant's request on August 9, 1955, and that the petition for reconsideration and grant was denied by Commission's order released November 17, 1955; and

It further appearing that no objection to the instant motion has been filed and that a grant thereof will conduce to the orderly dispatch of the Commission's business; now therefore

It is ordered, This 13th day of December 1955, that the Motion to Fix Date for Hearing be and it is hereby granted, and that the hearing in this proceeding shall be commenced at 10:00 a. m. on Thursday, January 26, 1956, at the offices of the Commission in Washington, D. C.; and

It is further ordered, That the Secretary send a copy of this order by Registered Mail—Return Receipt Requested to the applicant named at P. O. Box 19, Zephyr Cove, Nevada.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

[Docket Nos. 11493, 11494; FCC 55M-1030]

RADIO BROADCASTING SERVICE AND DANA W. ADAMS

FIRST STATEMENT CONCERNING PRE-HEARING CONFERENCES AND ORDER CONTINUING HEARING

In re applications of Louis Alford, Phillip D. Brady and Albert Mack Smith, d/b as Radio Broadcasting Service, Tyler, Texas, Docket No. 11493, File No. BP-9761; Dana W. Adams, Tyler, Texas, Docket No. 11494, File No. BP-9841; for construction permits.

The first pre-hearing conference was held herein on December 12, 1955. Both applicants and the Commission's Broadcast Bureau were represented by counsel. Neither of the respondents, Alto, Inc. (KAND), and Southwestair (KSWA), filed appearances pursuant to section 1.387 of the Commission's rules or appeared at the pre-hearing conference, as directed by the Hearing Examiner's order of November 15, 1955. On motion of counsel for Radio Broadcasting Service, the Hearing Examiner held each of the respondents to be in default. It was agreed, however, that the Hearing Examiner might reconsider this ruling provided a petition for reconsideration was filed by either respondent within 10 days after the date of this conference.

Agreements were reached among the parties and stated on the record, as reflected in the transcript which is incorporated herein by reference. Such agreements are found to be acceptable and approved by the Hearing Examiner. They include the following:

1. The direct cases, in written form, shall be prepared as follows:

(a) The testimony of each witness shall be prepared in narrative form and shall be submitted under the affidavit of the particular witness.

(b) All narrative statements (except engineering exhibits) shall be prepared in double-spaced form; each page and each line shall be numbered, and carbon copies shall not be acceptable.

(c) Parties shall be designated by abbreviated names, as follows: Radio, Adams, KAND, KSWA and Commission Counsel.

(d) Each party shall mark each of its exhibits with its name and a number. Narrative statements shall be numbered in series, beginning with one. An exhibit connected with a narrative statement shall be given the same number as the narrative statement, plus an identifying letter in series, such as "Radio No. 1-A." (Engineering exhibits may vary from this style.)

2. Where the direct case in written form contains testimony of witnesses whose direct testimony appropriately could have been taken by deposition, parties will not object to taking cross-examination of such witnesses through deposition procedures rather than requiring those witnesses to be brought to Washington.

3. With reference to program proposals in direct cases: unless a stipulation to the contrary is reached, applicants will submit, as a minimum, (a) complete program schedule of programs, including the classification of each program by type and source; (b) non-network program descriptions; (c) analyses of proposed typical week by type and source, together with information on spot announcements as required by FCC Form 301.

4. The direct written cases shall be exchanged on or before January 6, 1956.

5. On or before January 13, 1956, counsel for each party shall serve upon all other counsel, and file with the Commission in triplicate, a written statement containing (a) a list of all objections it desires to make to the receipt in evidence of any exhibits or specific portions thereof contained in the direct cases already exchanged, together with a brief statement of the reason for each objection; and (b) additional information it desires from other party or parties.

6. On or before January 18, 1956, counsel for all parties shall meet in informal conference, without the Hearing Examiner, for the purpose of discussing such objections and requests for information and reaching agreements thereon insofar as possible. All agreements reached shall be reduced to writing, signed by the parties, and filed with the Commission in triplicate on or before January 20, 1956, together with a list of the objections on which agreement was not reached and information refused to be furnished.

7. On or before January 20, 1956, each party shall serve upon all other parties, and file with the Commission in triplicate, a notice stating which witnesses it desires to be produced for cross-examination (a) in Washington, or (b) through deposition procedures.

8. All parties shall attempt to reach a stipulation with reference to engineering facts.

9. On January 25, 1956, at 10:00 a. m., a further pre-hearing conference shall be held for the purposes stated in section 1.841 (c).

10. Hearing is continued from January 12, 1956, to 10:00 a. m., January 31, 1956.

It is ordered, This 12th day of December 1955, that the foregoing agreements and requirements shall govern the course of the proceeding to the extent indicated, unless modified by the Hearing Examiner for cause or by the Commission upon review of the Hearing Examiner's ruling; and the hearing herein, now scheduled for January 12, 1956, is continued until January 31, 1956, at 10:00 a. m.; and the second pre-hearing conference is scheduled for January 25, 1956, at 10:00 a. m.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

[Docket No. 11573]

JESSE ZORN

ORDER TO SHOW CAUSE WHY RADIOTELEPHONE STATION LICENSE SHOULD NOT BE REVOKED

There being under consideration the matter of certain alleged violations of the Commission's rules in connection with the operation of station WE-8900 licensed to Jesse Zorn, Aransas Pass, Texas, and located aboard the vessel "Golden West";

It appearing that notices of the violations of the Commission's rules in the operation of said station were given the licensee as follows:

(a) Notice dated April 4, 1955, specifying, among other things, violation of section 8.108 of the Commission's rules on April 1, 1955, by transmitting harmonic emissions so as to cause undue interference;

(b) Notice dated May 9, 1955, sent by Registered Mail, Return Receipt Requested, which was received by the licensee on May 10, 1955, calling attention to the above-noted violation and failure to reply thereto in violation of section 8.601 (a) of the Commission's rules. This notice also requested a reply within 10 days of receipt;

It further appearing that as of this date the licensee has not answered either of the above-mentioned official violation notices;

It is ordered, This 14th day of December 1955 pursuant to the provisions of section 312 (c) of the Communications Act of 1934, as amended, that the said Jesse Zorn, Aransas Pass, Texas, show cause why the aforementioned license should not be revoked and appear and give evidence in respect thereto at a hearing[1] to be held before this Commission, at Washington, D. C., on the 21st day of February, 1956;

It is further ordered, That the Secretary send a copy of this Order to the licensee by Registered Mail—Return Receipt Requested.

Released: December 15, 1955.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

[F. R. Doc. 55-10166; Filed, Dec. 19, 1955; 8:49 a. m.]

[Docket No. 11574]

WARNER AND TAMBLE RADIO SERVICE, INC.

ORDER TO SHOW CAUSE WHY LICENSE FOR RADIOTELEPHONE STATION SHOULD NOT BE REVOKED

There being under consideration the matter of certain alleged violations of the Commission's rules in connection with the operation of station WA-7204, licensed to Warner and Tamble Radio Service, Inc., P. O. Box 166, Memphis 1, Tennessee and located aboard the vessel "Lin Smith";

It appearing that notices of the violations of the Commission's rules in the operation of said station were given the licensee as follows:

(a) Notice dated June 6, 1955, specifying among other things, that on March 25, 1955, said licensee had violated section 8.364 of the Commission's rules by failure to announce the assigned call letters at the beginning and conclusion of its communications;

(b) Notice dated July 22, 1955, sent by Registered Mail, Return Receipt Requested, which was received by the licensee on July 26, 1955, calling attention to the above-noted violation and also the further violation of section 8.601 (a) of Commission's rules for failure to respond thereto. This notice also requested a reply within 10 days of receipt;

It further appearing that as of this date the licensee has not answered either of the above-mentioned official violation notices;

It is ordered, This 14th day of December 1955 pursuant to the provisions of section 312 (c) of the Communications Act of 1934, as amended, that the said Warner and Tamble Radio Service, Inc., P. O. Box 166, Memphis 1, Tennessee, show cause why the aforementioned license should not be revoked and appear and give evidence in respect thereto at a hearing[1] to be held before this Commission at Washington, D. C., on the 13th day of February 1956;

It is further ordered, That the Secretary send a copy of this Order to the licensee by Registered Mail—Return Receipt Requested.

Released: December 15, 1955.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

[F. R. Doc. 55-10167; Filed, Dec. 19, 1955; 8:49 a. m.]

[Docket No. 11575]

MISSISSIPPI VALLEY BARGE LINE CO.

ORDER TO SHOW CAUSE WHY LICENSE FOR RADIOTELEPHONE STATION SHOULD NOT BE REVOKED

There being under consideration the matter of certain alleged violations of the Commission's rules in connection with the operation of station WA-7349 licensed to the Mississippi Valley Barge Line Company, 1017 Olive Street, St. Louis, Missouri, and located aboard the vessel "Louisiana";

It appearing that notices of the violations of the Commission's rules in the operation of said station were given the licensee as follows:

(a) Notice dated May 18, 1955, specifying, among other things, that said licensee on April 24, 1955, failed to announce call letters at the beginning and upon conclusion of communications in violation of section 8.364 of the Commission's rules.

(b) Notice dated July 25, 1955, by Registered Mail, Return Receipt Requested, warning the licensee concerning the above violation and failure to respond thereto in violation of section 8.601 (a) of the Commission's rules. This notice was received by the licensee on July 27, 1955, and requested a response within 10 days of receipt;

It further appearing that as of this date the licensee has not answered either of the above-mentioned official violation notices;

It is ordered, This 14th day of December 1955 pursuant to section 312 (c) of the Communications Act of 1934, as amended, that the said Mississippi Valley Barge Line Company show cause why the aforesaid license should not be revoked and appear and give evidence in respect thereto at a hearing[1] to be held before this Commission at Washington, D. C., on the 15th day of February 1956;

It is further ordered, That the Secretary send a copy of this Order by Registered Mail, Return Receipt Requested,

[1] Section 1.402 of the Commission's rules provides that in order to have the opportunity to appear before the Commission at the time and place specified in an order to show cause, a licensee shall within thirty (30) days from the date of the receipt of a show cause order submit a written statement informing the Commission whether said licensee will appear at the designated hearing and present evidence upon the matters specified, or whether the rights to such a hearing are waived. Waiver of the hearing may be accompanied by a statement setting forth the reasons why the licensee believes that an order of revocation should not be issued. A waiver unaccompanied by such a statement will be deemed to be an admission of the allegations specified in the order to show cause. Failure to respond to a show cause order within the above-mentioned thirty (30) day period, or, having informed the Commission in writing within the above-mentioned thirty (30) day period that the licensee will appear at the hearing and present evidence upon the matter specified and then failing to appear at the hearing, will be deemed to be a waiver of the right to a hearing and an admission of the allegations specified in the order to show cause.

to the said Mississippi Valley Barge Line Company, 1017 Olive Street, St. Louis, Missouri.

Released: December 15, 1955.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

[Docket No. 11576]

DUNCAN CAMERON

ORDER TO SHOW CAUSE WHY LICENSE FOR RADIOTELEPHONE STATION SHOULD NOT BE REVOKED

There being under consideration the matter of certain alleged violations of the Commission's rules in connection with the operation of station WE-5783 licensed to Duncan Cameron and located aboard the vessel "Kimberly";

It appearing that notices of the violations of the Commission's rules in the operation of said station were given to the licensee as follows:

(a) Notice dated June 8, 1955, specifying, among other things, that on April 21 and 22, 1955, said licensee violated section 8.364 of the Commission's rules by failing to announce the assigned call letters at the beginning and at the end of the communication;

(b) Notice dated July 22, 1955, sent by Registered Mail, Return Receipt Requested, received by the licensee on July 29, 1955, calling attention to the above noted violations and also the further violation of section 8.601 (a) of the Commission's rules for failure to reply thereto. This notice also requested a response within 10 days of receipt;

It further appearing that as of this date the licensee has not answered either of the above-mentioned official violation notices;

It is ordered, This 14th day of December 1955 pursuant to the provisions of section 312 (c) of the Communications Act of 1934, as amended, that the said Duncan Cameron, P. O. Box 1906, Fort Myers, Florida, show cause why the aforementioned license should not be revoked and appear and give evidence in respect thereto at a hearing [1] to be held before this Commission at Washington, D. C., on the 21st day of February, 1956;

It is further ordered, That the Secretary send a copy of this Order to the licensee by Registered Mail—Return Receipt Requested.

Released: December 15, 1955.

[Docket No. 11579]

SCHOONER CORP.

ORDER TO SHOW CAUSE WHY LICENSE FOR RADIOTELEPHONE STATION SHOULD NOT BE REVOKED

There being under consideration the matter of certain alleged violations of the Commission's rules in connection with the operation of station WC-4763, licensed to Schooner Corporation, 20 Fish Pier, Boston 10, Massachusetts, and located aboard the vessel "Ocean Clipper";

It appearing that notices of the violations of the Commission's rules were given the licensee as follows:

(a) Notice dated July 27, 1955, specifying among other things, that said licensee on July 12, 1955, had violated the following Commission's rules:

(1) Section 8.364 (a) by failing to identify the aforesaid station by the assigned call sign;

(2) Section 8.131 by operating with a frequency deviation greater than the tolerance allowed.

(b) Notice dated September 28, 1955, sent by Registered Mail, Return Receipt Requested, which was received by the licensee on September 29, 1955, calling attention to the above noted violations and the further violation of section 8.601 (a) for failure to reply thereto. The licensee was also requested to respond within ten days of receipt;

It further appearing that as of this date the licensee has not answered either of the above-mentioned official violation notices;

It is ordered, This 14th day of December 1955, pursuant to the provisions of section 312 (c) of the Communications Act of 1934, as amended, that the said Schooner Corporation, 20 Fish Pier, Boston 10, Massachusetts, show cause why the aforementioned license should not be revoked and appear and give evidence in respect thereto at a hearing [1] to be held before this Commission at Washington, D. C., on the 17th day of February, 1956;

It is further ordered, That the Secretary send a copy of this Order to the licensee by Registered Mail—Return Receipt Requested.

Released: December 15, 1955.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

FEDERAL POWER COMMISSION

[Docket Nos. G-8854—8864 etc.]

C. R. RIDGWAY ET AL.

NOTICE OF SEVERANCE

DECEMBER 14, 1955.

In the matters of C. R. Ridgway and W. B. Ridgway, Docket Nos. G-8854—G-8864, incl.; Granite Oil Trust No. 2 of Oklahoma, Docket No. G-8915; A. J. Hodges Industries, Inc., Docket No. G-8975; States Oil Company, et al., Docket No. G-8992; Robert B. Prentice, et al., Docket No. G-9018; W. Earl Rowe, et al., Docket No. G-9026; Sunray Mid-Continent Oil Company, Docket No. G-9043; Flanders Gas & Oil Company, Docket No. G-9052; J. C. Vaughan, Jr., Docket No. G-9160; A. E. Coutant, Docket No. G-9167.

By notice issued November 30, 1955, the above-captioned proceedings were consolidated and set down for hearing in Washington, D. C., on December 20, 1955.

Each of the above applications for certificate of public convenience and necessity involves the sale of natural gas in interstate commerce to United Gas Pipe Line Company for resale. In addition, however, the proceeding in Docket No. G-9052 involves an application for a certificate authorizing the acquisition of natural-gas properties.

It appears appropriate, therefore, to sever Docket No. G-9052 from the above-captioned proceedings, and to that end:

The proceeding in Docket No. G-9052 be and it is hereby severed from the proceedings consolidated with Docket No. G-8854.

Also take notice that the public hearing concerning the matters involved in and the issues presented by the application for a certificate of public convenience and necessity in Docket No. G-9052 will be held at a date and time to be fixed by further notice.

[SEAL] LEON M. FUQUAY,
Secretary.

[Docket No. G-6098]

SOUTHERN PRODUCTION CO., INC.

NOTICE OF APPLICATION AND DATE OF HEARING

DECEMBER 14, 1955.

Take notice that Southern Production Company, Inc. (Applicant), a Delaware corporation whose address is Fort Worth, Texas, filed on November 26, 1954, an application for a certificate of public convenience and necessity to continue making sales in interstate commerce of natural gas for resale, pursuant to section 7 of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant produces natural gas from the Panhandle and Sprayberry Trend

[1] Section 1.402 of the Commission's rules provides that in order to have the opportunity to appear before the Commission at the time and place specified in an order to show cause, a licensee shall within thirty (30) days from the date of the receipt of a show cause order submit a written statement informing the Commission whether said licensee will appear at the designated hearing and present evidence upon the matters specified, or whether the rights to such a hearing are waived. Waiver of the hearing may be accompanied by a statement setting forth the reasons why the licensee believes that an order of revocation should not be issued. A waiver unaccompanied by such a statement will be deemed to be an admission of the allegations specified in the order to show cause. Failure to respond to a show cause order within the above-mentioned thirty (30) day period, or, having informed the Commission in writing within the above-mentioned thirty (30) day period that the licensee will appear at the hearing and present evidence upon the matter specified and then failing to appear at the hearing, will be deemed to be a waiver of the right to a hearing and an admission of the allegations specified in the order to show cause.

[1] Section 1.402 of the Commission's rules provides that in order to have the opportunity to appear before the Commission at the time and place specified in an order to show cause, a licensee shall within thirty (30) days from the date of the receipt of a show cause order submit a written statement informing the Commission whether said licensee will appear at the designated hearing and present evidence upon the matters specified, or whether the rights to such a hearing are waived. Waiver of the hearing may be accompanied by a statement setting forth the reasons why the licensee believes that an order of revocation should not be issued. A waiver unaccompanied by such a statement will be deemed to be an admission of the allegations specified in the order to show cause. Failure to respond to a show cause order within the above-mentioned thirty (30) day period, or, having informed the Commission in writing within the above-mentioned thirty (30) day period that the licensee will appear at the hearing and present evidence upon the matter specified and then failing to appear at the hearing, will be deemed to be a waiver of the right to a hearing and an admission of the allegations specified in the order to show cause.

Gas Fields located in Gray, Upton, Reagan, Midland and Glasscock Counties, Texas, which it sells in interstate commerce to the following buyers for resale: Phillips Petroleum Company who resells to Northern Natural Gas Company, Consolidated Gas Utilities Company and Permian Basin Pipe Line Company; also sales are made to Texas Gas Production Corporation for resale to El Paso Natural Gas Company. The natural gas so purchased by Northern Natural Gas Company, Consolidated Gas Utilities Company, Permian Basin Pipe Line Company and El Paso Natural Gas Company is transported in interstate commerce and resold for ultimate public consumption by each of them.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations, and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on January 13, 1956, at 9:30 a. m., e. s. t., in a hearing room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of section 1.30 (c) (1) or (c) (2) of the Commission's rules of practice and procedure. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 6, 1956. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[File No. 24D-1436]

TRANS-CONTINENTAL URANIUM CORP.

ORDER TEMPORARILY SUSPENDING EXEMPTION, STATEMENT OF REASONS THEREFOR, AND NOTICE OF OPPORTUNITY FOR HEARING

DECEMBER 13, 1955.

I. Trans-Continental Uranium Corporation, a Nevada corporation, 358 South Third East Street, Salt Lake City, Utah, having filed with the Commission on October 1, 1954, a notification on Form 1-A, and subsequently filed amendments thereto, relating to a proposed public offering of 3,000,000 shares of common stock, par value 10 cents, at 10 cents per share for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of section 3 (b) thereof and Regulation A promulgated thereunder; and:

II. A. The Commission having reasonable cause to believe that the terms and conditions of Regulation A have not been complied with in that the company has failed to file on Form 2-A reports of sales as required by Rule 224 of Regulation A;

B. The Commission having been advised that Justin Steppler, Inc., a principal underwriter of the securities offered, and Beverly I. Steppler, a director of the issuer, have been permanently enjoined by the New York State Supreme Court, County of New York, from engaging in the business of acting as a broker or dealer in securities in the State of New York.

III. *It is ordered,* Pursuant to Rule 223 (a) of the General Rules and Regulations under the Securities Act of 1933 that the exemption under Regulation A be, and it hereby is, temporarily suspended.

Notice is hereby given that any person having any interest in the matter may file with the Secretary of the Commission a written request for a hearing; that, within 20 days after receipt of such request, the Commission will, or at any time upon its own motion may, set the matter down for hearing at a place to be designated by the Commission for the purpose of determining whether this order of suspension should be vacated or made permanent, without prejudice, however, to the consideration and presentation of additional matters at the hearing; and that notice of the time and place of said hearing will be promptly given by the Commission.

It is further ordered, That this order and notice shall be served upon Trans-Continental Uranium Corporation, 358 South Third East Street, Salt Lake City, Utah, Justin Steppler, Inc., 15 Exchange Place, Jersey City 2, New Jersey and Registrar and Transfer Co., 15 Exchange Place, Jersey City 2, New Jersey, personally or by registered mail or confirmed telegraphic notice, and shall be published in the FEDERAL REGISTER.

By the Commission.

ZENITH URANIUM & MINING CORP.

ORDER TEMPORARILY SUSPENDING EXEMPTION, STATEMENT OF REASONS THEREFOR, AND NOTICE OF OPPORTUNITY FOR HEARING

DECEMBER 13, 1955.

I. Zenith Uranium & Mining Corp., 351 South State Street, Salt Lake City, Utah, having filed with the Commission on July 12, 1954, a Notification on Form 1-A and an offering circular, and having subsequently filed amendments thereto on July 30 and August 2, 1954, relating to a proposed public offering of 300,000 shares of 1 cent par common stock at $1 per share, for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of section 3 (b) thereof and Regulation A promulgated thereunder; and,

II. A. The Commission having reasonable cause to believe that the terms and conditons of Regulation A have not been complied with in that the issuer has failed to file reports of sales on Form 2-A as required by Rule 224; and,

B. The Commission having been advised that a consent order was entered on October 31, 1955, in the United States District Court for the District of Massachusetts, permanently enjoining Daniel M. Sheehan, Jr., doing business as Sheehan & Company, a director and promoter of the company, who is also the principal underwriter of the securities proposed to be offered hereunder, from further violations of sections 10 (b), 15 (c) (1) and 17 (a) of the Securities Exchange Act of 1934 and the Rules and Regulations promulgated thereunder, in connection with the purchase and sale of any security.

III. *It is ordered,* Pursuant to Rule 223 (a) of the general rules and regulations under the Securities Act of 1933, as amended, that the exemption under

Regulation A be, and it hereby is, temporarily suspended.

Notice is hereby given that any person having any interest in the matter may file with the Secretary of the Commission a written request for a hearing; that, within 20 days after receipt of such request, the Commission will, or at any time upon its own motion may, set the matter down for hearing at a place to be designated by the Commission for the purpose of determining whether this order of suspension should be vacated or made permanent, without prejudice, however, to the consideration and presentation of additional matters at the hearing; and that notice of the time and place for said hearing will be promptly given by the Commission.

It is further ordered, That this order and notice shall be served upon Zenith Uranium & Mining Corp. and Daniel M. Sheehan, Jr., doing business as Sheehan & Company, 79 Milk Street, Boston, Massachusetts, personally or by registered mail or by confirmed telegraphic notice, and shall be published in the FEDERAL REGISTER.

VIGORELLI OF CANADA LTD.

ORDER TEMPORARILY SUSPENDING EXEMPTION, STATEMENT OF REASONS THEREFOR, AND NOTICE OF OPPORTUNITY FOR HEARING

DECEMBER 13, 1955.

Vigorelli of Canada Ltd. having filed with the Commission on August 9, 1954, for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of section 3 (b) thereof and Regulation D thereunder, a Notification on Form 1-D relating to a proposed offering of 96,770 shares of Common Shares ($1 Par Value) and 96,770 shares of 8 percent Cumulative Redeemable Preferred Shares ($2 Par Value) for an aggregate public offering price of $299,987;

The Commission having been advised that the terms and conditions of said Regulation D have not been complied with in that Vigorelli of Canada Ltd. has failed to file a report on Form 2-D for the six months period following the commencement of the offering as required by Rule 510 of Regulation D and has ignored requests by the Commission's staff for the filing of such report:

It is ordered, Pursuant to Rule 509 (a) of the general rules and regulations under the Securities Act of 1933, as amended, that the exemption of Vigorelli of Canada Ltd. under section 3 (b) and Regulation D be, and it hereby is, temporarily suspended.

Notice is hereby given that any person having any interest in the matter may file with the Secretary of the Commission a written request for a hearing; that, within 20 days after receipt of such request, the Commission will, or at any time upon its own motion may, set the matter down for hearing at a place to be designated by the Commission for the purpose of determining whether this order of suspension should be vacated or made permanent, without prejudice, however, to the consideration and presentation of additional matters at the hearing; and that notice of the time and place for said hearing will be promptly given by the Commission.

It is further ordered, That this order and notice shall be served upon Vigorelli of Canada Ltd., Crisona Brothers, B. Fennekohl & Co. and Toronto General Trusts Corporation personally or by registered mail or by confirmed telegraphic notice, and shall be published in the FEDERAL REGISTER.

By the Commission.

[File No. 812-976]

AMERICAN RESEARCH AND DEVELOPMENT CORP. AND PAUL VALVE CORP.

NOTICE OF FILING REQUESTING ORDER EXEMPTING PROPOSED TRANSACTION BETWEEN AFFILIATES

DECEMBER 14, 1955.

Notice is hereby given that American Research and Development Corporation ("Research"), a registered closed-end nondiversified investment company, has filed an application pursuant to section 17 (b) of the Investment Company Act of 1940 ("act") seeking an order exempting the proposed transaction, described below, from the prohibition contained in section 17 (a) (2) of the act.

Paul Valve Corporation ("Paul"), a New Jersey corporation organized in 1947, is engaged in the sale of valves for use in pulp mills, chemical process plants, product pipelines and other industrial applications.

Pursuant to a plan of reorganization consummated in April 1955, Paul exchanged new 10 cent par value common stock for all of its previously outstanding securities. Research received 22,621 shares of new common stock of Paul (22.6 percent of the new stock outstanding) in exchange for $62,000 principal amount of debentures and 26,040 shares of old common stock of Paul which it then held. This transaction was exempted by order of the Commission dated April 14, 1955 (Investment Company Act Release No. 2133).

It is stated that notwithstanding the reorganization Paul's business and credit has not improved; operations for the first four months of the fiscal year beginning May 1, 1955, resulted in a loss of $1,545. It is also stated that there is no working capital and no interest among stockholders sufficient to produce the needed working capital. Book value of the common stock of Paul as of September 30, 1955, amounted to $15,395 of which approximately $3,400 is applicable to Research's 22.6 percent stock interest. Paul's operations have been unprofitable in four of the last five years.

Research now proposes to sell its 22,661 shares of common stock of Paul to Alexander D. Harvey, President, director, and holder, together with his wife, of 9,000 shares of the common stock of Paul (equivalent to 9 percent of the stock outstanding), for an aggregate consideration of $6,460 or approximately $0.285 per share.

Research's cost of the stock is $64,604 measured by reference to the cost of $62,000 for the debentures and $2,604 paid for the old common stock surrendered in exchange for 22,661 shares of new common stock of Paul pursuant to the reorganization referred to above. Thus the $6,460 to be received by Research is approximately 10 percent of Research's original cost, but is substantially in excess of the book value of Research's interest of $3,480 in Paul as at September 30, 1955.

Generally speaking, section 17 (a) (2) of the act prohibits an affiliated person of an affiliated person of a registered investment company from purchasing any securities from such registered investment company, with one exception not applicable here, unless the Commission upon application pursuant to section 17 (b) of the act, grants an exemption from section 17 (a) (2) of the act after finding that the terms of the proposed transaction, including the consideration to be paid, are reasonable and fair and do not involve overreaching on the part of any person concerned, that the proposed transaction is consistent with the policy of each registered investment company concerned, as recited in its registration statement and reports filed under the act, and is consistent with the general purposes of the act.

By virtue of his position as an officer, director, and as a holder of more than 5 percent of the stock of Paul, Harvey is an affiliated person of Paul under the act; Paul is also an affiliated person of Research because of the latter's 22.6 percent stock interest in Paul; therefore, since Harvey is an affiliated person of an affiliated person (Paul) of a registered investment company (Research), the proposed transaction is prohibited by section 17 (a) (2) of the act unless exempted by the Commission pursuant to section 17 (b) of the act.

Research asserts that the proposed transaction was negotiated at arm's length and that except as stated above, Research is not affiliated directly or indirectly with Harvey.

Notice is further given that any interested person may, not later than December 27, 1955, at 5:30 p. m., submit to the Commission in writing any facts bearing upon the desirability of a hearing on the matter and may request that a hearing be held, such request stating the nature of his interest, the reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D. C. At any time after said date, the application may be granted as provided in Rule N-5 of the rules and regulations promulgated under the act.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 70-3428]

GENERAL PUBLIC UTILITIES CORP. AND ASSOCIATED ELECTRIC CO.

NOTICE OF FILING OF APPLICATION-DECLARATION REGARDING DISSOLUTION OF INTERMEDIATE HOLDING COMPANY, ACQUISITION OF ITS ASSETS BY TOP HOLDING COMPANY, AND CAPITAL CONTRIBUTION TO SUBSIDIARY OPERATING COMPANY

DECEMBER 14, 1955.

Notice is hereby given that General Public Utilities Corporation ("GPU") and Associated Electric Company ("Aelec"), both registered holding companies have filed with the Commission an application-declaration pursuant to the Public Utility Holding Company Act of 1935 ("act") and have designated sections 9 (a), 10, 11, 12 (b), and 12 (c) of the act, and Rules U-42 and U-44 (c) promulgated thereunder, as applicable to the proposed transactions, which are summarized as follows:

GPU, a New York corporation, owns all of the outstanding securities (consisting of 400,000 shares of common stock) of Aelec, a Delaware corporation. It is proposed, if the Commission shall grant and permit to become effective the application-declaration in File No. 70-3050, relating to the proposed merger of Northern Pennsylvania Power Company into Pennsylvania Electric Company and modification of the Commission's order of December 28, 1951, in File No. 59-32 so as to permit retention in the GPU holding-company system of Northern Pennsylvania Power Company, that Aelec will be dissolved under the provisions of Delaware law and all its assets, subject to its liabilities, transferred to GPU. Aelec's principal assets consist of all the outstanding common stock of Pennsylvania Electric Company, all of the outstanding preferred and common stocks and $4,000,000 principal amount of debentures of Manila Electric Company ("Meralco") and all of the outstanding securities (consisting of 2,000 shares of common stock) of Escudero Electric Service Company ("Escudero"). The two companies last mentioned are public utility companies operating in the Philippines and have been granted exemption from certain provisions of the act pursuant to section 3 (b) thereof. It is proposed that, after the dissolution of Aelec and the aforementioned transfer of Aelec's assets to GPU, GPU will make a capital contribution to Meralco of all of the outstanding common stock of Escudero.

It is stated that no State or Federal commission, other than this Commission, has jurisdiction over any of the proposed transactions, but that the transfer from Aelec to GPU of all of the outstanding common stock of Meralco and Escudero, and the subsequent transfer by GPU to Meralco as a capital contribution of all of the outstanding common stock of Escudero, require the approval of the Public Service Commission of the Philippines.

Applicants-declarants stipulate and agree that the granting and permitting to become effective of the application-declaration and the carrying out of the transactions herein proposed shall not be deemed, in any manner, to modify or otherwise affect the Commission's orders, dated August 13, 1942, and December 28, 1951 in File No. 59-32, requiring the divestiture by GPU of its interest in Escudero and Meralco.

Applicants-declarants request that the Commission's order granting and permitting to become effective the application-declaration contain the recitals with respect to the transfer by Aelec to GPU of its assets requisite to meet the requirements of Sections 1081-1083, inclusive, of the Internal Revenue Code of 1954.

Notice is further given that any interested person may, not later than January 5, 1956, at 5:30 p. m., request the Commission in writing that a hearing be held on this matter, stating the nature of his interest, the reason for such request, and the issues of fact or law, if any, raised by such filing which he proposes to controvert, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D. C. At any time after said date, the application-declaration, as filed or as hereafter amended, may be granted and permitted to become effective as provided in Rule U-23 of the Rules and Regulations promulgated under the Act, or the Commission may grant exemption from its rules as provided in Rules U-20 (a) and U-100 or take such other action as it may deem appropriate.

By the Commisssion.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 70-3410]

GENERAL PUBLIC UTILITIES CORP. ET AL.

ORDER REGARDING AGREEMENT PROVIDING FOR ALLOCATION OF CONSOLIDATED FEDERAL INCOME TAX LIABILITIES

DECEMBER 14, 1955.

General Public Utilities Corporation, a registered holding company, and its subsidiary companies, Jersey Central Power & Light Company, Metropolitan Edison Company, New Jersey Power & Light Company, Northern Pennsylvania Power Company, The Waverly Electric Light and Power Company, Pennsylvania Electric Company, Blair Fuel Company, Nineveh Water Company, Brockway Light, Heat and Power Company, Employees Welfare Association, Inc., and Associated Electric Company, having filed a declaration with the Commission pursuant to section 12 (b) of the Public Utility Holding Company Act of 1935 ("act") and Rule U-45 (a) promulgated thereunder regarding a certain proposed transaction, which is summarized as follows:

Declarants propose to enter into an agreement governing the allocation among said companies of the consolidated Federal income tax liability of such group of companies. It is stated that the proposed agreement does not comply with the exemption provisions of Rule U-45 (b) (6) in that it provides that (i) commencing with the tax return for 1954 and thereafter, a company which elects to claim a deduction for accelerated amortization of emergency facilities, as distinct from normal depreciation deductions, shall have allocated to it the entire tax benefits, and bear the entire tax burdens, attributable to such deduction, and (ii) commencing with the year 1955 and thereafter, a company which elects to claim a foreign tax credit shall have allocated to it the entire tax benefits attributable to such credit.

The declaration states that no State or Federal regulatory body, other than this Commission, has jurisdiction with respect to the proposed transaction.

Notice of the filing of said declaration having been given in the manner prescribed by Rule U-23, and no hearing having been requested of or ordered by the Commission; and the Commission finding that the applicable provisions of the act and of the rules thereunder are satisfied and that the declaration should be permitted to become effective forthwith:

It is ordered, Pursuant to Rule U-23 and the applicable provisions of the act, that said declaration be, and the same hereby is, permitted to become effective forthwith, subject to the terms and conditions set forth in Rule U-24.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

INTERSTATE COMMERCE COMMISSION

FOURTH SECTION APPLICATIONS FOR RELIEF

DECEMBER 15, 1955.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the General Rules of Practice (49 CFR 1.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

LONG-AND-SHORT HAUL

FSA No. 31423: *Paint and materials to Missouri River crossings.* Filed by W. J. Prueter, Agent, for interested rail carriers. Rates on paint, paint material and related articles, carloads from Chicago, Kankakee, and Rockford, Ill., Milwaukee, Racine, and Waxdale, Wis., Minneapolis, Minnesota Transfer, and St. Paul, Minn., and St. Louis, Mo., to specified points in Iowa, Kansas, Nebraska, and South Dakota on or near the Missouri River.

Grounds for relief: Circuitous routes.

Tariff: Supplement 49 to Agent Prueter's I. C. C. A-4038.

FSA No. 31424: *Iron and steel articles to Eastern Canadian Ports.* Filed by H. R. Hinsch, Agent, for interested rail carriers. Rates on iron and steel articles, carloads, also billets and articles taking same rates, carloads from specified points in central territory and in trunk-line arbitrary east of Pittsburgh, Pa., to specified eastern Canadian ports in the Provinces of New Brunswick, Nova Scotia, and Quebec.

Grounds for relief: Maintenance of port rate relations with north Atlantic seaboard ports in the United States, and circuitous routes.

Tariff: Supplement 78 to Agent Hinsch's I. C. C. 4350 and seven other tariffs.

FSA No. 31425: *Scrap paper—Florida points to the Southwest.* Filed by F. C. Kratzmeir, Agent, for interested rail carriers. Rates on paper, scrap or waste, other than sensitized and excelsior paper, straight or mixed carloads from Jacksonville, South Jacksonville, and Tampa, Fla., to Dallas, Tex., Shreveport, La., and Pryor (including Oklahoma Ordnance Works), Okla.

Grounds for relief: Short-line distance formula and circuitous routes.

Tariff: Supplement 143 to Agent Kratzmeir's I. C. C. 4090 and two other tariffs.

FSA No. 31426: *Lumber—West Virginia to North Carolina.* Filed by R. E. Boyle, Jr., Agent, for interested rail carriers. Rates on lumber, carloads from specified points in West Virginia to Greensboro, Mt. Airy, and Sanford, N. C.

Grounds for relief: Circuitous routes.

Tariff: Supplement 98 to Agent Spaninger's I. C. C. 1297.

FSA No. 31427: *Fertilizer compounds—Arkansas and Louisiana to the South.* Filed by F. C. Kratzmeir, Agent, for interested rail carriers. Rates on fertilizer compounds and related articles, carloads from Kay, Ark., and Bernice, La., to specified points in Alabama, Florida, Georgia, Kentucky, Louisiana (east of the Mississippi River), North Carolina, South Carolina, Tennessee, and West Virginia, also to Cincinnati, Ohio and Helena, Ark.

Grounds for relief: Short-line distance formula and circuity.

Tariff: Supplement 104 to Agent Kratzmeir's I. C. C. 4112.

FSA No. 31428: *Billets—Chicago, Ill., and Steelton, Ky., to Louisiana and Texas.* Filed by F. C. Kratzmeir, Agent, for interested rail carriers. Rates on iron and steel billets, other than copper clad, carloads from Chicago, Ill., and district points, and Steelton, Ky., to Doyline and Shreveport, La., and Longview, Tex.

Grounds for relief: Barge-rail competition and circuity.

Tariff: Supplement 24 to Agent Kratzmeir's I. C. C. 4170.

FSA No. 31429: *Salt—Louisiana to Alabama and Mississippi.* Filed by F. C. Kratzmeir, Agent, for interested rail carriers. Rates on mine run salt, in bulk, carloads, from Anse La Butte, Avery Island, Carla, Jefferson Island, Weeks, and Winfield, La., to Listerhill, Evans City, Emco, Sheffield, and Tuscumbia, Ala., and other specified points in Alabama and Mississippi.

Grounds for relief: Barge competition and circuity.

Tariff: Supplement 59 to Agent Kratzmeir's I. C. C. 3903.

FSA No. 31430: *Grain—Fitzgerald, Ga., to Wilmington, N. C.* Filed by R. E. Boyle, Jr., Agent, for interested rail carriers. Rates on grain, namely, barley, corn, oats, rye, soybeans, and wheat, in bulk, straight carloads from Fitzgerald, Ga., to Wilmington, N. C., for export, and for trans-shipment via water to coastal points north of Hampton Roads, Va.

Grounds for relief: Circuitous route.

Tariff: Supplement 113 to Agent C. A. Spaninger's I. C. C. 1325.

FSA No. 31431: *Substituted motor service—M-K-T System Lines.* Filed by Middlewest Motor Freight Bureau, Agent, for interested rail and motor carriers. Rates on various commodities in highway trailers on railroad flat cars, also empty trailers on such cars between St. Louis, Mo., on one hand, and Oklahoma City, Okla., on the other; also between Kansas City, Kans., on one hand, and Oklahoma City and Tulsa, Okla., on the other; also between St. Louis, Mo., or Kansas City, Kans., on one hand, and Dallas and Ft. Worth, Tex., on the other.

Grounds for relief: Motor truck competition.

Tariff: Supplement 32 to Middlewest Motor Freight Bureau MF-I. C. C. 223.

FSA No. 31432: *Motor-rail rates—Missouri-Kansas-Texas R. R. et al.* Filed by Middlewest Motor Freight Bureau, Agent, for interested rail and motor carriers. Rates on various commodities in trailers, transported on railroad flat cars between points in Kansas, Missouri, Oklahoma, and Texas.

Grounds for relief: Motor carrier competition.

Tariff: Supplement 32 to Middlewest Motor Freight Bureau tariff MF-I. C. C. No. 223.

FSA No. 31433: *Motor-rail rates—Chicago Great Western Ry. Co. et al.* Filed by Middlewest Motor Freight Bureau, Agent, for interested rail and motor carriers. Rates on various commodities in trailers, transported on railroad flat cars between Chicago, Ill., on the one hand, and Council Bluffs, or Des Moines, Iowa, on the other.

Grounds for relief: Motor carrier competition.

Tariff: Supplement No. 32 to Middlewest Motor Freight Bureau tariff MF-I. C. C. No. 223.

FSA No. 31434: *Motor-rail rates—Missouri-Kansas-Texas R. R. et al.* Filed by Middlewest Motor Freight Bureau, for interested rail and motor carriers. Rates on various commodities in trailers, transported on railroad flat cars between St. Louis, Mo., on the one hand, and Muskogee, Okla., on the other.

Grounds for relief: Motor carrier competition.

Tariff: Supplement 32 to Middlewest Motor Freight Bureau tariff MF-I. C. C. 223.

FSA No. 31435: *Automobile bodies from Michigan to the East.* Filed by H. R. Hinsch, Agent, for interested rail carriers. Rates on automobile bodies, freight or passenger, carloads from Ionia and Pontiac, Mich, to Metuchen, N. J., Framingham, Mass., and Wilmington, Del.

Grounds for relief: Carrier competition and circuity.

By the Commission.

[SEAL] HAROLD D. MCCOY,
Secretary.

FEDERAL REGISTER

VOLUME 20 NUMBER 246

Washington, Tuesday, December 20, 1955

UNIVERSITY OF MICHIGAN
DEC 27 1955
MAIN READING ROOM

TITLE 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

REPUBLICATION OF REGULATIONS

Chapter I of Title 21 is republished, reading as set forth below. In this republication minor editorial changes have been made and Parts 135, 145, 155, 170, 175, 185, and 196 have been redesignated as Parts 9, 165, 85, 281, 285, 290, and 4, respectively.

Dated: December 15, 1955.

[SEAL] GEO. P. LARRICK,
Commissioner of Food and Drugs.

This issue is divided into two parts, Part II of which contains a republication of Title 21, Chapter I, of the Code of Federal Regulations.

Subchapter A—General

Part
1 Regulations for the enforcement of the Federal Food, Drug, and Cosmetic Act.
3 Statements of general policy or interpretation.
4 Official records and information.
9 Color certification.

Subchapter B—Food and Food Products

10 General regulations relating to definitions and standards for food.
14 Cacao products; definitions and standards of identity.
15 Cereal flours and related products; definitions and standards of identity.
16 Alimentary pastes; definitions and standards of identity.
17 Bakery products; definitions and standards of identity.
18 Milk and cream; definitions and standards of identity.
19 Cheeses; processed cheeses; cheese foods; cheese spreads; and related foods; definitions and standards of identity.
25 Dressings for foods.
27 Canned fruits; definitions and standards of identity; quality; and fill of container.
29 Fruit butters, fruit jellies, fruit preserves, and related products; definitions and standards of identity.
36 Shellfish; definitions and standards of identity; fill of container.
42 Eggs and egg products; definitions and standards of identity.
45 Oleomargarine, margarine; definitions and standard of identity.
51 Canned vegetables; definitions and standards of identity; quality; and fill of container.
53 Tomato products; definitions and standards of identity; quality; and and fill of container.
85 Seafood inspection.
120 Tolerances and exemptions from tolerances for pesticide chemicals in or on raw agricultural commodities.
125 Label statements concerning dietary properties of food purporting to be or represented for special dietary uses.

Subchapter C—Drugs

130 Drugs exempted from prescription-dispensing requirements of section 503 (b) (1) (C) of the Federal Food, Drug, and Cosmetic Act.
141a Penicillin and penicillin-containing drugs; tests and methods of assay.
141b Streptomycin (or dihydrostreptomycin) and streptomycin- (or dihydrostreptomycin-) containing drugs; tests and methods of assay.
141c Chlortetracycline (or tetracycline) and chlortetracycline- (or tetracycline-) containing drugs; tests and methods of assay.
141d Chloramphenicol and chloramphenicol-containing drugs; tests and methods of assay.
141e Bacitracin and bacitracin-containing drugs; tests and methods of assay.
146 General regulations for the certification of antibiotic and antibiotic-containing drugs.
146a Certification of penicillin and penicillin-containing drugs.
146b Certification of streptomycin (or dihydrostreptomycin) and streptomycin- (or dihydrostreptomycin-) containing drugs.
146c Certification of chlortetracycline (or tetracycline) and chlortetracycline- (or tetracycline-) containing drugs.
146d Certification of chloramphenicol and chloramphenicol-containing drugs.
146e Certification of bacitracin and bacitracin-containing drugs.
164 Certification of batches of drugs composed wholly or partly of insulin.
165 Certain chemical derivatives of substances named in section 502 (d) of the Federal Food, Drug, and Cosmetic Act designated as habit forming.

Subchapter D—[Reserved]

Subchapter E—Regulations Under Specific Acts of Congress Other Than the Food, Drug and Cosmetic Act

Part
281 Enforcement of the Tea Importation Act.
285 Regulations under the Federal Caustic Poison Act.
290 Regulations for the enforcement of the Federal Import Milk Act.

Subchapter A—General

PART 1—REGULATIONS FOR THE ENFORCEMENT OF THE FEDERAL FOOD, DRUG, AND COSMETIC ACT

GENERAL

Sec.
1.1 General regulation.

DEFINITIONS

1.2 Labeling; definition.
1.3 Difference of opinion among experts.

PROHIBITED ACTS AND PENALTIES

1.4 Guaranty.
1.5 Guaranty; definition, and suggested forms.
1.6 Presentation of views under section 305 of the act.

FOOD

1.7 Food; labeling; misbranding.
1.8 Food; labeling; required statements; when exempt.
1.9 Food; labeling; prominence of required statements.
1.10 Food; labeling; designation of ingredients.
1.11 Special dietary uses.
1.12 Food; labeling; artificial flavoring or coloring, chemical preservatives.
1.13 Food; exemptions from labeling requirements.
1.14 Conformity to definitions and standards of identity.

DRUGS AND DEVICES

1.100 Drugs; name.
1.101 Drugs and devices; labeling, misbranding.
1.102 Drugs and devices, labeling requirements.
1.103 Drugs and devices; forms of making required statements.
1.104 Habit-forming drugs; label requirements.
1.105 Drugs; statement of ingredients and proportion.
1.106 Drugs and devices; directions for use.
1.107 Drugs and devices; exemptions.
1.108 Exemption from prescription requirements.
1.109 New drugs; definition.
1.109a New drugs; exemption from section 505 of the act.
1.110 New drugs; applications.
1.111 Notification of applicant.
1.112 Insufficient information in application.
1.113 Untrue statements in application.
1.114 New drugs; exemptions from section 505 (a).
1.115 Definition of term "insulin."

COSMETICS

1.200 Cosmetic; coal-tar hair dye defined.
1.201 Cosmetic; labeling; misbranding.
1.202 Cosmetic; labeling; required statements; exemptions.
1.203 Cosmetic; labeling requirements, form of stating.
1.204 Cosmetic; labeling requirements; exemptions.

IMPORTS AND EXPORTS

1.315 Definitions.
1.316 Notice of sampling.
1.317 Payment for samples.
1.318 Hearing.
1.319 Application for authorization.
1.320 Granting of authorization.
1.321 Bonds.
1.322 Costs chargeable in connection with relabeling and reconditioning inadmissible imports.

ADMINISTRATIVE

1.700 Examinations and investigations; samples.

PUBLIC NOTICE OF REGULATIONS

1.715 Public notice of regulations.

GENERAL

§ 1.1 *General regulation.* (a) The provisions of regulations promulgated under the act with respect to the doing of any act shall be applicable also to the causing of such act to be done.

(b) The definitions and interpretations of terms contained in section 201 of the act shall be applicable also to such terms when used in regulations promulgated under the act.

(Sec. 701 (a), 52 Stat.1055; 21 U.S.C. 371 (a))

DEFINITIONS

AUTHORITY: §§ 1.2 and 1.3 issued under sec. 701 (a), 52 Stat. 1055; 21 U. S. C. 371 (a). Statutory provisions interpreted or applied are cited to text in parentheses.

§ 1.2 *Labeling; definition.* Labeling includes all written, printed, or graphic matter accompanying an article at any time while such article is in interstate commerce or held for sale after shipment or delivery in interstate commerce.

(Sec. 201 (m), 52 Stat. 1041; 21 U. S. C. 321 (m))

§ 1.3 *Difference of opinion among experts.* The existence of a difference of opinion, among experts qualified by scientific training and experience, as to the truth of a representation made or suggested in the labeling is a fact (among other facts) the failure to reveal which may render the labeling misleading, if there is a material weight of opinion contrary to such representation.

(Sec. 201 (n), 52 Stat. 1041; 21 U. S. C. 321 (n))

PROHIBITED ACTS AND PENALTIES

AUTHORITY: §§ 1.4 to 1.6 issued under sec. 701 (a), 52 Stat. 1055; 21 U. S. C. 371 (a). Statutory provisions interpreted or applied are cited to text in parentheses.

§ 1.4 *Guaranty.* In case of the giving of a guaranty or undertaking referred to in section 303 (c) (2) or (3) of the act, each person signing such guaranty or undertaking shall be considered to have given it.

(Sec. 301 (h), 52 Stat. 1042; 21 U. S. C. 331 (h))

§ 1.5 *Guaranty; definition, and suggested forms.* (a) A guaranty or undertaking referred to in section 303 (c) (2) of the act may be:

(1) Limited to a specific shipment or other delivery of an article, in which case it may be a part of or attached to the invoice or bill of sale covering such shipment or delivery, or

(2) General and continuing, in which case, in its application to any shipment or other delivery of an article, it shall be considered to have been given at the date such article was shipped or delivered by the person who gives the guaranty or undertaking.

(b) The following are suggested forms of guaranty or undertaking under section 303 (c) (2) of the act:

(1) Limited form for use on invoice or bill of sale.

(Name of person giving the guaranty or undertaking) hereby guarantees that no article listed herein is adulterated or misbranded within the meaning of the Federal Food, Drug, and Cosmetic Act, or is an article which may not, under the provisions of section 404 or 505 of the act, be introduced into interstate commerce.

(Signature and post-office address of person giving the guaranty or undertaking)

(2) General and continuing form.

The article comprising each shipment or other delivery hereafter made by (name of person giving the guaranty or undertaking) to, or on the order of (name and post-office address of person to whom the guaranty or undertaking is given) is hereby guaranteed, as of the date of such shipment or delivery, to be, on such date, not adulterated or misbranded within the meaning of the Federal Food, Drug, and Cosmetic Act, and not an article which may not, under the provisions of section 404 or 505 of the act, be introduced into interstate commerce.

(Signature and post-office address of person giving the guaranty of undertaking)

(c) The application of a guaranty or undertaking referred to in section 303 (c) (2) of the act to any shipment or other delivery of an article shall expire when such article, after shipment or delivery by the person who gave such guaranty or undertaking, becomes adulterated or misbranded within the meaning of the act, or becomes an article which may not, under the provisions of section 404 or 505 of the act, be introduced into interstate commerce.

(d) A guaranty or undertaking referred to in section 303 (c) (3) of the act shall state that the shipment or other delivery of coal-tar color covered thereby was manufactured by a signer thereof. It may be a part of or attached to the invoice or bill of sale covering such color. If such shipment or delivery is from a foreign manufacturer, such guaranty or undertaking shall be signed by such manufacturer and by an agent of such manufacturer who resides in the United States.

(e) The following are suggested forms of guaranty or undertaking under section 303 (c) (3) of the act:

(1) For domestic manufacturers.

(Name of manufacturer) hereby guarantees that all coal-tar colors listed herein were manufactured by him, and are from batches certified in accordance with the applicable regulations promulgated under the Federal Food, Drug, and Cosmetic Act.

(Signature and post-office address of manufacturer)

(2) For foreign manufacturers.

(Name of manufacturer and agent) hereby severally guarantee that all coal-tar colors listed herein were manufactured by (name of manufacturer), and are from batches certified in accordance with the applicable regulations promulgated under the Federal Food, Drug, and Cosmetic Act.

(Signature and post-office address of manufacturer)

(Signature and post-office address of agent)

(f) For the purpose of a guaranty or undertaking under section 303 (c) (3) of the act the manufacturer of a shipment or other delivery of a coal-tar color is the person who packaged such color.

(g) A guaranty or undertaking, if signed by two or more persons, shall state that such persons severally guarantee the article to which it applies.

(h) No representation or suggestion that an article is guaranteed under the act shall be made in labeling.

(Sec. 303 (c), 52 Stat. 1043; 21 U. S. C. 333 (c))

§ 1.6 *Presentation of views under section 305 of the act.* (a) Presentation of views under section 305 of the act shall be private and informal. The views presented shall be confined to matters relevant to the contemplated proceeding. Such views may be presented by letter or in person by the person to whom the notice was given, or by his representative. In case such person holds a guaranty or undertaking referred to in section 303 (c) (2) or (3) of the act applicable to the article on which such notice was based, such guaranty or undertaking, or a verified copy thereof, shall be made a part of such presentation of views.

(b) Upon request, seasonably made, by the person to whom a notice appointing a time and place for the presentation of views under section 305 of the act has been given, or by his representative, such time or place, or both such time and place, may be changed if the request states reasonable grounds therefor. Such request shall be addressed to the office of the Food and Drug Administration which issued the notice.

(Sec. 305, 52 Stat. 1045; 21 U. S. C. 335)

FOOD

AUTHORITY: §§ 1.7 to 1.14 issued under sec. 701 (a), 52 Stat. 1055; 21 U. S. C. 371 (a). Statutory provisions interpreted or applied are cited to text in parentheses.

§ 1.7 *Food; labeling; misbranding.* (a) Among representations in the labeling of a food which render such food misbranded is a false or misleading representation with respect to another food or a drug, device, or cosmetic.

(b) The labeling of a food which contains two or more ingredients may be misleading by reason (among other reasons) of the designation of such food in such labeling by a name which includes or suggests the name of one or more but not all such ingredients, even though the names of all such ingredients are stated elsewhere in the labeling.

(Sec. 403 (a), 52 Stat. 1047; 21 U. S. C. 343 (a))

§ 1.8 *Food; labeling; required statements; when exempt.* (a) Where a food is not manufactured by the person whose name appears on the label, the name shall be qualified by a phrase which reveals the connection such person has with such food, such as "Manufactured for and Packed by ——," "Distributed by ——," or other similar phrase which expresses the facts.

(b) The statement of the place of business shall include the street address, if any, of such place, unless such street address is shown in a current city directory or telephone directory.

(c) If a person manufactures, packs, or distributes a food at a place other than his principal place of business, the label may state the principal place of business in lieu of the actual place where each package of such food was manufactured or packed or is to be distributed, if such statement is not misleading in any particular.

(d) The requirement that the label shall contain the name and place of business of the manufacturer, packer, or distributor shall not be considered to relieve any food from the requirement that its label shall not be misleading in any particular.

(e) (1) The statement of the quantity of the contents shall reveal the quantity of food in the package, exclusive of wrappers and other material packed with such food.

(2) The statement shall be expressed in the terms of weight, measure, numerical count, or a combination of numerical count and weight or measure, which are generally used by consumers to express quantity of such food and which give accurate information as to the quantity thereof. But if no general consumer usage in expressing accurate information as to the quantity of such food exists, the statement shall be in terms of liquid measure if the food is liquid, or in terms of weight if the food is solid, semisolid, viscous, or a mixture of solid and liquid; except that such statement may be in terms of dry measure if the food is a fresh fruit, fresh vegetable, or other dry commodity.

(f) (1) A statement of weight shall be in terms of the avoirdupois pound and ounce. A statement of liquid measure shall be in terms of the United States gallon of 231 cubic inches and quart, pint, and fluid ounce subdivisions thereof, and, except in case of frozen food which is so consumed, shall express the volume at 68° Fahrenheit (20° Centigrade). A statement of dry measure shall be in terms of the United States bushel of 2150.42 cubic inches and peck, dry quart, and dry pint subdivisions thereof; or in terms of the United States standard barrel and its subdivisions of third, half, and three-quarters barrel. However, in the case of an export shipment, the statement may be in terms of a system of weight or measure in common use in the country to which such shipment is exported.

(2) A statement of weight or measure in the terms specified in subparagraph (1) of this paragraph may be supplemented by a statement in terms of the metric system of weight or measure.

(3) Unless an unqualified statement of numerical count gives accurate information as to the quantity of food in the package, it shall be supplemented by such statement of weight, measure, or size of the individual units of the foods as will give such information.

(g) Statements shall contain only such fractions as are generally used in expressing the quantity of the food. A common fraction shall be reduced to its lowest terms; a decimal fraction shall not be carried out to more than two places.

(h) (1) If the quantity of food in the package equals or exceeds the smallest unit of weight or measure which is specified in paragraph (f) of this section, and which is applicable to such food under the provisions of paragraph (e) (2) of this section, the statement shall express the number of the largest of such units contained in the package (for example, the statement on the label of a package which contains one quart of food shall be "1 quart", and not "2 pints" or "32 fluid ounces"), unless the statement is made in accordance with the provisions of subparagraph (2) of this paragraph. Where such number is a whole number and a fraction, there may be substituted for the fraction its equivalent in smaller units, if any smaller is specified in such paragraph (f) (for examples, 1¾ quarts may be expressed as "1 quart 1½ pints" or "1 quart 1 pint 8 fluid ounces"; 1¼ pounds may be expressed as "1 pound 4 ounces"). The stated number of any unit which is smaller than the largest unit (specified in such paragraph (f)) contained in the package shall not equal or exceed the number of such smaller units in the next larger unit so specified (for examples, instead of "1 quart 16 fluid ounces" the statement shall be "1½ quarts" or "1 quart 1 pint"; instead of "24 ounces" the statement shall be "1½ pounds" or "1 pound 8 ounces").

(2) In the case of a food with respect to which there exists an established custom of stating the quantity of the contents as a fraction of a unit, which unit is larger than the quantity contained in the package, or as units smaller than the largest unit contained therein, the statement may be made in accordance with such custom if it is informative to consumers.

(i) The statement shall express the minimum quantity, or the average quantity, of the contents of the packages. If the statement is not so qualified as to show definitely that the quantity expressed is the minimum quantity, the statement shall be considered to express the average quantity.

(j) Where the statement expresses the minimum quantity, no variation below the stated minimum shall be permitted except variations below the stated weight or measure caused by ordinary and customary exposure, after the food is introduced into interstate commerce, to conditions which normally occur in good distribution practice and which unavoidably result in decreased weight or measure. Variations above the stated minimum shall not be unreasonably large.

(k) Where the statement does not express the minimum quantity:

(1) Variations from the stated weight or measure shall be permitted when caused by ordinary and customary exposure, after the food is introduced into interstate commerce, to conditions which normally occur in good distribution practice and which unavoidably result in change of weight or measure;

(2) Variations from the stated weight, measure, or numerical count shall be permitted when caused by unavoidable deviations in weighing, measuring, or counting individual packages which occur in good packing practice.

But under subparagraph (2) of this paragraph variations shall not be permitted to such extent that the average of the quantities in the packages comprising a shipment or other delivery of the food is below the quantity stated, and no unreasonable shortage in any package shall be permitted, even though overages in other packages in the same shipment or delivery compensate for such shortage.

(l) The extent of variations from the stated quantity of the contents permissible under paragraphs (j) and (k) of this section in the case of each shipment or other delivery shall be determined by the facts in such case.

(m) A food shall be exempt from compliance with the requirements of clause (2) of section 403 (e) of the act if:

(1) The quantity of the contents, as expressed in terms applicable to such food under the provisions of paragraph (e) (2) of this section, is less than one-half ounce avoirdupois, or less than one-half fluid ounce, or (in case the units of the food can be easily counted without opening the package) less than six units; or

(2) The statement of the quantity of the contents of the package, together with all other words, statements, and information required by or under authority of the act to appear on the label, cannot, because of insufficient label space, be so placed on the label as to comply with the requirements of section 403 (f) of the act and regulations promulgated thereunder.

(n) A food shall be exempt while held for sale from the requirements of clause (2) of section 403 (e) of the act (requiring a statement on the label of the quantity of contents) if said food, having been received in bulk containers at a retail establishment, is accurately weighed, measured, or counted either within the view of the purchaser or in compliance with the purchaser's order.

(Sec. 403 (e), 52 Stat. 1047; 21 U. S. C. 343 (e))

§ 1.9 *Food; labeling; prominence of required statements.* (a) A word, statement, or other information required by or under authority of the act to appear on the label may lack that prominence and conspicuousness required by section 403 (f) of the act by reason (among other reasons) of:

(1) The failure of such word, statement, or information to appear on the part or panel of the label which is presented or displayed under customary conditions of purchase;

(2) The failure of such word, statement, or information to appear on two or more parts or panels of the label, each of which has sufficient space therefor, and each of which is so designed as to render it likely to be, under customary conditions of purchase, the part or panel displayed;

(3) The failure of the label to extend over the area of the container or package available for such extension, so as to provide sufficient label space for the prominent placing of such word, statement, or information;

(4) Insufficiency of label space (for the prominent placing of such word, statement, or information) resulting from the use of label space for any word, statement, design, or device which is not required by or under authority of the act to appear on the label;

(5) Insufficiency of label space (for the prominent placing of such word, statement, or information) resulting from the use of label space to give materially greater conspicuousness to any other word, statement, or information, or to any design or device; or

(6) Smallness or style of type in which such word, statement, or information appears, insufficient background contrast, obscuring designs or vignettes, or crowding with other written, printed, or graphic matter.

(b) No exemption depending on insufficiency of label space, as prescribed in regulations promulgated under section 403 (e) or (i) of the act, shall apply if such insufficiency is caused by:

(1) The use of label space for any word statement, design, or device which is not required by or under authority of the act to appear on the label;

(2) The use of label space to give greater conspicuousness to any word, statement, or other information than is required by section 403 (f) of the act; or

(3) The use of label space for any representation in a foreign language.

(c) (1) All words, statements, and other information required by or under authority of the act to appear on the label or labeling shall appear thereon in the English language.

(2) If the label contains any representation in a foreign language, all words, statements, and other information required by or under authority of the act to appear on the label shall appear thereon in the foreign language.

(3) If the labeling contains any representation in a foreign language, all words, statements, and other information required by or under authority of the act to appear on the label or labeling shall appear on the labeling in the foreign language.

(Sec. 403 (f), 52 Stat. 1047; 21 U. S. C. 343 (f))

§ 1.10 *Food; labeling; designation of ingredients.* (a) The name of an ingredient (except a spice, flavoring, or coloring which is an ingredient of a food other than one sold as a spice, flavoring, or coloring), required by section 403 (i) (2) of the act to be borne on the label of a food, shall be a specific name and not a collective name. But if an ingredient (which itself contains two or more ingredients) conforms to a definition and standard of identity prescribed by regulations under section 401 of the act, such ingredient may be designated on the label of such food by the name specified in the definition and standard, supplemented, in case such regulations require the naming of optional ingredients present in such ingredient, by a statement showing the optional ingredients which are present in such ingredient.

(b) No ingredient shall be designated on the label as a spice, flavoring, or coloring unless it is a spice, flavoring, or coloring, as the case may be, within the meaning of such term as commonly understood by consumers. The term "coloring" shall not include any bleaching substance.

(c) An ingredient which is both a spice and a coloring, or both a flavoring and a coloring, shall be designated as spice and coloring, or flavoring and coloring, as the case may be, unless such ingredient is designated by its specific name.

(d) A label may be misleading by reason (among other reasons) of:

(1) The order in which the names of ingredients appear thereon, or the relative prominence otherwise given such names; or

(2) Its failure to reveal the proportion of, or other fact with respect to, an ingredient, when such proportion or other fact is material in the light of the representation that such ingredient was used in fabricating the food.

(e) (1) A food shall be exempt from the requirements of clause (2) of section 403 (i) of the act if all words, statements, and other information required by or under authority of the act to appear on the label of such food, cannot, because of insufficient label space, be so placed on the label as to comply with the requirements of section 403 (f) of the act and regulations promulgated thereunder. But such exemption shall be on the condition that, if the omission from the label of the statement of the quantity of the contents affords sufficient space to state legibly thereon all the information required by such clause (2), such statement of the quantity of the contents shall be omitted as authorized by § 1.8 (m) (2), and the information required by such clause (2) shall be so stated as prominently as practicable even though the statement is not of such conspicuousness as to render it likely to be read by the ordinary individual under customary conditions of purchase.

(2) In the case of an assortment of different items of food, when variations in the items which make up different packages packed from such assortment normally occur in good packing practice, and when such variations result in variations in the ingredients in different packages, such food shall be exempt from compliance with the requirements of clause (2) of section 403 (i) of the act with respect to any ingredient which is not common to all packages. But such exemption shall be on the condition that the label shall bear, in conjunction with the names of such ingredients as are common to all packages, a statement in terms which are as informative as practicable and which are not misleading, indicating that other ingredients may be present.

(f) A food shall be exempt while held for sale from the requirements of clause (2) of section 403 (i) of the act (requiring a declaration on the label of the common or usual name of each ingredient when the food is fabricated from two or more ingredients) if said food, having been received in bulk containers at a retail establishment, is displayed to the purchaser with either (1) the labeling of the bulk container plainly in view or (2) a counter card, sign, or other appropriate device bearing prominently and conspicuously the information required to be stated on the label pursuant to clause (2) of section 403 (i).

(Sec. 403 (i), 52 Stat. 1048; 21 U. S. C. 343 (i))

§ 1.11 *Special dietary uses.* (a) The term "special dietary uses", as applied to food for man, means particular (as distinguished from general) uses of food, as follows:

(1) Uses for supplying particular dietary needs which exist by reason of a physical, physiological, pathological or other condition, including but not limited to the conditions of disease, convalescence, pregnancy, lactation, allergic hypersensitivity to food, underweight, and overweight;

(2) Uses for supplying particular dietary needs which exist by reason of age, including but not limited to the ages of infancy and childhood;

(3) Uses for supplementing or fortifying the ordinary or usual diet with any vitamin, mineral, or other dietary property. Any such particular use of a food is a special dietary use, regardless of whether such food also purports to be or is represented for general use.

(b) No provision of any regulation under section 403 (j) of the act shall be construed as exempting any food from any other provision of the act or regulations thereunder, including sections 403 (a) and (g) and, when applicable, the provisions of Chapter V of the act.

§ 1.12 *Food; labeling; artificial flavoring or coloring, chemical preservatives.* (a) (1) The term "artificial flavoring" means a flavoring containing any sapid or aromatic constituent, which constituent was manufactured by a process of synthesis or other similar artifice.

(2) The term "artificial coloring" means a coloring containing any dye or pigment, which dye or pigment was manufactured by a process of synthesis or other similar artifice, or a coloring which was manufactured by extracting a natural dye or natural pigment from a plant or other material in which such dye or pigment was naturally produced.

(3) The term "chemical preservative" means any chemical which, when added to food, tends to prevent or retard deterioration thereof; but does not include common salt, sugars, vinegars, spices or oils extracted from spices, or substances added to food by direct exposure thereof to wood smoke.

(b) A food which is subject to the requirements of section 403 (k) of the act shall bear labeling, even though such food is not in package form.

(c) A statement of artificial flavoring, artificial coloring, or chemical preservative shall be placed on the food, or on its container or wrapper, or on any two or all of these, as may be necessary to render such statement likely to be read by the ordinary individual under customary conditions of purchase and use of such food.

(d) A food shall be exempt from compliance with the requirements of section 403 (k) of the act if it is not in package form and the units thereof are so small that a statement of artificial flavoring, artificial coloring, or chemical preservative, as the case may be, cannot be placed on such units with such conspicuousness as to render it likely to be read by the ordinary individual under customary conditions of purchase and use.

(e) A food shall be exempt while held for sale from the requirements of section 403 (k) of the act (requiring label statement of any artificial flavoring, artificial coloring, or chemical preservatives) if said food, having been received in bulk containers at a retail establishment, is displayed to the purchaser with either (1) the labeling of the bulk container plainly in view or (2) a counter card, sign, or other appropriate device bearing prominently and conspicuously the information required to be stated on the label pursuant to section 403 (k).

(Sec. 403 (k), 52 Stat. 1048; 21 U. S. C. 343 (k))

§ 1.13 *Food; exemptions from labeling requirements.* (a) (1) An open container is a container of rigid or semi-rigid construction, which is not closed by lid, wrapper, or otherwise.

(2) An open container of a fresh fruit or fresh vegetable, the quantity of contents of which is not more than one dry quart, shall be exempt from the labeling requirements of paragraphs (e), (g) (2) (with respect to the name of the food specified in the definition and standard), and (i) (1) of section 403 of the act; but such exemption shall be on the condition that if two or more such containers are enclosed in a crate or other shipping package, such crate or package shall bear labeling showing the number of such containers enclosed therein and the quantity of the contents of each.

(b) Except as provided by paragraphs (c) and (d) of this section, a shipment or other delivery of a food which is, in accordance with the practice of the trade, to be processed, labeled, or repacked in substantial quantity at an establishment other than that where originally processed or packed, shall be exempt, during the time of introduction into and movement in interstate commerce and the time of holding in such establishment, from compliance with the labeling requirements of section 403 (c), (e), (g), (h), (i), (j) and (k) of the act if:

(1) The person who introduced such shipment or delivery into interstate commerce is the operator of the establishment where such food is to be processed, labeled, or repacked; or

(2) In case such person is not such operator, such shipment or delivery is made to such establishment under a written agreement, signed by and containing the post-office addresses of such person and such operator, and containing such specifications for the processing, labeling, or repacking, as the case may be, of such food in such establishment as will insure, if such specifications are followed, that such food will not be adulterated or misbranded within the meaning of the act upon completion of such processing labeling, or repacking. Such person and such operator, shall each keep a copy of such agreement until all of such shipment or delivery has been removed from such establishment, and shall make such copies available for inspection at any reasonable hour to any officer or employee of the Department who requests them.

(c) An exemption of a shipment or other delivery of a food under paragraph (b) (1) of this section shall, at the beginning of the act of removing such shipment or delivery, or any part thereof, from such establishment become void ab initio if the food comprising such shipment, delivery, or part is adulterated or misbranded within the meaning of the act when so removed.

(d) An exemption of a shipment or other delivery of a food under paragraph (b) (2) of this section shall become void ab initio with respect to the person who introduced such shipment or delivery into interstate commerce upon refusal by such person to make available for inspection a copy of the agreement, as required by such paragraph.

(e) An exemption of a shipment or other delivery of a food under paragraph (b) (2) of this section shall expire:

(1) At the beginning of the act of removing such shipment or delivery, or any part thereof, from such establishment if the food comprising such shipment, delivery, or part is adulterated or misbranded within the meaning of the act when so removed; or

(2) Upon refusal by the operator of the establishment where such food is to be processed, labeled, or repacked, to make available for inspection a copy of the agreement, as required by such paragraph.

(f) The word "processed" shall include the holding of cheese in a suitable warehouse at a temperature of not less than 35° F. for the purpose of aging or curing to bring the cheese into compliance with requirements of an applicable definition and standard of identity. The exemptions provided for in paragraph (b) of this section shall apply to cheese which is, in accordance with the practice of the trade, shipped to a warehouse for aging or curing, on condition that the cheese is identified in the manner set forth in one of the applicable following subparagraphs, and in such case paragraphs (c), (d), and (e) of this section shall also apply:

(1) In the case of varieties of cheeses for which definitions and standards of identity require a period of aging, whether or not they are made from pasteurized milk, each such cheese shall bear on the cheese a legible mark showing the date at which the preliminary

manufacturing process has been completed and at which date curing commences, and to each cheese, on its wrapper or immediate container, shall be affixed a removable tag bearing the statement "Uncured _____ cheese for completion of curing and proper labeling," the blank being filled in with the applicable name of the variety of cheese. In the case of swiss cheese, the date at which the preliminary manufacturing process had been completed and at which date curing commences is the date on which the shaped curd is removed from immersion in saturated salt solution as provided in the definition and standard of identity for swiss cheese, and such cheese shall bear a removable tag reading, "To be cured and labeled as 'swiss cheese', but if eyes do not form to be labeled as 'swiss cheese for manufacturing.'"

(2) In the case of varieties of cheeses which when made from unpasteurized milk are required to be aged for not less than 60 days, each such cheese shall bear a legible mark on the cheese showing the date at which the preliminary manufacturing process has been completed and at which date curing commences, and to each such cheese or its wrapper or immediate container shall be affixed a removable tag reading, "_____ cheese made from unpasteurized milk. For completion of curing and proper labeling," the blank being filled in with the applicable name of the variety of cheese.

(3) In the case of cheddar cheese, washed curd cheese, colby cheese, granular cheese, and brick cheese made from unpasteurized milk, each such cheese shall bear a legible mark on the cheese showing the date at which the preliminary manufacturing process has been completed and at which date curing commences, and to each such cheese or its wrapper or immediate container shall be affixed a removable tag reading "_____ cheese made from unpasteurized milk. For completion of curing and proper labeling, or for labeling as _____ cheese for manufacturing," the blank being filled in with the applicable name of the variety of cheese.

(Sec. 405, 52 Stat. 1049; 21 U. S. C. 345)

§ 1.14 *Conformity to definitions and standards of identity.* In the following conditions, among others, a food does not conform to the definition and standard of identity therefor:

(a) If it contains an ingredient for which no provision is made in such definition and standard;

(b) If it fails to contain any one or more ingredients required by such definition and standard;

(c) If the quantity of any ingredient or component fails to conform to the limitation, if any, prescribed therefor by such definition and standard.

DRUGS AND DEVICES

AUTHORITY: §§ 1.100 to 1.115 issued under sec. 701 (a), 52 Stat. 1055; 21 U. S. C. 371 (a). Statutory provisions interpreted or applied are cited to text in parentheses.

§ 1.100 *Drugs; name.* (a) The name by which a drug is designated shall be clearly distinguishing and differentiating from any name recognized in an official compendium unless such drug complies in identity with the identity prescribed in an official compendium under such recognized name.

(b) The term "drug defined in an official compendium" means a drug having the identity prescribed for a drug in an official compendium.

(c) A statement that a drug defined in an official compendium differs in strength, quality, or purity from the standard of strength, quality, or purity set forth for such drug in an official compendium shall show all the respects in which such drug so differs, and the extent of each such difference.

(Sec. 501 (b), 52 Stat. 1049; 21 U. S. C. 351 (b))

§ 1.101 *Drugs and devices; labeling, misbranding.* (a) Among representations in the labeling of a drug or device which render such drug or device misbranded is a false or misleading representation with respect to another drug or device or a food or cosmetic.

(b) The labeling of a drug which contains two or more ingredients may be misleading by reason (among other reasons) of the designation of such drug in such labeling by a name which includes or suggests the name of one or more but not all such ingredients, even though the names of all such ingredients are stated elsewhere in the labeling.

(Sec. 502 (a), 52 Stat. 1050; 21 U. S. C. 352 (a))

§ 1.102 *Drugs and devices; labeling requirements.* (a) If a drug or device is not manufactured by the person whose name appears on the label, the name shall be qualified by a phrase which reveals the connection such person has with such drug or device, such as "Manufactured for and Packed by _____," "Distributed by _____," or other similar phrase which expresses the facts.

(b) The statement of the place of business shall include the street address, if any, of such place, unless such street address is shown in a current city directory or telephone directory.

(c) Where a person manufactures, packs, or distributes a drug or device at a place other than his principal place of business, the label may state the principal place of business in lieu of the actual place where each package of such drug or device was manufactured or packed or is to be distributed, if such statement is not misleading in any particular.

(d) The requirement that the label shall contain the name and place of business of the manufacturer, packer, or distributor shall not be considered to relieve any drug or device from the requirement that its label shall not be misleading in any particular.

(e) (1) The statement of the quantity of the contents of a package of a drug shall reveal the quantity of such drug in the package, exclusive of wrappers and other material packed with such drug.

(2) The statement shall be expressed in the terms of weight, measure, numerical count, or a combination of numerical count and weight or measure, which are generally used by consumers and users of such drug to express quantity thereof and which give accurate information as to such quantity. But if no general usage in expressing accurate information as to the quantity of such drug exists among consumers and users thereof, the statement of the quantity of a drug which is not in tablet, capsule, ampule, or other unit form shall be in terms of weight if the drug is solid, semi-solid, or viscous, or in terms of measure if the drug is liquid; the statement of the quantity of a drug which is in such unit form shall be in terms of the numerical count of such units, supplemented, when necessary to give accurate information as to the quantity of such drug in the package, by such statement (in such terms, manner, and form as are not misleading) of the weight or measure of such units, or of the quantity of each active ingredient in each such unit, as will give such information.

(3) The statement of the quantity of a device shall be expressed in terms of numerical count.

(f) A statement of weight shall be in terms of the avoirdupois pound, ounce, and grain, or of the kilogram, gram, and milligram. A statement of liquid measure shall be in terms of the United States gallon of 231 cubic inches and quart, pint, fluid ounce, and fluid dram subdivisions thereof, or of the liter, milliliter, or cubic centimeter, and shall express the volume at 68° Fahrenheit (20° Centigrade).

(g) Statements of the quantity of a drug shall contain only such fractions as are generally used in expressing the quantity of such drug. A common fraction shall be reduced to its lowest terms; a decimal fraction shall not be carried out to more than three places, except in the case of a statement of the quantity of an active ingredient in a unit of a drug.

(h) (1) Unless made in accordance with the provisions of subparagraph (2) of this paragraph, a statement of the quantity of a drug, in the terms of weight or measure applicable to such drug under the provisions of paragraph (e) (2) of this section, shall express the number of the largest unit specified in paragraph (f) of this section which is contained in the package (for example, the statement on the label of a package which contains one pint of a drug shall be "1 pint," and not "16 fluid ounces"). Where such number is a whole number and a fraction, there may be substituted for the fraction its equivalent in smaller units, if any smaller is specified in such paragraph (f) (for example, 1¼ pounds may be expressed as "1 pound 4 ounces"). The stated number of any unit which is smaller than the largest unit (specified in such paragraph (f)) contained in the package shall not equal or exceed the number of such smaller units in the next larger unit so specified (for example, instead of "1 quart 16 fluid ounces" the statement shall be "1½ quarts" or "1 quart 1 pint").

(2) In the case of a drug with respect to which there exists an established custom of stating the quantity of the contents as a fraction of a unit, which unit is larger than the quantity contained in the package, or as units smaller than the largest unit contained therein, the statement may be made in accordance with such custom if it is informative to consumers.

(i) The statement of the quantity of a drug or device shall express the minimum quantity, or the average quantity, of the contents of the packages. If the statement is not so qualified as to show definitely that the quantity expressed is the minimum quantity, the statement, except in the case of ampules, shall be considered to express the average quantity. The statement of the quantity of a drug in ampules shall be considered to express the minimum quantity.

(j) Where the statement expresses the minimum quantity, no variation below the stated minimum shall be permitted except variations below the stated weight or measure of a drug caused by ordinary and customary exposure, after such drug is introduced into interstate commerce, to conditions which normally occur in good distribution practice and which unavoidably result in decreased weight or measure. Variations above the stated minimum shall not be unreasonably large. In the case of a liquid drug in ampules the variation above the stated measure shall comply with the excess volume prescribed by The National Formulary for filling of ampules.

(k) Where the statement does not express the minimum quantity:

(1) Variations from the stated weight or measure of a drug shall be permitted when caused by ordinary and customary exposure, after such drug is introduced into interstate commerce, to conditions which normally occur in good distribution practice and which unavoidably result in change of weight or measure;

(2) Variations from the stated weight, measure, or numerical count of a drug or device shall be permitted when caused by unavoidable deviations in weighing, measuring, or counting the contents of individual packages which occur in good packing practice.

But under subparagraph (2) of this paragraph variations shall not be permitted to such extent that the average of the quantities in the packages comprising a shipment or other delivery of the drug or device is below the quantity stated and no unreasonable shortage in any package shall be permitted, even though overages in other packages in the same shipment or delivery compensate for such shortage.

(l) The extent of variations from the stated quantity of the contents permissible under paragraphs (j) and (k) of this section in the case of each shipment or other delivery shall be determined by the facts in such case.

(m) A drug or device shall be exempt from compliance with the requirements of clause (2) of section 502 (b) of the act if:

(1) The statement of the quantity of the contents, as expressed in terms applicable to such drug or device under the provisions of paragraph (e) (2) of this section, together with all other words, statements, and information required by or under authority of the act to appear on the label of such drug or device, cannot, because of insufficient label space, be so placed on the label as to comply with the requirements of section 502 (c) of the act and regulations promulgated thereunder, or

(2) The quantity of the contents of the package, as expressed in terms of numerical count in compliance with paragraph (e) (2) or (3) of this section, is less than six units, and such units can be easily counted without opening the package, or

(3) It is an ointment, is labeled "Sample" or "Physician's Sample," or with a substantially similar statement, and the contents of the package do not weigh more than 8 grams.

(Sec. 502 (b), 52 Stat. 1050; 21 U. S. C. 352 (b))

§ 1.103 *Drugs and devices; forms of making required statements.* (a) A word, statement, or other information required by or under authority of the act to appear on the label may lack that prominence and conspicuousness required by section 502 (c) of the act by reason (among other reasons) of:

(1) The failure of such word, statement, or information to appear on the part or panel of the label which is presented or displayed under customary conditions of purchase;

(2) The failure of such word, statement, or information to appear on two or more parts or panels of the label, each of which has sufficient space therefor, and each of which is so designed as to render it likely to be, under customary conditions of purchase, the part or panel displayed;

(3) The failure of the label to extend over the area of the container or package available for such extension, so as to provide sufficient label space for the prominent placing of such word, statement, or information;

(4) Insufficiency of label space (for the prominent placing of such word, statement, or information) resulting from the use of label space for any word, statement, design, or device which is not required by or under authority of the act to appear on the label;

(5) Insufficiency of label space (for the prominent placing of such word, statement, or information) resulting from the use of label space to give materially greater conspicuousness to any other word, statement, or information, or to any design or device; or

(6) Smallness or style of type in which such word, statement, or information appears, insufficient background contrast, obscuring designs or vignettes, or crowding with other written, printed, or graphic matter.

(b) No exemption depending on insufficiency of label space, as prescribed in regulations promulgated under section 502 (b) or (e) of the act, shall apply if such insufficiency is caused by:

(1) The use of label space for any word, statement, design, or device which is not required by or under authority of the act to appear on the label;

(2) The use of label space to give greater conspicuousness to any word, statement, or other information than is required by section 502 (c) of the act; or

(3) The use of label space for any representation in a foreign language.

(c) (1) All words, statements, and other information required by or under authority of the act to appear on the label or labeling shall appear thereon in the English language.

(2) If the label contains any representation in a foreign language, all words, statements, and other information required by or under authority of the act to appear on the label shall appear thereon in the foreign language.

(3) If the labeling contains any representation in a foreign language, all words, statements, and other information required by or under authority of the act to appear on the label or labeling shall appear on the labeling in the foreign language.

(Sec. 502 (c), 52 Stat. 1050; 21 U. S. C. 352 (c))

§ 1.104 *Habit-forming drugs; label requirements.* (a) (1) The name of a substance or derivative required to be borne on the label of a drug by section 502 (d) of the act shall be the common or usual name of such substance or derivative, unless it is designated solely by a name recognized in an official compendium and such designation complies with the provisions of section 502 (c).

(2) A statement on the label of a drug of the name of a constituent, which constituent is a chemical derivative of a substance named in section 502 (d) of the act, shall show the substance from which such constituent is derived and that such constituent is a derivative thereof.

(b) If the drug is in tablet, capsule, ampule, or other unit form, the statement of the quantity or proportion of such substance or derivative contained therein shall express the weight or measure of such substance or derivative in each such unit. If the drug is not in such unit form the statement shall express the weight or measure of such substance or derivative in a specified unit of weight or measure of the drug. Such statement shall be in terms which are informative to the ordinary consumer and user of the drug.

(c) The names and quantities or proportions of all such substances and derivatives, and the statement "Warning—May be habit forming," shall immediately follow (without intervening written, printed, or graphic matter) the name by which such drug is titled in the part or panel of the label thereof which is presented or displayed under customary conditions of purchase.

(d) A drug shall not be considered to be misbranded by reason of failure of its label to bear the statement "Warning—May be habit forming":

(1) If such drug is not suitable for internal use, and is distributed and sold exclusively for such external use as involves no possibility of habit formation; or

(2) If the only substance or derivative subject to section 502 (d) of the act contained in such drug is chlorobutanol, which is present solely as a preservative and in a quantity not more than 0.5 percent by weight, and such drug is for parenteral use only; or

(3) If the only substance or derivative subject to section 502 (d) of the act contained in such drug is chlorobutanol which is present as an analgesic or as an analgesic and a preservative in a quantity not more than 3.0 percent, and such drug contains one or more other active ingredients and is for parenteral use only.

§ 1.105 *Drugs; statement of ingredients and proportion.* (a) (1) The name of an ingredient, substance, derivative, or preparation required by section 502 (e) (2) of the act to be borne on the label of a drug shall be the name thereof which is listed in such section 502 (e) (2) of the act, or, if not so listed, shall be a specific name and not a collective name. But if an ingredient is an article the name of which is recognized in an official compendium and such article complies with the specifications set forth therefor in such compendium, such ingredient may be designated on the label of such drug by the common or usual name under which such specifications are so set forth.

(2) Where an ingredient contains a substance the quantity or proportion of which is required by section 502 (e) (2) of the act to appear on the label, and such ingredient is not a derivative or preparation of such substance as defined in paragraph (b) (1) of this section, the label shall bear, in conjunction with the name of the ingredient, a statement of the quantity or proportion of such substance in such drug.

(3) An abbreviation or chemical formula shall not be considered to be a common or usual name. The name "acetophenetidin" shall be considered to be the same as the name "acetphenetidin," "aminopyrine" the same as "amidopyrine." The name "alcohol" without qualification, means ethyl alcohol.

(b) (1) A derivative or preparation of a substance named in section 502 (e) (2) of the act is an article which is derived or prepared from such substance by any method, including actual or theoretical chemical action.

(2) A statement on the label of a drug of the name of an ingredient thereof, which ingredient is a derivative or preparation of a substance named in section 502 (e) (2) of the act, shall show the substance from which such ingredient is derived or prepared and that such ingredient is a derivative or preparation thereof.

(c) (1) If the drug is in tablet, capsule, ampul, or other unit form, the statement of the quantity or proportion of a substance, derivative, or preparation contained therein shall express the weight or measure of such substance, derivative, or preparation in each such unit. If the drug is not in such unit form the statement shall express the weight or measure of such substance, derivative, or preparation in a specified unit of weight or measure of the drug, or the percentage of such substance, derivative, or preparation in such drug. Such statement shall be in terms which are informative to the ordinary consumer and user of the drug.

(2) A statement of the percentage of alcohol shall express the percentage of absolute alcohol at 60° Fahrenheit (15.56° Centigrade). A statement of the percentage of a substance, derivative, or preparation other than alcohol shall express the percentage by weight; except that, if both the substance, derivative, or preparation and the drug containing it are liquid, the statement may express the percentage by volume at 68° Fahrenheit (20° Centigrade), but in such case the statement shall be so qualified as to show definitely that the percentage is expressed by volume.

(d) In case a statement of the quantity or proportion of a derivative or preparation in a drug is not as informative, to consumers or users of such drug, of the activity or consequences of use thereof as a statement of the quantity or proportion of the substance from which such derivative or preparation is derived or prepared, the quantity or proportion of such substance shall also be stated on the label of such drug.

(e) A label of a drug may be misleading by reason (among other reasons) of:

(1) The order in which the names of ingredients, substances, derivatives, or preparations appear thereon, or the relative prominence otherwise given such names; or

(2) Its failure to reveal the proportion of, or other fact with respect to, an ingredient, substance, derivative, or preparation, when such proportion or other fact is material in the light of the representation that such ingredient, substance, derivative, or preparation is a constituent of such drug.

(f) (1) A drug shall be exempt from the requirements of clause (2) of section 502 (e) of the act if all words, statements, and other information required by or under authority of the act to appear on the label of such drug, cannot, because of insufficient label space, be so placed on the label as to comply with the requirements of section 502 (c) of the act and regulations promulgated thereunder. But such exemption shall be on the condition that, if the omission from the label of the statement of the quantity of the contents affords sufficient space to state legibly thereon all the information required by such clause (2), such statement of the quantity of the contents shall be omitted as authorized by § 1.102 (m) (1), and the information required by such clause (2) shall be so stated as prominently as practicable even though the statement is not of such conspicuousness as to render it likely to be read by the ordinary individual under customary conditions of purchase.

(2) A drug shall be exempt from the requirements of clause (2) of section 502 (e) of the act with respect to the alkaloids atropine, hyoscine or hyoscyamine contained in such drug, if such alkaloid is contained therein as a constituent of belladonna, hyoscyamus, scopola, stramonium, or other plant material, or any preparation thereof, which was used as an ingredient of such drug, and no practical and accurate method of analysis exists for the quantitative determination of each such alkaloid in such ingredient. But such exemption shall be on the condition that the label of such drug shall state the quantity or proportion of total alkaloids contained therein as constituents of such ingredient.

(Sec. 502 (e), 52 Stat. 1050; 21 U. S. C. 352 (e))

§ 1.106 *Drugs and devices; directions for use.*—(a) *Adequate directions for use.* "Adequate directions for use" means directions under which the layman can use a drug or device safely and for the purposes for which it is intended. Directions for use may be inadequate because (among other reasons) of omission, in whole or in part, or incorrect specification of:

(1) Statements of all conditions, purposes, or uses for which such drug or device is intended, including conditions, purposes, or uses for which it is prescribed, recommended, or suggested in its oral, written, printed, or graphic advertising, and conditions, purposes, or uses for which the drug or device is commonly used; except that such statements shall not refer to conditions, uses, or purposes for which the drug or device can be safely used only under the supervision of a practitioner licensed by law and for which it is advertised solely to such practitioner.

(2) Quantity of dose (including usual quantities for each of the uses for which it is intended and usual quantities for persons of different ages and different physical conditions).

(3) Frequency of administration or application.

(4) Duration of administration or application.

(5) Time of administration or application (in relation to time of meals, time of onset of symptoms, or other time factors).

(6) Route or method of administration or application.

(7) Preparation for use (shaking, dilution, adjustment of temperature, or other manipulation or process).

(b) *Exemption for prescription drugs.* A drug subject to the requirements of section 503 (b) (1) of the act shall be exempt from section 502 (f) (1) if all the following conditions are met:

(1) The drug is:

(i) In the possession of a person (or his agents or employees) regularly and lawfully engaged in the manufacture, transportation, storage, or wholesale distribution of prescription drugs; or

(ii) In the possession of a retail, hospital, or clinic pharmacy, or a public health agency, regularly and lawfully engaged in dispensing prescription drugs;

and is to be dispensed in accordance with section 503 (b).

(2) The label of the drug bears:

(i) The statement "Caution: Federal law prohibits dispensing without prescription"; and

(ii) The recommended or usual dosage; and

(iii) The route of administration, if it is not for oral use; and

(iv) If it is fabricated from two or more ingredients and is not designated conspicuously by a name recognized in an official compendium, the quantity or proportion of each active ingredient, and if it is not for oral use the names of all other ingredients.

Provided, however, That the information referred to in subdivisions (ii), (iii), and (iv) of this subparagraph may be contained in the labeling on or within the package from which it is to be dispensed, and, in the case of ampuls too small or otherwise unable to accommodate a label but which are packaged in a container from which they are withdrawn for dispensing or use, the information referred to in subdivision (i) of this subparagraph may be placed on the outside container only.

(3) The labeling of the drug (which may include brochures readily available to licensed practitioners) bears information as to the use of the drug by practitioners licensed by law to administer it: *Provided, however,* That such information may be omitted from the labeling if it is contained in scientific literature widely disseminated among practitioners licensed by law to administer the drug.

(c) *Exemption for veterinary drugs.* A drug intended solely for veterinary use which, because of toxicity or other potentiality for harmful effect, or the method of its use, is not safe for animal use except under the supervision of a licensed veterinarian, and hence for which "adequate directions for use" cannot be prepared, shall be exempt from section 502 (f) (1) of the act if all the following conditions are met:

(1) The drug is in the possession of a person (or his agents or employees) regularly and lawfully engaged in the manufacture, transportation, storage, or wholesale or retail distribution of veterinary drugs and is to be sold only to or on the prescription or other order of a licensed veterinarian for use in the course of his professional practice.

(2) The label of a drug bears:

(i) The statement "Caution: Federal law restricts this drug to sale by or on the order of a licensed veterinarian"; and

(ii) The recommended or usual dosage; and

(iii) The route of administration, if it is not for oral use; and

(iv) The quantity or proportion of each active ingredient if it is fabricated from two or more ingredients and is not designated conspicuously by a name recognized in an official compendium.

Provided, however, That the information referred to in subdivisions (ii), (iii), and (iv) of this subparagraph may be contained in the labeling on or within the package from which it is to be dispensed.

(3) The labeling of the drug (which may include brochures readily available to licensed veterinarians) bears information as to use of the drug by licensed veterinarians: *Provided, however,* That such information may be omitted from the labeling if it is contained in scientific literature widely disseminated among veterinarians licensed by law to administer such drug.

(d) *Exemption for prescription devices.* A device which, because of any potentiality for harmful effect, or the method of its use, or the collateral measures necessary to its use, is not safe except under the supervision of a practitioner licensed by law to direct the use of such device, and hence for which "adequate directions for use" cannot be prepared, shall be exempt from section 502 (f) (1) of the act if all the following conditions are met:

(1) The device is in the possession of a person (or his agents or employees) regularly and lawfully engaged in the manufacture, transportation, storage, or wholesale or retail distribution of such device and is to be sold only to or on the prescription or other order of such practitioner for use in the course of his professional practice.

(2) The label of the device (other than surgical instruments) bears:

(i) The statement "Caution: Federal law restricts this device to sale by or on the order of a _____," the blank to be filled with the word "physician," "dentist," "veterinarian," or with the descriptive designation of any other practitioner licensed by the law of the State in which he practices to use or order the use of the device; and

(ii) The method of its application or use.

(3) The labeling of the device (which may include brochures readily available to licensed practitioners) bears information as to the use of the device by practitioners licensed by law to use it or direct its use: *Provided, however,* That such information may be omitted from the labeling if it is contained in scientific literature widely disseminated among practitioners licensed by law to use or order the use of such device.

(e) *Exemptions for drugs and devices shipped directly to licensed practitioners, hospitals, clinics, or public-health agencies for professional use.* Except as provided in paragraph (g) of this section, a drug or device shipped directly to or in the possession of a practitioner licensed by law to administer the drug or to use or direct the use of the device, or shipped directly to or in the possession of a hospital, clinic, or public-health agency, for use in the course of the professional practice of such a licensed practitioner, shall be exempt from section 502 (f) (1) of the act if it meets the conditions of paragraphs (b) (2) and (3), (c) (2) and (3), or (d) (2) and (3) of this section.

(f) *Retail exemption for veterinary drugs and prescription devices.* A drug or device subject to paragraph (c) or (d) of this section shall be exempt at the time of delivery to the ultimate purchaser or user from section 502 (f) (1) of the act if it is delivered by a licensed practitioner in the course of his professional practice or upon a prescription or other order lawfully issued in the course of his professional practice, with labeling bearing the name and address of such licensed practitioner and the directions for use and cautionary statements, if any, contained in such order.

(g) *Exemption for new drugs.* A new drug shall be exempt from section 502 (f) (1) of the act:

(1) To the extent to which such exemption is claimed in an effective application with respect to such drug under section 505 of the act; or

(2) If no application under section 505 of the act is effective with respect to such drug but it complies with section 505 (i) and regulations thereunder. No exemption shall apply to any other drug which would be a new drug if its labeling bore representations for its intended uses.

(h) *Exemption for drugs or devices when directions are commonly known.* A drug or device shall be exempt from section 502 (f) (1) of the act insofar as adequate directions for common uses thereof are known to the ordinary individual.

(i) *Exemptions for inactive ingredients.* A harmless drug that is ordinarily used as an inactive ingredient, such as a coloring, emulsifier, excipient, flavoring, lubricant, preservative, or solvent, in the preparation of other drugs shall be exempt from section 502 (f) (1) of the act. This exemption shall not apply to any substance intended for a use which results in the preparation of a new drug, unless an effective new-drug application provides for such use.

(j) *Exemption for diagnostic reagents.* A drug intended solely for use in the professional diagnosis of disease and which is generally recognized by qualified experts as useful for that purpose shall be exempt from section 502 (f) (1) of the act if its label bears the statement "Diagnostic reagent—For professional use only."

(k) *Exemption for prescription chemicals and other prescription components.* A drug prepared, packaged, and primarily sold as a prescription chemical or other component for use by registered pharmacists in compounding prescriptions or for dispensing in dosage unit form upon prescriptions shall be exempt from section 502 (f) (1) of the act if all the following conditions are met:

(1) The drug is an official liquid acid or official liquid alkali, or is not a liquid solution, emulsion, suspension, tablet, capsule, or other dosage unit form; and

(2) The label of the drug bears:

(i) The statement "For prescription compounding"; and

(ii) If in substantially all dosage forms in which it may be dispensed it is subject to section 503 (b) (1) of the act, the statement "Caution: Federal law prohibits its dispensing without prescription"; or

(iii) If it is not subject to section 503 (b) (1) of the act and is by custom among retail pharmacists sold in or from the interstate package for use by consumers, "adequate directions for use" in the conditions for which it is so sold.

Provided, however, That the information referred to in subdivision (iii) of this subparagraph may be contained in the labeling on or within the package from which it is to be dispensed.

(3) This exemption shall not apply to any substance intended for use in compounding which results in a new drug, unless an effective new-drug application covers such use of the drug in compounding prescriptions.

(l) *Exemption for processing, repacking, or manufacture.* A drug in a bulk package (except tablets, capsules, or other dosage unit forms) or a device intended for processing, repacking, or use in the manufacture of another drug or device shall be exempt from section 502 (f) (1) of the act if its label bears the statement "Caution: For manufactur-

ing, processing, or repacking"; and, if in substantially all dosage forms in which it may be dispensed it is subject to section 503 (b) (1), the statement "Caution: Federal law prohibits dispensing without prescription." This exemption and the exemption under paragraph (k) of this section may be claimed for the same article. But the exemption shall not apply to a substance intended for a use in manufacture, processing, or repacking which causes the finished article to be a new drug, unless:

(1) An effective new-drug application held by the person preparing the dosage form or drug for dispensing covers the production and delivery to him of such substance; or

(2) If no application is effective with respect to such new drug, the label statement "Caution: For manufacturing, processing, or repacking" is immediately supplemented by the words "in the preparation of a new drug limited by Federal law to investigational use," and the delivery is made for use only in the manufacture of such new drug limited to investigational use as provided in § 1.114.

(m) *Exemption for drugs and devices for use in teaching, research, and analysis.* A drug or device subject to paragraph (b), (c), or (d) of this section shall be exempt from section 502 (f) (1) of the act if shipped or sold to, or in the possession of, persons regularly and lawfully engaged in instruction in pharmacy, chemistry, or medicine not involving clinical use, or engaged in research not involving clinical use, or in chemical analysis, or physical testing, and is to be used only for such instruction, research, analysis, or testing.

(n) *Expiration of exemptions.* (1) If a shipment or delivery, or any part thereof, of a drug or device which is exempt under the regulations in this section is made to a person in whose possession the article is not exempt, or is made for any purpose other than those specified, such exemption shall expire, with respect to such shipment or delivery or part thereof, at the beginning of that shipment or delivery. The causing of an exemption to expire shall be considered an act which results in such drug or device being misbranded unless it is disposed of under circumstances in which it ceases to be a drug or device.

(2) The exemptions conferred by paragraphs (i), (j), (k), (l), and (m) of this section shall continue until the drugs or devices are used for the purposes for which they are exempted, or until they are relabeled to comply with section 502 (f) (1) of the act. If, however, the drug is converted, compounded, or manufactured into a dosage form limited to prescription dispensing, no exemption shall thereafter apply to the article unless the dosage form is labeled as required by section 503 (b) and paragraph (b), (c), or (d) of this section.

(o) *Intended uses.* The words "intended uses" or words of similar import in paragraphs (a), (g), (i), (j), (k), and (l) of this section refer to the objective intent of the persons legally responsible for the labeling of drugs and devices. The intent is determined by such persons' expressions or may be shown by the circumstances surrounding the distribution of the article. This objective intent may, for example, be shown by labeling claims, advertising matter, or oral or written statements by such persons or their representatives. It may be shown by the circumstances that the article is, with the knowledge of such persons or their representatives, offered and used for a purpose for which it is neither labeled nor advertised. The intended uses of an article may change after it has been introduced into interstate commerce by its manufacturer. If, for example, a packer, distributor, or seller intends an article for different uses than those intended by the person from whom he received the drug, such packer, distributor, or seller is required to supply adequate labeling in accordance with the new intended uses. But if a manufacturer knows, or has knowledge of facts that would give him notice, that a drug or device introduced into interstate commerce by him is to be used for conditions, purposes, or uses other than the ones for which he offers it, he is required to provide adequate labeling for such a drug which accords with such other uses to which the article is to be put.

§ 1.107 *Drugs and devices; exemptions.* (a) Except as provided by paragraphs (b) and (c) of this section, a shipment or other delivery of a drug or device which is, in accordance with the practice of the trade, to be processed, labeled, or repacked in substantial quantity at an establishment other than that where originally processed or packed, shall be exempt, during the time of introduction into and movement in interstate commerce and the time of holding in such establishment, from compliance with the labeling and packaging requirements of sections 501 (b) and 502 (b), (d), (e), (f), and (g) of the act if:

(1) The person who introduced such shipment or delivery into interstate commerce is the operator of the establishment where such drug or device is to be processed, labeled, or repacked; or

(2) In case such person is not such operator, such shipment or delivery is made to such establishment under a written agreement, signed by and containing the post-office addresses of such person and such operator, and containing such specifications for the processing, labeling, or repacking, as the case may be, of such drug or device in such establishment as will insure, if such specifications are followed, that such drug or device will not be adulterated or misbranded within the meaning of the act upon completion of such processing, labeling, or repacking. Such person and such operator shall each keep a copy of such agreement until all such shipment or delivery has been removed from such establishment, and shall make such copies available for inspection at any reasonable hour to any officer or employee of the Agency who requests them.

(b) An exemption of a shipment or other delivery of a drug or device under paragraph (a) (1) of this section shall, at the beginning of the act of removing such shipment or delivery, or any part thereof, from such establishment, become void ab initio if the drug or device comprising such shipment, delivery, or part is adulterated or misbranded within the meaning of the act when so removed.

(c) An exemption of a shipment or other delivery of a drug or device under paragraph (a) (2) of this section shall become void ab initio with respect to the person who introduced such shipment or delivery into interstate commerce upon refusal by such person to make available for inspection a copy of the agreement, as required by such subparagraph.

(d) An exemption of a shipment or other delivery of a drug or device under paragraph (a) (2) of this section shall expire:

(1) At the beginning of the act of removing such shipment or delivery, or any part thereof, from such establishment if the drug or device comprising such shipment, delivery, or part is adulterated or misbranded within the meaning of the act when so removed; or

(2) Upon refusal by the operator of the establishment where such drug or device is to be processed, labeled, or repacked, to make available for inspection a copy of the agreement, as required by such clause.

(e) Except as provided in paragraphs (g) and (h) of this section, a shipment or other delivery of a drug which is subject to section 507 of the act and which is, in accordance with the practice of the trade, to be processed or repacked in a substantial quantity at an establishment other than that where originally processed or packed shall be exempt from compliance with the labeling requirements of section 502 (f) of the act during the time such drug is also exempt from the requirements of section 502 (l) of the act under the provisions of § 146.20 or 146.21 of this chapter.

(f) Except as provided by paragraphs (g) and (h) of this section, a shipment or other delivery of a drug which is subject to section 507 of the act and which is, in accordance with the practice of the trade, to be labeled in substantial quantity at an establishment other than that where originally processed or packed shall be exempt from compliance with the labeling requirements of section 502 (b), (e) and (f) of the act during the time such drug is also exempt from the requirements of section 502 (l) of the act under § 146.18 of this chapter, if the words, statements, and other information required by section 502 (b) and (e) of the act appear on each shipping container of such drug.

(g) In case the person who introduced such shipment or other delivery into interstate commerce is the operator of the establishment where such drug is to be processed, labeled, or repacked, an exemption of such shipment or delivery under paragraph (e) or (f) of this section shall become void ab initio at the beginning of the act of removing such shipment or delivery or any part thereof from such establishment if the drug comprising such shipment, delivery, or part is adulterated or misbranded within the meaning of the act when so removed.

(h) In case the person who introduced such shipment or delivery into interstate commerce is not the operator of the establishment where such drug is to be processed, labeled, or repacked, an exemption of a shipment or other delivery of such drug under paragraph (e) or (f) of this section shall expire at the beginning of the act of removing such shipment or delivery or any part thereof from such establishment if the drug comprising such shipment, delivery, or part is adulterated or misbranded within the meaning of the act when so removed.

(Sec. 503 (a), 52 Stat. 1051; 21 U. S. C. 353 (a))

§ 1.108 *Exemption from prescription requirements*—(a) *Exemption for certain habit-forming drugs.* The prescription-dispensing requirements of section 503 (b) (1) (A) of the act are not necessary for the protection of the public health with respect to the following drugs subject to section 502 (d):

(1) Exempt narcotic preparations described in 26 CFR 151.2 and sold as required by 26 CFR 151.180 through 151.185a.

(2) Drugs containing chlorobutanol, intended for external use only.

(3) Epinephrine solution, 1 percent, preserved with chlorobutanol and intended for use solely as a spray.

(4) Drugs containing one or more of the derivatives of barbituric acid and in addition a sufficient quantity or proportion of another drug or drugs to prevent the ingestion of a sufficient amount of barbiturate derivative to cause a hypnotic or somnifacient effect.

(b) *Duration of prescription requirement.* Any drug limited to prescription use under section 503 (b) (1) (C) of the act remains so limited until it is exempted as provided in paragraph (c) of this section.

(c) *Prescription exemption procedure for drugs limited by a new-drug application.* The exemption of a drug from the prescription-dispensing requirements of section 503 (b) (1) (C) of the act may be initiated by the Commissioner or by any interested person. Any interested person may file a petition seeking such exemption, stating reasonable grounds therefor, which petition may be in the form of a supplement to an effective new-drug application. Upon receipt of such a petition, or on his own initiative at any time, the Commissioner will publish a notice of proposed rule making and invite written comments. After consideration of all available data, including any comments submitted, the Commissioner may issue a regulation granting or refusing the exemption, effective on a date specified therein. Whenever the Commissioner concludes, either at the time of publication of the notice of proposed rule making or after considering the written comments submitted, that granting or refusing the exemption requires a more thorough development of the facts than is possible in a written presentation, he may call a public hearing for that purpose. The notice of such hearing shall specify the questions to be considered. As soon as practicable after completion of the hearing, the final regulation granting or refusing the exemption shall be issued, effective on a date specified therein. If the Commissioner for good cause finds (and incorporates the finding and a brief statement of the reasons therefor in a regulation) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest, he may issue the final regulation forthwith.

(d) *New-drug status of drugs exempted from the prescription requirement.* A drug exempted from the prescription requirement under the provisions of paragraph (c) of this section continues to be a "new drug" within the meaning of section 201 (p) of the act until it has been used to a material extent or for a material time and has become generally recognized as safe when used in accordance with the directions for use contained in its labeling.

(e) *Prescription legend not allowed on exempted drugs.* The use of the prescription caution statement quoted in section 503 (b) (4) of the act, in the labeling of a drug exempted under the provisions of this section, constitutes misbranding. Any other statement or suggestion in the labeling of a drug exempted under this section, that such drug is limited to prescription use, may constitute misbranding.

(Sec. 503, 52 Stat. 1051, as amended; 21 U. S. C. 353)

NOTE: Paragraph (f) (1) and (2) of § 1.108 has been transferred to Part 130, as § 130.1 (a).

§ 1.109 *New drugs; definition.* Newness of a drug may arise by reason (among other reasons) of:

(a) The newness for drug use of any substance which composes such drug, in whole or in part, whether it be an active substance or a menstruum, excipient, carrier, coating, or other component;

(b) The newness for drug use of a combination of two or more substances, none of which is a new drug;

(c) The newness for drug use of the proportion of a substance in a combination, even though such combination containing such substance in other proportion is not a new drug;

(d) The newness of use of such drug in diagnosing, curing, mitigating, treating, or preventing a disease, or to affect a structure or function of the body even though such drug is not a new drug when used in another disease or to affect another structure or function of the body; or

(e) The newness of a dosage, or method or duration of administration or application, or other condition of use prescribed, recommended, or suggested in the labeling of such drug, even though such drug when used in other dosage, or other method or duration of administration or application, or different condition, is not a new drug.

(Sec. 201 (p), 52 Stat. 1041; 21 U. S. C. 321 (p))

§ 1.109a *New drugs; exemption from section 505 of the act.* A new drug shall not be deemed to be subject to section 505 of the act if it is a drug which is licensed under the Public Health Service Act of July 1, 1944 (58 Stat. 682; 42 U. S. C. 201 et seq.), or under the animal virus-serum-toxin law of March 4, 1913 (37 Stat. 832; 21 U. S. C. 151 et seq.)

§ 1.110 *New drugs; applications.* (a) Each application submitted for filing with the Secretary shall be in duplicate. If any part of the application is in a foreign language, an accurate and complete English translation shall be appended to such part.

(b) An application shall not be accepted for filing if only one copy is submitted or if it is incomplete on its face in that:

(1) It does not contain all the matter required by clauses (1), (2), (3), (4), and (6) of section 505 (b) of the act;

(2) It does not state the conditions under which the drug is to be used; or

(3) The specimens of labeling proposed for use upon or within the retail package do not expressly or by reference to a brochure or other printed matter prescribe, recommend, or suggest the use of such drug under such conditions.

The Food and Drug Administration shall notify the applicant of such nonacceptance and the reason therefor and, in case of incompleteness as to matter required by any clause of section 505 (b), shall specify such clause. Otherwise the date on which an application is received by the Department shall be considered to be the date on which such application is filed, and the Food and Drug Administration shall notify the applicant of such date. If the applicant withdraws his application, such application shall be considered as not having been filed.

(c) The applicant may file an amendment to an application which has been filed and is pending before the Secretary, but in such case the unamended application shall be considered as having been withdrawn and the amended application shall be considered as having been filed on the date on which the amendment is received by the Department. The Food and Drug Administration shall notify the applicant of such date.

(d) After an application has become effective with respect to a drug the applicant may file a supplemental application with respect thereto setting forth any proposed change in the conditions under which such drug is to be used, in the labeling thereof, in any circumstance relating to its production, or in any other information contained in the effective application. Such supplemental application may omit statements made in the effective application concerning which no change is proposed.

§ 1.111 *Notification of applicant.* If the Secretary determines, before the date prescribed by section 505 (c) of the act for an application to become effective, that he has no cause to issue an order under section 505 (d) of the act refusing to permit such application to become effective, the Food and Drug Administration shall so notify the applicant in writing and such application shall become effective on the date of the notification.

(Sec. 505 (c), 52 Stat. 1052; 21 U. S. C. 355 (c))

§ 1.112 *Insufficient information in application.* The information contained in an application may be insuffi-

cient for the Secretary to determine whether a drug is safe for use if it fails to include (among other things) a statement showing whether the drug is to be exempt under any provision of § 1.106, as amended, promulgated pursuant to section 502 (f) of the act, from the requirement that its labeling bear adequate directions for use. If the drug is to be so exempt, the information may also be insufficient if:

(a) The specimen label of the drug fails to incorporate by reference a specifically identified brochure or other printed matter containing information adequate for the use of such drug by physicians, dentists, or veterinarians, as the case may be;

(b) Such label fails to state that the drug is to be used as shown in such brochure or printed matter and that such brochure or printed matter will be sent to physicians, dentists, or veterinarians, as the case may be, on request;

(c) The application fails to contain copies of such brochure or printed matter; or

(d) The application fails to show that such brochure or printed matter is readily available to physicians, dentists, or veterinarians, as the case may be, or if not that it is to be made so when the application becomes effective.

§ 1.113 *Untrue statements in application.* Among the reasons why an application may contain an untrue statement of a material fact are changes in:

(a) Conditions of use prescribed, recommended, or suggested by the applicant for the drug from the conditions of such use stated in the application;

(b) Articles used as components of the drug from those listed in the application;

(c) Composition of the drug from that stated in the application;

(d) Methods used in, or the facilities or controls used for, the manufacture, processing, or packing of the drug from such methods, facilities, and controls described in the application; and

(e) Labeling from the specimens contained in the application.

§ 1.114 *New drugs; exemptions from section 505 (a).* (a) Except as provided by paragraph (b) of this section a shipment or other delivery of a new drug shall be exempt from the operation of section 505 (a) of the act if all the following conditions are complied with:

(1) The label of such drugs bears the statement "Caution: New drug—Limited by Federal law to investigational use."

(2) Such shipment or delivery is made only to, and solely for investigational use by or under the direction of, an expert qualified by scientific training and experience to investigate the safety of such drug.

(3) The person who introduced such shipment or delivery into interstate commerce obtains, prior to the introduction, a statement signed by such expert showing that he has adequate facilities for the investigation to be conducted by him, and that such drug will be used solely by him or under his direction for the investigation, unless and until an application becomes effective with respect to such drug under section 505 of the act. This subparagraph shall not apply when such shipment or delivery is made to an agency of the Government of the United States (including the National Research Council), or of any State or municipality, whose official functions involve investigations of new drugs by such experts.

(4) Such person keeps the statement referred to in subparagraph (3) of this paragraph, and complete records showing the date, quantity, and batch or code mark (if any), of each such shipment and delivery.

(5) Such person makes all records and statements referred to in subparagraphs (3) and (4) of this paragraph available for inspection upon the request of any officer or employee of the Department at any reasonable hour until 3 years after the introduction of such shipment or delivery into interstate commerce.

(b) A shipment or other delivery of a new drug which is being imported or offered for import into the United States shall be exempt from the operation of section 505 (a) of the act if all of the following conditions are complied with:

(1) The label of such drug bears the statement "Caution: New drug—Limited by United States law to investigational use."

(2) The importer of all such shipments or deliveries is an agent of the foreign exporter, residing in the United States, or the operator of an establishment in the United States which has facilities for regularly investigating the safety of such drugs, which facilities are manned by experts qualified by scientific training and experience to conduct such investigation.

(3) Such operator uses such drug solely for such investigation in such establishment, or such operator or agent otherwise disposes of such drug only to, and solely for investigational use by or under the direction of, such an expert other than one in such establishment.

(4) Such importer, prior to disposing of any of such drug to such an expert, obtains a statement signed by such expert showing that he has adequate facilities for the investigation to be conducted by him, and that such drug will be used solely by him or under his direction for the investigation, unless and until an application becomes effective with respect to such drug under section 505 of the act. This subparagraph shall not apply to any shipment or delivery or part thereof disposed of by such importer to an agency of the Government of the United States (including the National Research Council) or of any State or municipality whose official functions involve investigations of new drugs by such experts.

(5) Such importer keeps the statement referred to in subparagraph (4) of this paragraph and complete records showing the date, quantity, and batch or code marks (if any), of each such shipment and delivery and the disposition thereof.

(6) Such importer makes all statements and records referred to in subparagraphs (4) and (5) of this paragraph available for inspection upon the request of any officer or employee of the Department at any reasonable hour until 3 years after disposition by such importer of the lot of such drug to which such statement and records relate.

(c) An exemption under paragraph (a) or (b) of this section shall become void ab initio if any record or statement required by such paragraph to be kept and made available for inspection is not kept or made available as so required.

(d) An exemption under paragraph (a) or (b) of this section shall expire with respect to any exempted shipment or delivery or part thereof which has been supplied to an expert who has signed the statement referred to in paragraph (a) (3) or (b) (4) of this section and which is used otherwise than in accordance with such signed statement.

(e) An exemption under paragraph (b) of this section shall become void ab initio if the exempted shipment or delivery or any part thereof is disposed of otherwise than as provided by subparagraph (3) of such paragraph.

(f) No exemption under paragraph (b) of this section shall apply to any shipment or delivery to such importer if such importer, within 3 years prior to the offering of such shipment or delivery for import, has caused an exemption to become void as provided by paragraph (c) or (e) of this section.

(Sec. 505 (i), 52 Stat. 1052; 21 U. S. C. 355 (i))

§ 1.115 *Definition of term "insulin."* For the purposes of sections 502 (k) and 506 of the act, the term "insulin" as used therein means the active principle of pancreas which affects the metabolism of carbohydrate in the animal body and which is of value in the treatment of diabetes mellitus.

COSMETICS

AUTHORITY: §§ 1.200 to 1.204 issued under sec. 701 (a), 52 Stat. 1055; 21 U. S. C. 371 (a). Statutory provisions interpreted or applied are cited to text in parentheses.

§ 1.200 *Cosmetic; coal-tar hair dye defined.* The term "coal-tar hair dye" includes all articles containing any coal-tar color or intermediate which color or intermediate alters the color of the hair when such articles are applied to the hair under the conditions of use prescribed in the labeling thereof, or under such conditions of use as are customary or usual.

(Sec. 601 (a), 52 Stat. 1054; 21 U. S. C. 361 (a))

§ 1.201 *Cosmetic; labeling; misbranding.* (a) Among representations in labeling of a cosmetic which render such cosmetic misbranded is a false or misleading representation with respect to another cosmetic or a food, drug, or device.

(b) The labeling of a cosmetic which contains two or more ingredients may be misleading by reason (among other reasons) of the designation of such cosmetic in such labeling by a name which includes or suggests the name of one or more but not all such ingredients, even though the names of all such ingredients are stated elsewhere in the labeling.

(Sec. 602 (a), 52 Stat. 1054; 21 U. S. C. 362 (a))

§ 1.202 *Cosmetic; labeling; required statements; exemptions.* (a) If a cosmetic is not manufactured by the person whose name appears on the label, the name shall be qualified by a phrase which reveals the connection such person has with such cosmetic such as "Manufactured for and Packed by ———," "Distributed by ———," or other similar phrase which expresses the facts.

(b) The statement of the place of business shall include the street address, if any, of such place, unless such street address is shown in a current city directory or telephone directory.

(c) Where a person manufactures, packs, or distributes a cosmetic at a place other than his principal place of business, the label may state the principal place of business in lieu of the actual place where each package of such cosmetic was manufactured or packed or is to be distributed, if such statement is not misleading in any particular.

(d) The requirement that the label shall contain the name and place of business of the manufacturer, packer or distributor shall not be considered to relieve any cosmetic from the requirement that its label shall not be misleading in any particular.

(e) (1) The statement of the quantity of the contents shall reveal the quantity of cosmetic in the package, exclusive of wrappers and other material packed with such cosmetic.

(2) The statement shall be expressed in the terms of weight, measure, numerical count, or a combination of numerical count and weight or measure, which are generally used by consumers to express quantity of such cosmetic and which give accurate information as to the quantity thereof. But if no general consumer usage in expressing accurate information as to the quantity of such cosmetic exists, the statement shall be in terms of liquid measure if the cosmetic is liquid, or in terms of weight if the cosmetic is solid, semisolid, or viscous, or in such terms of numerical count, or numerical count and weight or measure, as will give accurate information as to the quantity of the cosmetic in the package.

(f) (1) A statement of weight shall be in terms of the avoirdupois pound and ounce. A statement of liquid measure shall be in terms of the United States gallon of 231 cubic inches and quart, pint, and fluid ounce subdivisions thereof, and shall express the volume at 68° Fahrenheit (20° Centigrade). However, in the case of an export shipment, the statement may be in terms of a system of weight or measure in common use in the country to which such shipment is exported.

(2) A statement of weight or measure in the terms specified in subparagraph (1) of this paragraph may be supplemented by a statement in terms of the metric system of weight or measure.

(3) Unless an unqualified statement of numerical count gives accurate information as to the quantity of cosmetic in the package, it shall be supplemented by such statement of weight, measure, or size of the individual units of the cosmetic as will give such information.

(g) Statements shall contain only such fractions as are generally used in expressing the quantity of the cosmetic. A common fraction shall be reduced to its lowest terms; a decimal fraction shall not be carried out to more than two places.

(h) (1) If the quantity of cosmetic in the package equals or exceeds the smallest unit of weight or measure which is specified in paragraph (f) of this section, and which is applicable to such cosmetic under the provisions of paragraph (e) (2) of this section, the statement shall express the number of the largest of such units contained in the package (for example, the statement on the label of a package which contains one pint of cosmetic shall be "1 pint" and not "16 fluid ounces"), unless the statement is made in accordance with the provisions of subparagraph (2) of this paragraph. Where such number is a whole number and a fraction, there may be substituted for the fraction its equivalent in smaller units, if any smaller is specified in such paragraph (f) (for examples, 1¾ quarts may be expressed as "1 quart 1½ pints" or "1 quart 1 pint 8 fluid ounces"; 1¼ pounds may be expressed as "1 pound 4 ounces"). The stated number of any unit which is smaller than the largest unit (specified in such paragraph (f)) contained in the package shall not equal or exceed the number of such smaller units in the next larger unit so specified (for examples, instead of "1 quart 16 fluid ounces" the statement shall be "1½ quarts" or "1 quart 1 pint"; instead of "24 ounces" the statement shall be "1½ pounds" or "1 pound 8 ounces").

(2). In the case of a cosmetic with respect to which there exists an established custom of stating the quantity of the contents as a fraction of a unit, which unit is larger than the quantity contained in the package, or as units smaller than the largest unit contained therein, the statement may be made in accordance with such custom if it is informative to consumers.

(i) The statement shall express the minimum quantity, or the average quantity, of the contents of the packages. If the statement is not so qualified as to show definitely that the quantity expressed is the minimum quantity, the statement shall be considered to express the average quantity.

(j) Where the statement expresses the minimum quantity, no variation below the stated minimum shall be permitted except variations below the stated weight or measure caused by ordinary and customary exposure, after the cosmetic is introduced into interstate commerce, to conditions which normally occur in good distribution practice and which unavoidably result in decreased weight or measure. Variations above the stated minimum shall not be unreasonably large.

(k) Where the statement does not express the minimum quantity:

(1) Variations from the stated weight or measure shall be permitted when caused by ordinary and customary exposure, after the cosmetic is introduced into interstate commerce, to conditions which normally occur in good distribution practice and which unavoidably result in change of weight or measure.

(2) Variations from the stated weight, measure, or numerical count shall be permitted when caused by unavoidable deviations in weighing, measuring, or counting individual packages which occur in good packing practice. But under this subparagraph variations shall not be permitted to such extent that the average of the quantities in the packages comprising a shipment or other delivery of the cosmetic is below the quantity stated, and no unreasonable shortage in any package shall be permitted, even though overages in other packages in the same shipment or delivery compensate for such shortage.

(l) The extent of variations from the stated quantity of the contents permissible under paragraphs (j) and (k) of this section in the case of each shipment or other delivery shall be determined by the facts in such case.

(m) A cosmetic shall be exempt from compliance with the requirements of clause (2) of section 602 (b) of the act if the quantity of the contents of the package, as expressed in terms applicable to such cosmetic under the provisions of paragraph (e) (2) of this section, is less than one-fourth ounce avoirdupois, or less than one-eighth fluid ounce, or (in case the units of the cosmetic can be easily counted without opening the package) less than six units.

(Sec. 602 (b), 52 Stat. 1054; 21 U. S. C. 362 (b))

§ 1.203 *Cosmetic; labeling requirements, form of stating.* (a) A word, statement, or other information required by or under authority of the act to appear on the label may lack that prominence and conspicuousness required by section 602 (c) of the act by reason (among other reasons) of:

(1) The failure of such word, statement, or information to appear on the part or panel of the label which is presented or displayed under customary conditions of purchase;

(2) The failure of such word, statement, or information to appear on two or more parts or panels of the label, each of which has sufficient space therefor, and each of which is so designed as to render it likely to be, under customary conditions of purchase, the part or panel displayed;

(3) The failure of the label to extend over the area of the container or package available for such extension, so as to provide sufficient label space for the prominent placing of such word, statement, or information;

(4) Insufficiency of label space (for the prominent placing of such word, statement, or information) resulting from the use of label space for any word, statement, design, or device which is not required by or under authority of the act to appear on the label;

(5) Insufficiency of label space (for the prominent placing of such word, statement, or information) resulting from the use of label space to give materially greater conspicuousness to any other word, statement, or information, or to any design or device;

(6) Smallness or style of type in which such word, statement, or information appears, insufficient background

contrast, obscuring designs or vignettes, or crowding with other written, printed, or graphic matter.

(b) (1) All words, statements, and other information required by or under authority of the act to appear on the label or labeling shall appear thereon in the English language.

(2) If the label contains any representation in a foreign language, all words, statements, and other information required by or under authority of the act to appear on the label shall appear thereon in the foreign language.

(3) If the labeling contains any representation in a foreign language, all words, statements, and other information required by or under authority of the act to appear on the label or labeling shall appear on the labeling in the foreign language.

(Sec. 602 (c), 52 Stat. 1054; 21 U. S. C. 362 (c))

§ 1.204 *Cosmetic; labeling requirements; exemptions.* (a) Except as provided by paragraphs (b) and (c) of this section, a shipment or other delivery of a cosmetic which is, in accordance with the practice of the trade, to be processed, labeled, or repacked in substantial quantity at an establishment other than that where originally processed or packed, shall be exempt, during the time of introduction into and movement in interstate commerce and the time of holding in such establishment, from compliance with the labeling requirements of sections 601 (a) and 602 (b) of the act if:

(1) The person who introduced such shipment or delivery into interstate commerce is the operator of the establishment where such cosmetic is to be processed, labeled, or repacked; or

(2) In case such person is not such operator, such shipment or delivery is made to such establishment under a written agreement, signed by and containing the post-office addresses of such person and such operator, and containing such specifications for the processing, labeling or repacking, as the case may be, of such cosmetic in such establishment as will insure, if such specifications are followed, that such cosmetic will not be adulterated or misbranded within the meaning of the act upon completion of such processing, labeling, or repacking. Such person and such operator shall each keep a copy of such agreement until all such shipment or delivery has been removed from such establishments, and shall make such copies available for inspection at any reasonable hour to any officer or employee of the Department who requests them.

(b) An exemption of a shipment or other delivery of a cosmetic under paragraph (a) (1) of this section shall, at the beginning of the act of removing such shipment or delivery, or any part thereof, from such establishment, become void ab initio if the cosmetic comprising such shipment, delivery, or part is adulterated or misbranded within the meaning of the act when so removed.

(c) An exemption of a shipment or other delivery of a cosmetic under paragraph (a) (2) of this section shall become void ab initio with respect to the person who introduced such shipment or delivery into interstate commerce upon refusal by such person to make available for inspection a copy of the agreement, as required by such clause.

(d) An exemption of a shipment or other delivery of a cosmetic under paragraph (a) (2) of this section shall expire:

(1) At the beginning of the act of removing such shipment or delivery, or any part thereof, from such establishment if the cosmetic comprising such shipment, delivery, or part is adulterated or misbranded within the meaning of the act when so removed; or

(2) Upon refusal by the operator of the establishment where such cosmetic is to be processed, labeled, or repacked, to make available for inspection a copy of the agreement, as required by such clause.

(Sec. 603, 52 Stat. 1054; 21 U. S. C. 363)

IMPORTS AND EXPORTS

AUTHORITY: §§ 1.315 to 1.322 issued under sec. 701, 52 Stat. 1055, as amended; 21 U. S. C. 371. Interpret or apply secs. 801, 52 Stat. 1058; 21 U. S. C. 381.

§ 1.315 *Definitions.* For the purposes of the regulations prescribed under section 801 (a), (b), and (c) of the Federal Food, Drug, and Cosmetic Act:

(a) The term "owner" or "consignee" means the person who has the rights of a consignee under the provisions of sections 483, 484, and 485 of the Tariff Act of 1930, as amended (19 U. S. C. 1483, 1484, 1485).

(b) The term "chief of district" means the chief of the district of the Food and Drug Administration having jurisdiction over the port of entry through which an article is imported or offered for import, or such officer of the district as he may designate to act in his behalf in administering and enforcing the provisions of section 801 (a), (b), and (c).

§ 1.316 *Notice of sampling.* When a sample of an article offered for import has been requested by the chief of district, the collector of customs having jurisdiction over the article shall give to the owner or consignee prompt notice of delivery of, or intention to deliver, such sample. Upon receipt of the notice, the owner or consignee shall hold such article and not distribute it until further notice from the chief of district or the collector of customs of the results of examination of the sample.

§ 1.317 *Payment for samples.* The Food and Drug Administration will pay for all import samples which are found to be in compliance with the requirements of the Federal Food, Drug, and Cosmetic Act. Billing for reimbursement should be made by the owner or consignee to the Food and Drug Administration district headquarters in whose territory the shipment was offered for import. Payment for samples will not be made if the article is found to be in violation of the act, even though subsequently brought into compliance under the terms of an authorization to bring the article into compliance or rendered not a food, drug, device, or cosmetic as set forth in § 1.319.

§ 1.318 *Hearing.* (a) If it appears that the article may be subject to refusal of admission, the chief of district shall give the owner or consignee a written notice to that effect, stating the reasons therefor. The notice shall specify a place and a period of time during which the owner or consignee shall have an opportunity to introduce testimony. Upon timely request, giving reasonable grounds therefor, such time and place may be changed. Such testimony shall be confined to matters relevant to the admissibility of the article, and may be introduced orally or in writing.

(b) If such owner or consignee submits or indicates his intention to submit an application for authorization to relabel or perform other action to bring the article into compliance with the act or to render it other than a food, drug, device, or cosmetic, such testimony shall include evidence in support of such application. If such application is not submitted at or prior to the hearing, the chief of district shall specify a time limit, reasonable in the light of the circumstances, for filing such application.

§ 1.319 *Application for authorization.* Application for authorization to relabel or perform other action to bring the article into compliance with the act or to render it other than a food, drug, device or cosmetic may be filed only by the owner or consignee, and shall:

(a) Contain detailed proposals for bringing the article into compliance with the act or rendering it other than a food, drug, device, or cosmetic.

(b) Specify the time and place where such operations will be carried out and the approximate time for their completion.

§ 1.320 *Granting of authorization.* (a) When authorization contemplated by § 1.319 is granted, the chief of district shall notify the applicant in writing, specifying:

(1) The procedure to be followed;

(2) The disposition of the rejected articles or portions thereof;

(3) That the operations are to be carried out under the supervision of an officer of the Food and Drug Administration or the Bureau of Customs, as the case may be;

(4) A time limit, reasonable in the light of the circumstances, for completion of the operations; and

(5) Such other conditions as are necessary to maintain adequate supervision and control over the article.

(b) Upon receipt of a written request for extension of time to complete such operations, containing reasonable grounds therefor, the chief of district may grant such additional time as he deems necessary.

(c) An authorization may be amended upon a showing of reasonable grounds therefor and the filing of an amended application for authorization with the chief of district.

(d) If ownership of an article covered by an authorization changes before the operations specified in the authorization have been completed, the original owner will be held responsible, unless the new owner has executed a bond and obtained a new authorization. Any authorization granted under this section shall supersede and nullify any previously granted authorization with respect to the article.

§ 1.321 *Bonds.* (a) The bonds required under section 801 (b) of the act may be executed by the owner or consignee on the appropriate form of a customs single-entry or term bond, containing a condition for the redelivery of the merchandise or any part thereof upon demand of the collector of customs and containing a provision for the performance of conditions as may legally be imposed for the relabeling or other action necessary to bring the article into compliance with the act or rendering it other than a food, drug, device, or cosmetic, in such manner as is prescribed for such bond in the customs regulations in force on the date of request for authorization. The bond shall be filed with the collector of customs.

(b) The collector of customs may cancel the liability for liquidated damages incurred under the above-mentioned provisions of such a bond, if he receives an application for relief therefrom, upon the payment of a lesser amount or upon such other terms and conditions as shall be deemed appropriate under the law and in view of the circumstances, but the collector shall not act under this regulation in any case unless the chief of district is in full agreement with the action.

§ 1.322 *Costs chargeable in connection with relabeling and reconditioning inadmissible imports.* The cost of supervising the relabeling or other action in connection with an import of food, drugs, devices, or cosmetics which fails to comply with the Federal Food, Drug, and Cosmetic Act shall be paid by the owner or consignee who files an application requesting such action and executes a bond, pursuant to section 801 (b) of the act, as amended. The cost of such supervision shall include, but not be restricted to, the following:

(a) Travel expenses of the supervising officer.

(b) Per diem in lieu of subsistence of the supervising officer when away from his home station, as provided by law.

(c) Services of the supervising officer, to be calculated at a flat rate of $4.00 per hour (which shall include administrative expense), except that such services performed by a customs officer and subject to the provisions of section 5 of the act of February 13, 1911, as amended (19 U. S. C. 267), shall be calculated as provided in that act.

(d) Services of analyst, to be calculated at a flat rate of $5.00 per hour (which shall include the use of the chemical laboratories and equipment of the Food and Drug Administration).

(e) The minimum charge for services of supervising officers and of analysts shall be not less than the charge for 1 hour, and time after the first hour shall be computed in multiples of 1 hour, disregarding fractional parts less than ½ hour.

ADMINISTRATIVE

§ 1.700 *Examinations and investigations; samples.* (a) (1) When any officer or employee of the Department collects a sample of a food, drug, or cosmetic for analysis under the act, the sample shall be designated as an official sample if records or other evidence is obtained by him or any other officer or employee of the Department indicating that the shipment or other lot of the article from which such sample was collected was introduced or delivered for introduction into interstate commerce, or was in or was received in interstate commerce, or was manufactured within a Territory. Only samples so designated by an officer or employee of the Department shall be considered to be official samples.

(2) For the purpose of determining whether or not a sample is collected for analysis, the term "analysis" includes examinations and tests.

(3) The owner of a food, drug, or cosmetic of which an official sample is collected is the person who owns the shipment or other lot of the article from which the sample is collected.

(b) When an officer or employee of the Department collects an official sample of a food, drug, or cosmetic for analysis under the act, he shall collect at least twice the quantity estimated by him to be sufficient for analysis, unless:

(1) The amount of the article available and reasonably accessible for sampling is less than twice the quantity so estimated;

(2) The cost of twice the quantity so estimated exceeds $10;

(3) The article is perishable;

(4) The sample is collected from a shipment or other lot which is being imported or offered for import into the United States;

(5) The sample is collected from a person named on the label of the article, or his agent, and such person is also the owner of the article;

(6) The sample is collected from the owner of the article, or his agent, and such article bears no label or, if it bears a label, no person is named thereon; or

(7) The analysis consists principally of rapid analytical procedures, organoleptic examination, or other field inspection examinations or tests, made at the place where the sample is collected or in a mobile or temporary laboratory. In addition to the quantity of sample prescribed above the officer or employee shall, if practicable, collect as part of the sample such further amount of the article as he estimates to be sufficient for use as exhibits in the trial of any case that may arise under the act based on the sample.

(c) After the Food and Drug Administration has completed such analysis of an official sample of a food, drug, or cosmetic as it determines, in the course of analysis and interpretation of analytical results, to be adequate to establish the respects, if any, in which the article is adulterated or misbranded within the meaning of the act, or otherwise subject to the prohibitions of the act, and has reserved an amount of the article it estimates to be adequate for use as exhibits in the trial of any case that may arise under the act based on the sample, a part of the sample, if any remains available, shall be provided for analysis, upon written request, by any person named on the label of the article, or the owner thereof, or the attorney or agent of such person or owner, except when:

(1) After collection, the sample or remaining part thereof has become decomposed or otherwise unfit for analysis, or

(2) The request is not made within a reasonable time before the trial of any case under the act, based on the sample, to which such person or owner is a party. The person, owner, attorney, or agent who requests the part of sample shall specify the amount desired. A request from an owner shall be accompanied by a showing of ownership, and a request from an attorney or agent by a showing of authority from such person or owner to receive the part of sample. When two or more requests for parts of the same sample are received the requests shall be complied with in the order in which they were received so long as any part of the sample remains available therefor.

(d) When an official sample of a food, drug, or cosmetic is the basis of a notice given under section 305 of the act, or of a case under the act, and the person to whom the notice was given, or any person who is a party to the case, has no right under paragraph (c) of this section to a part of the sample, such person or his attorney or agent may obtain a part of the sample upon request accompanied by a written waiver of right under such paragraph (c) from each person named on the label of the article and owner thereof, who has not exercised his right under such paragraph (c). The operation of this paragraph shall be subject to the exceptions, terms, and conditions prescribed in paragraph (c) of this section.

(e) The Food and Drug Administration is authorized to destroy:

(1) Any official sample when it determines that no analysis of such sample will be made;

(2) Any official sample or part thereof when it determines that no notice under section 305 of the act, and no case under the act, is or will be based on such sample;

(3) Any official sample or part thereof when the sample was the basis of a notice under section 305 of the act, and when, after opportunity for presentation of views following such notice, it determines that no other such notice, and no case under the act, is or will be based on such sample;

(4) Any official sample or part thereof when the sample was the basis of a case under the act which has gone to final judgment, and when it determines that no other such case is or will be based on such sample;

(5) Any official sample or part thereof if the article is perishable;

(6) Any official sample or part thereof when, after collection, such sample or part has become decomposed or otherwise unfit for analysis;

(7) That part of any official sample which is in excess of three times the quantity it estimates to be sufficient for analysis.

(Secs. 701 (a), (b), 52 Stat. 1055, 1057; 21 U. S. C. 371 (a), 372 (b))

RULES OF PRACTICE FOR HEARINGS

AUTHORITY: §§ 1.701 to 1.715 issued under sec. 701, 52 Stat. 1055; 21 U. S. C. 371.

DEFINITIONS

§ 1.701 *Definitions.* As used in §§ 1.701–1.715:

(a) The term "act" means the Federal Food, Drug, and Cosmetic Act, approved June 25, 1938 (52 Stat. 1040, as amended; 21 U. S. C. 301–392).

(b) The term "Department" means the Department of Health, Education, and Welfare of the United States.

(c) The term "Secretary" means the Secretary of Health, Education, and Welfare.

(d) The term "FEDERAL REGISTER" means the publication provided for by the Federal Register Act of July 26, 1935 and acts supplementary thereto and amendatory thereof (49 Stat. 500, 50 Stat. 304, sec. 202, 53 Stat. 1435, 56 Stat. 1045, 61 Stat. 451; 44 U. S. C. Chapter 8B).

(e) The term "person" includes an individual, partnership, corporation, and association.

(f) The term "hearing clerk" means the hearing clerk of the Department.

HEARINGS AND NOTICE THEREOF

§ 1.702 *Hearings under section 701 (e) of the act, except hearings with reference to regulations under section 404 (a) of the act.* The Secretary, on his own initiative or upon an application of any interested industry or substantial portion thereof stating reasonable grounds therefor, shall hold a public hearing upon a proposal to issue, amend, or repeal any regulation contemplated by any of the following sections of the act: 401, 403 (j), 406 (a) and (b), 501 (b), 502 (d), (h), 504, and 604.

§ 1.703 *Notice of hearing.* The Secretary shall give notice of the hearing by filing the same with the Archivist of the United States for publication in the FEDERAL REGISTER. The notice shall set forth the proposal in general terms and shall specify the time, which shall not be less than 30 days after the date of the notice, and the place for the public hearing.

§ 1.704 *Designation and powers of presiding officer.* (a) Each such hearing shall be conducted by a presiding officer, who shall be the Secretary or such officer or employee of the Secretary as the Department may designate for the purpose. Any such designation may be made or revoked by the Secretary at any time. Such hearing shall be conducted in an informal but orderly manner in accordance with the rules in §§ 1.701–1.715, and, where such rules are inapplicable or incomplete, in accordance with the directions of the presiding officer. The presiding officer shall have power to administer oaths, examine witnesses, and receive evidence, and to rule upon the admissibility of evidence and other matters that arise in the course of the hearing, but, except where the presiding officer is the Secretary, shall have no power to decide any motion which involves final determination of the merits of the proceeding.

(b) The hearing shall be held at the time and place set forth in the notice of the hearing, but may at such time and place be continued from day to day and adjourned to a later day or to a different place, within the city designated in the notice, without notice other than the announcement thereof by the presiding officer at the hearing.

PROCEDURE AT HEARING

§ 1.705 *Appearances.* At the hearing, any interested person shall be given an opportunity to appear, either in person or through his authorized representative, and to be heard with respect to matters relevant and material to the proposal. Any interested person who desires to be heard in person at any hearing under the rules in §§ 1.701–1.715 shall file with the presiding officer a written appearance setting forth his name, address and occupation. If such person desires to be heard through a representative, such person or such representative shall file with the presiding officer a written appearance setting forth the authority for such representative and the names, addresses, and occupations of such person and such representative. Any such person or such representative shall give such other information respecting his appearance as the presiding officer may request. All present at the hearing shall conform to all reasonable standards of orderly and ethical conduct.

§ 1.706 *Order of procedure.* (a) The presiding officer shall have noted on the record his designation as presiding officer and the notice of the hearing as filed with the Archivist of the United States. This shall be done by filing as an exhibit for the record a copy of the FEDERAL REGISTER containing such designation and such notice. If the designation has not been published in the FEDERAL REGISTER, the presiding officer shall file as an exhibit the order of the Secretary designating him to preside.

(b) To promote orderliness and clarity of the record, evidence shall be received with respect to the subject matter of the hearing in the following order, except as the presiding officer otherwise may permit:

(1) Evidence with respect to the proposal in general, including such matters as its historical background, the reason for the proposal, and its probable effect. No evidence shall be introduced at this stage of the hearing as to any specific provision of the proposal.

(2) Evidence with respect to specific terms of the proposal, which shall be read and considered section by section in a sequence to be determined by the presiding officer. Suggestions to add to, delete, or alter any portions of a given section of the proposal shall be made as consideration of such section is reached and, insofar as practicable, shall be submitting in writing.

(3) At each stage of the hearing, whether general or specific, evidence shall be received first in support of the proposal, followed by the evidence opposing the proposal.

§ 1.707 *Submission and receipt of evidence.* (a) Each witness shall, before proceeding to testify, be sworn or make affirmation.

(b) When necessary in order to prevent undue prolongation of the hearing, the presiding officer may limit the number of times any witness may testify to the same matter or the repetitious examination and cross-examination of witnesses, or the amount of corroborative or cumulative evidence.

(c) The presiding officer shall admit only relevant and material evidence.

(d) Opinion evidence shall be admitted when the presiding officer is satisfied that the witness is properly qualified.

(e) Affidavits, if relevant and material, shall be received and marked as exhibits, provided they are filed with the presiding officer on or before the date of the opening of the hearing. Every interested person shall be permitted to examine all affidavits which have been so filed and to file counter-affidavits with the presiding officer, within a period of time, to be fixed by the presiding officer, not more than 5 days following the close of the hearing. In any event, the Secretary will consider the lack of opportunity for cross-examination in determining the weight to be attached to statements made in the form of affidavits.

(f) If any person objects to the admission or rejection of any evidence, or other limitation of the scope of any examination or cross-examination, he shall state briefly the grounds of such objection, and the transcript shall not include argument or debate thereon except as ordered by the presiding officer. Any such objection shall be made before the presiding officer in order subsequently to be relied upon in the proceeding. A ruling of the presiding officer on any such objection shall be a part of the transcript, together with such offer of proof as has been made.

(g) Samples may be displayed at the hearing and may be described for purposes of the record but shall not be admitted in evidence as exhibits.

§ 1.708 *Transcript of the testimony.* Testimony given at a hearing shall be reported verbatim. All written statements, charts, tabulations, and similar data offered in evidence at the hearing shall be marked for identification and, upon a showing satisfactory to the presiding officer of their authenticity, relevancy, and materiality, shall be received and marked as exhibits in evidence. Such exhibits (including affidavits) shall, if practicable, be submitted in quintuplicate and in documentary form. In case the required number of copies are not made available, the presiding officer shall exercise his discretion as to whether said exhibit shall when practicable be read in evidence or whether additional copies shall be required to be submitted within a time to be specified by the presiding officer. Where the testimony of a witness refers to a statute, or to a report or document, the presiding officer shall, after inquiry relating to the identification of such statute, report, or document, determine whether the same shall be produced at the hearing and physically be made a part of the evidence as an exhibit or whether it shall be incorporated into the evidence by reference. Where relevant and material matter offered in evidence is embraced in a report or document containing immaterial and irrelevant matter, such immaterial and irrelevant matter shall be excluded and shall be segregated insofar as practicable, subject to the direction of the presiding officer.

§ 1.709 *Oral and written arguments.* (a) Unless the presiding officer shall issue an announcement at the hearing authorizing oral argument before him, it shall not be permitted.

(b) The presiding officer shall announce at the hearing a reasonable period within which interested persons may file written arguments based solely upon the evidence received at the hearing, citing the page or pages of the transcript of the testimony where such evidence occurs.

§ 1.710 *Filing the record of the hearing.* As soon as practicable after the close of the hearing, the complete record of the hearing shall be filed in the office of the hearing clerk. The record of the hearing shall include the transcript of the testimony, including any exhibits and together with any written arguments that may have been filed with the presiding officer.

§ 1.711 *Copies of the record of the hearing.* The Department will make provisions for a stenographic record of the testimony and for such copies of the transcript thereof as it requires for its own purposes. Any person desiring a copy of the record of the hearing or of any part thereof shall be entitled to the same upon application to the hearing clerk and upon payment of the costs thereof. Suggested corrections to transcripts of the testimony shall be considered only if offered within a period (to be fixed by the presiding officer) of not more than 3 days following the completion of the testimony, for which purpose the record shall be kept open for such additional period. The presiding officer shall have authority to act upon such suggested corrections.

ISSUANCE OF ORDER

§ 1.712 *Proposed order.* The Secretary, within a reasonable time after the filing of the record of the hearing, will issue his proposed order, which shall be served upon the interested persons whose appearances were entered at the hearing by publication in the FEDERAL REGISTER or by mailing a copy of the proposed order to each of such persons by registered mail: *Provided, however,* That if, after examination of the record of the hearing, the Secretary finds that no controversy with respect to the subject of the hearing exists between the persons who appeared thereat, and that such action will promote the purposes of the act, the Secretary will issue a final order in lieu of issuing a proposed order in accordance with this section.

§ 1.713 *Exceptions.* Within a reasonable time, which shall be specified in the proposed order but shall not exceed 20 days from the time of the issuance of such order, any interested person whose appearance was filed at the hearing may file exceptions to the proposed order. The exceptions shall point out with particularity the alleged errors in said proposed order, and shall contain a specific reference to the page of the transcript of the testimony or to the exhibit on which each exception is based. Such exceptions may be accompanied by a memorandum brief in support thereof.

§ 1.714 *Final order.* The Secretary thereafter will issue his final order. A duplicate original thereof shall thereupon be filed with the Archivist of the United States and published in the FEDERAL REGISTER. A duplicate original thereof shall also be filed with the hearing clerk for public inspection.

PUBLIC NOTICE OF REGULATIONS

§ 1.715 *Public notice of regulations.* Public notice of the issuance of the foregoing rules of practice for hearings in §§ 1.701–1.714 shall be given by publishing the same in the FEDERAL REGISTER.

PART 3—STATEMENTS OF GENERAL POLICY OR INTERPRETATION

Sec.
3.2 Notice to packers and shippers of shelled peanuts.
3.3 Notice to manufacturers, packers, and distributors of glandular preparations.
3.4 Notice to manufacturers, packers, and distributors of drugs for internal use which contain mineral oil.
3.5 Notice to manufacturers, packers, and distributors of gauze bandages.
3.6 Notice to importers of Peruvian canned fish.
3.7 Notice to manufacturers, packers, and distributors of veterinary preparations and animal feeds.
3.8 Notice to manufacturers, packers, and distributors of penicillin-containing drugs for veterinary use.
3.9 Notice to manufacturers, packers, and distributors of salt substitutes.
3.10 Notice to manufacturers and users in food products of monosodium glutamate.
3.11 Notice to manufacturers, packers, and distributors of estrogenic hormone preparations.
3.12 Temporary permits for interstate shipment of experimental packs of food varying from the requirements of definitions and standards of identity.
3.13 Supplying pharmacists with indications and dosage of drugs.
3.14 Notice to manufacturers and distributors of foods and drugs containing artificial sweeteners.
3.15 Notice to manufacturers and labelers of antibiotic and antibiotic-containing drugs.
3.16 Notice to manufacturers, packers, and distributors of drug products.
3.17 Labeling of oleomargarine.
3.19 Notice to manufacturers, packers, and distributors of pasteurized process cheese, pasteurized blended cheese, pasteurized process cheese food, pasteurized process cheese spread, and related foods.
3.20 Status of salt substitutes under the Federal Food, Drug, and Cosmetic Act.
3.21 Notice to manufacturers of pasteurized process cheese food and pasteurized process cheese spread.
3.22 Suprarenal glands from hog carcasses prior to final inspection.
3.23 Notice to manufacturers and users of monosodium glutamate and other hydrolyzed vegetable protein products.
3.24 Notice to packers of comminuted tomato products.
3.25 Notice to manufacturers and labelers of antibiotic drugs for veterinary use.
3.26 Labeling exemptions for foods repackaged in retail food establishments.
3.27 Status of fluoridated water and foods prepared with fluoridated water under the Federal Food, Drug, and Cosmetic Act.
3.28 Notice to manufacturers and repackers of ophthalmic solutions.
3.29 Direct or indirect addition of antibiotic drugs to foods for human consumption.
3.30 Shipment of antibiotic drugs packaged in bulk containers.
3.31 Label declaration of salt in frozen vegetables.
3.32 Label declarations of vitamin B_{12}, and folic acid in foods for special dietary uses.
3.33 Status of foods containing added coumarin.
3.34 Labeling of imported crabmeat.
3.35 Labeling of drug preparations containing significant proportions of wintergreen oil.
3.36 Procedure for establishing food standards under the Federal Food, Drug, and Cosmetic Act.
3.37 Confidentiality of information contained in new-drug applications.
3.38 Declaration of quantity of contents on labels for canned oysters.
3.39 Use of vegetable fat in products which are imitations of ice cream.
3.40 Pesticide chemicals; date on which statute becomes fully effective.
3.41 Pesticide chemicals; extended dates on which statute shall become fully effective.
3.42 Pesticide chemicals; additional extended dates on which statute shall become fully effective; denial of requests for extensions.
3.43 Labeling of drug preparations containing salicylates.
3.44 Pesticide chemicals; further extended dates on which statute shall become fully effective.
3.45 Sterilization of drugs by irradiation.

AUTHORITY: §§ 3.2 to 3.45 issued under sec. 701, 52 Stat. 1055; 21 U. S. C. 371. Statutory provisions interpreted or applied are cited to text in parentheses.

§ 3.2 *Notice to packers and shippers of shelled peanuts.* Investigations by the Food and Drug Administration have shown that a number of interstate shipments of shelled peanuts in bags holding from approximately 100 to 125 pounds each have failed to bear labeling as required by the terms of the Federal Food, Drug, and Cosmetic Act.

Shelled peanuts in sacks, whether or not shipped in carload lots, should bear the following information required by the law on food in package form:

(a) The name of the product.

(b) An accurate statement of net weight.

(c) The name and place of business of the packer or distributor.

This information should be conspicuously set forth. It may be printed or stenciled on each bag or, if desired, placed on tags which are securely attached to each bag.

The net weight marked on the bags must be the correct net weight of the peanuts at the time they are delivered to the carrier for interstate shipment. The tare weight of the bag should not be included in the weight declaration.

§ 3.3 *Notice to manufacturers, packers, and distributors of glandular preparations.* Under date of December 4, 1941, in a notice to manufacturers of glandular preparations, the Food and Drug Administration expressed the opinion that preparations of inert glandular materials intended for medicinal use should, in view of the requirement of section 201 (n) of the Federal Food, Drug, and Cosmetic Act (52 Stat. 1041; 21 U. S. C. 321 (n)), be labeled with a statement of the material fact that there is no scientific evidence that the articles contain any therapeutic or physiologically active constituents. Numerous preparations of such inert glandular materials were subsequently marketed with disclaimers of the type suggested. The term "inert glandular materials" means preparations incapable of exerting an action or effect of some significant or measurable benefit in one way or another, i. e., in the diagnosis, cure, mitigation, treatment, or prevention of disease, or in affecting the structure or any function of the body.

Manufacturers have heretofore taken advantage of regulation (b) under section 502 (f) of the act (§ 1.106 (b) of this chapter), permitting omission of directions for use where the so-called "prescription only" legend was placed upon the labels. This regulation was amended, effective October 10, 1945. Among the conditions now authorizing the omission of directions for use, § 1.106 (b) (3) of this chapter, is the following: "Information adequate for the use of such drug • • • by physicians, dentists, or veterinarians, as the case may be, is readily available." Obviously, information adequate for the use of a glandular preparation which is inert is not available to physicians, dentists, or veterinarians.

The Department of Health, Education, and Welfare is of the opinion that inert glandular materials may not be exempted from the requirements of section 502 (f) (1) of the act that they bear adequate directions for use; and, accordingly, that their labeling must include, among other things, representations as to the conditions for which such articles are intended to be used or as to the structure or function of the human body that they are intended to affect. Since any such representations offering these articles for use as drugs would be false or misleading, such articles will be considered to be misbranded if they are distributed for use as drugs.

The amended regulations provide also that in the case of drugs intended for parenteral administration there shall be no exemption from the requirement that their labelings bear adequate directions for use. Such inert glandular materials for parenteral use are therefore subject to the same comment as applies to those intended for oral administration.

§ 3.4 *Notice to manufacturers, packers, and distributors of drugs for internal use which contain mineral oil.* In the past few years research studies have altered medical opinion as to the usefulness and harmfulness of mineral oil in the human body. These studies have indicated that when mineral oil is used orally near mealtime it interferes with absorption from the digestive tract of provitamin A and the fat-soluble vitamins A, D, and K, and consequently interferes with the utilization of calcium and phosphorus, with the result that the user is left liable to deficiency diseases. When so used in pregnancy it predisposes to hemorrhagic disease of the newborn.

There is accumulated evidence that the indiscriminate administration of mineral oil to infants may be followed by aspiration of the mineral oil and subsequent "lipoid pneumonia."

In view of these facts, the Department of Health, Education, and Welfare will regard as misbranded under the provisions of the Federal Food, Drug, and Cosmetic Act a drug for oral administration consisting in whole or in part of mineral oil, the labeling of which encourages its use in pregnancy or indicates or implies that such drug is for administration to infants.

It is also this Department's view that the act requires the labelings of such drugs to bear a warning against consumption other than at bedtime and against administration to infants. The following form of warning is suggested: "Caution: To be taken only at bedtime. Do not use at any other time or administer to infants, except upon the advice of a physician."

This statement of interpretation does not in any way exempt mineral oil or preparations containing mineral oil from complying in all other respects with the requirements of the Federal Food, Drug, and Cosmetic Act.

§ 3.5 *Notice to manufacturers, packers, and distributors of gauze bandages.* The twelfth revision of the United States Pharmacopeia established a packaging specification standard for adhesive absorbent gauze (adhesive absorbent compress) which read: "Adhesive absorbent gauze must be packaged individually in such manner that the sterility is maintained until the individual package is opened for use, and the individual packages must be grouped in a second protective container." This specification, with slight modifications in the wording, appears in the thirteenth revision of the United States Pharmacopeia, which is now official.

At the time the standard was first promulgated representations were made to the Food and Drug Administration that, due to the existence of war priorities, it was impossible for manufacturers to obtain the machinery needed to wrap the bandages individually. In view of the priority situation existing at that time, the Administration informed manufacturers generally that until conditions changed no legal actions would be inaugurated under the provisions of the Federal Food, Drug, and Cosmetic Act based solely on the failure to wrap adhesive gauze bandages individually.

Recent investigations have revealed that most manufacturers have obtained the machinery needed for the individual wrapping of such bandages or have been promised early delivery of such machinery. It will be the purpose of the Department of Health, Education, and Welfare to recommend legal actions in instances where United States Pharmacopeia packaging requirements are not complied with after July 1, 1948.

§ 3.6 *Notice to importers of Peruvian canned fish.* In collaboration with the United States Department of State and officials of the Government of Peru, the Food and Drug Administration of the Department of Health, Education, and Welfare has made a study in Peru of the canning of bonito and tuna packed for exportation to the United States. The fish known in Peru as bonito constitutes a major portion of the pack. Representative specimens of Peruvian bonito have been identified as the species Sarda chilensis. This confirms previous information that the species of fish constituting the commercial bonito fishery in Peru is the same species of bonito that has been packed in this country in small quantities and sold as bonito, for many years. Minor quantities of another bonito, Sarda velox, are apparently caught in Peruvian waters but do not enter the commercial pack to any significant degree. The bonitos, Sarda chilensis and Sarda velox, are not classified as tuna and under the provisions of the Federal Food, Drug, and Cosmetic Act have never been legally labeled as tuna, but must be labeled as "bonito" or "bonito fish."

Two species of tuna, "skipjack" (Katsuwonus pelamis) and "yellowfin" (Thunnus macropterus), are commercially canned in Peru but constitute a relatively small proportion of the Peruvian pack of canned fish exported to the United States.

Information developed during the investigation in Peru shows that the bonito (Sarda chilensis) can be readily distinguished from the tunas. Consequently no difficulty should be encountered by packers in keeping separate the fish in the two classifications and in properly labeling the canned product before shipment.

The provisions of the Federal Food, Drug, and Cosmetic Act require that importations of canned bonito and canned tuna, when offered for entry into the United States, must bear labels designating the product as "bonito" or as "tuna", as the case may be. Shipments that are unlabeled or mislabeled when offered for entry must be detained and are subject to refusal of admission, with consequent exportation or destruction.

§ 3.7 *Notice to manufacturers, packers, and distributors of veterinary preparations and animal feeds.* A number of products have been developed to promote fattening, increase milk or egg production, or effect other physiological changes in farm animals. Many of these compounds contain as active ingredients substances the toxicity of which is known to be of a high order. For example, thiouracil, a very potent drug, has been proposed for use to promote fattening. When such substances are added to food they render the food adulterated under section 402 (a) of the Federal Food, Drug, and Cosmetic Act.

The Department of Health, Education, and Welfare regards sections 402 (a) (2) and 406 of the act as clear enunciations of congressional intent to deny the channels of interstate commerce to food containing added poisonous or deleterious ingredients which are unnecessary in its production or which can be avoided by good manufacturing practice.

Since these compounds are intended to affect the structure or function of the body of animals and have not been previously used for such purposes, they are regarded as new drugs, requiring the submission of adequate evidence of their safety, as required by section 505 of the act, before being marketed in interstate commerce.

In considering a new-drug application for a product intended to effect physiological changes in farm animals, the Department of Health, Education and Welfare will regard the absence of satisfactory evidence showing that the meat or other food obtained from animals fed the drug is entirely free of any poisonous or deleterious ingredient resulting therefrom at the time of marketing as ground for refusal to make the application effective.

§ 3.8 *Notice to manufacturers, packers, and distributors of penicillin-containing drugs for veterinary use.* Since the release on October 5, 1945, of the notice to manufacturers and distributors of veterinary penicillin and a circular entitled "Indications, Directions and Precautions Suggested for Inclusion in the Labeling of Sodium and Calcium Penicillin for Veterinary Use" and the supplemental material released on April 25, 1946, much additional information has accumulated relative to the use of penicillin in animals. However, the knowledge concerning the efficacy and limitations of penicillin for treating various disease conditions of animals is far from being complete. Therefore this statement, which is intended to supersede previously released information on the labeling of penicillin-containing drugs for veterinary use, is in the nature of a tentative guide to be used in conjunction with the penicillin regulations for labeling penicillin for veterinary use. As the knowledge of the efficacy and limitations of penicillin for treating animals is expanded there will be further releases relating to the labeling of such drugs. It is believed, however, that at the present time claims made in the labeling of penicillin intended for veterinary use should not exceed those suggested in this section.

Penicillin, under laboratory conditions, has pronounced potency against a wide range of organisms, including the following of interest to veterinarians: most strains of streptococci, staphylococci, clostridia, corynebacteria, Bacillus anthracis, Actinomyces bovis, Erysipelothrix rhusiopathiae, and leptospira. Penicillin is ineffective in infections caused by gram-negative bacilli, viruses, and occasional resistant strains of organisms which are usually regarded as susceptible to penicillin.

(a) *Indications.* There is conclusive scientific evidence establishing the therapeutic efficacy of penicillin for bovine mastitis caused by Streptococcus agalactiae. Good results have been reported in the use of penicillin for mastitis caused by strains of Streptococcus dysgalactiae. Results of treatment are no more than fair in mastitis caused by Streptococcus uberis and staphylococci; poor in cases caused by corynebacteria. Mastitis caused by colon bacilli does not respond to penicillin therapy. Reliable reports provide a supportive basis for recommending the use of penicillin for the following disease conditions: leptospirosis of dogs, osteomyelitis, peritonitis, strangles of horses, equine pneumonia, tetanus in the very early stage (with antitoxin), calf pneumonia, calf diphtheria, pyelonephritis in cattle, blackleg, malignant edema, anthrax in the very early stage, metritis, bovine actinomycosis, swine erysipelas in turkeys, and superficial infections of the skin caused by penicillin-sensitive organisms. It should be remembered that proper use of effective therapy depends on an accurate diagnosis of the disease condition to be treated.

(b) *Methods of administration*—(1) *By injection.* Deep intramuscular injection is the route of choice when using the parenteral forms of penicillin for systemic therapy. Subcutaneous injections are apt to be painful and are therefore usually avoided. When penicillin in oil or penicillin in oil and wax is injected care should be taken that the needle is not in a blood vessel before discharging the contents of the syringe.

(2) *By mouth.* Since penicillin is inactivated by gastric secretion, it cannot be given by mouth unless precautions are taken to neutralize the process in the stomach. This may be accomplished through the use of buffered penicillin tablets given at least ½ hour before and not less than 2 hours after eating. The therapeutic efficacy of these tablets will vary in different individuals and according to the amount of active penicillin absorbed. As a general rule, the amount of penicillin required for effective therapy when given by mouth is five times the amount required by injection. With the possible exception of small-animal practitioners, veterinarians will probably find it impracticable to use penicillin in this form. Buffered penicillin tablets may be of value in some cases in which it is not possible to administer the drug by injection at the required intervals and in others after the disease has been brought under control by penicillin injections, and it is desirable to continue the use of the drug. The tablets may be given alone or as a supplement to parenteral therapy. In all serious conditions, however, parenteral administration is the recommended route.

(3) *By topical application.* Topical application includes direct injection of penicillin suspended in suitable vehicles into udders through the teat canal, into abscesses, joint capsules, body cavities, the spinal canal, and direct application to the skin and eyes. The underlying purpose of this method is to insure effective therapeutic concentrations of the drug in local areas of infection. In many instances it may be used as an adjunct to parenteral injections. However, after parenteral injection penicillin does not penetrate readily to the eyes, into spinal fluid, or, unless in extremely high unitage, into the milk. Therefore the topical method appears to be the only practicable one of treating local infections involving the eyes, spinal canal, or udder.

(c) *Dosage*—(1) *Systemic infections.* For therapy of systemic infections caused by most strains of penicillin-sensitive organisms a minimum of 2,000 units per pound of body weight should be administered, preferably by intramuscular injection. Further information concerning this recommendation may be obtained by request from the Food and Drug Administration. The required dosage of water-soluble salts of penicillin dissolved in proper aqueous solvents should be repeated every 3 to 4 hours to establish and maintain effective therapeutic concentrations of the drug in the body fluids and tissues. The necessary amount of penicillin in oil and wax should be given every 12 hours. The indicated quantity of procaine penicillin in oil or of certain of the newer certifiable repository penicillin products may be given as infrequently as once every 24 hours or longer. However, severe infections or infections caused by less sensitive organisms may require up to double the minimum dosage or more frequent injections or both. Since the objective of penicillin therapy is to bring the infection under control as quickly as possible, the minimum dosage or frequency of injection or both should be increased materially in all conditions known to be caused by sensitive organisms if no definite indication of clinical improvement is noticed 12 to 14 hours after the initial injection.

(2) *Bovine Streptococcus agalactiae mastitis.* Effective treatment of udders infected with penicillin-sensitive organisms depends on maintaining therapeutically effective concentrations of penicillin in the area of infection. Available experimental data indicate that the following methods for introducing adequate amounts of the drug into infected quarters can be depended upon to overcome the infection in a majority (75 percent or more) of Streptococcus agalactiae mastitis cases:

(i) Aqueous solutions (sodium, calcium, or crystalline penicillin dissolved in sterile distilled water):

(*a*) Inject 25,000 to 30,000 units under aseptic conditions through the teat canal into each infected quarter. Repeat after each milking or once every 12 hours until five to seven injections have been made. One repeat injection may be sufficient in the chronic form without induration.

(*b*) In cows producing up to 40 pounds of milk per day a total of 100,000 units per infected quarter administered as five injections of 20,000 units each at intervals of 12 hours or as four injections of 25,000 units each at intervals of 24 hours. In cows producing more than 40 pounds of milk per day or in acute cases a total of 200,000 units per infected quarter administered as four injections of 50,000 units each at intervals of 24 hours. It may be desirable to skip one milking after the last injection in the series to prolong a therapeutic concentration of penicillin in the treated quarters. Volume of vehicle should be adequate to favor immediate distribution throughout the cistern area. Usually 50 cc. is adequate.

(*c*) Large udders: First day, 200,000 units per infected quarter; second and

third days, 100,000 units per infected quarter each day. Small to moderate-sized udders: First day, 100,000 units per infected quarter; second and third days, 50,000 units per infected quarter each day. All quarters infected with Streptococcus agalactiae at the time of drying off should be infused with 100,000 to 200,000 units sometime during the dry period, preferably during the interval between 2 weeks after the last milking and 3 weeks before parturition.

(ii) Emulsified solutions (soluble salts of penicillin dissolved in oil and water emulsified with lanolin derivatives): Inject 100,000 units under aseptic conditions through the teat canal into each infected quarter. Repeat treatment if subsequent bacteriological examination shows infection to be still present.

(iii) Bougies (25,000 or more units of sodium, calcium, potassium, or procaine penicillin in a milk-soluble base shaped in slender, elongated form to permit easy insertion into the milk cistern of the udder through the teat canal). Aseptically insert one bougie into each infected quarter after each milking for as long as the infection persists.

(iv) Oil and wax suspensions (calcium or crystalline penicillin in refined peanut or sesame oil and white wax) and ointments (calcium or crystalline penicillin in an ointment base suitable for udder instillation). In view of the scarcity of information concerning this use of such products, basic directions for use may be different in individual cases. Adequacy of directions as a whole depends primarily on the penicillin potency of each product and the nature of supportive data.

(3) *General.* Whenever practicable, accurate diagnosis should be established by identification of the causative organism. No case of mastitis should be considered cured unless bacteriological examination of the milk taken from treated quarters approximately 3 weeks after the last application of penicillin shows the absence of causative organisms. Augmenting penicillin therapy with proper surgical treatment yields best results when treating abscesses, empyema, suppurative arthritis, and infections of body cavities and joints caused by penicillin-sensitive organisms. Collections of pus should be removed prior to each local application of 25,000 to 50,000 units of penicillin in sterile aqueous solution two to three times every 24 hours. Sterile dressings, saturated with an aqueous solution containing at least 1,000 units of penicillin per milliliter, applied one or more times per day as the condition indicates, may be effective for treating superficial infections of the skin caused by penicillin-sensitive organisms. If indicated, supplement local therapy with systemic medication.

(d) *Precautions.* If reactions occur which cannot be adequately controlled and are more serious than the condition being treated, use of the drug should be discontinued.

§ 3.9 *Notice to manufacturers, packers, and distributors of salt substitutes.* The recent reported poisonings from salt substitutes containing lithium chloride have focused attention upon this entire field. Salt substitutes have been regarded in the past as special dietary foods. They are also drugs, since they are employed in the mitigation and treatment of disease. There is considerable doubt as to the safety of unrestricted use of any salt substitute in the presence of cardio-vascular-renal disease and a low sodium diet. Consequently, the Department of Health, Education, and Welfare believes that each salt substitute is a new drug within the meaning of section 201 (p) of the Federal Food, Drug, and Cosmetic Act. The interstate distribution of each salt substitute should be discontinued until a new-drug application has been filed and has become effective with respect to the substitute.

§ 3.10 *Notice to manufacturers and users in food products of monosodium glutamate.* In the light of information now before the Food and Drug Administration on the manner of use of monosodium glutamate in foods, this Agency is not disposed to maintain the position previously expressed by it on April 11, 1940, in a trade correspondence letter designated as TC 23[illegible] that monosodium glutamate be designated as an artificial flavoring on labels of foods to which it is added. Where it is used as an ingredient in a food for which a standard of identity has not been promulgated under the Federal Food, Drug, and Cosmetic Act, its presence should be declared on the label by its common or usual name, monosodium glutamate, in compliance with section 403 (i) (2) of the act. Since none of the standards of identity for food so far promulgated under section 401 provide for the inclusion of monosodium glutamate as an optional ingredient, this substance may not be used in such standardized foods unless and until the appropriate standards are amended after hearing. If in any case the addition of monosodium glutamate has the effect of concealing damage or inferiority, or of making the article appear to be of better or greater value than it is, the article would be classed as adulterated regardless of labeling.

§ 3.11 *Notice to manufacturers, packers, and distributors of estrogenic hormone preparations.* Some drug preparations fabricated wholly or in part from alpha-estradiol and labeled as to potency in terms of international units or in terms of international units of estrone activity have been marketed. The international unit of the estrus-producing hormone was established by the International Conference on the Standardization of Sex Hormones at London, England, on August 1, 1932. This unit was defined as "the specific estrus-producing activity contained in 0.1 gamma (=0.0001 mg.) of the standard" hydroxyketonic hormone found in urine (estrone). The International Conference declared that it did not recommend the determination of the activity of non-hydroxyketonic forms of estrogenic hormones in units of estrone because of the varying ratios between the activity of such non-hydroxyketonic estrogenic hormones and estrone, when measured by different methods on test animals. There is no international unit for measuring the activity of alpha-estradiol and no accepted relationship between its activity and that of estrone, either in test animals or in humans. The declaration of potency of alpha-estradiol in terms of international units or in terms of international units of estrone activity is therefore considered misleading, within the meaning of 21 U. S. C. 352 (a). The declaration of the alpha-estradiol content of an estrogenic hormone preparation in terms of weight is considered appropriate.

§ 3.12 *Temporary permits for interstate shipment of experimental packs of food varying from the requirements of definitions and standards of identity.* (a) The Department of Health, Education, and Welfare recognizes that appropriate investigations of potential advances in food technology sometimes require tests in interstate markets of the advantages to and acceptance by consumers of variations in foods from applicable definitions and standards of identity prescribed under section 401 of the Federal Food, Drug, and Cosmetic Act.

(b) It is the purpose of the Department to permit such tests where they are necessary to the completion or conclusiveness of an otherwise adequate investigation and where the interests of consumers are adequately safeguarded. The Department will therefore refrain from recommending regulatory proceedings under the act on the charge that a food does not conform to an applicable standard, if the person who introduces or causes the introduction of the food into interstate commerce holds an effective permit from the Secretary providing specifically for those variations in respect to which the food fails to conform to the applicable definition and standard of identity.

(c) Any person desiring a permit may file with the Secretary a written application in triplicate containing as part thereof the following:

(1) Name and address of the applicant.

(2) A statement of whether or not the applicant is regularly engaged in producing the food involved.

(3) A reference to the applicable definition and standard of identity (citing applicable section of regulations).

(4) A full description of the proposed variation from the standard.

(5) The basis upon which the food so varying is believed to be wholesome and nondeleterious.

(6) The amount of any new ingredient to be added; the amount of any ingredient, required by the standard, to be eliminated; any change of concentration not contemplated by the standard; or any change in name that would more appropriately describe the new product under test. If such new ingredient is not a commonly known food ingredient, a description of its properties and basis for concluding that it is not a deleterious substance.

(7) The purpose of effecting the variation.

(8) A statement of how the variation is of potential advantage to consumers.

(9) The labeling proposed to be used for the food so varying.

(10) The period during which the applicant desires to introduce such food into interstate commerce, with a statement of the reasons supporting the need for such period.

(11) The probable amount of such food that will be distributed.

(12) The area of distribution.

(13) The address at which such food will be manufactured.

(14) A statement of whether or not such food has been or is to be distributed in the State in which it was manufactured.

(15) If it has not been or is not to be so distributed, a statement showing why.

(16) If it has been or is to be so distributed, a statement of why it is deemed necessary to distribute such food in other States.

(d) The Secretary may require the applicant to furnish samples of the food varying from the standard and to furnish such additional information as may be deemed necessary for action on the application.

(e) If the Secretary concludes that the variation may be advantageous to consumers and will not result in failure of the food to conform to any provision of the act except section 403 (g), a permit shall be issued to the applicant for interstate shipment of such food. The terms and conditions of the permit shall be those set forth in the application with such modifications, restrictions, or qualifications as the Secretary may deem necessary and state in the permit.

(f) The terms and conditions of the permit may be modified at the discretion of the Secretary or upon application of the permittee during the effective period of the permit.

(g) The Secretary may revoke a permit for cause, which shall include but not be limited to the following:

(1) That the permittee has introduced a food into interstate commerce contrary to the terms and conditions of the permit.

(2) That the application for a permit contains an untrue statement of a material fact.

(3) That the need therefor no longer exists.

(h) During the period within which any permit is effective, it shall be deemed to be included within the terms of any guaranty or undertaking otherwise effective pursuant to the provisions of section 303 (c) of the act.

(i) If an application is made for an extension of the permit, it shall be accompanied by a description of experiments conducted under the permit, tentative conclusions reached, and reasons why further experimental shipments are considered necessary.

(Secs. 401, 403, 52 Stat. 1046, 1047; 21 U. S. C. 341, 343)

§ 3.13 *Supplying pharmacists with indications and dosage of drugs.* (a) This Department is aware of statements that the regulations covering prescription drugs prevent the manufacturer from sending the pharmacist data he needs on indications and dosage in exercising his important professional function of checking against possible mistakes in the prescription.

(b) These regulations emphasize the importance of the profession of pharmacy; they are not intended to deprive the pharmacist of information necessary to the discharge of his professional duty of insuring the integrity of the drugs he dispenses on prescription.

(c) To discourage attempts at self-medication with drugs which the layman cannot safely and effectively use without the physician's guidance and which therefore should be dispensed only on doctor's orders, the regulations provide that the labeling of such drugs shall not bear indications or directions, except that the prescription package should bear the directions specified in the prescription. The law defines labeling as written, printed, or graphic matter accompanying the drug.

(d) The courts have given a broad interpretation to the definition of labeling, holding it to cover all pamphlets and the like used to inform consumers what the drug is for and how it is to be used. The Department of Health, Education, and Welfare regards the supplying of printed matter to the pharmacist for his professional information, and not as a means of over-the-counter sales promotion, such as by display to prospective purchasers, as a legitimate means of making information necessary for professional use readily available. This Department has no intention of recommending action based on the supplying or use of such material for that professional purpose.

§ 3.14 *Notice to manufacturers and distributors of foods and drugs containing artificial sweeteners.* Chronic-toxicity studies conducted by the Department of Health, Education, and Welfare show that the artificial sweeteners dulcin (also known as sucrol, or 4-ethoxyphenylurea, or paraphenetolcarbamide) and P–4000 (also known as 1-n-propoxy-2-amino-4-nitrobenzene) cause injury to rats when fed at relatively low levels for approximately 2 years. Consequently, the Secretary of Health, Education, and Welfare regards these chemicals as poisonous substances which have no place in any food.

Pending further evaluation of available data, it is not possible to state the conditions under which dulcin or P–4000 would render a drug in which it is used dangerous to health. Since other artificial sweeteners are available which have a much greater margin of safety in chronic-toxicity studies, the use of dulcin and P–4000 as sweeteners of drugs is to be discouraged.

§ 3.15 *Notice to manufacturers and labelers of antibiotic and antibiotic-containing drugs.* Recent investigations by the Department of Health, Education, and Welfare have revealed that a number of persons engaged in manufacturing and selling antibiotic and antibiotic-containing drugs are introducing into interstate commerce shipments of these drugs that are unlabeled, or not fully labeled, and are not exempt from labeling under the provisions of § 146.18 of this chapter. This practice has been based upon the belief that interstate shipments of antibiotic and antibiotic-containing drugs to persons engaged in the export trade are not subject to certification.

When these drugs are introduced into interstate commerce they must be certified, exempted from labeling under § 146.18, of this chapter, or exempted from misbranding by meeting all the conditions specified in section 801 (d) of the Federal Food, Drug, and Cosmetic Act (21 U. S. C. 381 (d)). Section 801 (d) of the act is not satisfied merely by shipment of drugs to exporters. If exemption under this section is to be claimed, the drugs, at the time of introduction into interstate commerce, must be marked for export, must accord to the specifications of the foreign purchaser, and must not be in conflict with the laws of the country to which they are intended for export. The initial shipper has a responsibility to meet all the conditions of section 801 (d) if exemption is to be claimed. It is not enough that he is shipping to a person engaged in the export trade who will obtain a foreign purchaser, who will mark the goods for export, and who will obtain assurance that the drug is not in conflict with the laws of the country to which it is intended for export.

Section 146.18 of this chapter provides exemption from labeling. If the original shipper has an effective exemption permit under the regulations in Part 146, the exporting firm named in the exemption permit may be allowed to receive and to hold the unlabeled drugs under the exemption until the conditions of section 801 (d) of the act are satisfied.

§ 3.16 *Notice to manufacturers, packers, and distributors of drug products.* Conferences have recently been held between members of the Department of Health, Education, and Welfare and representatives of the Agricultural Research Service, Department of Agriculture, concerning requests made to that agency for the release of ox bile from condemned livers of slaughtered animals for use in the manufacture of certain drugs.

The Secretary of Health, Education, and Welfare has given careful consideration to this problem and has reached the conclusion that no hazard to public health will be involved in the release of such ox bile, after the addition to it of sufficient sodium hydroxide to give the mixture a sodium hydroxide content of not less than 5 percent, the mixture then being allowed to stand at least 24 hours. This Department will not regard as in violation of the provisions of the Federal Food, Drug, and Cosmetic Act such alkalized and aged ox bile, if labeled "Ox Bile and Sodium Hydroxide (or Ox Bile and Sodium Hydroxide Solution). Sodium hydroxide not less than 5 percent by weight. For manufacturing use only," together with a statement of the quantity of contents in the container (for example, "50 gallons") and the name and address of the manufacturer, packer, or shipper.

Bile from the condemned livers of sheep and goats also may be released, under the same conditions as outlined in the preceding paragraph, except that the words "Sheep Bile" or "Goat Bile,"

as the case may be, shall be substituted for the words "Ox Bile" upon the label. In the case of mixtures of bile from any two or all three of the sources mentioned, the label shall indicate the sources of such bile.

§ 3.17 *Labeling of oleomargarine.* The Federal Food, Drug, and Cosmetic Act was amended by the recently enacted legislation (64 Stat. 20) on colored oleomargarine. A new section numbered 407 was added. Among other things, the new section requires that there appear on the label of the package the word "oleomargarine" or "margarine" in type or lettering at least as large as any other type or lettering on such label, and a full and accurate statement of all the ingredients contained in such oleomargine or margarine. It provides that these requirements "shall be in addition to and not in lieu of any of the other requirements of this Act."

(a) Under section 403 (g) of the Federal Food, Drug, and Cosmetic Act any article that is represented as or purports to be oleomargarine must conform to the definition and standard of identity for oleomargarine promulgated under section 401 of the act (Part 45 of this chapter), and its label must bear the name "oleomargarine," which is the name specified in the standard. It is this Department's view that the name "oleomargarine" should appear on the label, until the standard is amended.

(b) While under the provisions of the identity standard for oleomargarine only certain of the optional ingredients authorized by the standard are required to be declared on the label, section 407 requires, in the case of colored oleomargarine, "a full and accurate statement of all the ingredients contained in such oleomargarine or margarine." The following optional ingredients authorized by the identity standard for oleomargarine and the names by which we believe such ingredients, when present, should be declared in order to constitute "a full and accurate statement" are set forth below:

(1) The rendered fat, or oil, or stearin derived therefrom (any or all of which may be hydrogenated), of cattle, sheep, swine, or goats, or any combination of two or more of such articles—to be declared by the name of the specific animal fat, oil, or stearin, for example, "beef fat."

(2) Any vegetable food fat or oil, or oil or stearin derived therefrom (any or all of which may be hydrogenated), or any combination of two or more of such articles—to be declared as, for example, "cottonseed oil" or "soybean oil," or if such oils are present in the same batch or lot, as "cottonseed oil, soybean oil, peanut oil, and corn oil," listing the predominating oils of the mixture ahead of those which are present in much smaller quantities. If the oil or oils present are hydrogenated, the declaration should be, for example, "hydrogenated cottonseed oil" or "hardened cottonseed oil."

(3) The optional ingredients cream, milk, skim milk, or dried skim milk (nonfat dry milk solids or defatted milk solids) and water, butter, and salt should be declared by those terms.

(4) Artificial color and artificial flavor should be declared as such by the terms prescribed in the identity standard for oleomargarine. They need not be additionally declared by the names of the specific colors or flavors.

(5) The presence of sodium benzoate or benzoic acid should be declared as prescribed by the identity standard for oleomargarine.

(6) The optional ingredient vitamin A added in an essential carrier may be declared merely as "vitamin A added" or "with added vitamin A."

(7) The optional ingredient vitamin D may be declared as "vitamin D added" or "with added vitamin D."

(8) The optional emulsifying ingredients lecithin, mono- or diglycerides and sodium sulfo-acetate derivatives of mono- or diglycerides should be declared by those terms.

(9) The statement of all the ingredients contained in colored oleomargarine is subject to the requirements pertaining to conspicuousness in section 403 (f) of the act.

(c) In considering the requirement that the word "oleomargarine" be in type or lettering at least as large as any other type or lettering on the label, it must be borne in mind that other factors than mere height of lettering are involved. The type or lettering of the word "oleomargarine" should be compared with other type or lettering from the standpoint of:

(1) The area occupied by each letter as measured by a closely fitting rectangle drawn around it. The area of such rectangle with respect to any of the letters in the word "oleomargarine" should equal or exceed the area of such rectangle applied to the same or a corresponding letter elsewhere on the label. A single letter may be the largest type on the label, in which case each letter in the word "oleomargarine" must be at least as large as that letter.

(2) The boldness of letters, or breadth of the lines forming the letters which constitute factors in determining largeness. The letters in the word "oleomargarine" should equal or exceed in boldness and prominence that of the same or corresponding letters elsewhere on the label.

(d) Colored oleomargarine containing the optional ingredients vitamin A and/or vitamin D continues to be subject to the labeling requirements of section 403 (j) of the act pertaining to foods for special dietary use.

(e) The word "oleomargarine" (and thus the other information called for by the statute) should appear on each panel of the package label which might reasonably be selected by the grocer for display purposes at the point of sale.

(f) The colored-oleomargarine amendment states that "for the purposes of this section [section 15 of the Federal Trade Commission Act, as amended] and section 407 of the Federal Food, Drug, and Cosmetic Act, as amended, the term 'oleomargarine' or 'margarine' includes (1) all substances, mixtures, and compounds known as oleomargarine or margarine; (2) all substances, mixtures, and compounds which have a consistence similar to that of butter and which contain any edible oils or fats other than milk fat if made in imitation or semblance of butter." Notwithstanding the difference between this definition and the definition and standard of identity for oleomargarine promulgated under section 401 of the act, it was the clear intent of Congress that any article which is represented as or purports to be oleomargarine and which fails to comply with the definition and standard of identity for oleomargarine is misbranded under section 403 (g), even though it may meet the new statutory definition. This ban on an article which fails to comply with the definition and standard of identity for oleomargarine heretofore has not applied to colored or uncolored oleomargarine sold within the same State in which manufactured. By the terms of the new section 407 colored oleomargarine or colored margarine which is sold in the same State or Territory in which it is produced is subject in the same manner and to the same extent to the provisions of this act as if it had been introduced into interstate commerce.

(g) Section 407 (b) (4) requires that each part of the contents of the package be "contained in a wrapper which bears the word 'oleomargarine' or 'margarine' in type or lettering not smaller than 20-point type." We interpret this to mean that the height of the actual letters is not less than 20 points, or 20/72 of 1 inch.

(h) Since wrapped quarter-pound sticks of oleomargarine may constitute units of retail sale, they should be individually labeled with all the mandatory label information required by sections 403 and 407 of the Food, Drug, and Cosmetic Act, just as in the case of 1-pound cartons.

§ 3.19 *Notice to manufacturers, packers, and distributors of pasteurized process cheese, pasteurized blended cheese, pasteurized process cheese food, pasteurized process cheese spread, and related foods.* (a) Definitions and standards of identity have recently been promulgated under the authority of the Federal Food, Drug, and Cosmetic Act for a number of foods made in part from cheese, including pasteurized process cheese; pasteurized process cheese with fruits, vegetables, or meats; pasteurized blended cheese; pasteurized process cheese food; pasteurized process cheese spread, and related foods. These standards prescribe the name for each such food. The act requires that this name appear on the label. Many of these names consist of several words. In the past it has been the practice of some manufacturers to subordinate the words "pasteurized," "blended," "process," "food," and "spread" to give undue prominence to the word "cheese" and to words naming the variety of cheese involved.

(b) When placing the names of these foods on labels so as to comply with the requirements of section 403 (a), (f), and (g) of the act, all the words forming the name specified by a definition and standard of identity should be given equal prominence. This can readily be accomplished by printing the specified name of the food in letters of the same size, color, and style of type, and with the same background.

(c) Where the names of optional ingredients are required to appear on the label, the designations of all such ingredients should be given equal prominence. The names of the optional ingredients should appear prominently and conspicuously but should not be displayed with greater prominence than the name of the food. The word "contains" may precede the names of the optional ingredients, and when so used will not be considered as intervening printed matter between name of food and name of optional ingredients required to be placed on the label.

(d) Where a manufacturer elects to include a label statement of fat and moisture content, the declaration should be on the basis of the food as marketed. A fat declaration on a moisture-free basis is likely to be misleading, and should not be used in labeling.

§ 3.20 *Status of salt substitutes under the Federal Food, Drug, and Cosmetic Act.* Under date of March 8, 1949, the Department of Health, Education, and Welfare announced (§ 3.9) that it would regard each salt substitute as a new drug within the meaning of section 201 (p) of the Federal Food, Drug, and Cosmetic Act, and that interstate distribution of each salt substitute should be discontinued until a new-drug application had been filed and become effective. Substantial information concerning the safety of many of the ingredients used in salt substitutes has been developed and published since the announcement was made. It is now possible to evaluate the safety of many individual salt substitutes and to determine whether they are new drugs requiring effective applications prior to distribution in interstate commerce.

The Department of Health, Education, and Welfare therefore no longer regards all salt substitutes as new drugs. Upon request, the Department will express its opinion as to whether a new-drug application is necessary for any particular product if complete information concerning its composition and proposed labeling is submitted.

§ 3.21 *Notice to manufacturers of pasteurized process cheese food and pasteurized process cheese spread.* Regulations establishing definitions and standards of identity for pasteurized process cheese food and pasteurized process cheese spread appear in §§ 19.765 and 19.775 of this chapter, respectively. These regulations became effective on February 24, 1951.

An application has been received from a substantial portion of the interested industry proposing to amend these regulations to permit skim milk cheese for manufacturing as an optional ingredient in these foods. Alternative ways of amending the regulations are suggested: (1) To permit skim milk cheese for manufacturing as an optional cheese ingredient under paragraph (c) of each of the sections; or (2) To permit skim milk cheese for manufacturing as an optional dairy ingredient under paragraph (d) of each of the sections.

A hearing to take evidence on these proposals will be called as soon as practicable. Pending such a hearing and the issuance of an order resulting therefrom, the Department of Health, Education, and Welfare will not recommend action against pasteurized process cheese foods or pasteurized process cheese spreads solely because they include skim milk cheese for manufacturing as part of the optional cheese or dairy ingredients. Such foods must comply with other requirements of the existing regulations as well as the general provisions of the law.

§ 3.22 *Suprarenal glands from hog carcasses prior to final inspection.* The Agricultural Research Service of the U. S. Department of Agriculture has informed the Food and Drug Administration of the Department of Health, Education, and Welfare that, under appropriate conditions, it will permit the removal of suprarenal glands from hogs that have not been finally inspected by Federal inspectors. The glands to be so obtained are intended for use in manufacturing extracts containing one or more of the therapeutically useful constitutents of suprarenal glands.

Under the conditions specified in this section, the Secretary of Health, Education, and Welfare has determined that the public health will be adequately protected from any danger from the use of drugs, made in whole or in part from suprarenal glands of hogs that may be condemned by Federal inspectors of the Department of Agriculture after removal of such glands from the carcasses, arising from any abnormality of such carcasses if such glands are subjected to the following prescribed treatment, which will destroy or eliminate any microorganisms or toxins that might be present in the glands:

The glands are subjected to quick freezing promptly upon removal from the carcasses and maintained in a frozen state until they are ground and immersed in 95 percent to 100 percent acetone. The ground tissues remain in the acetone for a period of not less than 6 days, the mixture is filtered, and the residue is burned.

§ 3.23 *Notice to manufacturers and users of monosodium glutamate and other hydrolyzed vegetable protein products.* Following a review of various statements submitted by manufacturers and distributors of monosodium glutamate and various hydrolyzed plant protein products, the following conclusions have been reached:

(a) The facts submitted establish that there are three classes of products to be considered:

(1) Purified monosodium glutamate.

(2) Hydrolyzed proteins (amino acid salts) from which none of the monosodium glutamate has been removed.

(3) Hydrolyzed proteins (amino acid salts), a by-product in the manufacture of purified monosodium glutamate but from which a substantial proportion of the monosodium glutamate has been removed.

(b) The statement of policy appearing in § 3.10 is reaffirmed. Monosodium glutamate is the common or usual name of the substance covered in said statement of policy. It need not be declared as an artificial flavoring, but when used as an ingredient of food products should be declared by its common or usual name. It may not be used in a food for which a standard of identity has been promulgated unless the standard or any amendment thereto recognizes it as an optional ingredient. It may not be used under any circumstances in such a way as to conceal damage or inferiority or make the article appear better or of greater value than it is.

(c) (1) The substance described in paragraph (a) (2) of this section has long been designated as "hydrolyzed vegetable protein."

(2) The substance covered by paragraph (a) (3) of this section should have a distinctive name, since one of its original constituents has been partially removed. Manufacturers have suggested that this substance be described as "hydrolyzed vegetable protein with reduced monosodium glutamate content." This designation appears acceptable.

(d) While the substances referred to in paragraph (a) (2) and (3) of this section contain a number of amino acid salts as well as sodium chloride, monosodium glutamate is the ingredient which has been quite generally emphasized, and is best known to consumers under that name. No objection is offered under the Federal Food, Drug, and Cosmetic Act to the addition of a quantitative declaration on the labels of containers of such hydrolyzed vegetable protein or hydrolyzed vegetable protein with reduced monosodium glutamate content showing the percentage amounts of monosodium glutamate, the total of other amino acid salts, salt, and water, if in liquid form, all to be declared in the order of their decreasing percentages. If monosodium glutamate represents a smaller proportion of the substance than the other amino acid salts and salt (sodium chloride), it should be declared last in the list of ingredients.

(e) When the substances described in paragraphs (a) (2) and (3) of this section are used as ingredients in a fabricated food, either may be declared as "salt and hydrolyzed vegetable protein" (or "salt and hydrolyzed plant protein") on the label of the fabricated food product; *Provided*, That where salt is declared as a separate ingredient of the fabricated food, in compliance with section 403 (i) (2) of the act, the word "salt" need not be repeated in connection with the "hydrolyzed vegetable protein" (or "hydrolyzed plant protein") declaration.

§ 3.24 *Notice to packers of comminuted tomato products.* It has long been known that tomato rot may be caused by one or more of the following: Fungus diseases, bacterial diseases, virus diseases, and certain nonparasitic diseases. Only the fungus rots are characterized by the presence of mold filaments. Mold counts on comminuted tomato products are not increased by incorporating within the product tomato rot caused by bacteria, virus, or nonparasitic factors. Although high mold counts on these products reveal that

large amounts of rotten material are present, low mold counts do not necessarily demonstrate absence of the type of rot caused by the tomato diseases that are not characterized by mold filaments.

Inspections of canneries engaged in the packing of comminuted tomato products show that most packers effectively trim, sort out, and discard rotten tomatoes from the raw stock. Some packers, however, do not properly eliminate rotten tomato material, and a few packers deliberately use rotten tomatoes in these foods, provided the mold count remains low. Some packers, on occasion, have mixed tomato products having a high mold count with tomato products containing little or no mold, so as to produce a blend with a low mold count.

Packers of comminuted tomato products who rely upon the mold count as the sole or primary control procedure, to the neglect of adequate sorting and trimming, may produce products with low mold counts which contain substantial amounts of rot.

It is the purpose of this announcement to advise all canners of tomato products that:

(a) Although high mold count is conclusive evidence of inclusion of substantial amounts of rot, mold count is not the only way of establishing that comminuted tomato products contain decomposed tomato material.

(b) Where factory observations or other evidence reveals that comminuted tomato products contain rot not caused by mold, such rot, as well as that caused by mold, will be taken into account in applying the provisions of the Federal Food, Drug, and Cosmetic Act against adulteration.

(c) The blending of tomato products adulterated with tomato rot, of whatever kind, with tomato products made from sound tomatoes, or with other sound food, renders the blend adulterated.

§ 3.25 *Notice to manufacturers and labelers of antibiotic drugs for veterinary use.* Unless a proper interval of time is allowed following the use of antibiotic drugs for the treatment of mastitis in milk-producing animals, the antibiotic drugs may get into the general milk supply. Because of the specific action of antibiotic drugs on cheese starters, milk containing such drugs is of no value to cheese manufacturers.

The direct or inadvertent addition of antibiotic drugs to milk to be sold for human consumption or for the manufacture of dairy products may constitute an adulteration within the meaning of section 402 of the Federal Food, Drug, and Cosmetic Act (sec. 402, 52 Stat. 1046; 21 U. S. C. 342).

The labeling of antibiotic drugs intended for intramammary use in the treatment of mastitis in milk-producing animals should bear a prominent statement designed to prevent milk from treated portions of the udder from entering the general milk supply. The following statement is recommended for this purpose: *"Important:* Milk from treated segments of udders should be discarded or used for purposes other than human consumption for at least 72 hours after the last treatment."

§ 3.26 *Labeling exemptions for foods repackaged in retail food establishments.* The Secretary of Health, Education, and Welfare will refrain from recommending criminal, injunction, or seizure proceedings on charges that a food repackaged in a retail establishment was misbranded, while held for sale, because it did not comply with the following provisions of the Federal Food, Drug, and Cosmetic Act, if the conditions herein specified are met:

(a) Section 403 (e) (1) (requiring a statement on the label of the name and place of business of the manufacturer, packer, or distributor);

(b) Section 403 (g) (2) (requiring the label of a food which purports to be or is represented as one for which a definition and standard of identity has been prescribed to bear the name of the food specified in the definition and standard and, insofar as may be required by the regulation establishing the standard, the common names of the optional ingredients present in the food), if the food was displayed to the purchaser with its interstate labeling clearly in view, or with a counter card, sign, or other appropriate device bearing prominently and conspicuously the information required by these provisions; or

(c) Section 403 (i) (1) (requiring the label to bear the common or usual name of the food), if the food was displayed to the purchaser with its interstate labeling clearly in view, or with a counter card, sign, or other appropriate device bearing prominently and conspicuously the common or usual name of the food, or if the common or usual name of the food is clearly revealed by its appearance.

§ 3.27 *Status of fluoridated water and foods prepared with fluoridated water under the Federal Food, Drug, and Cosmetic Act.* (a) The program for fluoridation of public water supplies recommended by the Department of Health, Education, and Welfare, through the Public Health Service, contemplates the controlled addition of fluorine at a level optimum for the prevention of dental caries.

(b) Public water supplies do not ordinarily come under the provisions of the Federal Food, Drug, and Cosmetic Act. Nevertheless, a substantial number of inquiries have been received concerning the status of such water under the provisions of the act and the status, in interstate commerce, of commercially prepared foods in which fluoridated water has been used.

(c) The Department of Health, Education, and Welfare will regard water supplies containing fluorine, within the limitations recommended by the Public Health Service, as not actionable under the Federal Food, Drug, and Cosmetic Act. Similarly, commercially prepared foods within the jurisdiction of the act, in which a fluoridated water supply has been used in the processing operation, will not be regarded as actionable under the Federal law because of the flourine content of the water so used, unless the process involves a significant concentration of fluorine from the water. In the latter instance the facts with respect to the particular case will be controlling.

§ 3.28 *Notice to manufacturers and repackers of ophthalmic solutions.* (a) Investigations by pharmaceutical manufacturers, physicians, and the Food and Drug Administration have revealed that liquid preparations for ophthalmic use contaminated with viable microorganisms have been responsible for serious eye injuries and, in some cases, complete loss of vision. The Food and Drug Administration has conducted a survey of medical opinion and has found that it is the consensus of informed persons that such preparations should be sterile. It is evident that liquid preparations offered or intended for ophthalmic use purport to be of such purity and quality as to be suitable for safe use in the eye. The Department of Health, Education, and Welfare concludes that such preparations fall below their professed standard of purity or quality and may be unsafe for use if they are not sterile. Accordingly, liquid preparations offered or intended for ophthalmic use which are not sterile may be regarded as adulterated within the meaning of section 501 (c) of the Federal Food, Drug, and Cosmetic Act and, further, may be misbranded within the meaning of section 502 (j) of the act.

(b) Liquid ophthalmic preparations packed in multiple-dose containers should (1) contain one or more suitable and harmless substances that will prevent the growth of micro-organisms, or should (2) be so packaged as to volume and type of container and so labeled as to duration of use and necessary warnings as will afford adequate protection and minimize the hazard of injury resulting from contamination during use.

§ 3.29 *Direct or indirect addition of antibiotic drugs to foods for human consumption.* (a) The Food and Drug Administration has received inquiries concerning the use of antibiotic drugs as food preservatives. Careful consideration has been given to this question and the conclusion has been reached that such use constitutes a public-health hazard. Consumption of food so treated may cause sensitization of the consumer to such antibiotics and may result in the emergence of strains of pathogenic micro-organisms resistant to these drugs.

(b) The presence of antibiotic drugs in foods intended for human consumption, or the direct or indirect addition of such drugs to such foods, may be deemed an adulteration within the meaning of section 402 of the Federal Food, Drug, and Cosmetic Act (sec. 402, 52 Stat. 1046; 21 U. S. C. 342).

(c) This statement of policy will not bar the establishment of safe tolerances for antibiotic drugs in or on raw agricultural commodities under the provisions of section 408 of the act, where suitable evidence of usefulness of the antibiotic drugs and of safety of the residue is available.

§ 3.30 *Shipment of antibiotic drugs packaged in bulk containers.* (a) The Food and Drug Administration has received inquiries from certain interested manufacturers concerning their shipment of certified antibiotics, packaged in bulk containers, to hospitals and pharmacies for repacking or for use in the manufacture of another drug on the order or prescription of a physician. The regulations promulgated under section 507 of the Federal Food, Drug, and Cosmetic Act (21 U. S. C. 357) do not prohibit the shipment of certified bulk containers of antibiotics to such persons. However, under the provisions of § 146.4 (b) (2) (i) of this chapter, certification should be requested of each repacked batch and of each batch of another drug manufactured from such bulk drug, unless the repackaged drug or other drug has been made exempt from the certification requirements by regulation. The fact that the drug is to be repacked or manufactured on the order or prescription of a physician does not exempt it from the certification requirements of the act. Under the provisions of § 146.4 (b) (2) (ii) of this chapter, it is only when the drug used to compound a prescription is in a container packaged for dispensing that certification of the drug so compounded is not required.

(b) In the light of these provisions, unless the manufacturer and shipper of bulk containers of antibiotics has, with the consignee, an effective permit issued under § 146.21 of this chapter, if the drug is to be repacked, or under § 146.22 of this chapter if it is to be used in the manufacture of another drug, the shipper has the responsibility of seeing that certification is requested of each repacked batch and of each batch of another drug manufactured from such drug.

§ 3.31 *Label declaration of salt in frozen vegetables.* (a) In a number of diseases or disease conditions it is important to restrict the intake of sodium. Sodium occurs in all natural foods, but added salt makes the most important contribution to the total sodium intake in the diet. Most fresh vegetables are of low sodium content and consumers generally regard frozen vegetables as being free of added salt and suitable for use in low-sodium diets. While salt may not be added directly as a seasoning ingredient during the processing of frozen vegetables, the use of salt brine in quality separation of such vegetables as peas and lima beans preparatory to freezing may contribute substantial amounts of salt to the finished article. The failure of the labels of frozen vegetables to declare the presence of salt has been the basis of complaints to the Food and Drug Administration.

(b) Section 403 (i) (2) of the Federal Food, Drug, and Cosmetic Act requires the label of a fabricated food to bear the common or usual name of each ingredient present. The Department of Health, Education, and Welfare regards any frozen vegetable containing salt, added directly or indirectly, as misbranded in violation of section 403 (i) (2) of the Federal Food, Drug, and Cosmetic Act unless its label names salt as an ingredient.

§ 3.32 *Label declarations of vitamin B_{12} and folic acid in foods for special dietary uses.* (a) Section 125.3 (a) (2) of this chapter, issued under the authority of section 403 (j) of the Federal Food, Drug, and Cosmetic Act (sec. 403 (j), 52 Stat. 1048; 21 U. S. C. 343 (j)) requires that if a food purports to be or is represented for special dietary use by man by reason, in whole or in part, of a vitamin for which the need in human nutrition has not been established, the label of such food shall bear the statement "The need for _____ in human nutrition has not been established," the blank to be filled in with the name of such vitamin.

(b) Heretofore this Department has considered vitamin B_{12} and folic acid as among those vitamins for which the need in human nutrition has not been established. However, recent scientific evidence shows that these vitamins are needed in human nutrition. The Department therefore considers the requirement of § 125.3 (a) (2) quoted in paragraph (a) of this section as no longer applicable to food offered for special dietary use by reason of these vitamins.

(Sec. 403, 52 Stat. 1048; 21 U. S. C. 343)

§ 3.33 *Status of foods containing added coumarin.* Manufacturers of coumarin have reported pharmacological investigations showing that it has toxic properties. They have informed the Food and Drug Administration that it will no longer be sold for food use. The Federal Food, Drug, and Cosmetic Act defines food as adulterated if it contains any added poisonous or deleterious substance not required in the production or avoidable in good manufacturing practice. Food containing coumarin added as such or as a constituent of tonka beans or tonka extract will be regarded as adulterated under this provision of the law.

(Secs. 402, 406, 52 Stat. 1046, 1049; 21 U. S. C. 342, 346)

§ 3.34 *Labeling of imported crabmeat.* (a) For many years canned crabmeat has been imported into the United States from Japan. Such imports have consisted primarily of a product designated as "King crabmeat." There have been limited importations of articles designated as "Korean crabmeat" and "Snow crabmeat." Two closely allied species of crab have been packed in Japan for export to the United States, under the designation "King crabmeat." These species are Paralithodes camtschatica (taraba-gani) and Paralithodes platypus (abura-gani). A third species of crab, Paralithodes brevipes, has been labeled either as "King crabmeat" or "Hanasaki crabmeat" when intended for export to the United States. The Department of Health, Education, and Welfare considers the term "King crabmeat" as an acceptable common name for the product prepared from any one of the three species Paralithodes camtschatica, Paralithodes platypus, and Paralithodes brevipes. The Department also considers the name "Hanasaki crabmeat" as an alternative common name for the product prepared from Paralithodes brevipes.

(b) Prior to World War II, there was a limited pack of crabmeat from the species Erimacrus isenbeckii at canneries located on the coast of Korea, but only a small quantity of this product was imported into the United States. To distinguish the product from the various species of Paralithodes and to connote its geographic origin, the article was designated by the name "Korean crab." For the past several years there has been a limited amount of the species Erimacrus isenbeckii packed in Japan or on Japanese factory ships operating in the Bering Sea. This species of crab is generally known in Japan as "Kegani." This product, packed in Japan, when offered for entry into the United States has been designated by a variety of names, including "Korean crabmeat," "Snow crabmeat," "Eliza crabmeat," "Kegani crabmeat," and "Zuwai crabmeat," with resulting confusion to importers and consumers. The term "Korean crab" is no longer applicable to the product as an indication of its geographic origin. The long absence of the product from the domestic market, until its recent reintroduction under a variety of names, has largely eliminated consumer recognition of the identity of the product under the name "Korean crabmeat." The Department therefore considers the designation "Korean variety crabmeat" or, alternatively, "Kegani crabmeat" as suitable common names for the product packed from the species Erimacrus isenbeckii.

(c) There has also been a limited pack of Chionectes opilio (zuwai-gani) offered for entry into the United States. This product has for many years been designated by the name "Snow crabmeat." The Department regards the designation "Snow crabmeat" as the common or usual name for the product when distributed in the United States.

(d) Section 403 (i) (1) of the Federal Food, Drug, and Cosmetic Act requires that the label of a food for which there is no definition and standard of identity shall bear the common or usual name of the food, if any there be. No definition and standard of identity has been established for crabmeat under the act. The Department of Health, Education, and Welfare regards the label designations for canned crabmeat prepared from the various species of crab as stated in paragraphs (a), (b), and (c) of this section as satisfactory compliance with section 403 (i) (1) of the act.

(Sec. 403, 52 Stat. 1048; 21 U. S. C. 343)

§ 3.35 *Labeling of drug preparations containing significant proportions of wintergreen oil.* (a) Because methyl salicylate (wintergreen oil) manifests no toxicity in the minute amounts in which it is used as a flavoring, it is mistakenly regarded by the public as harmless even when taken in substantially larger amounts. Actually, it is quite toxic when taken in quantities of a teaspoonful or more. Wintergreen oil and preparations containing it have caused a number of deaths through accidental misuse by both adults and children. Children are particularly attracted by the odor and are likely to swallow these products when left within reach.

(b) To safeguard against fatalities from this cause, the Department of Health, Education, and Welfare will regard as misbranded under the provisions

of the Federal Food, Drug, and Cosmetic Act any drug containing more than 5 percent methyl salicylate (wintergreen oil), the labeling of which fails to warn that use otherwise than as directed therein may be dangerous and that the article should be kept out of reach of children to prevent accidental poisoning.

(c) This statement of interpretation in no way exempts methyl salicylate (wintergreen oil) or its preparations from complying in all other respects with the requirements of the Federal Food, Drug, and Cosmetic Act.

(Sec. 502, 52 Stat. 1051; 21 U. S. C. 352)

§ 3.36 *Procedure for establishing food standards under the Federal Food, Drug, and Cosmetic Act.* The procedure prescribed in the Federal Food, Drug, and Cosmetic Act for the issuance, amendment, or repeal of standards for foods has recently been modified by Congress. The new amendment permits any interested person showing reasonable grounds therefor to petition the Secretary of Health, Education, and Welfare to initiate action.

(a) If the petitioner shows that he is an interested person and furnishes reasonable grounds for his proposal, it is the duty of the Secretary to publish the proposal and afford opportunity for other interested persons to comment on it. After a study of all the facts available and of the comments received, the Secretary will act upon the proposal and publish an order, to which objection may be taken by persons who would be adversely affected. Thus the issues in controversy are singled out for a public hearing.

(b) Practical administration of the law requires that there be a substantial showing of merit before any proposal is published. In passing on proposals submitted by petitioners for initiating actions, it will be the policy of the Department of Health, Education, and Welfare to consider that reasonable grounds have been furnished when:

(1) The proposal includes or is accompanied by a statement of the facts that the petitioner asserts he is in a position to substantiate by evidence in the event the proceedings lead to a public hearing.

(2) The facts declared furnish substantial support of the proposal and warrant a conclusion that the proposal is reasonable.

(3) The proposal, if adopted, would promote honesty and fair dealing in the interest of consumers.

(c) Opportunity will be given to amend petitions regarded as inadequate.

(Sec. 401, 52 Stat. 1046, as amended, 68 Stat. 54; 21 U. S. C. 341)

§ 3.37 *Confidentiality of information contained in new-drug applications.* (a) The Federal Food, Drug, and Cosmetic Act provides, in section 505 (b), that any person may file with the Secretary of Health, Education, and Welfare an application with respect to any new drug, which shall include, among other things, a full list of the articles used as components and a full statement of the composition of such drug. These requirements apply to all components or ingredients of a new drug, whether or not they are therapeutically active. Fulfillment of these requirements may be met by submitting a full statement of the chemical or common or usual name and of the quantity of each component or ingredient of the drug. Such requirements may also be met through the inclusion in the new-drug application of a properly authorized reference to a previous application or other Food and Drug Administration file containing the relevent information.

(b) The Food and Drug Administration treats information in new-drug applications as confidential. Section 301 (j) of the Federal Food, Drug, and Cosmetic Act makes it an offense to divulge to unauthorized persons any information acquired from a new-drug application concerning any method or process that is a trade secret. Basic manufacturers sometimes submit data to the Food and Drug Administration in the form of so-called master files for the purpose of establishing the safety of ingredients that may be used in new drugs and authorize specified applicants to refer to the data in support of their own new-drug applications. Such manufacturers may regard some of the data in such files as trade secrets and request the Food and Drug Administration to treat such information as confidential. The Food and Drug Administration will preserve the confidentiality of such data to the extent that it may properly do so. Because the applicant is legally responsible for the composition of the new drug and all its ingredients and may require information in the master file for judicial or administrative proceedings concerning the drug, the Food and Drug Administration will not withhold such information from the applicant when his need for it arises and he submits a written request for it.

(Secs. 301, 505, 52 Stat. 1042, 1052; 21 U. S. C. 331, 355)

§ 3.38 *Declaration of quantity of contents on labels for canned oysters.* (a) For many years packers of canned oysters in the Gulf area of the United States have labeled their output with a declaration of the drained weight of oysters in the containers. Packers in other areas have marketed canned oysters with a declaration of the total weight of the contents of the container. Investigation reveals that under present-day practice consumers generally do not discard the liquid packing medium, but use it as a part of the food. Section 403 (e) (2) of the Federal Food, Drug, and Cosmetic Act and the regulations thereunder require food in package form to bear an accurate label statement of the quantity of food in the container.

(b) It is concluded that compliance with the label declaration of quantity of contents requirement will be met by an accurate declaration of the total weight of the contents of the can. The requirements of § 36.6 of this chapter, establishing a standard of fill of container for canned oysters and specifying the statement of substandard fill for those canned oysters failing to meet that standard remain unaffected by this interpretation.

(Sec. 403, 52 Stat. 1047; 21 U. S. C. 343)

§ 3.39 *Use of vegetable fat in products which are imitations of ice cream.* There is currently being marketed in interstate commerce a frozen product made in semblance of ice cream, but containing vegetable fats in complete or partial substitution for milk fat. In some cases the product is marketed under a fanciful designation. Such a product is now regarded as an imitation of ice cream, and thus amenable to the provision of the Federal Food, Drug, and Cosmetic Act requiring the label to bear the name "Imitation Ice Cream," with all these words in type of uniform size and prominence, regardless of whether a fanciful designation is used.

(Secs. 402, 403; 52 Stat. 1047; 21 U. S. C. 342, 343)

§ 3.40 *Pesticide chemicals; date on which statute becomes fully effective.* (a) The pesticide chemicals amendment to the Federal Food, Drug, and Cosmetic Act (68 Stat. 511) is scheduled to become fully effective on July 22, 1955. However, the Secretary of Health, Education, and Welfare may extend this date on a product-by-product basis for a time not to exceed 12 months on a finding that conditions exist that necessitate the extension of such additional period. After the amendment becomes fully effective, a raw agricultural commodity in interstate commerce may bear residues of a poisonous pesticide chemical only if:

(1) Under the provisions of the Federal Food, Drug, and Cosmetic Act a tolerance has been established for residues of the pesticide chemical, or it has been exempted from the requirement of a tolerance; and

(2) If a tolerance has been established, the residues are within the tolerance level.

Numerous tolerances for residues of pesticide chemicals—and some exemptions from the requirement of a tolerance—have been established. However, tolerances or exemptions have not been established for some pesticide chemicals that are employed in agriculture, and it is not possible at this time to determine whether tolerances will be established for them before the end of the current growing season. Some of these pesticides have been recommended by certain State officials for use on crops throughout the 1955 growing season. Agriculturists, pesticide manufacturers and distributors, and food-law enforcement officials need to know the status of these pesticides under the amendment prior to July 22, 1955, so that they will know whether the pesticides should be employed throughout the 1955 growing season.

(b) The Department of Health, Education, and Welfare is prepared to consider requests for an extension of the effective date of the law for specific pesticides. The following criteria, among others, will be used in evaluating and acting upon such requests:

(1) There should not be an extension of the effective date of the amendment for uses of pesticide chemicals for which tolerances have already been established.

(2) The effective date of the amendment should be extended for a pesticide chemical only upon a finding, based on a study of the available facts about the chemical and its toxicity, that the interests of public health will not be jeopardized by the extension.

(3) There should be evidence about the amounts of residues which remain in or on food from use of a pesticide chemical and about its chronic toxicity before an extension is granted.

(4) Extension should not be granted for a pesticide chemical which causes alarming symptoms in test animals (cancer or blood disorders, for example) in any dosage, unless experimental data show a level of feeding to test animals that is safe.

(5) Where a tolerance has been set for residues of a pesticide chemical on one or more raw agricultural commodities under the Federal Food, Drug, and Cosmetic Act, and the other criteria of this statement of policy are met, the effective date may be extended for other uses of the pesticide chemical.

(6) Extension should be granted only for uses of a pesticide chemical registered with the Department of Agriculture under the Federal Insecticide, Fungicide, and Rodenticide Act of 1947 (61 Stat. 163; 7 U. S. C. 135) prior to the 1955 growing season (prior to May 1, 1955).

(7) Extension should be granted only to the end of the 1955 growing season, because longer extensions would result in confusion during the 1956 growing season. The principal growing season in the United States ends by October 31.

(8) Notice of the decisions of the Department on requests for extensions will be published in the FEDERAL REGISTER.

(c) Each request for an extension should be addressed to the Commissioner of Food and Drugs and should give:

(1) The name and chemical composition of the pesticide chemical for which extension is requested.

(2) A list of uses for which extension is requested and evidence that these uses were registered under the Federal Insecticide, Fungicide, and Rodenticide Act prior to May 1, 1955.

(3) Information about the amounts of residues that are expected to remain on raw agricultural commodities from these uses.

(4) Available information which indicates that these residues will not jeopardize the public health.

(5) A statement of the reason(s) a tolerance or exemption from the requirement of a tolerance has not been requested.

(d) In order that decisions on requests for extensions may be published before July 22, 1955, requests and supporting data should be received by June 27, 1955.

(e) Use during the 1955 growing season of a pesticide chemical for which extension is granted may yield a raw agricultural commodity which bears residues of the chemical. In such case, the raw agricultural commodity will not be considered adulterated within the meaning of the act even though it is marketed after the growing season, provided the commodity bearing such residues would have been legal in interstate commerce during the 1955 growing season.

(f) The Department believes that extensions beyond October 31, 1955, would lead to confusion in 1956. It recommends that States prepare spray schedules for the 1956 growing season which direct (1) pesticide uses that leave no residues at time of harvest or (2) the use only of pesticides for which tolerances have been established or exemptions granted under the Federal Food, Drug, and Cosmetic Act.

§ 3.41 *Pesticide chemicals; extended dates on which statute shall become fully effective.* (a) The amendment in clause (2) of section 402 (a) of the Federal Food, Drug, and Cosmetic Act shall become effective on the dates specified for the following pesticide chemicals:

(1) The effective date for Aramite (2-(*p-tert*-butylphenoxy) isopropyl-2-chloroethyl sulfite) shall be September 30, 1955, unless a tolerance is established for Aramite before that date, in which case the effective date shall be the date on which the regulation establishing such tolerance is published in the FEDERAL REGISTER.

(2) Effective date October 31, 1955:

Acrylonitrile: As a fumigant.
Aldrin:
- Apples, pears, and quinces.
- Avocados and papayas.
- Berries of the bramble type.
- Blueberries.
- Cherries.
- Citrus fruits (including grapefruit, lemons, oranges, and tangerines).
- Cranberries.
- Currants.
- Dates.
- Figs.
- Gooseberries.
- Grapes.
- Guavas.
- Peaches, nectarines, apricots, and mangoes.
- Pineapples.
- Plums and prunes.
- Strawberries.
- Artichokes.
- Asparagus.
- Beans (including black-eyed peas and soybeans).
- Beets (garden variety), turnips and rutabagas (including tops).
- Beets, sugar (including tops).
- Broccoli, Brussels sprouts, kohlrabi.
- Cabbage and cauliflower.
- Carrots, horseradish, parsnips, and radishes (including tops).
- Celery.
- Collards, kale, mustard greens, spinach, and Swiss chard.
- Corn, grain (including sweet, field, and popcorn).
- Corn fodder or forage.
- Cucumbers and summer squash.
- Eggplant, peppers, and pimentos.
- Endive (escarole), lettuce, and salsify.
- Melons (including cantaloupes, muskmelons, watermelons), pumpkins, winter squash.
- Okra.
- Onions (including leeks, shallots, and garlic).
- Parsley and watercress.
- Peanuts.
- Peas and cowpeas (including forage).
- Tomatoes.
- Grains (including oats, rye, barley, wheat, and rice).
- Buckwheat.
- Grain forage.
- Nuts (including pecans, almonds, hazelnuts, walnuts, hickory nuts).
- Legumes for forage (including clovers, alfalfa, soybean hay, peanut hay, and lespedeza).
- Grass crops (pasture and range grass, timothy, grass hay).
- Mint, spearmint, and peppermint.
- Sorghums.
- Sorghum forage.

Benzene hexachloride:
- Wheat.
- Oats.
- Garlic.
- Blueberries.
- Meat.
- Forage crops (alfalfa and clover).

Butoxy polypropylene glycol: In animal fly sprays.
Calcium cyanamide:
- Lettuce.
- Celery.
- Beans.
- Tomatoes.
- Potatoes.
- Cabbage and other crucifers.
- Asparagus.
- Hops.
- Small grains.
- Peas.
- Timothy hay.
- Stone fruits.

Calcium cyanide: As grain fumigant.
Carbon bisulfide: As grain fumigant.
Carbon tetrachloride: As grain fumigant.
Captan:
- Citrus fruits (grapefruit, lemons, limes, oranges, tangerines).
- Pineapples.
- Beans (green beans, lima beans, black-eyed peas).
- Peas.
- Potatoes.
- Apples, pears, quinces.
- Grapes.
- Strawberries.
- Cucumbers, summer squash.
- Eggplant, peppers.
- Melons (cantaloupes, watermelons).
- Pumpkins, winter squash.
- Tomatoes.
- Peaches, nectarines, apricots, mangoes.
- Plums, prunes.
- Celery.
- Collards, spinach.
- Lettuce.
- Cherries (sweet and sour).

Chlordane:
- Meat.
- Forage crops (including grass).
- Sweetpotatoes.
- Grains.
- Cottonseed.
- Sugarcane.

Chlorobenzilate (ethyl-4,4'-dichlorobenzilate):
- Apples.
- Pears.

Chloropicrin: As grain fumigant.
Copper carbonate, basic: Pears.
DDT:
- Forage crops (including alfalfa, clovers, peanuts, and other legumes).
- Corn and similar forage.
- Meat.
- Grain.
- Oranges.

Dieldrin:
- Avocados and papayas.
- Berries of the bramble type.
- Blueberries.
- Citrus fruits (including grapefruit, lemons, oranges, and tangerines).
- Cranberries.
- Currants.
- Dates.
- Figs.
- Gooseberries.
- Grapes.
- Guavas.
- Mangoes.
- Pineapples.
- Plums and prunes.
- Strawberries.
- Artichokes.
- Asparagus.

Beans (including black-eyed peas and soybeans).
Beets (garden variety), turnips, and rutabagas (including tops).
Beets, sugar (including tops).
Broccoli, brussels sprouts, kohlrabi.
Cabbage and cauliflower.
Carrots, horseradish, parsnips, and radishes (including tops).
Celery.
Collards, kale, mustard greens, spinach, and Swiss chard.
Corn, grain (including sweet, field, and popcorn).
Corn fodder or forage.
Cucumbers and summer squash.
Eggplant, peppers, and pimientos.
Endive (escarole), lettuce, salsify.
Melons (including cantaloupes, muskmelons, watermelons), pumpkins, and winter squash.
Okra.
Parsley and watercress.
Peanuts.
Peas and cowpeas (including forage).
Potatoes and sweetpotatoes.
Tomatoes.
Grains (including oats, rye, barley, wheat, rice).
Buckwheat.
Grain forage.
Nuts (including pecans, almonds, hazelnuts, walnuts, hickory nuts).
Legumes for forage (including clovers, alfalfa, soybean hay, peanut hay, lespedeza).
Grass crops (pasture and range grass, timothy, grass hay).
Mint, spearmint, and peppermint.
Sorghum.
Sorghum forage.

Endrin:
Cabbage.
Sugar beets.

EPN (*O*-ethyl-*O*-paranitrophenyl benzene thiophosphonate):
Grapes.
Nuts (including pecans, walnuts, and almonds).
Tomatoes.
Olives.
Onions.
Cottonseed.
Sugar beets.

Ethylene dibromide: As grain and soil fumigant.
Ethylene dichloride: As grain fumigant.
Ferbam: Almonds.

Heptachlor:
Alfalfa, clover, and sweet clover.
Beets, including sugar beets.
Cabbage, brussels sprouts, kohlrabi, and cauliflower.
Corn.
Cotton.
Pasture and range grass.
Onions.
Peanuts.
Peas.
Sugarcane.
Sweetpotatoes.
Turnips.

Hydrocyanic acid: As a fumigant for grains, dried peas and beans, and nut meats.

Karathane (2,6-dinitro-6-caprylphenyl crotonate):
Apples.
Pears.
Almonds.
Cantaloup.
Cucumbers.
Squash.

Karmex DW (3-(3,4-dichlorophenyl)-1,1-dimethyl urea): Cottonseed.

Karmex W (3-(parachlorophenyl)-1,1-dimethyl urea):
Pineapple.
Asparagus.
Onions.
Sugarcane.

Lindane:
Cranberries.
Cantaloups.
Watermelons.
Grain (from treating storage bins).
Meat.
Walnuts.
Forage crops (alfalfa, clover).
Sweetpotatoes and yams.

Malathion:
Alfalfa.
Apples.
Apricots.
Avocados.
Barley.
Beans.
Beets.
Blueberries.
Broccoli.
Brussels sprouts.
Cabbage.
Cauliflower.
Celery.
Cherries.
Citrus.
Clover.
Cranberries.
Cucumbers.
Currants.
Dandellons.
Dates.
Dewberries.
Eggplant.
Gooseberries.
Grapes.
Guavas.
Kale.
Kohlrabi.
Lettuce.
Mangoes.
Melons.
Mustard.
Oats.
Onions.
Passion fruit.
Pasture grass.
Peaches.
Pears.
Pecans.
Peas.
Peppers.
Pineapples.
Plums.
Potatoes.
Prunes.
Raspberries.
Rutabagas.
Spinach.
Squash.
Strawberries.
Sweet corn.
Tomatoes.
Turnips.
Walnuts.
Wheat.

Maleic hydrazide:
Potatoes.
Onions.

Maneb:
Almonds.
Beans.
Carrots.
Celery.
Cranberries.
Cucumbers.
Figs.
Grapes.
Onions.
Peaches.
Potatoes.
Spinach.
Tomatoes.

Methoxychlor:
Carrots.
Currants.
Gooseberries.
Pasture grasses.
Forage legumes (alfalfa, clovers, peanuts, cowpeas, soybeans).
Peanuts.
Mint.
Meat.
Grains.

Methyl bromide: As a fumigant.

Ovotran (parachlorophenyl parachlorobenzene sulfonate):
Apples.
Citrus.
Melons.
Peaches.
Pears.
Plums.
Prunes.

Parathion:
Forage crops (alfalfa, clover, peas, pangola grass, timothy, vetch).
Field crops (barley, corn, oats, wheat).
Hops.
Olives.

Phygon (2,3-dichloro-1,4-napthoquinone):
Celery.
Tomatoes.

Piperonyl butoxide: Grains (from storage treatment).

Potassium cyanate: As weed-killer spray, resulting in residues on asparagus, onions, peas, tomatoes, cottonseed, soybeans, field beans.

Sodium orthophenylphenate tetrahydrate:
Apples.
Pears.

Sulfoxide (*n*-octylsulfoxide of isosafrole): In fly sprays.

Sulphenone (parachlorophenyl phenyl sulfone):
Apples.
Pears.
Peaches.

Systox:
Apples.
Pears.
Oranges.
Lemons.
Grapefruit.
Grapes.
Strawberries.
Broccoli.
Brussels sprouts.
Cabbage.
Cauliflower.
Muskmelons.
Potatoes.
Almonds.
English walnuts.
Alfalfa.
Clover.
Hops.

TDE: Meat.

Toxaphene:
Cranberries.
Plums and prunes.
Beets.
Turnips.
Rutabagas.
Sugar beets.
Horseradish.
Parsnips.
Collards.
Kale.
Mustard greens.
Spinach.
Swiss chard.
Peppers.
Pimentos.
Cowpeas.
Grains (including oats, rye, barley, wheat, rice, sorghum grain).
Buckwheat.
Nuts (including pecans, walnuts, hazelnuts, hickory nuts).
Legumes for forage (including clovers, alfalfa, soybean hay, peanut hay, lespedeza, cowpea hay).
Grass crops (pasture and range grass, timothy, grass hay).
Grain forage (including corn and sorghum).
Sugarcane.
Meat.

Trichloroethane: As grain fumigant.

Zineb:
Pecans.
Hops.
Mushrooms.

Ziram:
Almonds.
Pecans.
Strawberries.

(b) The extensions prescribed in paragraph (a) of this section apply only to the extent that tolerances or exemptions under section 408 of the Federal Food, Drug, and Cosmetic Act shall not have been established prior to the effective dates as extended.

§ 3.42 *Pesticide chemicals; additional extended dates on which statute shall become fully effective; denial of requests for extensions.* (a) Conditions exist which necessitate the following extensions. The amendment in clause (2) of section 402 (a) of the Federal Food, Drug, and Cosmetic Act shall become effective on the dates specified for the following pesticide chemicals:

(1) Effective date October 31, 1955:
Alkyl dimethyl benzyl ammonium chloride: On apples.
Allethrin: On livestock.
Chloro IPC: Preemergence use on spinach.
Dimite: On fruits and vegetables.
Ethylene dichloride: On citrus and strawberries.
Ethylene oxide: On spices.
Piperonyl butoxide: On apples, citrus, livestock, pears, tomatoes.
Pyrethrins: On apples, citrus, grains (stored), livestock, pears, tomatoes.
Sodium dimethyldithiocarbamate: On cantaloups.
Trichloroethane: On citrus, strawberries.
(2) Effective date January 22, 1956:
Diphenyl: On citrus.

(b) Extension is not granted for the following indicated uses of the listed pesticide chemicals. Conditions do not exist that necessitate extension for these uses.

Hexamethylenetetramine: On citrus.
Methoxychlor: In milk.
Rotenone: Unspecified uses.
Sodium *O*-phenylphenate: On citrus.

(c) The extensions prescribed in paragraph (a) of this section apply only to the extent that tolerances or exemptions under section 408 of the Federal Food, Drug, and Cosmetic Act shall not have been established prior to the effective dates as extended.

(Secs. 402, 408, 68 Stat. 511, 517; 21 U. S. C. 342, 346a)

§ 3.43 *Labeling of drug preparations containing salicylates.* (a) Because salicylate preparations enjoy widespread use as analgesics and such articles are ordinarily not toxic in the amounts required for producing an analgesic action, they are frequently regarded by the public as harmless. Actually, salicylates are capable of causing injury and even death when consumed in excessive quantities. Salicylate preparations have caused a number of deaths through accidental misuse by both adults and children, which might have been avoided had the users been aware of their potential hazards.

(b) On the basis of a study and conclusions by the Medical Advisory Panel on the Accidental Ingestion and Misuse of Salicylate Preparations by Children, under date of February 14, 1955, and in the interest of protecting the public health, the following recommendations are made concerning the labeling that should be employed for salicylate preparations to meet the requirements of section 502 (f) (1) and (2) of the Federal Food, Drug, and Cosmetic Act.

(1) The labels of all packages of salicylate preparations that are labeled with directions for use should bear, clearly visible and in bold-face type, some such statement as one of the following:

(i) "Warning—Keep out of the reach of children"; or

(ii) "Warning—Keep this and all medications out of the reach of children."

(2) In lieu of specific dosage recommendations for children under three years of age, the labeling of salicylate preparations for oral use should bear a statement such as: "For children under 3 years of age, consult your physician."

(c) The labeling recommendations in paragraph (b) of this section are applicable to preparations containing aspirin, salicylamide, salicylic acid and its salts, and other salicylic acid derivatives used as analgesics, except as provided in paragraph (d) of this section.

(d) To the extent shown in this paragraph, the labeling recommendations of paragraph (b) of this section do not apply to the following preparations.

(1) Paragraph (b) (1) of this section does not apply to wintergreen oil subject to § 3.35.

(2) Paragraph (b) (1) of this section does not apply to effervescent salicylate preparations since such preparations do not lend themselves to accidental use or overdosage.

(3) Paragraph (b) (1) and (2) of this section does not apply to preparations of para-aminosalicylic acid and its salts, which are not labeled with directions for use as analgesics.

(e) This statement in no way exempts salicylate preparations from complying in all other respects with the requirements of the Federal Food, Drug, and Cosmetic Act.

(f) Copies of the recommendations adopted by the Medical Advisory Panel on the Accidental Ingestion and Misuse of Salicylate Preparations by Children, which convened on February 14, 1955, may be obtained from the Department of Health, Education, and Welfare, Food and Drug Administration, upon request.

(g) Six months will be allowed for modification of existing labeling to comply with this statement.

(Sec. 502, 52 Stat. 1050, as amended; 21 U. S. C. 352)

§ 3.44 *Pesticide chemicals; further extended dates on which statute shall become fully effective.* The amendments in clause (2) of section 402 (a) of the Federal Food, Drug, and Cosmetic Act shall become fully effective on the dates specified for the pesticide chemicals named in this section. The extensions prescribed in this section apply only to the extent that tolerances or exemptions from tolerances under section 408 of the act shall not have been established prior to the effective dates as extended. This section supersedes any extended effective dates for the same pesticide chemicals for use on the same raw agricultural commodities previously published in §§ 3.41 and 3.42. All further changes in extended effective dates on the same or other pesticide chemicals will be published as amendments to this section.

(a) (1) Effective date January 22, 1956:
Aldrin: For use on berries of the bramble type, blueberries, dates, pineapples, strawberries, beans (including black-eyed peas and soybeans), beets (sugar, including tops), broccoli, cabbage, carrots, corn, cucumbers, onions, peanuts, peas and cowpeas (including forage), tomatoes, grains (including oats, rye, barley, wheat, rice), buckwheat, grain forage, legumes for forage (including clovers, alfalfa, peanut hay), grass crops (pasture and range grass), mint (including spearmint and peppermint).
Allethrin: On livestock.
Calcium cyanide: As a grain fumigant.
Chlordane: On forage crops (including grass), sweetpotatoes, grains, cottonseed, sugarcane.
Dieldrin: On berries of the bramble type, blueberries, citrus fruits, grapes, plums and prunes, strawberries, beans (including black-eyed peas and soybeans), cabbage, corn, cucumbers, lettuce, melons (including cantaloups and muskmelons), peanuts, peas and cowpeas, potatoes and sweetpotatoes, grains (including oats, rye, barley, wheat, rice), buckwheat, grain forage, legumes for forage (including clovers, alfalfa, peanut hay), grass crops (pasture and range grass, timothy, grass hay), sorghum, sorghum forage.
Endrin: On cabbage, sugar beets.
EPN (*O*-ethyl-*O*-paranitrophenyl benzene thiophosphonate): On grapes, nuts (including pecans, walnuts, and almonds), tomatoes, olives, onions, cottonseed, sugar beets.
Ethylene dibromide: As a soil fumigant.
Ferbam: On almonds.
Hydrocyanic acid: As a fumigant for grains, dried peas and beans, and nut meats.
Lindane: On forage crops (alfalfa, clover), meat, grain (from treating storage bins).
Methoxychlor: On carrots, currants, gooseberries, pasture grasses, forage legumes (alfalfa, clovers, peanuts, cowpeas, soybeans), peanuts, mint, meat, grains.
Methyl bromide: As a fumigant.
Parathion: On forage crops (alfalfa, clover, peas, pangola grass, timothy, vetch), field crops (barley, corn, oats, wheat), hops, olives.
Phygon (2,3-dichloro-1,4-naphthoquinone): On celery, tomatoes.
Piperonyl butoxide: On apples, citrus, livestock, pears, tomatoes, grains.
Pyrethrins: On apples, citrus, grains (stored), livestock, pears, tomatoes.
Toxaphene: On cranberries, plums and prunes, beets, turnips, rutabagas, sugar beets, horseradish, parsnips, collards, kale, mustard greens, spinach, Swiss chard, peppers, pimentos, cow peas, grains (including oats, rye, barley, wheat, rice, sorghum grain), buckwheat, nuts (including pecans, walnuts, hazelnuts, hickory nuts), legumes for forage (including clovers, alfalfa, soybean hay, peanut hay, lespedeza, cow pea hay), grass crops (pasture and range grass, timothy, grass hay), grain forage (including corn and sorghum), sugarcane, meat.
Zineb: On pecans, hops, mushrooms.
Ziram: On almonds, pecans, strawberries.

(2) Effective date March 1, 1956:
Acrylonitrile: As a fumigant.
Benzene hexachloride: In meat.
Butoxypolypropylene glycol: In animal fly sprays.
Captan: Post-harvest use on potatoes.
Carbon bisulfide: As a grain fumigant.
Carbon tetrachloride: As a grain fumigant.
Chlordane: In meat.
Chloropicrin: As a grain fumigant.

Copper carbonate, basic: On pears.
DDT: In meat.
Ethylene dibromide: As a fumigant.
Ethylene dichloride: As a grain fumigant, on citrus and strawberries.
Ethylene oxide: On spices.
Malathion: On citrus.
Ovotran (*p*-chlorophenyl parachlorobenzene sulfonate): On citrus.
Sodium-orthophenylphenate tetrahydrate: On apples and pears.
Sodium-o-phenylphenate: On citrus.
TDE: In meat.
Trichloroethane: As a grain fumigant, on citrus and strawberries.

(Secs. 402, 408, 68 Stat. 511, 517; 21 U. S. C. 342, 346a)

§ 3.45 *Sterilization of drugs by irradiation.* There is a current interest in the utilization of newly developed sources of radiation for the sterilization of drugs. Prior to the marketing of a drug sterilized by such means, it is necessary in the interest of protecting the public health to establish by adequate investigations that the irradiation treatment does not cause the drug to become unsafe or otherwise unsuitable for use. Accordingly, all drug products, including injections, ophthalmic solutions, surgical sutures, and surgical dressings sterilized by means of irradiation are regarded as new drugs within the meaning of section 201 (p) of the Federal Food, Drug, and Cosmetic Act. An effective new-drug application pursuant to section 505 of the act is therefore a prerequisite to interstate shipment of such articles, except as provided by section 505 (i).

(Secs. 201, 505, 52 Stat. 1042, 1052; 21 U. S. C. 321, 355)

PART 4—OFFICIAL RECORDS AND INFORMATION

§ 4.1 *Disclosure of official records and information.* (a) No officer or employee of the Food and Drug Administration or of any other office or establishment in the Department of Health, Education, and Welfare—except as otherwise specifically authorized in accordance with paragraph (c) of this section or except in the discharge of his official duties under the laws administered by the Food and Drug Administration—shall produce or disclose to any person, or before any tribunal, directly or indirectly, whether in response to a subpoena or otherwise, any record (including any file, letter, application, report, work sheet, or other paper or document) pertaining to the functions of the Food and Drug Administration, or any information acquired from any such record or otherwise acquired in the discharge of his official duties.

(b) Whenever a subpoena or a subpoena duces tecum, in appropriate form, has been lawfully served upon an officer or employee of the Food and Drug Administration commanding the production of any such record or the giving of any such information, such officer or employee will, unless otherwise specifically authorized in accordance with paragraph (c), appear in response thereto and respectfully decline to produce the record or information specified therein, on the ground that disclosure of such record or information is prohibited by this section.

(c) A person who desires the disclosure of any such record or information may make written request therefor, verified by oath, directed to the Commissioner of Food and Drugs, setting forth his interest in the matter sought to be disclosed and specifically designating the use to which such records or information will be put in the event of compliance with such request; *Provided*, That a written request therefor made by a health, food or drug officer, prosecuting attorney or member of the judiciary of any State, Territory or political subdivision thereof, acting in his official capacity, need not be verified by oath. If it is determined by the Commissioner, or any other officer or employee of the Food and Drug Administration whom he may designate to act on his behalf for the purpose, that disclosure of any such record or information for the use so specifically designated will not be incompatible with the public interest and will not result in revealing confidential matters the request will be granted, and if testimony relating thereto is requested one or more employees of the Food and Drug Administration will be designated and directed to appear, in response to a subpoena or a subpoena duces tecum, and testify with respect thereto.

(Sec. 10, 29 Stat. 607, as amended, sec. 3, 44 Stat. 1102, sec. 9 (c) (1), 44 Stat. 1409, sec. 4, 49 Stat. 885, sec. 701 (a), 52 Stat. 1055; 15 U. S. C. 409 (c) (1), 21 U. S. C. 50, 64, 143, 371 (a))

PART 9—COLOR CERTIFICATION

Sec.

9.1 Definitions.
9.2 General specification for straight colors.
9.3 List of straight colors and specifications for their certification for use in food, drugs, and cosmetics.
9.4 List of straight colors and specifications for their certification for use in drugs cosmetics.
9.5 List of straight colors and specifications for their certification for use in externally applied drugs and cosmetics.
9.6 Mixtures which may be certified.
9.7 Sampling, storage, and packaging.
9.8 Requests for certification.
9.9 Certification.
9.10 Limitations of certificates.
9.11 Labeling.
9.12 Records of distribution.
9.13 Authority to refuse certification service.
9.14 Procedure for admitting colors to listing.
9.15 Fees.

AUTHORITY: §§ 9.1 to 9.15 issued under sec. 701 (a), 52 Stat. 1055; 21 U. S. C. 371 (a). Interpret or apply secs. 406 (b), 504, 604, 702, 706, 52 Stat. 1049, 1052, 1055, 1056, 1058; 21 U. S. C. 346 (b), 354, 364, 372, 376.

§ 9.1 *Definitions.* For the purposes of this part:

(a) The term "coal-tar color" means articles which (1) are composed of or contain any substance derived from coal tar, or any substance so related in its chemical structure to a constituent of coal tar as to be capable of derivation from such constituent; and (2) when added or applied to a food, drug, cosmetic, or the human body or any part thereof, are capable (alone or through reaction with other substance) of imparting color thereto.

(b) The term "straight color" means a coal-tar color listed in §§ 9.3, 9.4, or 9.5, and includes such impurities and substrata as are contained in such color.

(c) The term "mixture" means a coal-tar color made by mixing two or more straight colors, or one or more straight colors and one or more diluents.

(d) The term "diluent" means any component of a coal-tar color, except a straight color.

(e) The term "pure dye" means the coal-tar dye contained in a coal-tar color, exclusive of any intermediate or other impurity, or of any diluent or substratum contained therein.

(f) The term "substratum" means the substance on which the pure dye in a lake is extended.

(g) The term "alumina" means a suspension in water of precipated aluminum hydroxide.

(h) The term "blanc fixe" means a suspension in water of precipitated barium sulfate.

(i) The term "gloss white" means a suspension in water of co-preciptated aluminum hydroxide and barium sulfate.

(j) The term "mixed oxides" means the sum of the quantities of aluminum, iron, calcium, and magnesium (in whatever combination they may exist in a coal-tar color) calculated as aluminum trioxide, ferric oxide, calcium oxide, and magnesium oxide.

(k) The term "batch" means a quantity of coal-tar color which is set apart and held as a unit for the purpose of obtaining certification of such quantity.

(l) The term "batch number" means the number assigned to a batch by the person who requests certification thereof.

(m) The term "lot number" means an identifying number or symbol assigned to a batch by the Food and Drug Administration.

(n) The term "externally applied drugs and cosmetics" means drugs and cosmetics which are applied only to external parts of the body and not to the lips or any body surface covered by mucous membrane.

(o) The authorization contained in this part for the certification of coal-tar colors shall not be considered to authorize the certification of any coal-tar color for use in any article which is applied to the area of the eye. A coal-tar color used in any such article which is so applied shall be considered to be from a batch that has not been certified in accordance with this part, even though such color is from a batch that has been certified for other use.

(p) The term "area of the eye" means the area enclosed within the circumference of the supra-orbital ridge and the infra-orbital ridge, including the eyebrow, the skin below the eyebrow, the eyelids and the eyelashes, the conjunctival sac of the eye, the eyeball, and the soft areolar tissue that lies within the perimeter of the infra-orbital ridge.

(q) The definitions and interpretations of terms contained in section 201 of the act shall be applicable also to such terms when used in this part.

§ 9.2 *General specifications for straight colors.* No batch of a straight color listed in § 9.3, § 9.4, or § 9.5 shall be certified under this part unless:

(a) It is free from all impurities (other than those named in paragraph (b) of this section or in the specifications set forth in such section for such color) to the extent that such impurities can be avoided by good manufacturing practice.

(b) It conforms to the following specifications:

(1) In the case of a straight color listed in § 9.3:

Lead (as Pb), not more than 0.001 percent.
Arsenic (as As_2O_3), not more than 0.00014 percent.
Heavy metals (except Pb and As) (by precipitation as sulfides), not more than trace.

(2) In the case of a straight color listed in § 9.4 or §9.5:

Lead (as Pb), not more than 0.002 percent.
Arsenic (as As_2O_3), not more than 0.0002 percent.
Heavy metals (except Pb and As) (by precipitation as sulfides), not more than 0.003 percent.

(3) In the case of a straight color which contains a barium salt listed in § 9.4 or § 9.5—soluble barium (in dilute HCl) (as $BaCl_2$), not more than 0.05 percent.

§ 9.3 *List of straight colors and specifications for their certification for use in food, drugs, and cosmetics.* (a) A batch of a straight color listed in this section may be certified, in accordance with the provisions of the regulations in this part, for use in food (subject to the restrictions prescribed by paragraph (c) of this section), drugs, and cosmetics, if such batch conforms to the requirements of § 9.2 and to the specifications in this section set forth for such color.

FD&C GREEN No. 1

SPECIFICATIONS

Monosodium salt of 4-[4-(N-ethyl-p-sulfobenzylamino)-diphenylmethylene] - [1 - (N-ethyl-N-p-sulfoniumbenzyl) - $\Delta^{2,5}$ - cyclohexadienimine].
Volatile matter (at 135° C.), not more than 10.0 percent.
Water insoluble matter, not more than 0.5 percent.
Ether extracts, not more than 0.4 percent.
Chlorides and sulfates of sodium, not more than 6.0 percent.
Mixed oxides, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 82.0 percent.

FD&C GREEN No. 2

SPECIFICATIONS

Disodium salt of 4-{[4-(N-ethyl-p-sulfobenzylamino)-phenyl] - (4-sulfonium-phenyl)-methylene}-[1-(N-ethyl-N-p-sulfobenzyl)-$\Delta^{2,5}$-cyclohexadienimine].
Volatile matter (at 135° C.), not more than 10.0 percent.
Water insoluble matter, not more than 0.5 percent.
Ether extracts, not more than 0.4 percent.
Chlorides and sulfates of sodium, not more than 6.0 percent.
Mixed oxides, not more than 1.0 percent.
Subsidiary dyes (as FD&C Green No. 1), not more than 5.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 82.0 percent.

FD&C GREEN No. 3

SPECIFICATIONS

Disodium salt of 4-{[4-(N-ethyl-p-sulfobenzylamino)-phenyl]-(4-hydroxy-2-sulfoniumphenyl)-methylene}-[1-(N-ethyl-N-p-sulfobenzyl)-$\Delta^{2,5}$-cyclohexadienimine].
Volatile matter (at 135° C.), not more than 10.0 percent.
Water insoluble matter, not more than 0.5 percent.
Ether extracts, not more than 0.4 percent.
Chlorides and sulfates of sodium, not more than 5.0 percent.
Mixed oxides, not more than 1.0 percent.
Subsidiary dyes, not more than 5.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 85.0 percent.

FD&C YELLOW No. 1

SPECIFICATIONS

Disodium salt of 2,4-dinitro-1-naphthol-7-sulfonic acid.
Volatile matter (at 135° C.), not more than 10.0 percent.
Water insoluble matter, not more than 0.2 percent.
Ether extracts, not more than 0.1 percent.
Chlorides and sulfates of sodium, not more than 5.0 percent.
Mixed oxides, not more than 1.0 percent.
Martius Yellow, not more than 0.03 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 85.0 percent.

FD&C YELLOW No. 2

SPECIFICATIONS

Dipotassium salt of 2,4-dinitro-1-naphthol-7-sulfonic acid.
Volatile matter (at 135° C.), not more than 10.0 percent.
Ether extracts, not more than 0.1 percent.
Chlorides and sulfates of potassium, not more than 5.0 percent.
Mixed oxides, not more than 1.0 percent.
Martius Yellow, not more than 0.03 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 85.0 percent.

FD&C YELLOW No. 3

SPECIFICATIONS

1-Phenylazo-2-naphthylamine.
Volatile matter (at 80° C.), not more than 0.2 percent.
Sulfated ash, not more than 0.3 percent.
Water soluble matter, not more than 0.3 percent.
Matter, insoluble in carbon tetrachloride, not more than 0.5 percent.
Intermediates, not more than 0.05 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 99.0 percent.
Melting point, not less than 99° C.

FD&C YELLOW No. 4

SPECIFICATIONS

1-o-Tolylazo-2-naphthylamine.
Volatile matter (at 80° C.), not more than 0.2 percent.
Sulfated ash, not more than 0.3 percent.
Water soluble matter, not more than 0.3 percent.
Matter, insoluble in carbon tetrachloride, not more than 0.5 percent.
Intermediates, not more than 0.05 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 99.0 percent.
Melting point, not less than 120° C.

FD&C YELLOW No. 5

SPECIFICATIONS

Trisodium salt of 3-carboxy-5-hydroxy-1-p-sulfophenyl-4-p-sulfophenylazo-pyrazole.
Volatile matter (at 135° C.), not more than 10.0 percent.
Water insoluble matter, not more than 0.5 percent.
Ether extracts, not more than 0.3 percent.
Phenylhydrazine-p-sulfonic acid, not more than 0.1 percent.
Chlorides and sulfates of sodium, not more than 6.0 percent.
Mixed oxides, not more than 1.0 percent.
Subsidiary dyes, not more than 3.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 85.0 percent.

FD&C YELLOW No. 6

SPECIFICATIONS

Disodium salt of 1-p-sulfophenylazo-2-naphthol-6-sulfonic acid.
Volatile matter (at 135° C.), not more than 10.0 percent.
Water insoluble matter, not more than 0.5 percent.
Ether extracts, not more than 0.2 percent.
Chlorides and sulfates of sodium, not more than 5.0 percent.
Mixed oxides, not more than 1.0 percent.
Subsidiary dyes, not more than 5.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 85.0 percent.

FD&C RED No. 1

SPECIFICATIONS

Disodium salt of 1-pseudocumylazo-2-naphthol-3,6-disulfonic acid.
Volatile matter (at 135° C.), not more than 10.0 percent.
Water insoluble matter, not more than 0.3 percent.
Ether extracts, not more than 0.2 percent.
Pseudo-cumidine, not more than 0.2 percent.
Chlorides and sulfates of sodium, not more than 6.0 percent.
Mixed oxides, not more than 1.0 percent.
Lower sulfonated dyes, not more than 5.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 85.0 percent.
Boiling range of crude pseudo-cumidine, or of pseudo-cumidine obtained by reduction of the dye, 220–245° C.

FD&C RED No. 2

SPECIFICATIONS

Trisodium salt of 1-(4-sulfo-1-naphthylazo)-2-naphthol-3,6-disulfonic acid.
Volatile matter (at 135° C.), not more than 10.0 percent.
Water insoluble matter, not more than 0.5 percent.
Ether extracts, not more than 0.2 percent.
Chlorides and sulfates of sodium, not more than 5.0 percent.
Mixed oxides, not more than 1.0 percent.
Subsidiary dyes, not more than 4.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 85.0 percent.

FD&C RED No. 3

SPECIFICATIONS

Disodium salt of 9-o-carboxyphenyl-6-hydroxy-2, 4, 5, 7-tetraiodo-3-isoxanthone.
Volatile matter (at 135° C.), not more than 12.0 percent.
Water, insoluble matter, not more than 0.2 percent.
Ether extracts, not more than 0.1 percent.
Chlorides and sulfates of sodium, not more than 2.0 percent.
Sodium carbonate, not more than 0.5 percent.
Sodium iodide, not more than 0.4 percent.
Mixed oxides, not more than 1.0 percent.
Permitted range of organically combined iodine in pure dye, free from water of crystallization, 56.8 to 58.5 percent.
Pure dye (as determined gravimetrically), not less than 85.0 percent.

FD&C Red No. 4

SPECIFICATIONS

Disodium salt of 2-(5-sulfo-2,4-xylylazo)-1-naphthol-4-sulfonic acid.
Volatile matter (at 135° C.), not more than 10.0 percent.
Water, insoluble matter, not more than 0.3 percent.
Ether extracts, not more than 0.2 percent.
Chlorides and sulfates of sodium, not more than 5.0 percent.
Mixed oxides, not more than 1.0 percent.
Subsidiary dyes, not more than 5.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 85.0 percent.

FD&C Blue No. 1

SPECIFICATIONS

Disodium salt of 4-{[4-(N-ethyl-p-sulfobenzylamino)-phenyl] - (2-sulfoniumphenyl)-methylene}-[1-(N-ethyl-N-p-sulfobenzyl)-$\Delta^{2,5}$-cyclohexadienimine].
Volatile matter (at 135° C.), not more than 10.0 percent.
Water insoluble matter, not more than 0.3 percent.
Ether extracts, not more than 0.4 percent.
Chlorides and sulfates of sodium, not more than 4.0 percent.
Sodium acetate, not more than 3.0 percent.
Mixed oxides, not more than 1.0 percent.
Subsidiary dyes, not more than 5.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 82.0 percent.

FD&C Blue No. 2

SPECIFICATIONS

Disodium salt of 5, 5'-indigotindisulfonic acid.
Volatile matter (at 135° C.), not more than 10.0 percent.
Water insoluable matter, not more than 0.5 percent.
Ether extracts, not more than 0.5 percent.
Chlorides and sulfates of sodium, not more than 7.0 percent.
Mixed oxides, not more than 1.0 percent.
Lower sulfonated dyes, not more than 5.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 85.0 percent.

FD&C Violet No. 1

SPECIFICATIONS

Monosodium salt of 4-{[4-(N-ethyl-p-sulfobenzylamino)-phenyl]-[4-(N-ethyl-p-sulfoniumbenzylamino)-phenyl]-methylene}-(N,N-dimethyl-$\Delta^{2,5}$-cyclohexadienimine).
Volatile matter (at 135° C.), not more than 8.0 percent.
Water-insoluble matter, not more than 0.3 percent.
Ether extracts, not more than 0.4 percent.
p-Dimethylaminobenzoic acid, not more than 0.2 percent.
Chlorides and sulfates of sodium, not more than 4.0 percent.
Mixed oxides, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 85.0 percent.
The sum of the volatile matter, chlorides and sulfates of sodium, pure dye, and leuco base of the dye, not less than 95.0 percent.

LAKES

Any lake made by extending on a substratum of alumina, a salt prepared from one of the water soluble straight colors hereinbefore listed in this paragraph by combining such color with the basic radicle aluminum or calcium.

SPECIFICATIONS

Ether extracts, not more than 0.3 percent.
Soluble chlorides and sulfates (as sodium salts), not more than 2.0 percent.
Inorganic matter, insoluble in HCl, not more than 0.5 percent.
Intermediates, not more than 0.1 percent.

(b) Each lake made as prescribed under the caption "Lakes" in paragraph (a) of this section shall be considered to be a straight color and to be listed therein under the name which is formed as follows:
(1) The listed name of the color from which the lake is prepared;
(2) The name of the basic radicle combined in such color; and
(3) The word "Lake".
(For example, the name of a lake prepared by extending the aluminum salt prepared from FD&C Orange No. 1 upon the substratum would be FD&C Orange No. 1—Aluminum Lake.)
(c) No lake listed in paragraph (a) of this section shall be certified for any use in food except external application to shell eggs.

§ 9.4 *List of straight colors and specifications for their certification for use in drugs and cosmetics.* (a) A batch of a straight color listed in this section may be certified, in accordance with the provisions of this part, for use only in drugs and cosmetics, if such batch conforms to the requirements of § 9.2 and to the specifications set forth in this section for such color.

D&C Green No. 4

SPECIFICATIONS

Calcium salt of 4-{[4-(N-ethyl-p-sulfobenzylamino)-phenyl]-(4-sulfonium-phenyl)-methylene}-[1-(N-ethyl-N-p-sulfobenzyl)-$\Delta^{2,5}$-cyclohexadienimine].
Volatile matter (at 135° C.), not more than 10.0 percent.
Water insoluble matter, not more than 1.0 percent.
Ether extracts, not more than 0.5 percent.
Chlorides and sulfates (as calcium salts), not more than 5.0 percent.
Oxides of iron and aluminum, not more than 1.0 percent.
Subsidiary dyes (as FD&C Green No. 1), not more than 5.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 82.0 percent.

D&C Green No. 5

SPECIFICATIONS

Disodium salt of 1,4-bis(o-sulfo-p-toluino)-anthraquinone.
Volatile matter (at 135° C.), not more than 10.0 percent.
Water insoluble matter, not more than 1.0 percent.
Ether extracts, not more than 0.5 percent.
1,4-Dihydroxy-anthraquinone, not more than 0.2 percent.
Chlorides and sulfates of sodium, not more than 15.0 percent.
Mixed oxides, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 75.0 percent.

D&C Green No. 6

SPECIFICATIONS

1,4-Bis-(p-toluino)-anthraquinone.
Volatile matter (at 135° C.), not more than 2.0 percent.
Sulfated ash, not more than 1.0 percent.
Water soluble matter, not more than 0.3 percent.
Matter, insoluble in carbon tetrachloride, not more than 1.5 percent.
Intermediates, not more than 0.5 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 96.0 percent.
Melting point, not less than 210° C.

D&C Green No. 7

SPECIFICATIONS

Monosodium salt of 4-{[4-(N-ethyl-p-sulfobenzylamino)-phenyl]-(o-chlorophenyl)-methylene}-1-(N-ethyl-N-p-sulfonium-benzyl-$\Delta^{2,5}$-cyclohexadienimine).
Volatile matter (at 135° C.), not more than 10.0 percent.
Water insoluble matter, not more than 1.0 percent.
Ether extracts, not more than 0.5 percent.
Chlorides and sulfates of sodium, not more than 8.0 percent.
Mixed oxides, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride, not less than 80.0 percent.

D&C Green No. 8

SPECIFICATIONS

Trisodium salt of 10-hydroxy-3,5,8-pyrene-trisulfonic acid.
Volatile matter (at 135° C.), not more than 15.0 percent.
Water insoluble matter, not more than 0.1 percent.
Chloroform extract, not more than 0.5 percent.
Pyrene, not more than 0.2 percent.
Chlorides and sulfates of sodium, not more than 20.0 percent.
Mixed oxides, not more than 1.0 percent.
Pure dye (as calculated from organically combined sulfur), not less than 65.0 percent.

D&C Yellow No. 7

SPECIFICATIONS

3,6-Fluorandiol.
Volatile matter (at 135° C.), not more than 2.0 percent.
Insoluble matter (alkaline solution), not more than 1.0 percent.
Ether extracts (from alkaline solution), not more than 0.5 percent.
Chlorides and sulfates of sodium, not more than 2.0 percent.
Mixed oxides, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 96.0 percent.

D&C Yellow No. 8

SPECIFICATIONS

Disodium salt 9-o-carboxyphenyl-6-hydroxy-3-isoxanthone.
Volatile matter (at 135° C.), not more than 10.0 percent.
Water insoluble matter, not more than 1.0 percent.
Ether extracts, not more than 0.5 percent.
Chlorides and sulfates of sodium, not more than 8.0 percent.
Mixed oxides, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 82.0 percent.

D&C Yellow No. 9

SPECIFICATIONS

Dipotassium salt of 9-o-carboxyphenyl-6-hydroxy-3-isoxanthone.
Volatile matter (at 135° C.), not more than 10.0 percent.
Water insoluble matter, not more than 1.0 percent.
Ether extracts, not more than 0.5 percent.
Chlorides and sulfates of potassium, not more than 5.0 percent.
Mixed oxides, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 82.0 percent.

D&C Yellow No. 10

SPECIFICATIONS

Disodium salt of disulfonic acid of 2-(2-quinolyl)-1,3-indandione.
Volatile matter (at 135° C.), not more than 10.0 percent.
Water insoluble matter, not more than 1.0 percent.
Ether extracts, not more than 0.5 percent.
Quinaldine, not more than 0.2 percent.
Chlorides and sulfates of sodium, not more than 6.0 percent.
Mixed oxides, not more than 1.0 percent.
Pure dye (as calculated from organically combined nitrogen), not less than 82.0 percent.

D&C Yellow No. 11

SPECIFICATIONS

2-(2-Quinolyl)-1,3-indandione.
Volatile matter (at 135° C.), not more than 1.0 percent.
Sulfated ash, not more than 1.0 percent.
Matter insoluble in alcohol, not more than 0.5 percent.
Quinaldine, not more than 0.2 percent.
Pure dye (as calculated from organically combined nitrogen), not less than 96.0 percent.
Melting point, not less than 235° C.

D&C Red No. 5

SPECIFICATIONS

Disodium salt of 1-xylylazo-2-naphthol-3,6-disulfonic acid.
Volatile matter (at 135° C.), not more than 12.0 percent.
Water insoluble matter, not more than 1.0 percent.
Ether extracts, not more than 0.5 percent.
Xylidine, not more than 0.2 percent.
Chlorides and sulfates of sodium, not more than 6.0 percent.
Mixed oxides, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 82.0 percent.

D&C Red No. 6

SPECIFICATIONS

Monosodium salt of 4-(o-sulfo-p-tolylazo)-3-hydroxy-2-naphthoic acid.
Volatile matter (at 135° C.), not more than 10.0 percent.
Water insoluble matter, not more than 1.0 percent.
Ether extracts (Isopropyl ether), not more than 0.5 percent.
Chlorides and sulfates of sodium, not more than 2.0 percent.
Mixed oxides, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 82.0 percent.

D&C Red No. 7

SPECIFICATIONS

Calcium salt of 4-(o-sulfo-p-tolylazo)-3-hydroxy-2-naphthoic acid.
Volatile matter (at 135° C.), not more than 8.0 percent.
Ether extracts (Isopropyl ether), not more than 0.5 percent.
Chlorides and sulfates (as calcium salts), not more than 6.0 percent.
Oxides of iron and aluminum, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 85.0 percent.

D&C Red No. 8

SPECIFICATIONS

Monosodium salt of 1-(4-chloro-o-sulfo-5-tolylazo)-2-naphthol.
Volatile matter (at 135° C.), not more than 10.0 percent.
Ether extracts (Isopropyl ether), not more than 0.5 percent.
Lake Red C Amine, not more than 0.2 percent.
beta-Naphthol, not more than 0.2 percent.
Chlorides and sulfates of sodium, not more than 5.0 percent.
Mixed oxides, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 85.0 percent.

D&C Red No. 9

SPECIFICATIONS

Barium salt of 1-(4-chloro-o-sulfo-5-tolylazo)-2-naphthol.
Volatile matter (at 135° C.), not more than 5.0 percent.
Ether extracts (Isopropyl ether), not more than 0.5 percent.
Lake Red C Amine, not more than 0.2 percent.
beta-Naphthol, not more than 0.2 percent.
Chlorides and sulfates of sodium, not more than 6.0 percent.
Oxides of iron and aluminum, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 87.0 percent.

D&C Red No. 10

SPECIFICATIONS

Monosodium salt of 2-(2-hydroxy-1-naphthylazo)-1-naphthalenesulfonic acid.
Volatile matter (135° C.), not more than 5.0 percent.
Ether extracts (Isopropyl ether), not more than 0.5 percent.
Tobias acid, not more than 0.2 percent.
beta-Naphthol, not more than 0.2 percent.
Chlorides and sulfates of sodium, not more than 5.0 percent.
Mixed oxides, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 90.0 percent.

D&C Red No. 11

SPECIFICATIONS

Calcium salt of 2-(2-hydroxy-1-naphthylazo)-1-naphthalenesulfonic acid.
Volatile matter (at 135° C.), not more than 5.0 percent.
Ether extracts (Isopropyl ether), not more than 0.5 percent.
Tobias acid, not more than 0.2 percent.
beta-Naphthol, not more than 0.2 percent.
Chlorides and sulfates (as calcium salts), not more than 5.0 percent.
Oxides of iron and aluminum, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 90.0 percent.

D&C Red No. 12

SPECIFICATIONS

Barium salt of 2-(2-hydroxy-1-naphthylazo)-1-naphthalenesulfonic acid.
Volatile matter (at 135° C.), not more than 5.0 percent.
Ether extracts (Isopropyl ether), not more than 0.5 percent.
Tobias acid, not more than 0.2 percent.
beta-Naphthol, not more than 0.2 percent.
Chlorides and sulfates of sodium, not more than 5.0 percent.
Oxides of iron and aluminum, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 90.0 percent.

D&C Red No. 13

SPECIFICATIONS

Strontium salt of 2-(2-hydroxy-1-naphthylazo)-1-naphthalenesulfonic acid.
Volatile matter (at 135° C.), not more than 5.0 percent.
Ether extracts (Isopropyl ether), not more than 0.5 percent.
Tobias acid, not more than 0.2 percent.
beta-Naphthol, not more than 0.2 percent.
Chlorides and sulfates (as sodium salts), not more than 5.0 percent.
Oxides of iron and aluminum, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 90.0 percent.

D&C Red No. 14

SPECIFICATIONS

Monosodium salt of 1-o-carboxy-phenylazo-2-napthol.
Volatile matter (at 135° C.), not more than 5.0 percent.
Ether extracts (Isopropyl ether), not more than 0.5 percent.
beta-Napthol, not more than 0.2 percent.
Chlorides and sulfates of sodium, not more than 5.0 percent.
Mixed oxides, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 90.0 percent.

D&C Red No. 15

SPECIFICATIONS

Barium salt of 1-o-carboxyphenylazo-2-naphthol.
Volatile matter (at 135° C.), not more than 5.0 percent.
Ether extracts (Isopropyl ether), not more than 0.5 percent.
beta-Naphthol, not more than 0.2 percent.
Chlorides and sulfates of sodium, not more than 5.0 percent.
Oxides of iron and aluminum, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 90.0 percent.

D&C Red No. 16

SPECIFICATIONS

Calcium salt of 1-o-carboxphyenylazo-2-naphthol.
Volatile matter (at 135° C.), not more than 5.0 percent.
Ether extracts (Isopropyl ether), not more than 0.5 percent.
beta-Naphthol, not more than 0.2 percent.
Chlorides and sulfates (as calcium salts), not more than 5.0 percent.
Oxides of iron and aluminum, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 90.0 percent.

D&C Red No. 17

SPECIFICATIONS

1-p-Phenylazophenylazo-2-naphthol.
Volatile matter (at 135° C.), not more than 5.0 percent.
Insoluble matter (in toluene), not more than 3.0 percent.
Aniline, not more than 0.2 percent.
Amino-azo-benzene, not more than 0.2 percent.
beta-Naphthol, not more than 0.2 percent.
Sodium chloride, not more than 3.0 percent.
Mixed oxides, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 85.0 percent.

D&C Red No. 18

SPECIFICATIONS

1-Xylylazoxylylazo-2-naphthol.
Volatile matter (at 100° C.), not more than 2.0 percent.
Sulfated ash, not more than 2.0 percent.
Water soluble matter, not more than 0.5 percent.

Matter, insoluble in carbon tetrachloride, not more than 1.0 percent.
Chlorides and sulfates of sodium, not more than 1.0 percent.
Amino-azo-xylene, not more than 0.2 percent.
Xylidine, not more than 0.2 percent.
beta-Naphthol, not more than 0.2 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 95.0 percent.

D&C RED No. 19

SPECIFICATIONS

3-Ethochloride of 9-o-carboxyphenyl-6-diethylamino-3-ethylimino-3-isoxanthene.
Volatile matter (at 135° C.), not more than 5.0 percent.
Water insoluble matter, not more than 1.0 percent.
Ether extracts (from acid solution), not more than 0.5 percent.
Diethyl-m-aminophenol, not more than 0.2 percent.
Chlorides and sulfates of sodium, not more than 2.0 percent.
Mixed oxides, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 92.0 percent.

D&C RED No. 20

SPECIFICATIONS

3-Ethoacetate of 9-o-carboxyphenyl-6-diethylamino-3-ethylimino-3-isoxanthene.
Volatile matter (at 135° C.), not more than 5.0 percent.
Water insoluble matter, not more than 1.0 percent.
Ether extracts (from acid solution), not more than 0.5 percent.
Diethyl-m-aminophenol, not more than 0.2 percent.
Sodium acetate, not more than 2.0 percent.
Mixed oxides, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 92.0 percent.

D&C RED No. 21

SPECIFICATIONS

2,4,5,7-Tetrabromo-3,6-fluorandiol.
Volatile matter (at 135° C.), not more than 6.0 percent.
Insoluble matter (alkaline solution), not more than 1.0 percent.
Ether extracts (from alkaline solution), not more than 0.5 percent.
Chlorides and sulfates of sodium, not more than 2.0 percent.
Mixed oxides, not more than 1.0 percent.
Free bromine, not more than 0.02 percent.
Permitted range of organically combined bromine in pure dye, 47.5–51.5 percent.
Pure dye (as determined gravimetrically), not less than 93.0 percent.

D&C RED No. 22

SPECIFICATIONS

Disodium salt of 2,4,5,7-tetrabromo-9-o-carboxyphenyl-6-hydroxy-3-isoxanthone.
Volatile matter (at 135° C.), not more than 10.0 percent.
Water insoluble matter, not more than 1.0 percent.
Ether extracts, not more than 0.5 percent.
Chlorides and sulfates of sodium, not more than 5.0 percent.
Mixed oxides, not more than 1.0 percent.
Free bromine, not more than 0.02 percent.
Permitted range of organically combined bromine in pure dye, 44.5–48.5 percent.
Pure dye (as determined gravimetrically), not less than 85.0 percent.

D&C RED No. 23

SPECIFICATIONS

Dipotassium salt of 2,4,5,7-tetrabromo-9-o-carboxyphenyl-6-hydroxy-3-isoxanthone.
Volatile matter (at 135° C.), not more than 15.0 percent.
Water insoluble matter, not more than 1.0 percent.
Ether extracts, not more than 0.5 percent.
Chlorides and sulfates of potassium, not more than 5.0 percent.
Mixed oxides, not more than 1.0 percent.
Free bromine, not more than 0.02 percent.
Permitted range of organically combined bromine in pure dye (free from water or alcohol of crystallization), 42.0–46.0 percent.
Pure dye (as determined gravimetrically), not less than 80.0 percent.

D&C RED No. 24

SPECIFICATIONS

2,4,5,7-Tetrachloro-3,6-fluorandiol.
Volatile matter (at 135° C.), not more than 5.0 percent.
Insoluble matter (alkaline solution), not more than 1.0 percent.
Ether extracts (from alkaline solution), nor more than 0.5 percent.
Chlorides and sulfates of sodium, not more than 3.0 percent.
Mixed oxides, not more than 1.0 percent.
Free chlorine, not more than 0.02 percent.
Permitted range of organically combined chlorine in pure dye, 28.0–32.0 percent.
Pure dye (as determined gravimetrically), not less than 90.0 percent.

D&C RED No. 25

SPECIFICATIONS

Disodium salt of 9-o-carboxylphenyl-2,4,5,7-tetrachloro-6-hydroxy-3-isoxanthone.
Volatile matter (at 135° C.), not more than 10.0 percent.
Water insoluble matter, not more than 1.0 percent.
Ether extracts, not more than 0.5 percent.
Chlorides and sulfates of sodium, not more than 5.0 percent.
Mixed oxides, not more than 1.0 percent.
Free chlorine, not more than 0.02 percent.
Permitted range of organically combined chlorine in pure dye, 26.0–29.5 percent.
Pure dye (as determined gravimetrically), not less than 85.0 percent.

D&C RED No. 26

SPECIFICATIONS

Dipotassium salt of 9-o-carboxylphenyl-2,4,5,7-tetrachloro-6-hydroxy-3-isoxanthone.
Volatile matter (at 135° C.), not more than 10.0 percent.
Water insoluble matter, not more than 1.0 percent.
Ether extracts, not more than 0.5 percent.
Chlorides and sulfates of potassium, not more than 5.0 percent.
Mixed oxides, not more than 1.0 percent.
Free chlorine, not more than 0.02 percent.
Permitted range of organically combined chlorine in pure dye, 24.5–27.5 percent.
Pure dye (as determined gravimetrically), not less than 85.0 percent.

D&C RED No. 27

SPECIFICATIONS

2,4,5,7-tetrabromo-12,13,14,15 - tetrachloro-3,6-fluorandiol.
Volatile matter (at 135° C.), not more than 5.0 percent.
Insoluble matter (alkaline solution), not more than 1.0 percent.
Ether extracts (from alkaline solution), not more than 0.5 percent.
Sodium chloride, not more than 3.0 percent.
Mixed oxides, not more than 1.0 percent.
Free halogens, not more than 0.02 percent.
Permitted range of organically combined bromine in pure dye, 38.5–42.5 percent.
Permitted range of organically combined chlorine in pure dye, 16.0–19.0 percent.
Pure dye (as determined gravimetrically), not less than 90.0 percent.

D&C RED No. 28

SPECIFICATIONS

Disodium salt of 2,4,5,7-tetrabromo-9-(3,4,5,6-tetrachloro-o-carboxyphenyl)-6-hydroxy-3-isoxanthone.
Volatile matter (at 135° C.), not more than 10.0 percent.
Water insoluble matter, not more than 1.0 percent.
Ether extracts, not more than 0.5 percent.
Chlorides and sulfates of sodium, not more than 5.0 percent.
Mixed oxides, not more than 1.0 percent.
Free halogens, not more than 0.02 percent.
Permitted range of organically combined bromine in pure dye 36.5–40.5 percent.
Permitted range of organically combined chlorine in pure dye, 16.0–18.0 percent.
Pure dye (as determined gravimetrically), not less than 85.0 percent.

D&C RED No. 29

SPECIFICATIONS

1,4,5,8,15-Pentabromo-2.7 - dicarboxy - 3,6-fluorandiol.
Volatile matter (at 135° C.), not more than 2.0 percent.
Sulfated ash, not more than 1.0 percent.
Insoluble matter (alkaline solution), not more than 0.3 percent.
Soluble matter (in 1 percent aqueous hydrochloric acid), not more than 2.0 percent.
Free bromine, not more than 0.02 percent.
Permitted range of organically combined bromine in pure dye, 47.0–51.0 percent.
Pure dye (as determined gravimetrically), not less than 95.0 percent.

D&C RED No. 30

SPECIFICATIONS

5,5'-Dichloro-3,3'-dimethyl-thioindigo.
Volatile matter (at 135° C.), not more than 5.0 percent.
Matter, insoluble in xylene, not more than 1.0 percent.
Sodium chloride, not more than 3.0 percent.
Mixed oxides, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 90.0 percent.

D&C RED No. 31

SPECIFICATIONS

Calcium salt of 3-hydroxy-4-phenylazo-2-naphthoic acid.
Volatile matter (at 135° C.), not more than 5.0 percent.
Ether extracts (Isopropyl ether), not more than 0.5 percent.
Aniline, not more than 0.2 percent.
Chlorides and sulfates (as calcium salts), not more than 5.0 percent.
Oxides of iron and aluminum, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 90.0 percent.

D&C RED No. 33

SPECIFICATIONS

Disodium salt of 8-amino-2-phenylazo-1-naphthol-3,6-disulfonic acid.
Volatile matter (at 135° C.), not more than 6.0 percent.
Water insoluble matter, not more than 1.0 percent.
Ether extracts, not more than 0.5 percent.
Aniline, not more than 0.2 percent.
Chlorides and sulfates of sodium, not more than 10.0 percent.
Mixed oxides, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 82.0 percent.

D&C RED No. 34

SPECIFICATIONS

Calcium salt of 4-(1-sulfo-2-naphthylazo)-3-hydroxy-2-naphthoic acid.
Volatile matter (at 135° C.), not more than 5.0 percent.
Ether extracts, not more than 0.5 percent.
Tobias acid, not more than 0.2 percent.
Chlorides and sulfates (as calcium salts), not more than 10.0 percent.
Oxides of iron and aluminum, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 85.0 percent.

D&C RED No. 35

SPECIFICATIONS

1-(o-Nitro-p-tolylazo)-2-napthol.
Volatile matter (at 135° C.), not more than 2.0 percent.
Sulfated ash, not more than 1.5 percent.
Matter insoluble in toluene, not more than 1.5 percent.
2-Nitro-p-toluidine, not more than 0.2 percent.
beta-Napthol, not more than 0.2 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 95.0 percent.
Melting point, not less than 272° C.

D&C RED No. 36

SPECIFICATIONS

1 - (o-Chloro-p-nitrophenylazo)-2-naphthol.
Volati' matter (at 135° C.), not more than 5.0 percent.
Sulfated ash, not more than 1.0 percent.
Matter insoluble in toluene, not more than 1.0 percent.
o-Chloro-p-nitroaniline, not more than 0.2 percent.
beta-Naphthol, not more than 0.2 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 90.0 percent.

D&C RED No. 37

SPECIFICATIONS

3-Ethostearate of 9-o-carboxyphenyl-6-diethylamino-3-ethylimino-3-isoxanthene.
Volatile matter (at 80° C.), not more than 2.0 percent.
Sulfated ash, not more than 3.0 percent.
Matter insoluble in benzene, not more than 0.5 percent.
Diethyl-m-aminophenol, not more than 0.2 percent.
Stearic acid (not part of the dye), not more than 50.0 percent.
Pure dye (as determined by titration with titanium trichloride) not less than 50.0 percent.

D&C RED No. 38

SPECIFICATIONS

3-Hydroxy-N-(m-nitrophenyl)-4-(o-nitro-p-tolylazo)-2-napthamide.
Volatile matter (at 135° C.) not more than 5.0 percent.
Sulfated ash, not more than 1.5 percent.
Matter, insoluble in nitrobenzene, not more than 0.5 percent.
2-Nitro-p-toluidine, not more than 0.2 percent.
3-Hydroxy-N-(m-nitrophenyl)-2-naphthamide, not more than 0.2 percent.
Pure dye (as calculated from organically combined nitrogen), not less than 90.0 percent.

D&C RED No. 39

SPECIFICATIONS

o-[p-(β,β'-dihydroxy-diethylamino)-phenylazo]-benzoic acid.
Volatile matter (at 100° C.), not more than 2.0 percent.
Matter insoluble in acetone, not more than 1.5 percent.
Ether extract (petroleum ether), not more than 0.5 percent.
N,N(β,β'-dihydroxy-diethyl)-aniline, not more than 0.2 percent.
Sulfated ash, not more than 1.5 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 95.0 percent.

D&C ORANGE No. 3

SPECIFICATIONS

Disodium salt of 1-phenylazo-2-napthol-6,8-disulfonic acid.
Volatile matter (at 135° C.), not more than 10.0 percent.
Water insoluble matter, not more than 1.0 percent.
Ether extracts, not more than 0.5 percent.
Aniline, not more than 0.2 percent.
Chlorides and sulfates of sodium, not more than 8.0 percent.
Mixed oxides, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 82.0 percent.

D&C ORANGE No. 4

SPECIFICATIONS

Monosodium salt of 1-p-sulfophenylazo-2-naphthol.
Volatile matter (at 135° C.), not more than 10.0 percent.
Water insoluble matter, not more than 1.0 percent.
Ether extracts, not more than 0.5 percent.
beta-Naphthol, not more than 0.2 percent.
Chlorides and sulfates of sodium, not more than 5.0 percent.
Mixed oxides, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 85.0 percent.

D&C ORANGE No. 5

SPECIFICATIONS

4,5-Dibromo-3,6-fluorandiol.
Volatile matter (at 135° C.), not more than 5.0 percent.
Insoluble matter (alkaline solution), not more than 1.0 percent.
Ether extracts (from alkaline solution), not more than 0.5 percent.
Sodium chloride, not more than 3.0 percent.
Mixed oxides, not more than 1.0 percent.
Free bromine, not more than 0.02 percent.
Permitted range of organically combined bromine in pure dye, 31.0–35.0 percent.
Pure dye (as determined gravimetrically), not less than 90.0 percent.

D&C ORANGE No. 6

SPECIFICATIONS

Disodium salt of 4,5-dibromo-9-o-carboxyphenyl-6-hydroxy-3-isoxanthone.
Volatile matter (at 135° C.), not more than 10.0 percent.
Water insoluble matter, not more than 1.0 percent.
Ether extracts, not more than 0.5 percent.
Chlorides and sulfates of sodium, not more than 5.0 percent.
Mixed oxides, not more than 1.0 percent.
Free bromine, not more than 0.02 percent.
Permitted range of organically combined bromine in pure dye, 28.0–32.0 percent.
Pure dye (as determined gravimetrically), not less than 85.0 percent.

D&C Blue No. 6

SPECIFICATIONS

Indigotin.
Volatile matter (at 135° C.), not more than 5.0 percent.
Sulfated ash, not more than 2.0 percent.
Matter, insoluble in dichlorhydrin, not more than 1.0 percent.
Ether extracts, not more than 0.5 percent.
Pure dye (as determined by titration with titanium trichloride) not less than 95.0 percent.

D&C Blue No. 7

SPECIFICATIONS

Monosodium salt of 4-{[4-(N-ethyl-benzylamino)-phenyl]-(5 - hydroxy-4-sulfo-2-sulfoniumphenyl) - methylene}-(N - ethyl - N-benzyl-$\Delta^{2,5}$-cyclohexadienimine).
Volatile matter (at 135° C.), not more than 10.0 percent.
Water insoluble matter not more than 1.0 percent.
Ether extracts, not more than 0.5 percent.
m-Nitro-benzaldehyde, not more than 0.2 percent.
Benzylethylaniline, not more than 0.2 percent.
Chlorides and sulfates of sodium, not more than 8.0 percent.
Mixed oxides, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 80.0 percent.

D&C Blue No. 8

SPECIFICATIONS

Calcium salt of 4-{[4-(N-ethylbenzylamino) - phenyl]-(5-hydroxy-4-sulfo - 2 - sulfoniumphenyl) - methylene} - (N-ethyl-N-benzyl-$\Delta^{2,5}$-cyclohexadienimine).
Volatile matter (at 135° C.), not more than 10.0 percent.
Water insoluble matter, not more than 1.0 percent.
Ether extracts, not more than 0.5 percent.
m-Nitro-benzaldehyde, not more than 0.2 percent.
Benzylethylaniline, not more than 0.2 percent.
Chlorides and sulfates (as calcium salts), not more than 8.0 percent.
Oxides of iron and aluminum, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 80.0 percent.

D&C Blue No. 9

SPECIFICATIONS

3,3'-Dichloroindanthrene.
Volatile matter (at 135° C.), not more than 1.0 percent.
Sulfated ash, not more than 1.0 percent.
2-Amino anthraquinone, not more than 0.2 percent.
Matter extractable by alcoholic HCL, not more than 1.0 percent.
Permitted range of organically combined chlorine in pure dye, 13.0–14.8 percent.
Pure dye (as calculated from organically combined nitrogen), not less than 97.0 percent.

D&C Black No. 1

SPECIFICATIONS

Disodium salt of 8-amino-7-p-nitrophenylazo-2-phenylazo-1-naphthol-3,6- disulfonic acid.
Volatile matter (at 135° C.), not more than 10.0 percent.
Water insoluble matter, not more than 1.0 percent.
Ether extracts, not more than 0.5 percent.
Aniline, not more than 0.2 percent.
p-Nitroaniline, not more than 0.2 percent.
Chlorides and sulfates of sodium, not more than 10.0 percent.
Mixed oxides, not more than 1.0 percent.
Pure dye (as determined by titration with titanium trichloride), not less than 82.0 percent.

D&C Violet No. 2

SPECIFICATIONS

1-Hydroxy-4-p-toluino-anthraquinone.
Volatile matter (at 135° C.) not more than 2.0 percent.
Sulfated ash, not more than 1.0 percent.
Matter insoluble in carbon tetrachloride, not more than 1.5 percent.
p-Toluidine, not more than 0.2 percent.
Pure dye (as calculated from organically combined nitrogen), not less than 96.0 percent.
Melting point, not less than 185° C.

Lakes

Any lake, other than those listed in § 135.3, made by extending on a substratum of alumina, blanc fixe, gloss white, clay, titanium dioxide, zinc oxide, talc, rosin, aluminum benzoate, or any combination of two or more of these, (1) one of the straight colors (except lakes) listed in § 135.3 or hereinbefore listed in this paragraph, which color is a salt in which is combined the basic radicle sodium, potassium, aluminum, barium, calcium, strontium, or zirconium; or (2) a salt prepared from one of the straight colors (except lakes) listed in § 135.3, or hereinbefore listed in this paragraph, by combining such color with the basic radicle sodium, potassium, aluminum, barium, calcium, strontium, or zirconium.

SPECIFICATIONS

Ether extracts, not more than 0.5 percent.
Soluble chlorides and sulfates (as sodium salts), not more than 3.0 percent.
Intermediates, not more than 0.2 percent.

(b) Each lake made as prescribed under the caption "Lakes" in paragraph (a) of this section shall be considered to be a straight color and to be listed therein under the name which is formed as follows:

(1) The listed name of the color from which the lake is prepared, except that if such name contains the symbol "FD&C" such symbol shall be changed to "D&C";

(2) The name of the basic radicle combined in such color; and

(3) The word "Lake."

(For example, the name of a lake prepared by extending the color D&C Red No. 9 upon a substratum is "D&C Red No. 9—Barium Lake", and a lake prepared by extending the aluminum salt prepared from FD&C Green No. 1 upon a substratum other than alumina is "D&C Green No. 1—Aluminum Lake".)

§ 9.5 *List of straight colors and specifications for their certification for use in externally applied drugs and cosmetics.* (a) A batch of a straight color listed in this section may be certified, in accordance with the provisions of this part, for use in externally applied drugs and cosmetics, if such batch conforms to the requirements of § 9.2 and to the specifications set forth in this section for such color.

LAKES

Any lake made by extending on a substratum of alumina, blanc fixe, gloss white, clay, titanium dioxide, zinc oxide, talc, rosin, aluminum benzoate, or on any combination of two or more of these (1) one of the straight colors hereinbefore listed in this paragraph, which color is a salt in which is combined the basic radicle sodium, potassium, barium, or calcium; or (2) a salt prepared from one of the straight colors hereinbefore listed in this paragraph by combining such color with the basic radicle sodium, potassium, aluminum, barium, calcium, strontium, or zirconium.

SPECIFICATIONS

Ether extracts, not more than 0.5 percent.
Soluble chlorides and sulfates (as sodium salts), not more than 3.0 percent.
Intermediates, not more than 0.2 percent.

(b) Each lake made as prescribed under the caption "Lakes" in paragraph (a) of this section shall be considered to be a straight color and to be listed therein under the name which is formed as follows:

(1) The listed name of the color from which the lake is prepared;

(2 The name of the basic radicle combined in such color; and

(3) The word "Lake."

(For example, the name of a lake prepared by extending the color Ext D&C Yellow No. 2 upon a substratum is "Ext D&C Yellow No. 2—Calcium Lake," and a lake prepared by extending the barium salt prepared from Ext D&C Red No. 2 upon the substratum is "Ext D&C Red No. 2—Barium Lake.")

§ 9.6 *Mixtures which may be certified.* (a) A batch of a mixture which contains no straight color listed in § 9.4 or § 9.5 may be certified in accordance with the provisions of the regulations in this part, for use in food (subject to the restrictions prescribed in paragraph (d) of this section), drugs, and cosmetics, if:

(1) Each coal-tar color used as an ingredient in mixing such batch is from a previously certified batch and such color has not changed in composition in any manner whatever since such previous certification, except by mixing into such batch of mixture;

(2) Each diluent in such batch of mixture is harmless and suitable for use therein; and

(3) No diluent (except resins, natural gum, pectin and, in the case of mixtures which are aqueous solutions or aqueous pastes, sodium benzoate in a quantity of not more than 1/10 of 1 percent) in such mixture is a non-nutritive substance, unless such mixture is for external application to shell eggs, or for use in coloring a food specified in the requests for certification of such batch submitted in accordance with § 9.8 (c), and such diluent, in the usual process of manufacturing such food, is removed and does not become a component of such food.

(b) A batch of a mixture which contains no straight color listed in § 9.5, or which contains a diluent not permitted by paragraph (a) (3) of this section, may be certified in accordance with the provisions of this part, for use only in drugs and cosmetics, if:

(1) Each coal-tar color used as an ingredient in mixing such batch is from a previously certified batch and such color has not changed in composition in any manner whatever since such previous certification, except by mixing into such batch of mixture.

(2) Each diluent in such batch of mixture is harmless and suitable for use therein.

(c) A batch of a mixture which contains a straight color listed in § 9.5 may be certified in accordance with the provisions of this part, for use only in externally applied drugs and cosmetics, if:

(1) Each coal-tar color used as an ingredient in mixing such batch is from a previously certified batch and such color has not changed in composition in any manner whatever since such previous certification, except by mixing into such batch of mixture; and

(2) Each diluent in such batch of mixture is harmless and suitable for use therein.

(d) No mixture which contains a lake listed in § 9.3 shall be certified for any use in food except external application to shell eggs.

§ 9.7 *Sampling, storage, and packaging.* (a) A sample of a coal-tar color which is to accompany a request for certification submitted in accordance with § 9.8 shall be taken from the batch covered by such request only after such batch has been so thoroughly mixed as to be of uniform composition throughout. Immediately after such sample is taken it shall be closed in a package of such kind as to prevent change in the composition of such sample. Such package shall be labeled to show conspicuously the name and post office address of the person submitting such request, the name of such color, and the batch number and quantity of such batch.

(b) Immediately after such sample is taken such batch shall be stored in containers of such kind as to prevent change in the composition of such color, or closed in packages for shipment or delivery, and so held until such batch is certified or certification thereof is refused. If such batch is certified and at the time of certification such batch or any part thereof is so stored such storage shall be maintained until such batch or part is:

(1) Closed in such packages.

(2) Used by the person who obtained such certification as an ingredient in a batch of a mixture on which such person submits a request for certification in accordance with § 9.8, or

(3) Used by such person in coloring a food, drug, or cosmetic, in accordance with the use for which such batch was certified.

(c) The package in which a coal-tar color is closed for shipment or delivery shall be of such kind as to prevent change in the composition of such color, and shall be so closed or sealed that such package cannot be opened without destroying such package or seal.

(d) For the purposes of this part an unavoidable change in the moisture content of a coal-tar color caused by ordinary and customary exposure that occurs in good storage packing, and distribution practice, shall not be considered to be a change in the composition of such color.

§ 9.8 *Requests for certification.* (a) A request for certification of a batch of a coal-tar color shall be addressed to the Food and Drug Administration, Department of Health, Education and Welfare, Washington 25, D. C. A request from a foreign manufacturer shall be signed by such manufacturer and by an agent of such manufacturer who resides in the United States.

(b) Except in the case of a request submitted under paragraph (d) of this section, a person who requests the certification of a batch of a straight color shall submit as part of his request statements showing:

(1) Whether or not he manufactured such batch, and if he did not, the name and post office address of the manufacturer thereof;

(2) The name of such color, as listed in § 9.3, § 9.4, or § 9.5, and the batch number and quantity of such batch;

(3) In the case of a lake, the process whereby such lake is made, including the name or names of the substrata present and the quantity thereof used for such batch.

Such request shall be accompanied by a ¼-pound sample taken from such batch and accurately representative thereof, and by payment of the fee prescribed by § 9.15 (a) (1). Such person shall submit such additional information and samples as the Food and Drug Administration may require for the purpose of determining whether or not such batch complies with the requirements laid down by § 9.9 (a) for the issuance of a certificate.

(c) Except in the case of a request submitted under paragraph (d) of this section, a person who requests certification of a batch of a mixture shall submit as part of his request statements:

(1) To the effect that he mixed such batch;

(2) Showing the name of such mixture, and the batch number and quantity of such batch;

(3) Showing the lot number of each coal-tar color used as an ingredient in mixing such batch, the quantity of such color so used, and that such color has not changed in composition in any manner whatever since certification, except by mixing into such batch;

(4) Showing the name, quality, and quantity of each diluent used as an ingredient in mixing such batch;

(5) In case such mixture contains a diluent permitted by § 9.6 (a) (3) only because such mixture is for use in coloring shell eggs or such diluent does not become a component of a food colored by such mixture, specifying the name of the food for which such mixture is used;

(6) Describing fully the process of mixing, with special reference to the precautions taken to render such batch uniform in composition.

Such request shall be accompanied by a ⅛-pound sample (or if the mixture contains 2 percent or less of pure dye, a ¼-pound sample) taken from such mixed batch and accurately representative thereof, and by payment of the fee prescribed by § 9.15 (a) (2). Such person shall submit such additional information and samples as the Food and Drug Administration may require for the purpose of determining whether or not such mixed batch complies with the requirements laid down by § 9.9 (a) for the issuance of a certificate.

(d) A person who requests the certification of a batch made by repacking a coal-tar color from a batch previously certified under this part, shall submit as part of his request statements:

(1) To the effect that he made the batch on which he requests certification by repacking such color, and that such color has not changed in composition in any manner whatever since such previous certification; and

(2) Showing the lot number of such previously certified batch, the name of such repacked color, and the batch number and quantity of such repacked batch. Such request shall be accompanied by a ⅛-pound sample taken from such repacked batch and accurately representative thereof, and by payment of the fee prescribed by § 9.15 (a) (2). Such person shall submit such additional information and samples as the Food and Drug Administration may require for the purpose of determining whether or not such repacked batch complies with the requirements of § 9.9 (a) for the issuance of a certificate.

§ 9.9 *Certification.* (a) If the Food and Drug Administration determines, after such investigation as it considers to be necessary, that:

(1) A request submitted in accordance with § 9.8 appears to contain no untrue statement of a material fact;

(2) In the case of a straight color, such color conforms to the specifications set forth therefor in §§ 9.2, 9.3, 9.4, and 9.5;

(3) In the case of a mixture containing a diluent, such diluent is harmless and suitable for use therein; and

(4) The batch covered by such request otherwise appears to comply with this part, the Food and Drug Administration shall issue to the person who submitted such request a certificate showing the lot number assigned to such batch and that such batch, subject to the terms, conditions, and restrictions prescribed by § 9.10, is a certified batch for use in food, drugs, and cosmetics, or for use only in drugs and cosmetics, or for use only in externally applied drugs and cosmetics, as the case may be.

(b) If the Food and Drug Administration determines, after such investigation as it considers to be necessary, that a request submitted in accordance with § 9.8, or the batch of coal-tar color covered by such request, does not comply with the requirements laid down by paragraph (a) of this section for the issuance of a certificate, the Food and Drug Administration shall refuse to certify such batch and shall give notice thereof to the person who submitted such request, stating its reasons for refusal.

§ 9.10 *Limitations of certificates.* (a) If a certificate is obtained through fraud or misrepresentation of a material fact, such certificate shall not be effective, and coal-tar color from the batch on which such certificate was issued shall be considered to be from a batch that has not been certified in accordance with this part.

(b) If, between the time a sample of coal-tar color accompanying a request for certification is taken and the time a certificate covering the batch of such color is received by the person to whom it is issued, any such color becomes changed in composition in any manner whatever, such certificates shall not be effective with respect to such changed color, and such changed color shall be considered to be from a batch that has not been certified in accordance with this part.

(c) If, at any time after a certificate is received by the person to whom it is issued, any color from the batch covered by such certificate becomes changed in composition in any manner whatever, such certificate shall expire with respect to such changed color. After such expiration such color shall be considered to be from a batch that has not been certified in accordance with this part; except that such color shall not be so considered for the purpose of certifying a batch of a mixture in which such color was used as an ingredient, if such change resulted solely from such use.

(d) A certificate shall expire with respect to any coal-tar color covered thereby if the package in which such color was closed for shipment or delivery is opened, unless opened solely for repacking by the person to whom such certificate was issued. After such expiration such color shall be considered to be from a batch that has not been certified in accordance with this part; except that such color shall not be so considered:

(1) When such color is used, subject to the restrictions prescribed by paragraphs (f), (g), and (h) of this section, in coloring a food, drug, or cosmetic;

(2) For the purpose of certifying a batch made by repacking such color; or

(3) For the purpose of certifying a batch of a mixture in which such color is used as an ingredient.

(e) A certificate shall not be effective with respect to a package of coal-tar color, and such color shall be considered to be from a batch that has not been certified in accordance with this part, if such package is shipped or delivered under a label which does not bear all words, statements, and other information required by § 9.11 to appear thereon.

(f) If a mixture from a batch containing a diluent permitted by § 9.6 (a) (3) only because such diluent does not become a component of a food colored by such mixture is used in coloring another food, such mixture so used shall be considered to be from a batch that has not been certified in accordance with this part.

(g) If coal-tar color from a batch which was certified for use in drugs and cosmetics only is used in coloring a food; such color so used shall be considered to be from a batch that has not been certified in accordance with this part.

(h) If a coal-tar color from a batch which was certified for use only in externally applied drugs and cosmetics is used in food or in other drugs or other cosmetics, such color so used shall be considered to be from a batch that has not been certified in accordance with this part.

(i) If a coal-tar color from a batch containing any lake listed in § 9.3 is used in coloring any food except shell eggs, such color so used shall be considered to be from a batch that has not been certified in accordance with the regulations in this part.

§ 9.11 *Labeling.* (a) The label on each package of coal-tar color from a batch that has been certified in accordance with this part shall bear, in addition to other words, statements, and information required by or under authority of the act to appear on such label:

(1) The name of such color;

(2) The lot number of such batch unless, in the case of any mixture for household use which contains not more than 15 percent of pure dye and which, if it is liquid, is in packages containing not more than 2 fluid ounces, or, if it is solid, semisolid, or viscous, is in packages containing not more than 2 avoirdupois ounces, such lot number appears on the labeling or on each invoice accompanying shipments or deliveries of such mixture, or unless in the case of such mixture there appears on the label, a code number which the manufacturer has identified with the lot number by giving to the Food and Drug Administration written notice that such code number will be used in lieu of the lot number;

(3) The percentage of pure dye in such color as provided in paragraph (b) of this section; and,

(4) In case such batch was certified for use only in drugs and cosmetics, the statement "Not for use in coloring food"; or in case such batch was certified for use only in externally applied drugs and cosmetics, the statement "Not for use in coloring food, or in coloring any drug or cosmetic used internally or on the lips or any mucous membrane"; or in case such batch is a mixture containing a diluent permitted by § 9.6 (a) (3) only because such diluent does not become a component of a food colored by such mixture, the statement "Not for use in coloring any food except _____" (the blank to be filled in by the name of such food); or in case such batch contains any lake listed in § 9.3 or any diluent permitted by § 9.6 (a) (3) only because such batch is for use in coloring shell eggs, the statement "Not for use in coloring any food except shell eggs."

(b) The statement of the percentage of pure dye in a coal-tar color shall express:

(1) The percentage of pure dye shown in the certificate covering such color; or

(2) The minimum percentage by weight of pure dye in such color.

Where the statement expresses the minimum percentage, no variation below the stated minimum shall be permitted, and variations above shall not be unreasonably large.

(c) The name by which a straight color is designated on its label shall be the name by which such color is listed in § 9.3, § 9.4, or § 9.5.

(d) No batch of a mixture shall be certified under this part if:

(1) The name of such mixture is false or misleading in any particular; or

(2) The name of such mixture is the same as or simulates the name of a previously certified batch of a mixture containing a different substance, or a different percentage of a pure dye; but this provision shall not apply if:

(i) The person who requests certification of such batch is the owner of such name and has given 3 months' written notice to the Food and Drug Administration specifying the change to be made in the composition of such mixture; or

(ii) Such change results from removal of a color from the listings in §§ 135.3, 135.4, and 135.5.

§ 9.12 *Records of distribution.* (a) The person to whom a certificate is issued shall keep complete records showing the disposal of all the coal-tar color from the batch covered by such certificate. Upon the request of any officer or employee of the Food and Drug Administration, or of any other officer or employee of the United States acting on behalf of the Secretary of Health, Education, and Welfare, such person, at all reasonable hours until at least 1 year after disposal of all such color, shall make such records available to any such officer or employee, and shall accord to such officer or employee full opportunity to make inventory of stocks of such color on hand and otherwise to check the correctness of such records.

(b) The records required to be kept by paragraph (a) of this section shall show:

(1) Each quantity used by such person from such batch and the date and kind of such use;

(2) The date and quantity of each shipment or delivery from such batch, and the name and post office address of the person to whom such shipment or delivery was made.

§ 9.13 *Authority to refuse certification service.* When it appears to the Secretary of Health, Education, and Welfare that a person has:

(a) Obtained a certificate through fraud or misrepresentation of a material fact;

(b) Falsified the records required to be kept by § 9.12; or

(c) Failed to keep such records, or to make them available, or to accord full opportunity to make inventory of stocks on hand or otherwise to check the correctness of such records, as required by such section,

the Secretary may immediately suspend service to such person under this part, and may continue such suspension unless and until such person shows adequate cause why such suspension should be terminated.

§ 9.14 *Procedure for admitting colors to listing.* (a) An application for the admission of a coal-tar color to listing in § 9.3, § 9.4, or § 9.5 shall be accompanied by:

(1) Full reports of investigations which are adequate to show whether or not such color is harmless and suitable for use in food, drugs, and cosmetics, or in drugs and cosmetics, or in externally applied drugs and cosmetics, as the case may be;

(2) A full statement of the percentages and compositions of the pure dye and all intermediates and other impurities contained in such color;

(3) A full statement showing the identity, purity, and quantity or proportion of each intermediate and other article used as a component of such color, and all steps in the process used for the manufacture of such color;

(4) A full description of practical and accurate methods of analysis for the quantitative determination of the pure dye and of all intermediates and other impurities contained in such color;

(5) A full description of practical and accurate methods for the identification of such dye in food, drugs, and cosmetics colored therewith, or in drugs and cosmetics colored therewith;

(6) A 5-pound sample of such color (unless the Food and Drug Administration authorizes or requires submission of other quantity suitable to the need for investigation) taken from a batch produced under practical manufacturing conditions, and accurately representative of such batch; and

(7) The advance deposit prescribed by § 9.15 (b) (2).

(b) If the Secretary determines, after such investigation as he considers to be necessary, that:

(1) Such color is harmless and suitable for use in foods, drugs, and cosmetics, or in drugs and cosmetics, or in externally applied drugs and cosmetics;

(2) Practical and accurate methods of analysis exists for the quantitative determination of the pure dye and all intermediates and other impurities contained in such color; and

(3) Practical and accurate methods exist for the identification of such dye in food, drugs, and cosmetics colored therewith, or in drugs and cosmetics colored therewith, the Secretary, for the purpose of listing such color in § 9.3, § 9.4, or § 9.5, shall proceed with a proposed amendment to this part as prescribed by section 701 (e) of the act.

(c) If the Secretary, after such investigation as he considers to be necessary, determines that such color does not comply with the requirements laid down by paragraph (b) of this section with respect to procedure for the purpose of listing such color in § 9.3, § 9.4, or § 9.5, the Secretary shall give notice thereof to the applicant, stating the respects in which such color does not so comply.

§ 9.15 *Fees.* (a) (1) The fee for the services provided by the regulations in this part, in the case of each request for certification submitted in accordance with § 9.8 (b), shall be 10 cents per pound of the batch covered by such request; but no such fee shall be less than $75.00.

(2) The fees for the services provided under the regulations in this part in the case of each request for certification submitted in accordance with § 9.8 (c) or (d) shall be:

Weight of batch:	Fee
100 pounds or less	$6.00.
Over 100 pounds but not over 500 pounds.	$6.00, plus 4 cents for each pound in excess of 100 pounds.
Over 500 pounds	$22.00, plus ¼ cent for each pound in excess of 500 pounds.

(b) (1) The fee for the service provided by this part, in the case of each application for the admission of a coal-tar color in listing in § 9.3, § 9.4, or § 9.5, shall be the cost incurred by the Department in making the investigations contemplated by § 9.14 (b) and (c).

(2) Such application shall be accompanied by an advance deposit of $500 to cover such fee, and thereafter advance deposits of the same amount (unless the Food and Drug Administration authorizes deposit in other amount) shall be made whenever necessary to prevent arrears in the payment of such fee. Any excess advance deposit so made shall be returned to the applicant after the close of such investigation;

(c) All deposits and fees required by this section shall be paid by money order, bank draft, or certified check, drawn to the order of the Treasurer of the United States, collectible at par at Washington, D. C. All such deposits and fees shall be forwarded to the Food and Drug Administration, Department of Health, Education, and Welfare, Washington 25, D. C., whereupon after making appropriate records thereof they will be transmitted to the Chief Disbursing Officer, Division of Disbursement, Treasury Department, for deposit to the special account "Certification and Inspection Services, Food and Drug Administration."

(d) Whenever in the judgment of the Commissioner the ratio between fees collected (which are based upon experience and the best estimate of costs and the best estimate of earnings) and the costs of providing the service during an elapsed period of time, in the light of all circumstances and contingencies, warrants a refund from the fund collected during such period, he shall make ratable refunds to those persons to whom the services were rendered and charged, except that no refund shall be made where the computed ratable amount for the elapsed period is less than $5.00.

Subchapter B—Food and Food Products

PART 10—GENERAL REGULATIONS RELATING TO DEFINITIONS AND STANDARDS FOR FOOD

Sec.

10.1 General regulation.
10.2 General methods for water capacity and fill of containers.
10.3 General statements of substandard quality and substandard fill of container.

AUTHORITY: §§ 10.1 to 10.3, issued under sec. 701 (a), 52 Stat. 1055; 21 U. S. C. 371 (a).

§ 10.1 *General regulation.* (a) The definitions and interpretations of terms contained in section 201 of the act shall be applicable also to such terms when used in regulations promulgated under the act.

(b) If a regulation prescribing a definition and standard of identity for a food has been promulgated under section 401 of the act and the name therein specified for the food is used in any other regulation under section 401 or any other provision of the act, such name means the food which conforms to such definition and standard, except as otherwise specifically provided in such other regulation.

(c) No provision of any regulation prescribing a definition and standard of identity or standard of quality or fill of container under section 401 of the act shall be construed as in any way affecting the concurrent applicability of the general provisions of the act and the regulations thereunder relating to adulteration and misbranding. For example, all regulations under section 401 contemplate that the food and all articles used as components or ingredients thereof shall not be poisonous or deleterious and shall be clean, sound, and fit for food. A provision in such regulations for the use of coloring or flavoring does not authorize such use under circumstances or in a manner whereby damage or inferiority is concealed or whereby the food is made to appear better or of greater value than it is.

§ 10.2 *General methods for water capacity and fill of containers.* For the purposes of regulations promulgated under section 401 of the act:

(a) The term "general method for water capacity of containers" means the following method:

(1) In the case of a container with lid attached by double seam, cut out the lid without removing or altering the height of the double seam.

(2) Wash, dry, and weigh the empty container.

(3) Fill the container with distilled water at 68° Fahrenheit to 3/16 inch vertical distance below the top level of the container, and weigh the container thus filled.

(4) Subtract the weight found in subparagraph (2) from the weight found in subparagraph (3) of this paragraph. The difference shall be considered to be the weight of water required to fill the container.

In the case of a container with lid attached otherwise than by double seam, remove the lid and proceed as directed in subparagraphs (2)–(4) of this paragraph (except that under subparagraph (3) fill the container to the level of the top thereof.

(b) The term "general method for fill of containers" means the following method:

(1) In the case of a container with lid attached by double seam, cut out the lid without removing or altering the height of the double seam.

(2) Measure the vertical distance from the top level of the container to the top level of the food.

(3) Remove the food from the container; wash, dry, and weigh the container.

(4) Fill the container with water to 3/16 inch vertical distance below the top level of the container. Record the temperature of the water, weigh the container thus filled, and determine the weight of the water by substracting the weight of the container found in subparagraph (3) of this paragraph.

(5) Maintaining the water at the temperature recorded in subparagraph (4) of this paragraph, draw off water from the container as filled in subparagraph (4) to the level of the food found in subparagraph (2), weigh the container with remaining water, and determine the weight of the remaining water by subtracting the weight of the container found in subparagraph (3) of this paragraph.

(6) Divide the weight of water found in subparagraph (5) by the weight of water found in subparagraph (4), and multiply by 100. The result shall be considered to be the percent of the total capacity of the container occupied by the food.

In the case of a container with lid attached otherwise than by double seam, remove the lid and proceed as directed in subparagraphs (2)–(6) of this paragraph, except that under subparagraph (4), fill the container to the level of the top thereof.

§ 10.3 *General statements of substandard quality and substandard fill of container.* For the purposes of regulations promulgated under section 401 of the act:

(a) The term "general statement of substandard quality" means the statement "Below Standard in Quality Good Food—Not High Grade" printed in two lines of Cheltenham bold condensed caps. The words "Below Standard in Quality" constitute the first line, and the second immediately follows. If the quantity of the contents of the container is less than 1 pound, the type of the first line is 12-point, and of the second, 8-point. If such quantity is 1 pound or more, the type of the first line is 14-point, and of the second, 10-point. Such statement is enclosed within lines, not less than 6 points in width, forming a rectangle. Such statement, with enclosing lines, is on a strongly contrasting, uniform background, and is so placed as to be easily seen when the name of the food or any pictorial representation thereof is viewed, wherever such name or representation appears so conspicuously as to be easily seen under customary conditions of purchase.

(b) The term "general statement of substandard fill" means the statement "Below Standard in Fill" printed in Cheltenham bold condensed caps. If the quantity of the contents of the container is less than 1 pound, the statement is in 12-point type; if such quantity is 1 pound or more, the statement is in 14-point type. Such statement is enclosed within lines, not less than 6 points in width, forming a rectangle; but if the statement specified in paragraph (a) of this section is also used, both statements (one following the other) may be enclosed within the same rectangle. Such statement or statements, with enclosing lines, are on a strongly contrasting, uniform background, and are so placed as to be easily seen when the name of the food or any pictorial representation thereof is viewed, wherever such name or representation appears so conspicuously as to be easily seen under customary conditions of purchase.

PART 14—CACAO PRODUCTS; DEFINITIONS AND STANDARDS OF IDENTITY

Sec.

14.1 Cacao nibs, cocoa nibs, cracked cocoa; identity; label statement of optional ingredients.
14.2 Chocolate liquor, chocolate, baking chocolate, bitter chocolate, cooking chocolate, chocolate coating, bitter chocolate coating; identity; label statement of optional ingredients.
14.3 Breakfast cocoa, high fat cocoa; identity; label statement of optional ingredients.
14.4 Cocoa, medium fat cocoa; identity; label statement of optional ingredients.
14.5 Low-fat cocoa; identity; label statement of optional ingredients.
14.6 Sweet chocolate, sweet chocolate coating; identity; label statement of optional ingredients.
14.7 Milk chocolate, sweet milk chocolate, milk chocolate coating, sweet milk chocolate coating; identity; label statement of optional ingredients.
14.8 Skim milk chocolate, sweet skim milk chocolate, skim milk chocolate coating, sweet skim milk chocolate coating; identity; label statement of optional ingredients.
14.9 Buttermilk chocolate, buttermilk chocolate coating; identity; label statement of optional ingredients.
14.10 Mixed dairy product chocolates, mixed dairy product chocolate coatings; identity; label statement of optional ingredients.
14.11 Sweet chocolate and vegetable fat (other than cacao fat) coating; identity; label statement of optional ingredients.
14.12 Sweet cocoa and vegetable fat (other than cacao fat) coating; identity; label statement of optional ingredients.

AUTHORITY: §§ 14.1 to 14.12 issued under sec. 701 (a), 52 Stat. 1055; 21 U. S. C. 371 (a). Interpret or apply sec. 401, 52 Stat. 1046, 68 Stat. 54; 21 U. S. C. 341.

§ 14.1 *Cacao nibs, cocoa nibs, cracked cocoa; identity; label statement of optional ingredients.* (a) Cacao nibs, cocoa nibs, cracked cocoa is the food prepared by heating and cracking dried or cured and cleaned cacao beans and removing shell therefrom. Cacao nibs or the cacao beans from which they are prepared may be processed by heating with one or more of the following optional alkali ingredients, added as such or in aqueous solution: Bicarbonate, carbonate, or hydroxide of sodium, ammonium, or potassium; or carbonate or oxide of magnesium; but for each 100 parts by weight of cacao nibs used, as such or before shelling from the cacao beans, the total quantity of such alkalis used is not greater in neutralizing value (calculated from the respective combining weights of such alkalis used) than the neutralizing value of 3 parts by weight of anhydrous potassium carbonate. The cacao shell content of cacao nibs is not more than 1.75 percent by weight (calculated to an alkali-free basis if they or the cacao beans from which they were prepared have been processed with alkali), as determined by the method prescribed under "Shell in Cacao Nibs—Tentative" beginning on page 208 [Ed. note, 8th edition, 1955, p. 192, secs. 12.9–12.13] of "Official and Tentative Methods of Analysis of the Association of Official Agricultural Chemists," 5th Ed., 1940.

(b) When cacao nibs or the cacao beans from which they are prepared are processed, in whole or in part, with any optional alkali ingredient specified in paragraph (a) of this section, the label shall bear the statement "Processed with Alkali"; but in lieu of the word "Alkali" in such statement the specific common name of the optional alkali ingredient may be used. Wherever the name of the food appears on the label so conspicuously as to be easily seen under customary conditions of purchase, such statement shall immediately and conspicuously precede or follow such name without intervening written, printed, or graphic matter.

§ 14.2 *Chocolate liquor, chocolate, baking chocolate, bitter chocolate, cooking chocolate, chocolate coating, bitter chocolate coating; identity; label statement of optional ingredients.* (a) Chocolate liquor, chocolate, baking chocolate, bitter chocolate, cooking chocolate, chocolate coating, bitter chocolate coating is the solid or semiplastic food prepared by finely grinding cacao nibs. To such ground cacao nibs, cacao fat or a cocoa or both may be added in quantities needed to adjust the cacao fat content of the finished chocolate liquor. (For the purposes of this section the term "cocoa" means breakfast cocoa, cocoa, low-fat cocoa, or any mixture of two or more of these.) Chocolate liquor may be spiced, flavored, or otherwise seasoned with one or more of the following optional ingredients, other than any such ingredient or combinatoin of ingredients specified in subparagraphs (1), (2), or (3) of this paragraph which imparts a flavor that imitates the flavor of chocolate, milk, or butter:

(1) Ground spice.

(2) Ground vanilla beans; any natural food flavoring oil, oleoresin, or extract.

(3) Vanillin, ethyl vanillin, or other artificial food flavoring.

(4) Butter, milk fat, dried malted cereal extract, ground coffee, ground nut meats.

(5) Salt.

Any optional ingredient used with the cacao beans or cacao nibs from which such chocolate liquor is prepared, or used with any cocoa added in preparing such chocolate liquor, shall be considered to be an optional ingredient used with such chocolate liquor. The optional alkali ingredients specified for use with cacao nibs in § 14.1 (a) may be used as optional ingredients with chocolate liquor; but for each 100 parts by weight of cacao nibs used in preparing the chocolate liquor, the total quantity of such alkalis used is not greater in neutralizing value (calculated from the respective combining weights of such alkalis used) than 3 parts by weight of anhydrous potassium carbonate. The finished chocolate liquor contains not less than 50 percent and not more than 58 percent by weight of cacao fat. Unless the chocolate liquor is seasoned with butter, milk fat, or ground nut meats, the percentage of cacao fat is determined by the method prescribed under "Fat Method I—Official" beginning on page 202 [Ed. note, 8th edition, 1955, p. 198, sec. 12.22] of "Official and Tentative Methods of Analysis of the Association of Official Agricultural Chemists," 5th Ed., 1940.

(b) Wherever the name of the food appears on the label so conspicuously as to be easily seen under customary conditions of purchase, the statements prescribed in this section, showing the optional ingredients used shall immediately and conspicuously precede or follow such name, without intervening written, printed, or graphic matter.

(1) When the food is seasoned with an optional ingredient specified in subparagraph (a) (1) of this section the label shall bear the statement "Spiced," "Spice Added," "With Added Spice," "Spiced With ____," or "With Added ____," the blank being filled in with the specific common name of the spice used.

(2) When the food is flavored with an optional ingredient specified in paragraph (a) (2) of this section, the label shall bear the statement "Flavored," "Flavoring Added," "With Added Flavoring," "Flavored With _____," "_____ Added," or "With Added ____," the blank being filled in with the specific common name of the flavoring used.

(3) When the food is flavored with an optional ingredient specified in paragraph (a) (3) of this section, the label shall bear the statement "Artificially Flavored," "Artificial Flavoring Added," "With Artificial Flavoring," "Artificially Flavored With ____," or "With ____, an Artificial Flavoring," the blank being filled in with the specific common name of the artificial flavoring used.

(4) When the food is seasoned with an optional ingredient specified in paragraph (a) (4) of this section, the label shall bear the statement "Seasoned With ____," the blank being filled in with the specific common name of the substance used as seasoning.

(5) When any optional alkali ingredient specified in § 14.1 (a) is used, the label shall bear the statement "Processed With Alkali;" but in lieu of the word "Alkali" in such statement the specific common name of the optional alkali ingredient may be used.

Label statements prescribed in subparagraphs (1) to (4), inclusive, of this paragraph may be combined, as for example, "With Added Cinnamon, Vanilla, and Ethyl Vanillin, an Artificial Flavoring."

§ 14.3 *Breakfast cocoa, high fat cocoa; identity; label statement of optional ingredients.* (a) Breakfast cocoa, high fat cocoa is the food prepared by pulverizing the residual material remaining after part of the cacao fat has been removed from ground cacao nibs. It may be spiced, flavored, or otherwise seasoned with one or more of the following optional ingredients, other than any such ingredient or combination of ingredients which imparts a flavor that imi-

tates the flavor of chocolate, milk, or butter:

(1) Ground spice.

(2) Ground vanilla beans; any natural food flavoring oil, oleoresin, or extract.

(3) Vanillin, ethyl vanillin, or other artificial food flavoring.

(4) Salt.

Any optional ingredient used with the cacao beans, cacao nibs, or ground cacao nibs from which such breakfast cocoa is prepared shall be considered to be an optional ingredient used with such breakfast cocoa. The optional alkali ingredients specified for use with cacao nibs in § 14.1 (a) may be used as optional ingredients with breakfast cocoa; but for each 100 parts by weight of cacao nibs used in preparing the breakfast cocoa, the total quantity of such alkalis used is not greater in neutralizing value (calculated from the respective combining weights of such alkalis used) than 3 parts by weight of anhydrous potassium carbonate. The finished breakfast cocoa contains not less than 22 percent of cacao fat, as determined by the method prescribed under "Fat Method I—Official" beginning on page 202 [Ed. note, 8th edition, 1955, p. 198, sec. 12.22] of "Official and Tentative Methods of Analysis of the Association of Official Agricultural Chemists," 5th Ed., 1940.

(b) Wherever the name of the food appears on the label so conspicuously as to be easily seen under customary conditions of purchase, the statements prescribed in this section, showing the optional ingredients used shall immediately and conspicuously precede or follow such name, without intervening written, printed, or graphic matter:

(1) When the food is seasoned with an optional ingredient specified in paragraph (a) (1) of this section, the label shall bear the statement "Spiced," "Spice Added," "With Added Spice," "Spiced With ____," or "With Added ____," the blank being filled in with the specific common name of the spice used.

(2) When the food is flavored with an optional ingredient specified in subparagraph (a) (2) of this section, the label shall bear the statement "Flavored," "Flavoring Added," "With Added Flavoring," "Flavored With _____," "_____ Added," or "With Added ____," the blank being filled in with the specific common name of the flavoring used.

(3) When the food is flavored with an optional ingredient specified in paragraph (a) (3) of this section, the label shall bear the statement "Artificially Flavored," "Artificial Flavoring Added," "With Artificial Flavoring," "Artificially Flavored With ____," or "With ____, an Artificial Flavoring," the blank being filled in with the specific common name of the artificial flavoring used.

(4) When any optional alkali ingredient specified in § 14.1 (a) is used, the label shall bear the statement "Processed With Alkali" but in lieu of the word "Alkali" in such statement the specific common name of the optional alkali ingredient may be used.

Label statements prescribed by subparagraphs (1) to (4), inclusive, of this paragraph may be combined, as for example, "With Added Cinnamon, Vanilla, and Ethyl Vanillin, an Artificial Flavoring."

§ 14.4 *Cocoa, medium fat cocoa; identity; label statement of optional ingredients.* Cocoa, medium fat cocoa conforms to the definition and standard of identity, and is subject to the requirements for label statement of optional ingredients, prescribed for breakfast cocoa by § 14.3, except that it contains less than 22 percent but not less than 10 percent of cacao fat, as determined by the method referred to in § 14.3 (a).

§ 14.5 *Low-fat cocoa; identity; label statement of optional ingredients.* Low-fat cocoa conforms to the definition and standard of identity, and is subject to the requirements for label statement of optional ingredients, prescribed for breakfast cocoa by § 14.3, except that it contains less than 10 percent of cacao fat as determined by the method referred to in § 14.3 (a).

§ 14.6 *Sweet chocolate, sweet chocolate coating; identity; label statement of optional ingredients.* (a) Sweet chocolate, sweet chocolate coating is the solid or semiplastic food the ingredients of which are intimately mixed and ground, prepared from chocolate liquor (with or without the addition of cacao fat) sweetened with one of the optional saccharine ingredients specified in paragraph (b) of this section. It may be spiced, flavored, or otherwise seasoned with one or more of the following optional ingredients, other than any such ingredient or combination of ingredients which imparts a flavor that imitates the flavor of chocolate, milk, or butter:

(1) Ground spice, ground vanilla beans, any natural food flavoring oil or oleoresin or extract, ground coffee, ground nut meats, honey, molasses, brown sugar, mable sugar, dried malted cereal extract, salt.

(2) Vanillin, ethyl vanillin, or other artificial food flavoring.

One or a mixture of both of the following optional emulsifying ingredients may be added in a total quantity not more than 0.5 percent of the weight of the finished food (such ingredient or mixture may be added in combination with a vegetable food fat carrier, such combination containing not less than 60 percent by weight of the emulsifying ingredient or mixture):

(3) Lecithin, with or without related natural phosphatides.

(4) Monoglycerides and diglycerides of fat-forming fatty acids in combination with monosodium phosphate derivatives thereof.

One or any mixture of two or more of the following optional dairy ingredients may be used in such quantity that the finished sweet chocolate contains less than 12 percent by weight of milk constituent solids:

(5) Butter, milk fat, cream, milk, concentrated milk, evaporated milk, sweetened condensed milk, dried milk, skim milk, concentrated skim milk, evaporated skim milk, sweetened condensed skim milk, nonfat dry milk solids, concentrated buttermilk, dried buttermilk, malted milk.

If chocolate liquor with any optional ingredient specified in § 14.2 (a) is used, such ingredient shall be considered to be an optional ingredient used with the sweet chocolate. The finished sweet chocolate contains not less than 15 percent by weight of chocolate liquor, calculated by subtracting from the weight of chocolate liquor used the weight of cacao fat therein and the weights therein of alkali and seasoning ingredients, if any, multiplying the remainder by 2.2, dividing the result by the weight of the finished sweet chocolate, and multiplying the quotient by 100. Bittersweet chocolate is sweet chocolate which contains not less than 35 percent by weight of chocolate liquor, calculated in the same manner.

(b) The optional saccharine ingredients referred to in paragraph (a) of this section are:

(1) Sugar, or partly refined cane sugar, or both.

(2) Any mixture of dextrose and sugar or partly refined cane sugar or both in which the weight of the solids of the dextrose used is not more than one-third of the total weight of the solids of all the saccharine ingredients used.

(3) Any mixture of dried corn sirup or dried glucose sirup and sugar or partly refined cane sugar or both in which the weight of the solids of the dried corn sirup or dried glucose sirup used is not more than one-fourth of the total weight of the solids of all the saccharine ingredients used.

(4) Any mixture of dextrose and dried corn sirup or dried glucose sirup and sugar or partly refined cane sugar or both in which three times the weight of the solids of the dextrose used plus four times the weight of the solids of the dried corn sirup or of the solids of the dried glucose sirup used is not more than the total weight of the solids of all the saccharine ingredients used.

(c) For the purpose of this section:

(1) The term "dextrose" means the anhydrous refined monosaccharide obtained from hydrolyzed starch.

(2) The term "dried corn sirup" means the product obtained by drying incompletely hydrolyzed cornstarch; its solids contain not less than 58 percent by weight of reducing sugars.

(3) The term "dried glucose sirup" means the product obtained by drying "glucose sirup." "Glucose sirup" is a clarified, concentrated, aqueous solution of the products obtained by the incomplete hydrolysis of any edible starch. The solids of glucose sirup contain not less than 40 percent by weight of reducing sugars calculated as anhydrous dextrose.

(d) "Semisweet chocolate," "bittersweet chocolate," "semisweet chocolate coating," and "bittersweet chocolate coating" are alternate names for sweet chocolate which contains not less than the minimum quantity of chocolate liquor prescribed for bittersweet chocolate by paragraph (a) of this section.

(e) Wherever the name of the food appears on the label so conspicuously as to be easily seen under customary conditions of purchase, the statements prescribed in this section, showing the optional ingredients used shall immediately and conspicuously precede or follow such name, without intervening written, printed, or graphic matter:

(1) When the food is flavored with an optional ingredient specified in paragraph (a) (2) of this section, the label shall bear the statement "Artificially Flavored," "Artificial Flavoring Added," "With Artificial Flavoring," "Artificially Flavored With _____," or "With ____, an Artificial Flavoring," the blank being filled in with the specific common name of the artificial flavoring used.

(2) When an optional ingredient specified in paragraph (a) (3) or (4) of this section is used, the label shall bear the statement "Emulsifier Added" or "With Added Emulsifier."

(3) When any optional alkali ingredient specified in § 14.1 (a) is used the label shall bear the statement "Processed with Alkali," but in lieu of the word "Alkali" in such statement the specific common name of the optional alkali ingredient may be used.

Label statements prescribed by subparagraphs (1) and (2) of this paragraph may be combined, as for example, "With Added Emulsifier and Ethyl Vanillin, an Artificial Flavoring."

§ 14.7 *Milk chocolate, sweet milk chocolate, milk chocolate coating, sweet milk chocolate coating; identity, label statement of optional ingredients.* (a) Milk chocolate, sweet milk chocolate, milk chocolate coating, sweet milk chocolate coating is the solid or semiplastic food the ingredients of which are intimately mixed and ground, prepared from chocolate liquor (with or without the addition of cacao fat) and one or more of the optional dairy ingredients specified in paragraph (b) of this section, sweetened with one of the optional saccharine ingredients specified in § 14.6 (b) and (c). It may be spiced, flavored, or otherwise seasoned with one or more of the following optional ingredients, other than any such ingredient or combination of ingredients which imparts a flavor that imitates the flavor of chocolate, milk, or butter:

(1) Ground spice, ground vanilla beans, any natural food flavoring oil or oleoresin or extract, ground coffee, ground nut meats, honey, molasses, brown sugar, maple sugar, dried malted cereal extract, salt.

(2) Vanillin, ethyl vanillin or other artificial food flavoring.

One or a mixture of both of the following optional emulsifying ingredients may be added in a total quantity not more than 0.5 percent of the weight of the finished food (such ingredient or mixture may be added in combination with a vegetable food fat carrier, such combination containing not less than 60 percent by weight of the emulsifying ingredient or mixture):

(3) Lecithin, with or without related natural phosphatides.

(4) Monoglycerides and diglycerides of fat-forming fatty acids in combination with monosodium phosphate derivatives thereof.

If chocolate liquor with any optional ingredient specified in § 14.2 (a) is used, such ingredient shall be considered to be an optional ingredient used with the milk chocolate. The finished milk chocolate contains not less than 3.66 percent by weight of milk fat, not less than 12 percent by weight of milk solids, and not less than 10 percent by weight of chocolate liquor as calculated by subtracting from the weight of chocolate liquor used the weight of cacao fat therein and the weights therein of alkali and seasoning ingredients, if any, multiplying the remainder by 2.2, dividing the result by the weight of the finished milk chocolate, and multiplying the quotient by 100.

(b) The optional dairy ingredients referred to in paragraph (a) of this section are milk, concentrated milk, evaporated milk, sweetened condensed milk, dried milk, butter, milk fat, cream, skim milk, concentrated skim milk, evaporated skim milk, sweetened condensed skim milk, and nonfat dry milk solids; but in any such ingredient or combination of two or more of such ingredients used, the weight of nonfat milk solids is not more than 2.43 times and not less than 1.20 times the weight of milk fat therein.

(c) Wherever the name of the food appears on the label so conspicuously as to be easily seen under customary conditions of purchase, the statements prescribed in this section, showing the optional ingredients used shall immediately and conspicuously precede or follow such name, without intervening written, printed, or graphic matter:

(1) When the food is flavored with an optional ingredient specified in paragraph (a) (2) of this section, the label shall bear the statement "Artificially Flavored", "Artificial Flavoring Added", "With Artificial Flavoring", "Artificially Flavored With _____", or "With _____, an Artificial Flavoring", the blank being filled in with the specific common name of the artificial flavoring used.

(2) When an optional ingredient specified in paragraph (a) (3) or (4) of this section is used, the label shall bear the statement "Emulsifier Added" or "With Added Emulsifier."

(3) When any optional alkali ingredient specified in § 14.1 (a) is used the label shall bear the statement "Processed With Alkali", but in lieu of the word "Alkali" in such statement the specific common name of the optional alkali ingredient may be used.

Label statements prescribed by subparagraphs (1) and (2) of this paragraph may be combined, as for example, "With Added Emulsifier and Ethyl Vanillin, an Artificial Flavoring."

§ 14.8 *Skim milk chocolate, sweet skim milk chocolate, skim milk chocolate coating, sweet skim milk chocolate coating; identity; label statement of optional ingredients.* (a) Skim milk chocolate, sweet skim milk chocolate, skim milk chocolate coating, sweet skim milk chocolate coating conforms to the definition and standard of identity, and is subject to the requirements for label statement of optional ingredients, prescribed for milk chocolate by § 14.7, except that:

(1) The dairy ingredients used are limited to skim milk, concentrated skim milk, evaporated skim milk, sweetened condensed skim milk, nonfat dry milk solids, and any combination of two or more of these.

(2) The finished skim milk chocolate contains less than 3.66 percent by weight of milk fat and, instead of milk solids, it contains not less than 12 percent by weight of skim milk solids.

§ 14.9 *Buttermilk chocolate, buttermilk chocolate coating; identity; label statement of optional ingredients.* (a) Buttermilk chocolate, buttermilk chocolate coating conforms to the definition and standard of identity, and is subject to the requirements for label statement of optional ingredients, prescribed for milk chocolate by § 14.7, except that:

(1) The dairy ingredients used are limited to sweet cream buttermilk, concentrated sweet cream buttermilk, dried sweet cream buttermilk, or any combination of two or all of these.

(2) The finished buttermilk chocolate contains less than 3.66 percent by weight of milk fat and, instead of milk solids, it contains not less than 12 percent by weight of sweet cream buttermilk solids.

§ 14.10 *Mixed dairy product chocolates, mixed dairy product chocolate coatings; identity; label statement of optional ingredients.* (a) The articles for which definitions and standards of identity are prescribed by this section are the foods each of which conforms to the definition and standard of identity, and is subject to the requirements for label statement of optional ingredients, prescribed for milk chocolate by § 14.7, except that:

(1) The dairy ingredient used in each such article is a mixture of two or more of the following four components:

(i) Any dairy ingredient or combination of such ingredients specified in § 14.7 (b) which is within the limits of the ratios specified therein for nonfat milk solids to milk fat.

(ii) One or more of the five skim milk ingredients specified in § 14.8.

(iii) One or more of the three sweet cream buttermilk ingredients specified in § 14.9.

(iv) Malted milk.

(2) Each of the finished articles may contain less than 3.66 percent by weight of milk fat and, instead of milk solids, it contains not less than 12 percent by weight of milk constituent solids of the components used. The quantity of each component used in any such mixture is such that no component contributes less than one-third of the weight of milk constituent solids contributed by that component used in largest proportion. When any such mixture is of components (i) and (ii) of subparagraph (1), the quantity of nonfat milk solids in such mixture is more than 2.43 times the quantity of milk fat therein. For the purposes of paragraph (b) of this section, the designation of each of the components listed above is respectively "Milk," "Skim Milk," "Buttermilk," and "Malted Milk."

(b) The name of each such article is "chocolate" or "chocolate coating" preceded by the designations prescribed by paragraph (a) of this section for each component of the dairy ingredients used, such designations appearing in the order of predominance, if any, of the weight of milk constituent solids in each such

component. (For example, "Milk and Skim Milk Chocolate.")

§ 14.11 *Sweet chocolate and vegetable fat (other than cacao fat) coating; identity; label statement of optional ingredients.* (a) Sweet chocolate and vegetable fat (other than cacao fat) coating conforms to the definition and standard of identity, and is subject to the requirements for label statement of optional ingredients, prescribed for sweet chocolate by § 14.6, except that:

(1) In its preparation is added one or any combination of two or more vegetable food oils or vegetable food fats, other than cacao fat, which oil, fat, or combination may be hydrogenated and which has a melting point lower than that of cacao fat.

(2) The requirement of § 14.6 (a) that the milk constituent solids be less than 12 percent by weight does not apply.

(b) The provisions of this section shall not be construed as applicable to any article by reason of the addition thereto of a vegetable food fat other than cacao fat as a carrier of emulsifying ingredients, as authorized and within the limit prescribed by § 14.6 (a).

§ 14.12 *Sweet cocoa and vegetable fat (other than cacao fat) coating; identity; label statement of optional ingredients.* (a) Sweet cocoa and vegetable fat (other than cacao fat) coating conforms to the definition and standard of identity, and is subject to the requirements for label statement of optional ingredients, prescribed for sweet chocolate by § 14.6, except that:

(1) In its preparation cocoa is used, instead of chocolate liquor, in such quantity that the finished food contains not less than 6.8 percent by weight of the nonfat cacao portion of such cocoa, calculated by subtracting from the weight of cocoa used the weight of cacao fat therein and the weight therein of alkali and seasoning ingredients, if any, dividing the remainder by the weight of the finished food, and multiplying the quotient by 100. (For the purposes of this section the term "cocoa" means breakfast cocoa, cocoa, low-fat cocoa, or any mixture of two or more of these.)

(2) In its preparation is added one or any combination of two or more vegetable food oils, vegetable food fats, or vegetable food stearins, other than cacao fat, which oil, fat, stearin, or combination has a melting point higher than that of cacao fat. Any such oil or fat may be hydrogenated.

(3) The requirement of § 14.6 (a) that the milk constituent solids be less than 12 percent by weight does not apply.

PART 15—CEREAL FLOURS AND RELATED PRODUCTS; DEFINITIONS AND STANDARDS OF IDENTITY

Subpart A—Wheat Flour and Related Products

Sec.

15.1 Flour, white flour, wheat flour, plain flour; identity; label statement of optional ingredients.
15.10 Enriched flour; identity; label statement of optional ingredients.
15.20 Bromated flour; identity; label statement of optional ingredients.
15.30 Enriched bromated flour; identity; label statement of optional ingredients.
15.40 Durum flour; identity.
15.50 Self-rising flour, self-rising white flour, self-rising wheat flour; identity; label statement of optional ingredients.
15.60 Enriched self-rising flour; identity; label statement of optional ingredients.
15.70 Phosphated flour, phosphated white flour, phosphated wheat flour; identity; label statement of optional ingredients.
15.80 Whole wheat flour, graham flour, entire wheat flour; identity; label statement of optional ingredients.
15.90 Bromated whole wheat flour; identity; label statement of optional ingredients.
15.100 Whole durum wheat flour; identity; label statement of optional ingredients.
15.110 Crushed wheat, coarse ground wheat; identity.
15.120 Cracked wheat; identity.
15.130 Farina; identity.
15.140 Enriched farina; identity; label statement of optional ingredients.
15.150 Semolina; identity.

Subpart B—Corn Flour and Related Products

15.500 White corn meal; identity.
15.501 Yellow corn meal; identity.
15.502 Bolted white corn meal; identity.
15.503 Bolted yellow corn meal; identity.
15.504 Degerminated white corn meal, degermed white corn meal; identity.
15.505 Degerminated yellow corn meal, degermed yellow corn meal; identity.
15.506 Self-rising white corn meal; identity.
15.507 Self-rising yellow corn meal; identity.
15.508 White corn flour; identity.
15.509 Yellow corn flour; identity.
15.510 Grits, corn grits, hominy grits; identity.
15.511 Yellow grits, yellow corn grits, yellow hominy grits; identity.
15.512 Quick grits, quick cooking grits; identity.
15.513 Enriched corn meals; identity.
15.514 Enriched corn grits; identity.

AUTHORITY: §§ 15.1 to 15.514 issued under sec. 701 (a), 52 Stat. 1055; 21 U. S. C. 371 (a). Interpret or apply sec. 401, 52 Stat. 1046, 68 Stat 54; 21 U. S. C. 341.

SUBPART A—WHEAT FLOUR AND RELATED PRODUCTS

§ 15.1 *Flour, white flour, wheat flour, plain flour; identity; label statement of optional ingredients.* (a) Flour, white flour, wheat flour, plain flour, is the food prepared by grinding and bolting cleaned wheat other than durum wheat and red durum wheat; to compensate for any natural deficiency of enzymes, malted wheat, malted wheat flour, malted barley flour, or any combination of two or more of these, may be used; but the quantity of malted barley flour so used is not more than 0.25 percent. One of the cloths through which the flour is bolted has openings not larger than those of woven wire cloth designated "149 micron (No. 100)" in Table I of "Standard Specifications for Sieves," published March 1, 1940, in L. C. 584 of the United States Department of Commerce, National Bureau of Standards. The flour is freed from bran coat, or bran coat and germ, to such extent that the percent of ash therein, calculated to a moisture-free basis is not more than the sum of 1/20 of the percent of protein therein, calculated to a moisture-free basis, and 0.35. Its moisture content is not more than 15 percent. Unless such addition conceals damage or inferiority of the flour or makes it appear better or of greater value than it is, one or any combination of two or more of the following optional bleaching ingredients may be added in a quantity not more than sufficient for bleaching or, in case such ingredient has an artificial aging effect, in a quantity not more than sufficient for bleaching and such artificial aging effect:

(1) Oxides of nitrogen.
(2) Chlorine.
(3) Nitrosyl chloride.
(4) Chlorine dioxide.

(5) One part by weight of benzoyl peroxide mixed with not more than six parts by weight of one or any mixture of two or more of the following: potassium alum, calcium sulfate, magnesium carbonate, sodium aluminum sulfate, dicalcium phosphate, tricalcium phosphate, starch, calcium carbonate.

(b) When any optional bleaching ingredient is used, the label shall bear the word "Bleached." Wherever the name of the food appears on the label so conspicuously as to be easily seen under customary conditions of purchase, the word "Bleached" shall immediately and conspicuously precede or follow such name, without intervening written, printed, or graphic matter; except that where such name is a part of a trade-mark or brand, other written, printed, or graphic matter, which is also a part of such trade-mark or brand, may so intervene if the word "Bleached" is in such juxtaposition with such trade-mark or brand as to be conspicuously related to such name.

(c) For the purposes of this section:

(1) Ash is determined by the method prescribed in the book "Official and Tentative Methods of Analysis of the Association of Official Agricultural Chemists," 5th Edition, 1940, page 212, under "Method I—Official." [Ed. note: 8th Ed., 1955, p. 207, sec. 13.6.] Ash is calculated to a moisture-free basis by subtracting the percent of moisture in the flour from 100, dividing the remainder into the percent of ash, and multiplying the quotient by 100.

(2) Protein is 5.7 times the nitrogen as determined by the method prescribed in such book on page 26, under "Kjeldahl-Gunning-Arnold Method—Official." [Ed. note: 8th Ed., 1955, p. 12 "Improved Kjeldahl method for nitrate-free samples," sec. 2.23]. Protein is calculated to a moisture-free basis by subtracting the percent of moisture in the flour from 100, dividing the remainder into the percent of protein, and multiplying the quotient by 100.

(3) Moisture is determined by the method prescribed in such book on page 211, under "Vacuum Oven Method—Official." [Ed. note: 8th Ed., 1955, p. 206, secs. 13.2, 13.3.]

§ 15.10 *Enriched flour; identity; label statement of optional ingredients.* Enriched flour conforms to the definition and standard of identity, and is subject to the requirements for label statement of optional ingredients, prescribed for flour by § 15.1, except that:

(a) It contains in each pound not less than 2.0 milligrams and not more than 2.5 milligrams of thiamine, not less than 1.2 milligrams and not more than 1.5 milligrams of riboflavin, not less than 16.0 milligrams and not more than 20.0 milligrams of niacin or niacinamide, not less than 13.0 milligrams and not more than 16.5 milligrams of iron (Fe);

(b) Vitamin D may be added in such quantity that each pound of the finished enriched flour contains not less than 250 U. S. P. units and not more than 1,000 U. S. P. units of vitamin D;

(c) Calcium may be added in such quantity that each pound of the finished enriched flour contains not less than 500 milligrams and not more than 625 milligrams of calcium (Ca), except that enriched flour may be acidified with monocalcium phosphate irrespective of the minimum limit for calcium (Ca) prescribed in this paragraph;

(d) It may contain not more than 5 percent by weight of wheat germ or partly defatted wheat germ; and

(e) In determining whether the ash content complies with the requirements of this section allowance is made for ash resulting from any added iron or salts of iron or calcium.

Iron and calcium may be added only in forms which are harmless and assimilable. The substances referred to in paragraphs (a) and (b) of this section may be added in a harmless carrier which does not impair the enriched flour; such carrier is used only in the quantity necessary to effect an intimate and uniform admixture of such substances with the flour.

§ 15.20 *Bromated flour; identity; label statement of optional ingredients.* Bromated flour conforms to the definition and standard of identity, and is subject to the requirements for label statement of optional ingredients, prescribed for flour by § 15.1, except that potassium bromate is added in a quantity not exceeding 50 parts to each million parts of the finished bromated flour, and is added only to flours whose baking qualities are improved by such addition.

§ 15.30 *Enriched bromated flour; identity; label statement of optional ingredients.* Enriched bromated flour conforms to the definition and standard of identity, and is subject to the requirements for label statement of optional ingredients, prescribed for enriched flour by § 15.10, except that potassium bromate is added in a quantity not exceeding 50 parts to each million parts of the finished enriched bromated flour, and is added only to enriched flours whose baking qualities are improved by such addition.

§ 15.40 *Durum flour; identity.* (a) Durum flour is the food prepared by grinding and bolting cleaned durum wheat. One of the cloths through which such flour is bolted has openings not larger than those of woven-wire cloth designated "149 micron (No. 100)" in table I of "Standard Specifications for Sieves," published March 1, 1940, in L. C. 584 of the U. S. Department of Commerce, National Bureau of Standards. It is freed from bran coat, or bran coat and germ, to such extent that the percent of ash therein, calculated to a moisture-free basis, is not more than 1.5 percent. Its moisture content is not more than 15 percent.

(b) For the purposes of this section, ash and moisture are determined by the methods therefor referred to in § 15.1 (c).

§ 15.50 *Self-rising flour, self-rising white flour, self-rising wheat flour; identity; label statement of optional ingredients.* (a) Self-rising flour, self-rising white flour, self-rising wheat flour, is an intimate mixture of flour, sodium bicarbonate, and the acid-reacting substance monocalcium phosphate or sodium acid pyrophosphate or both. It is seasoned with salt. When it is tested by the method prescribed in paragraph (c) of this section not less than 0.5 percent of carbon dioxide is evolved. The acid-reacting substance is added in sufficient quantity to neutralize the sodium bicarbonate. The combined weight of such acid-reacting substance and sodium bicarbonate is not more than 4.5 parts to each 100 parts of flour used. Subject to the conditions and restrictions prescribed by § 15.1 (a), the bleaching ingredients specified in such section may be added as optional ingredients. If the flour used in making the self-rising flour is bleached, the optional bleaching ingredient used therein (see § 15.1 (a)) is also an optional ingredient of the self-rising flour.

(b) (1) When any optional bleaching ingredient is used, the label shall bear the word "Bleached."

(2) Wherever the name of the food appears on the label so conspicuously as to be easily seen under customary conditions of purchase, the word "Bleached" shall immediately and conspicuously precede or follow such name, without intervening written, printed, or graphic matter; except that where such name is a part of a trade-mark or brand, other written, printed, or graphic matter, which is also a part of such trade-mark or brand, may so intervene if the word "Bleached" is in such juxtaposition with such trade-mark or brand as to be conspicuously related to such name.

(c) The method referred to in paragraph (a) of this section is the method prescribed in "Official and Tentative Methods of Analysis of the Association of Official Agricultural Chemists," 5th edition, 1940, beginning on page 186 [Ed. note, 8th edition, 1955, p. 127, secs. 17.2, 17.3], under "Gasometric Method with Chittick's Apparatus—Official," except that the following procedure is substituted for the procedure specified therein under "6—Determination":

Weigh 17 grams of the official sample into flask A, add 15–20 glass beads (4–6 mm. diameter), and connect this flask with the apparatus (fig. 22). Open stopcock C and by means of the leveling bulb E bring the displacement solution to the 25 cc. graduation above the zero mark. (This 25 cc. is a partial allowance for the volume of acid to be used in the decomposition.) Allow the apparatus to stand 1–2 minutes to insure that the temperature and pressure within the apparatus are the same as those of the room. Close the stopcock, lower the leveling bulb somewhat to reduce the pressure within the apparatus, and slowly run into the decomposition flask from burette F 45 cc. of sulfuric acid (1+5). To prevent the liberated carbon dioxide from escaping through the acid burette into the air, keep the displacement solution in the leveling bulb at all times during the decomposition at a lower level than that in the gas-measuring tube. Rotate and then vigorously agitate the decomposition flask for three minutes to mix the contents intimately. Allow to stand for 10 minutes to bring to equilibrium. Equalize the pressure in the measuring tube by means of the leveling bulb and read the volume of gas from the zero point on the tube. Deduct 20 cc. from this reading (this 20 cc. together with previous allowance of 25 cc. compensates for the 45 cc. acid used in the decomposition). Observe the temperature of the air surrounding the apparatus and also the barometric pressure and multiply the number of cc. of gas evolved by the factor given in Table 24—Chapter XLIII [Ed. note, 8th edition, 1955, sec. 42.29] for the temperature and pressure observed. Divide the corrected reading by 100 to obtain the apparent percent by weight of carbon dioxide in the official sample.

Correct the apparent percent of carbon dioxide to compensate for varying atmospheric conditions by immediately assaying a synthetic sample by the same method in the same apparatus.

Prepare the synthetic sample with 16.2 grams of flour, 0.30 gram of monocalcium phosphate, 0.30 gram of salt, and a sufficient quantity of sodium bicarbonate U. S. P. (dried over sulfuric acid) to yield the amount of carbon dioxide recovered in assay of official sample. Determine this quantity by multiplying weight of carbon dioxide recovered in assay of official sample by 1.91.

Divide the weight of carbon dioxide recovered from synthetic sample by weight of carbon dioxide contained in sodium bicarbonate used.

Divide the quotient into the apparent percent of carbon dioxide in official sample to obtain percent of carbon dioxide evolved from the official sample.

§ 15.60 *Enriched self-rising flour; identity; label statement of optional ingredients.* Enriched self-rising flour conforms to the definition and standard of identity, and is subject to the requirements for label statement of optional ingredients, prescribed for self-rising flour by § 15.50, except that:

(a) It contains in each pound not less than 2.0 milligrams and not more than 2.5 milligrams of thiamine, not less than 1.2 milligrams and not more than 1.5 milligrams of riboflavin, not less than 16.0 milligrams and not more than 20.0 milligrams of niacin or niacinamide, not less than 13.0 milligrams and not more than 16.5 milligrams of iron (Fe), not less than 500 milligrams and not more than 1,500 milligrams of calcium (Ca);

(b) Vitamin D may be added in such quantity that each pound of the finished enriched self-rising flour contains not

less than 250 U. S. P. units and not more than 1,000 U. S. P. units of vitamin D;

(c) It may contain not more than 5 percent by weight of wheat germ or partly defatted wheat germ;

(d) When calcium is added as dicalcium phosphate, such dicalcium phosphate is also considered to be an acid-reacting substance; and

(e) When calcium is added as carbonate, the method set forth in § 15.50 (c) does not apply as a test for carbon dioxide evolved; but in such case the quantity of carbon dioxide evolved under ordinary conditions of use of the enriched self-rising flour is not less than 0.5 percent of the weight thereof.

Iron and calcium may be added only in forms which are harmless and assimilable. The substances referred to in paragraphs (a) and (b) of this section may be added in a harmless carrier which does not impair the enriched self-rising flour; such carrier is used only in the quantity necessary to effect an intimate and uniform admixture of such substances with the flour.

§ 15.70 *Phosphated flour, phosphated white flour, phosphated wheat flour; identity; label statement of optional ingredients.* Phosphated flour, phosphated white flour, phosphated wheat flour, conforms to the definition and standard of identity, and is subject to the requirements for label declaration of optional ingredients, prescribed for flour by § 15.1, except that:

(a) Monocalcium phosphate is added in a quantity not less than 0.25 percent and not more than 0.75 percent of the weight of the finished phosphated flour; and

(b) In determining whether the ash content complies with the requirements of this section allowance is made for the added monocalcium phosphate.

§ 15.80 *Whole wheat flour, graham flour, entire wheat flour; identity; label statement of optional ingredients.* (a) Whole wheat flour, graham flour, entire wheat flour, is the food prepared by so grinding cleaned wheat other than durum wheat and red durum wheat that, when tested by the method prescribed in paragraph (c) (2) of this section, not less than 90 percent passes through a No. 8 sieve and not less than 50 percent passes through a No. 20 sieve. The proportions of the natural constituents of such wheat, other than moisture, remain unaltered. To compensate for any natural deficiency of enzymes, malted wheat, malted wheat flour, malted barley flour, or any combination of two or more of these, may be used; but the quantity of malted wheat flour so used is not more than 0.5 percent, and the quantity of malted barley flour so used is not more than 0.25 percent. The moisture content of whole wheat flour is not more than 15 percent. Unless such addition conceals damage or inferiority of the whole wheat flour or makes it appear better or of greater value than it is, the optional bleaching ingredient chlorine dioxide, chlorine, or a mixture of nitrosyl chloride and chlorine, may be added in a quantity not more than sufficient for bleaching and artificial aging effects.

(b) When any optional bleaching ingredient is used, the label shall bear the word "Bleached." Wherever the name of the food appears on the label so conspicuously as to be easily seen under customary conditions of purchase, the word "Bleached" shall immediately and conspicuously precede or follow such name, without intervening written, printed, or graphic matter; except that where such name is a part of a trade-mark or brand, other written, printed, or graphic matter, which is also a part of such trade-mark or brand, may so intervene if the word "Bleached" is in such juxtaposition with such trade-mark or brand as to be conspicuously related to such name.

(c) For the purposes of this section:

(1) Moisture is determined by the method prescribed in "Official and Tentative Methods of Analysis of the Association of Official Agricultural Chemists," 5th Edition, 1940, page 211, under "Vacuum Oven Method—Official." [Ed. note: 8th Ed., 1955, p. 206, secs. 13.2, 13.3.]

(2) The method referred to in paragraph (a) of this section is as follows: Use No. 8 and No. 20 sieves, having standard 8-inch full height frames, complying with the specifications for wire cloth and sieve frames in "Standard Specifications for Sieves," published March 1, 1940, in L. C. 584 of the U. S. Department of Commerce, National Bureau of Standards. Fit a No. 8 sieve into a No. 20 sieve. Attach bottom pan to the No. 20 sieve. Pour 100 gm. of the sample into the No. 8 sieve. Attach cover and hold the assembly in a slightly inclined position with one hand. Shake the sieves by striking the sides against the other hand with an upward stroke, at the rate of about 150 times per minute. Turn the sieves about one-sixth of a revolution each time in the same direction, after each 25 strokes. Continue shaking for 2 minutes. Weigh the material which fails to pass through the No. 8 sieve and the material which passes through the No. 20 sieve.

§ 15.90 *Bromated whole wheat flour; identity; label statement of optional ingredients.* Bromated whole wheat flour conforms to the definition and standard of identity, and is subject to the requirements for label statement of optional ingredients, prescribed for whole wheat flour by § 15.80, except that potassium bromate is added in a quantity not exceeding 75 parts to each million parts of finished bromated whole wheat flour.

§ 15.100 *Whole durum wheat flour; identity; label statement of optional ingredients.* Whole durum wheat flour conforms to the definition and standard of identity, and is subject to the requirements for label statement of optional ingredients, prescribed for whole wheat flour by § 15.80, except that cleaned durum wheat, instead of cleaned wheat other than durum wheat and red durum wheat, is used in its preparation.

§ 15.110 *Crushed wheat, coarse ground wheat; identity.* Crushed wheat, coarse ground wheat, is the food prepared by so crushing cleaned wheat other than durum wheat and red durum wheat that, when tested by the method prescribed in § 15.80 (c) (2), 40 percent or more passes through a No. 8 sieve and less than 50 percent passes through a No. 20 sieve. The proportions of the natural constituents of such wheat, other than moisture, remain unaltered. Crushed wheat contains not more than 15 percent of moisture as determined by the method prescribed in "Official and Tentative Methods of Analysis of the Association of Official Agricultural Chemists," 5th edition, 1940, page 353 [Ed. note, 8th edition, 1955, p. 367, secs. 22.2, 22.3], under "Preparation of Sample—Official" and "Moisture I. Drying with Heat—Official."

§ 15.120 *Cracked wheat; identity.* Cracked wheat is the food prepared by so cracking or cutting into angular fragments cleaned wheat other than durum wheat and red durum wheat that, when tested by the method prescribed in § 15.80 (c) (2), not less than 90 percent passes through a No. 8 sieve and not more than 20 percent passes through a No. 20 sieve. The proportions of the natural constituents of such wheat, other than moisture, remain unaltered. Cracked wheat contains not more than 15 percent of moisture as determined by the method prescribed in "Official and Tentative Methods of Analysis of the Association of Official Agricultural Chemists", 5th edition, 1940, page 353 [Ed. note, 8th edition, 1955, p. 367, secs. 22.2, 22.3], under "Preparation of Sample—Official" and "Moisture I. Drying with Heat—Official."

§ 15.130 *Farina; identity.* (a) Farina is the food prepared by grinding and bolting cleaned wheat, other than durum wheat and red durum wheat, to such fineness that, when tested by the method prescribed in paragraph (b) (2) of this section, it passes through a No. 20 sieve, but not more than 3 percent passes through a No. 100 sieve. It is freed from bran coat, or bran coat and germ, to such extent that the percent of ash therein, calculated to a moisture-free basis, is not more than 0.6 percent. Its moisture content is not more than 15 percent.

(b) For the purposes of this section:

(1) Ash and moisture are determined by the methods therefor referred to in § 15.1 (c).

(2) The method referred to in paragraph (a) of this section is as follows: Use No. 20 and No. 100 sieves, having standard 8-inch full-height frames, complying with the specifications for wire cloth and sieve frames in "Standard Specifications for Sieves," published March 1, 1940, in L. C. 584 of the United States Department of Commerce, National Bureau of Standards. Fit a No. 20 sieve into a No. 100 sieve. Attach bottom pan to the No. 100 sieve. Pour 100 grams of the sample into the No. 20 sieve. Attach cover and hold the assembly in a slightly inclined position with one hand. Shake the sieves by striking the sides against the other hand with an upward stroke, at the rate of about 150 times per minute. Turn the sieves about one-sixth of a revolution, each time in the same direction, after each 25 strokes. Continue shaking for 2 minutes. Weigh the material which fails to pass through the No. 20 sieve and the material which passes through the No. 100 sieve.

§ 15.140 *Enriched farina; identity; label statement of optional ingredients.* (a) Enriched farina conforms to the definition and standard of identity prescribed for farina by § 15.130, except that:

(1) It contains in each pound not less than 2.0 milligrams and not more than 2.5 milligrams of thiamine, not less than 1.2 milligrams and not more than 1.5 milligrams of riboflavin, not less than 16.0 milligrams and not more than 20.0 milligrams of niacin or niacinamide, and not less than 13.0 milligrams of iron (Fe).

(2) Vitamin D may be added in such quantity that each pound of the finished enriched farina contains not less than 250 U. S. P. units of the optional ingredient vitamin D.

(3) Calcium may be added in such quantity that each pound of the finished enriched farina contains not less than 500 milligrams of the optional ingredient calcium (Ca).

(4) It may contain not more than 8 percent by weight of the optional ingredient wheat germ or partly defatted wheat germ.

(5) It may contain not less than 0.5 percent and not more than 1 percent by weight of the optional ingredient disodium phosphate.

(6) In determining whether the ash content complies with the requirements of this section allowance is made for ash resulting from any added iron or salts of iron or calcium, or from any added disodium phosphate, or from any added wheat germ or partly defatted wheat germ.

Iron and calcium may be added only in forms which are harmless and assimilable. Dried irradiated yeast may be used as a source of vitamin D. The substances referred to in subparagraphs (1) and (2) of this paragraph may be added in a harmless carrier which does not impair the enriched farina; such carrier is used only in the quantity necessary to effect an intimate and uniform admixture of such substances with the farina.

(b) When the optional ingredient disodium phosphate is used, the label shall bear the statement "Disodium phosphate added for quick cooking." Wherever the name of the food appears on the label so conspicuously as to be easily seen under customary conditions of purchase, such statement shall immediately and conspicuously precede or follow such name, without intervening written, printed, or graphic matter; except that where such name is a part of trade-mark or brand, other written, printed, or graphic matter which is also a part of such trademark or brand, may so intervene if such statement is in such juxtaposition with such trademark or brand as to be conspicuously related to such name.

§ 15.150 *Semolina; identity.* (a) Semolina is the food prepared by grinding and bolting cleaned durum wheat to such fineness that, when tested by the method prescribed in § 15.130 (b) (2), it passes through a No. 20 sieve, but not more than 3 percent passes through a No. 100 sieve. It is freed from bran coat, or bran coat and germ, to such extent that the percent of ash therein, calculated to a moisture-free basis, is not more than 0.92 percent. Its moisture content is not more than 15 percent.

(b) For the purpose of this section, ash and moisture are determined by the methods therefor referred to in § 15.1 (c).

SUBPART B—CORN FLOUR AND RELATED PRODUCTS

§ 15.500 *White corn meal; identity.* (a) White corn meal is the food prepared by so grinding cleaned white corn that when tested by the method prescribed in paragraph (b) (2) of this section not less than 95 percent passes through a No. 12 sieve, not less than 45 percent through a No. 25 sieve, but not more than 35 percent through a No. 72 grits gauze. Its moisture content is not more than 15 percent. In its preparation coarse particles of the ground corn may be separated and discarded, or reground and recombined with all or part of the material from which they were separated, but in any such case the crude fiber content of the finished corn meal is not less than 1.2 percent and not more than that of the cleaned corn from which it was ground, and its fat content does not differ more than 0.3 percent from that of such corn. The contents of crude fiber and fat in all the foregoing provisions relating thereto are on a moisture-free basis.

(b) (1) For the purposes of this section moisture is determined by the method prescribed in "Official and Tentative Methods of Analysis of the Association of Official Agricultural Chemists," 6th edition, page 259, sections 20.70 and 20.71 [Ed note, 8th edition; 1955, p. 220, secs. 13.54, 13.55], fat is determined by the method prescribed on pages 259 and 260, sections 20.70 and 20.73 [Ed. note, 8th edition, 1955, p. 220, secs. 13.54 and 13.59]; and crude fiber determined by the method prescribed on pages 259 and 260, sections 20.70 and 20.74 [Ed. note, 8th edition, 1955, p. 220, secs. 13.54 and 13.57].

(2) The method referred to in paragraph (a) of this section is as follows:

Use No. 12 and No. 25 sieves, having standard 8-inch diameter, full-height frames, complying with the specifications for wire cloth and sieve frames in "Standard Specifications for Sieves," published March 1, 1940, in L. C. 584 of the Bureau of Standards, United States Department of Commerce. A sieve with frame of the same dimensions as the Nos. 12 and 25 and fitted with 72 XXX grits gauze is used as the third sieve. It is referred to hereafter as the No. 72 sieve. The 72 XXX grits gauze has openings equivalent in size with those of No. 70 woven-wire cloth, complying with specifications for such cloth contained in such "Standard Specifications for Sieves" Attach bottom pan to No. 72 sieve. Fit the No. 25 sieve into the No. 72 sieve and the No. 12 sieve into the No. 25 sieve. Pour 100 grams of sample into the No. 12 sieve, attach cover and hold the assembly in a slightly inclined position and shake the assembly of sieves by striking the sides against one hand with an upward stroke, at the rate of about 150 times per minute. Turn the assembly of sieves about one-sixth of a revolution, each time in the same direction, after each 25 strokes. Continue shaking for 2 minutes. Weigh separately the material remaining on each sieve and in the pan, and calculate each weight as percent of sample. Sometimes when meals are tested, fine particles clog the sieve openings. If any sieve is clogged by fine material smaller than its openings, empty the contents onto a piece of paper. Remove the entrapped material on the bottom of the sieve by a hair brush and add to the sieve below. In like manner, clean the adhering material from inside the sieve and add to the material on the paper. Return mixture on the paper to the sieve, reassemble the sieves, and shake in the same manner as before for 1 minute. Repeat cleaning procedure if necessary until a 5-gram or less loss in weight occurs in any sieve during a 1-minute shaking. The percent of sample passing through No. 12 sieve shall be determined by subtracting from 100 percent, the percent of material remaining on the No. 12 sieve. The percent passing through a No. 25 sieve shall be determined by adding the percents remaining on the No. 72 sieve and the percent in pan. The percent in the pan shall be considered as the percent passing through a No. 72 XXX grits gauze.

§ 15.501 *Yellow corn meal; identity.* Yellow corn meal conforms to the definition and standard of identity prescribed by § 15.500 for white corn meal except that cleaned yellow corn is used instead of cleaned white corn.

§ 15.502 *Bolted white corn meal; identity.* (a) Bolted white corn meal is the food prepared by so grinding and sifting cleaned white corn that:

(1) Its crude fiber content is less than 1.2 percent but its fat content is not less than 2.25 percent; and

(2) When tested by the method prescribed in § 15.500 (b) (2), except that a No. 20 standard sieve is used instead of the No. 12 sieve, not less than 95 percent passes through a No. 20 sieve, not less than 45 percent through a No. 25 sieve, but not more than 25 percent through No. 72 XXX grits gauze. Its moisture content is not more than 15 percent. In its preparation particles of ground corn which contain germ may be separated, reground, and recombined with all or part of the material from which it was separated, but in any such case the fat content of the finished bolted white corn meal does not exceed by more than 0.3 percent the fat content of the cleaned corn from which it was ground. The contents of crude fiber and fat in all the foregoing provisions relating thereto are on a moisture-free basis.

(b) For the purposes of this section, moisture, fat and crude fiber are determined by the methods therefor referred to in § 15.500 (b) (1).

§ 15.503 *Bolted yellow corn meal; identity.* Bolted yellow corn meal conforms to the definition and standard of identity perscribed by § 15.502 for bolted white corn meal except that cleaned

yellow corn is used instead of cleaned white corn.

§ 15.504 *Degerminated white corn meal, degermed white corn meal; identity.* (a) Degerminated white corn meal, degermed white corn meal, is the food prepared by grinding cleaned white corn and removing bran and germ so that:

(1) On a moisture-free basis, its crude fiber content is less than 1.2 percent and its fat content is less than 2.25 percent; and

(2) When tested by the method prescribed in § 15.500 (b) (2), except that a No. 20 standard sieve is used instead of a No. 12 sieve, not less than 95 percent passes through a No. 20 sieve, not less than 45 percent through a No. 25 sieve, but not more than 25 percent through No. 72 XXX grits gauze. Its moisture content is not more than 15 percent.

(b) For the purposes of this section, moisture, fat and crude fiber are determined by methods therefor referred to in § 15.500 (b) (1).

§ 15.505 *Degerminated yellow corn meal, degermed yellow corn meal; identity.* Degerminated yellow corn meal, degermed yellow corn meal, conforms to the definition and standard of identity prescribed by § 15.504 for degerminated white corn meal except that cleaned yellow corn is used instead of cleaned white corn.

§ 15.506 *Self-rising white corn meal; identity.* (a) Self-rising white corn meal is an intimate mixture of white corn meal, sodium bicarbonate, and the acid-reacting substance monocalcium phosphate. It is seasoned with salt. When it is tested by the method prescribed in paragraph (b) of this section, not less than 0.5 percent of carbon dioxide is evolved. The acid-reacting substance is added in sufficient quantity to neutralize the sodium bicarbonate. The combined weight of such acid-reacting substance and sodium bicarbonate is not more than 4.5 parts to each 100 parts of white corn meal used.

(b) The method referred to in paragraph (a) of this section is the method prescribed in "Official and Tentative Methods of Analysis of the Association of Official Agricultural Chemists," 6th Edition, beginning on page 208 [Ed. note, 8th edition, 1955, p. 127, secs. 7.2, 7.3] under "Gasometric Method (2) with Chittick's Apparatus—Official," except that the following procedure is substituted for the procedure specified therein under "17.6—Determination":

Weigh 17 grams of the official sample into flask *A*, add 15–20 glass beads (4–6 mm. diameter), and connect this flask with the apparatus (fig. 25). Open stopcock *C* and by means of the leveling bulb *E* bring the displacement solution to the 25 cc. graduation above the zero mark. (This 25 cc. is a partial allowance for the volume of acid to be used in the decomposition.) Allow the apparatus to stand 1–2 minutes to insure that the temperature and pressure within the apparatus are the same as those of the room. Close the stopcock, lower the leveling bulb somewhat to reduce the pressure within the apparatus, and slowly run into the decomposition flash from burette *F* 45 cc. of sulfuric acid (1+5). To prevent the liberated carbon dioxide from escaping through the acid burette into the air, keep the displacement solution in the leveling bulb at all times during the decomposition at a lower level than that in the gas-measuring tube. Rotate and then vigorously agitate the decomposition flask for 3 minutes to mix the contents intimately. Allow to stand for 10 minutes to bring to equilibrium. Equalize the pressure in the measuring tube by means of the leveling bulb and read the volume of gas from the zero point on the tube. Deduct 20 cc. from this reading (this 20 cc. together with previous allowance of 25 cc. compensates for the 45 cc. acid used in the decomposition). Observe the temperature of the air surrounding the apparatus and also the barometric pressure and multiply the number of cc. of gas evolved by the factor given in Table 44.30 [Ed. note, 8th edition, 1955, sec. 42.29]—Reference Tables for the temperature and pressure observed. Divide the corrected reading by 100 to obtain the apparent percent by weight of carbon dioxide in the official sample.

Correct the apparent percent of carbon dioxide to compensate for varying atmospheric conditions by immediately assaying a synthetic sample by the same method in the same apparatus.

Prepare the synthetic sample with 16.2 grams of corn meal, 0.30 gram of monocalcium phosphate, 0.30 gram of salt, and a sufficient quantity of sodium bicarbonate U. S. P. (dried over sulfuric acid) to yield the amount of carbon dioxide recovered in assay of official sample. Determine this quantity by multiplying weight of carbon dioxide recovered in assay of official sample by 1.91.

Divide the weight of carbon dioxide recovered from synthetic sample by weight of carbon dioxide contained in sodium bicarbonate used.

Divide the quotient into the apparent percent of carbon dioxide in official sample to obtain percent of carbon dioxide evolved from the official sample.

§ 15.507 *Self-rising yellow corn meal; identity.* Self-rising yellow corn meal conforms to the definition and standard of identity prescribed by § 15.506 for self-rising white corn meal except that yellow corn meal is used instead of white corn meal.

§ 15.508 *White corn flour; identity.* (a) White corn flour is the food prepared by so grinding and bolting cleaned white corn that when tested by the method prescribed in paragraph (b) (2) of this section, not less than 98 percent passes through a No. 50 sieve and not less than 50 percent passes through No. 70 woven-wire cloth. Its moisture content is not more than 15 percent. In its preparation part of the ground corn may be removed, but in any such case, the content (on a moisture-free basis) of neither the crude fiber nor fat in the finished white corn flour exceeds the content (on a moisture-free basis) of such substance in the cleaned corn from which it was ground.

(b) (1) For the purpose of this section, moisture, fat, and crude fiber are determined by methods therefor referred to in § 15.500 (b) (1).

(2) The method referred to in paragraph (a) of this section is as follows: Weigh 5 grams of sample into a tared truncated metal cone (top diameter 5 centimeters, bottom diameter 2 centimeters, height 4 centimeters), fitted at bottom with 70-mesh wire cloth complying with the specifications for No. 70 wire cloth in "Standard Specifications for Sieves," published March 1, 1940 in L. C. 584 of the Bureau of Standards, United States Department of Commerce. Attach cone to a suction flask. Wash with 150 ml. of petroleum either applied in a small stream without suction, while gently stirring the sample with a small glass rod. Apply suction for 2 minutes after washing is completed, then shake the cone for 2 minutes with a vigorous horizontal motion, striking the side against the hand, and then weigh. The decrease in weight of sample, calculated as percent by weight of sample shall be considered the percent passing through No. 70 wire cloth. Transfer the residue from cone to a No. 50 sieve having a standard 8-inch diameter full-height frame, complying with the specifications for wire cloth and sieve frame in said "Standard Specifications for Sieves." Shake for 2 minutes with a vigorous horizontal motion, striking the side against the hand; remove and weigh the residue; calculate the weight of residue as percent by weight of sample, and subtract from 100 percent to obtain the percent of sample passing through the No. 50 sieve.

§ 15.509 *Yellow corn flour; identity.* Yellow corn flour conforms to the definition and standard of identity prescribed by § 15.508 for white corn flour except that cleaned yellow corn is used instead of cleaned white corn.

§ 15.510 *Grits, corn grits, hominy grits; identity.* (a) Grits, corn grits, hominy grits, is the food prepared by so grinding and sifting cleaned white corn, with removal of corn bran and germ, that:

(1) On a moisture-free basis its crude fiber content is not more than 1.2 percent and its fat content is not more than 2.25 percent; and

(2) When tested by the method prescribed in paragraph (b) (2) of this section not less than 95 percent passes through a No. 10 sieve but not more than 20 percent through a No. 25 sieve.

(b) (1) For the purposes of this section moisture, fat, and crude fiber are determined by methods therefor referred to in § 15.500 (b) (1).

(2) The method referred to in paragraph (a) of this section is as follows: Use No. 10 and No. 25 sieves, having standard 8-inch diameter full-height frames, complying with the specifications for wire cloth and sieve frames in "Standard Specifications for Sieves," published March 1, 1940, in L. C. 584 of the Bureau of Standards, United States Department of Commerce. Attach bottom pan to No. 25 sieve. Fit the No. 10 sieve into the No. 25 sieve. Pour 100 grams of sample into the No. 10 sieve, attach cover and hold assembly in a slightly inclined position, shake the sieves by striking the sides against one hand with an upward stroke, at the rate of about 150 times per minute. Turn the sieves about one-sixth of a revolution each time in the same direction after each 25 strokes. Continue shaking for 2 minutes. Weigh separately the material remaining on the No. 10 sieve and in the pan, and calculate each weight as percent of sample. The percent of sample passing through a No. 10 sieve shall be determined by subtracting from 100 percent the percent remaining on the No. 10 sieve. The percent of material in the pan shall be considered as the percent passing through a No. 25 sieve.

§ 15.511 *Yellow grits, yellow corn grits, yellow hominy grits; identity.* Yellow grits, yellow corn grits, yellow hominy grits, conforms to the definition and standard of identity prescribed by § 15.510 for grits except that cleaned yellow corn is used instead of cleaned white corn.

§ 15.512 *Quick grits, quick cooking grits; identity.* (a) Quick grits, quick cooking grits are the foods, each of which conforms to the definition and standard of identity prescribed for a kind of grits by §§ 15.510 or 15.511, except that in process of preparation the grits are lightly steamed and slightly compressed so as to fracture the particles.

(b) The name of each kind of grits is "Quick" or "Quick cooking" followed by the name of the kind of grits used which is prescribed in the definition and standard of identity therefor.

§ 15.513 *Enriched corn meals; identity.* (a) Enriched corn meals are the foods, each of which conforms to the definition and standard of identity prescribed for a kind of corn meal by §§ 15.500 to 15.507, inclusive, except that:

(1) It contains in each pound not less than 2.0 mg. and not more than 3.0 mg. of thiamine, not less than 1.2 mg. and not more than 1.8 mg. of riboflavin, not less than 16 mg. and not more than 24 mg. of niacin or niacinamide, and not less than 13 mg. and not more than 26 mg. of iron (Fe);

(2) It may contain in each pound not less than 250 U. S. P. units and not more than 1,000 U. S. P. units of vitamin D; and

(3) It may contain in each pound not less than 500 mg. and not more than 750 mg. of calcium (Ca). Iron and calcium may be added only in forms which are harmless and assimilable. The substances referred to in this subparagraph and in subparagraphs (1) and (2) of this paragraph may be added in a harmless carrier which does not impair the enriched corn meal; such carrier is used only in the quantity necessary to effect an intimate and uniform admixture of such substances with the kind of corn meal used. Dried yeast in quantities not exceeding 1.5 percent by weight of the finished food may be used.

(b) The name of each kind of enriched corn meal is the word "Enriched" followed by the name of the kind of corn meal used which is prescribed in the definition and standard of identity therefor.

§ 15.514 *Enriched corn grits; identity.* (a) Enriched corn grits are the foods, each of which conforms to the definition and standard of identity prescribed for grits, yellow grits, or quick cooking grits by §§ 15.510 to 15.512, inclusive, except that:

(1) It contains in each pound not less than 2.0 mg. and not more than 3.0 mg. of thiamine, not less than 1.2 mg. and not more than 1.8 mg. of riboflavin, not less than 16 mg. and not more than 24 mg. of niacin or niacinamide, not less than 13 mg. and not more than 26 mg. of iron (Fe);

(2) It may contain in each pound not less than 250 U. S. P. units and not more than 1,000 U. S. P. units of vitamin D; and

(3) It may contain in each pound not less than 500 mg. and not more than 750 mg. of calcium (Ca). Iron and calcium may be added only in forms which are harmless and assimilable. The vitamins referred to in subparagraph (1) of this paragraph may be combined with harmless substances to render them insoluble in water if the water-insoluble products are assimilable. The substances referred to in this subparagraph and in subparagraphs (1) and (2) of this paragraph may be added in a harmless carrier; such carrier is used only in the quantity necessary to effect an intimate and uniform admixture of such substances with the kind of corn grits used. Dried yeast in quantities not exceeding 1.5 percent by weight of the finished food may be used. When the finished food is tested by the method prescribed in paragraph (c) of this section it complies with the requirements set forth therein.

(b) The name of each kind of enriched corn grits is the word "Enriched" followed by the name of the kind of corn grits used which is prescribed in the definition and standard of identity therefor.

(c) The method referred to in paragraph (a) of this section is as follows:

Transfer 100 grams of enriched grits to a 2-liter Erlenmeyer flask containing 1 liter of water at 25° C. Stopper the flask and rotate it for exactly ½ minute so that the grits are kept in motion. Allow the grits to settle for ½ minute, then pour off 850 cc. of the water along with any floating or suspended matter. Determine thiamine, riboflavin, niacin, and iron in the wet grits and water remaining in the flask. Calculate as mg. per pound of the grits before rinsing. The amounts found by this procedure are not less than 85 percent of the minimum amounts of thiamine, riboflavin, niacin, and iron prescribed by the standard for enriched grits.

PART 16—ALIMENTARY PASTES; DEFINITIONS AND STANDARDS OF IDENTITY

Sec.
16.1 Macaroni products; identity; label statement of optional ingredients.
16.2 Milk macaroni products; identity; label statement of optional ingredients.
16.3 Whole wheat macaroni products; identity; label statement of optional ingredients.
16.4 Wheat and soy macaroni products; identity; label statement of optional ingredients.
16.5 Vegetable macaroni products; identity; label statement of optional ingredients.
16.6 Noodle products; identity; label statement of optional ingredients.
16.7 Wheat and soy noodle products; identity; label statement of optional ingredients.
16.8 Vegetable noodle products; identity; label statement of optional ingredients.
16.9 Enriched macaroni products; identity; label statement of optional ingredients.
16.10 Enriched noodle products; identity; label statement of optional ingredients.

AUTHORITY: §§ 16.1 to 16.10 issued under sec. 701 (a), 52 Stat. 1055; 21 U. S. C. 371 (a). Interpret or apply sec. 401, 52 Stat. 1046, 68 Stat. 54; 21 U. S. C. 341.

§ 16.1 *Macaroni products; identity; label statement of optional ingredients.* (a) Macaroni products are the class of food each of which is prepared by drying formed units of dough made from semolina, durum flour, farina, flour, or any combination of two or more of these, with water and with or without one or more of the optional ingredients specified in subparagraphs (1) to (5), inclusive, of this paragraph:

(1) Egg white, frozen egg white, dried egg white, or any two or all of these, in such quantity that the solids thereof is not less than 0.5 percent and not more than 2.0 percent of the weight of the finished food.

(2) Disodium phosphate, in a quantity not less than 0.5 percent and not more than 1.0 percent of the weight of the finished food.

(3) Onions, celery, garlic, bay leaf, or any two or more of these, in a quantity which seasons the food.

(4) Salt, in a quantity which seasons the food.

(5) Gum gluten, in such quantity that the protein content of the finished food is not more than 13 percent by weight.

The finished macaroni product contains not less than 87 percent of total solids as determined by the method prescribed in "Official and Tentative Methods of Analysis of the Association of Official Agricultural Chemists," Fifth Edition, 1940, page 235 [Ed. note, 8th edition, 1955, p. 230, sec. 13.109], under "Vacuum Oven Method—Official."

(b) Macaroni is the macaroni product the units of which are tube-shaped and more than 0.11 inch but not more than 0.27 inch in diameter.

(c) Spaghetti is the macaroni product the units of which are tube-shaped or cord-shaped (not tubular) and more than 0.06 inch but not more than 0.11 inch in diameter.

(d) Vermicelli is the macaroni product the units of which are cord-shaped (not tubular) and not more than 0.06 inch in diameter.

(e) The name of each food for which a definition and standard of identity is prescribed by this section is "Macaroni

Product"; or alternately, the name is "Macaroni," "Spaghetti," or "Vermicelli," as the case may be, when the units of the food are of the shapes and sizes specified in paragraph (b), (c), or (d), respectively, of this section.

(f) (1) When disodium phosphate is used the label shall bear the statement "Disodium phosphate added for quick cooking."

(2) When any ingredient specified in paragraph (a) (3) of this section is used the label shall bear the statement "Seasoned with_____," the blank being filled in with the common name of the ingredient; or in the case of bay leaves the statement "Spiced," "Spice added," or "Spiced with bay leaves."

(3) Wherever the name of the food appears on such label so conspicuously as to be easily seen under customary conditions of purchase, the words and statements prescribed in this section, showing the optional ingredients used shall immediately and conspicuously precede or follow, or in part precede and in part follow, such name without intervening written, printed, or other graphic matter.

§ 16.2 *Milk macaroni products; identity; label statement of optional ingredients.* (a) Milk macaroni products are the class of food each of which conforms to the definition and standard of identity, and is subject to the requirements for label statement of optional ingredients, prescribed for macaroni products by § 16.1 (a) and (f) (2) and (3), except that:

(1) Milk is used as the sole moistening ingredient in preparing the dough; or in lieu of milk one or more of the milk ingredients specified in paragraph (f) of this section is used, with or without water, in such quantity that the weight of milk solids therein is not less than 3.8 percent of the weight of the finished milk macaroni product; and

(2) None of the optional ingredients permitted by § 16.1 (a) (1) and (2) is used. When the optional ingredient gum gluten (§ 16.1 (a) (5)) is added, the quantity is such that the protein derived therefrom, together with the protein derived from semolina, durum flour, farina, flour, or any combination of these used, does not exceed 13 percent of the weight of the finished food.

(b) Milk macaroni is the milk macaroni product the units of which conform to the specifications of shape and size prescribed for macaroni by § 16.1 (b).

(c) Milk spaghetti is the milk macaroni product the units of which conform to the specifications of shape and size prescribed for spaghetti by § 16.1 (c).

(d) Milk vermicelli is the milk macaroni product the units of which conform to the specifications of shape and size prescribed for vermicelli by § 16.1 (d).

(e) The name of each food for which a definition and standard of identity is prescribed by this section is "Milk Macaroni Product"; or alternatively, the name is "Milk Macaroni," "Milk Spaghetti," or "Milk Vermicelli," as the case may be, when the units of the food comply with the requirements of paragraph (b), (c), or (d), respectively, of this section.

(f) The milk ingredients referred to in paragraph (a) (1) of this section are concentrated milk, evaporated milk, dried milk, and a mixture of butter with skim milk, concentrated skim milk, evaporated skim milk, defatted milk solids (dried skim milk), or any two or more of these, in such proportion that the weight of nonfat milk solids in such mixture is not more than 2.275 times the weight of milk fat therein.

§ 16.3 *Whole wheat macaroni products; identity; label statement of optional ingredients.* (a) Whole wheat macaroni products are the class of food each of which conforms to the definition and standard of identity, and is subject to the requirements for label statement of optional ingredients, prescribed for macaroni products by § 16.1 (a) and (f) (2) and (3), except that:

(1) Whole wheat flour or whole durum wheat flour or both are used as the sole wheat ingredient; and

(2) None of the optional ingredients permitted by § 16.1 (a) (1), (2), and (5) is used.

(b) Whole wheat macaroni is the whole wheat macaroni product the units of which conform to the specifications of shape and size prescribed for macaroni by § 16.1 (b).

(c) Whole wheat spaghetti is the whole wheat macaroni product the units of which conform to the specifications of shape and size prescribed for spaghetti by § 16.1 (c).

(d) Whole wheat vermicelli is the whole wheat macaroni product the units of which conform to the specifications of shape and size prescribed for vermicelli by § 16.1 (d).

(e) The name of each food for which a definition and standard of identity is prescribed by this section is "Whole Wheat Macaroni Product"; or alternatively, the name is "Whole Wheat Macaroni," "Whole Wheat Spaghetti," or "Whole Wheat Vermicelli," as the case may be, when the units of the food comply with the requirements of paragraph (b), (c), or (d), respectively, of this section.

§ 16.4 *Wheat and soy macaroni products; identity; label statement of optional ingredients.* (a) Wheat and soy macaroni products are the class of food each of which conforms to the definition and standard of identity, and is subject to the requirements for label statement of optional ingredients, prescribed for macaroni products by § 16.1 (a) and (f) (2) and (3), except that:

(1) Soy flour is added in a quantity not less than 12.5 percent of the combined weight of the wheat and soy ingredients used (the soy flour used is made from heat-processed, dehulled soybeans, with or without the removal of fat therefrom); and

(2) None of the optional ingredients permitted by § 16.1 (a) (1) and (2) is used. When the optional ingredient gum gluten (§ 16.1 (a) (5)) is added, the quantity is such that the protein derived therefrom, together with the protein derived from semolina, durum flour, farina, flour or any combination of these used, does not exceed 13 percent of the weight of the finished food.

(b) Wheat and soy macaroni is the wheat and soy macaroni product the units of which conform to the specifications of shape and size prescribed for macaroni by § 16.1 (b).

(c) Wheat and soy spaghetti is the wheat and soy macaroni product the units of which conform to the specifications of shape and size prescribed for spaghetti by § 16.1 (c).

(d) Wheat and soy vermicelli is the wheat and soy macaroni product the units of which conform to the specifications of shape and size prescribed for vermicelli by § 16.1 (d).

(e) The name of each food for which a definition and standard of identity is prescribed by this section is "Wheat and Soy Macaroni Product," "Wheat and Soybean Macaroni Product," "_____ and Soy Macaroni Product," or "_____ and Soybean Macaroni Product," the blank in each instance being filled in with the name whereby the wheat ingredient used is designated in § 16.1 (a); or alternatively, the name is "Wheat and Soy Macaroni," "Wheat and Soybean Macaroni," "_____ and Soy Macaroni," or "_____ and Soybean Macaroni" when the units of the food comply with the requirements of paragraph (b) of this section; or "Wheat and Soy Spaghetti," "Wheat and Soybean Spaghetti," "_____ and Soy Spaghetti," or "_____ and Soybean Spaghetti" when such units comply with the requirements of paragraph (c) of this section; or "Wheat and Soy Vermicelli," "Wheat and Soybean Vermicelli," "_____ and Soy Vermicelli," or "_____ and Soybean Vermicelli" when such units comply with the requirements of paragraph (d) of this section, the blank in each instance being filled in with the name whereby the wheat ingredient used is designated in § 16.1 (a).

§ 16.5 *Vegetable macaroni products; identity; label statement of optional ingredients.* (a) Vegetable macaroni products are the class of food each of which conforms to the definition and standard of identity, and is subject to the requirements for label statement of optional ingredients, prescribed for macaroni products by § 16.1 (a) and (f) (2) and (3), except that:

(1) Tomato (of any red variety), artichoke, beet, carrot, parsley, or spinach is added in such quantity that the solids thereof is not less than 3 percent by weight of the finished vegetable macaroni product (the vegetable used may be fresh, canned, dried, or in the form of puree or paste); and

(2) None of the optional ingredients permitted by § 16.1 (a) (1) and (2) is used. When the optional ingredient gum gluten (§16.1 (a) (5)) is added, the quantity is such that the protein derived therefrom, together with the protein derived from the semolina, durum flour, farina, flour or any combination of these used, does not exceed 13 percent of the weight of the finished food.

(b) Vegetable macaroni is the vegetable macaroni product the units of which conform to the specifications of shape and size prescribed for macaroni by § 16.1 (b).

(c) Vegetable spaghetti is the vegetable macaroni product the units of which conform to the specifications of shape and size prescribed for spaghetti by § 16.1 (c).

(d) Vegetable vermicelli is the vegetable macaroni product, the units of which conform to the specifications of shape and size prescribed for vermicelli by § 16.1 (d).

(e) The name of each food for which a definition and standard of identity is prescribed by this section is "_____ Macaroni Product," the blank being filled in with the name whereby the vegetable used is designated in paragraph (a) of this section; or alternatively, the name is "_____ Macaroni," "_____ Spaghetti," or "_____ Vermicelli," as the case may be, when the units of the food comply with the requirements of paragraph (b), (c), or (d), respectively, the blank in each instance being filled in with the name whereby the vegetable used is designated in paragraph (a) of this section.

§ 16.6 *Noodle products; identity; label statement of optional ingredients.* (a) Noodle products are the class of food each of which is prepared by drying formed units of dough made from semolina, durum flour, farina, flour, or any combination of two or more of these, with liquid eggs, frozen eggs, dried eggs, egg yolks, frozen yolks, dried yolks, or any combination of two or more of these, with or without water and with or without one or more of the optional ingredients specified in subparagraphs (1) to (3), inclusive:

(1) Onions, celery, garlic, bay leaf, or any two or more of these, in a quantity which seasons the food.

(2) Salt, in a quantity which seasons the food.

(3) Gum gluten, in such quantity that the protein derived therefrom, together with the protein derived from semolina, durum flour, farina, flour or any combination of these used, does not exceed 13 percent of the weight of the finished food.

The finished noodle product contains not less than 87 percent of total solids as determined by the method prescribed in "Official and Tentative Methods of Analysis of the Association of Official Agricultural Chemists," Fifth Edition, 1940, page 235 [Ed. note, 8th edition, 1955, p. 230, sec. 13.109], under "Vacuum Oven Method—Official." The total solids of noodle products contains not less than 5.5 percent by weight of the solids of egg, or egg yolk.

(b) Noodles, egg noodles, is the noodle product the units of which are ribbon-shaped.

(c) Egg macaroni is the noodle product the units of which are tube-shaped and more than 0.11 inch but not more than 0.27 inch in diameter.

(d) Egg spaghetti is the noodle product the units of which are tube-shaped or cord-shaped (not tubular) and more than 0.06 inch but not more than 0.11 inch in diameter.

(e) Egg vermicelli is the noodle product the units of which are cord-shaped (not tubular) and not more than 0.06 inch in diameter.

(f) The name of each food for which a definition and standard of identity is prescribed by this section is "Noodle Product" or "Egg Noodle Product"; or alternatively, the name is "Noodles" or "Egg Noodles," "Egg Macaroni," "Egg Spaghetti," or "Egg Vermicelli," as the case may be, when the units of the food are of the shapes and sizes specified in paragraph (b), (c), (d), or (e), respectively, of this section.

(g) When any ingredient specified in paragraph (a) (1) of this section is used, the label of the noodle product shall bear the statement "Seasoned with _____," the blank being filled in with the common name of the ingredient; or in the case of bay leaves the statement "Spiced," "Spice added," or "Spiced with bay leaves."

(h) Wherever the name of the food appears on such label so conspicuously as to be easily seen under customary conditions of purchase, the words and statements prescribed in this section, showing the ingredients used shall immediately and conspicuously precede or follow, or in part precede and in part follow, such name without intervening written, printed, or other graphic matter.

§ 16.7 *Wheat and soy noodle products; identity; label statement of optional ingredients.* (a) Wheat and soy noodle products are the class of food each of which conforms to the definition and standard of identity, and is subject to the requirements for label statement of optional ingredients, prescribed for noodle products by § 16.6 (a) and (g), except that soy flour is added in a quantity not less than 12.5 percent of the combined weight of the wheat and soy ingredients used (the soy flour used is made from heat-processed, dehulled soybeans, with or without the removal of fat therefrom).

(b) Wheat and soy noodles, wheat and soy egg noodles, is the wheat and soy noodle product the units of which are ribbon-shaped.

(c) Wheat and soy egg macaroni is the wheat and soy noodle product the units of which conform to the specifications of shape and size prescribed for egg macaroni by § 16.6 (c).

(d) Wheat and soy egg spaghetti is the wheat and soy noodle product the units of which conform to the specifications of shape and size prescribed for egg spaghetti by § 16.6 (d).

(e) Wheat and soy egg vermicelli is the wheat and soy noodle product the units of which conform to the specifications of shape and size prescribed for egg vermicelli by § 16.6 (e).

(f) The name of each food for which a definition and standard of identity is prescribed by this section is "Wheat and Soy Noodle Product," "Wheat and Soy Egg Noodle Product," "Wheat and Soybean Noodle Product," "Wheat and Soybean Egg Noodle Product," "_____ and Soy Noodle Product," "_____ and Soy Egg Noodle Product," "_____ and Soybean Noodle Product," or "_____ and Soybean Egg Noodle Product," the blank in each instance being filled in with the name whereby the wheat ingredient used is designated in § 16.6 (a); or alternatively, the name is "Wheat and Soy Noodles," "Wheat and Soy Egg Noodles," "Wheat and Soybean Noodles," "Wheat and Soybean Egg Noodles," "_____ and Soy Noodles," "_____ and Soy Egg Noodles," "_____ and Soybean Noodles," or "_____ and Soybean Egg Noodles" when the units of the food comply with the requirements of paragraph (b) of this section; or "Wheat and Soy Egg Macaroni," "Wheat and Soybean Egg Macaroni," "_____ and Soy Egg Macaroni," or "_____ and Soybean Egg Macaroni" when such units comply with the requirements of paragraph (c) of this section; or "Wheat and Soy Egg Spaghetti," "Wheat and Soybean Egg Spaghetti," "_____ and Soy Egg Spaghetti," or "_____ and Soybean Egg Spaghetti" when such units comply with the requirements of paragraph (d) of this section; or "Wheat and Soy Egg Vermicelli," "Wheat and Soybean Egg Vermicelli," "_____ and Soy Egg Vermicelli," or "_____ and Soybean Egg Vermicelli," when such units comply with the requirements of paragraph (e) of this section, the blank in each instance being filled in with the name whereby the wheat ingredient used is designated in § 16.6 (a).

§ 16.8 *Vegetable noodle products; identity; label statement of optional ingredients.* (a) Vegetable noodle products are the class of food each of which conforms to the definition and standard of identity, and is subject to the requirements for label statement of optional ingredients, prescribed for noodle products by § 16.6 (a) and (g), except that tomato (of any red variety), artichoke, beet, carrot, parsley, or spinach is added in such quantity that the solids thereof is not less than 3 percent by weight of the finished vegetable noodle product (the vegetable used may be fresh, canned, dried, or in the form of puree or paste).

(b) Vegetable noodles, vegetable egg noodles, is the vegetable noodle product the units of which are ribbon-shaped.

(c) Vegetable egg macaroni is the vegetable noodle product the units of which conform to the specifications of shape and size prescribed for egg macaroni by § 16.6 (c).

(d) Vegetable egg spaghetti is the vegetable noodle product the units of which conform to the specifications of shape and size prescribed for egg spaghetti by § 16.6 (d).

(e) Vegetable egg vermicelli is the vegetable noodle product the units of which conform to the specifications of shape and size prescribed for egg vermicelli by § 16.6 (e).

(f) The name of each food for which a definition and standard of identity is prescribed by this section is "_____ Noodle Product" or "_____ Egg Noodle Product," the blank being filled in with the name whereby the vegetable used is designated in paragraph (a) of this section; or alternatively, the name is "_____ Noodles" or "_____ Egg Noodles," "_____ Egg Macaroni," "_____ Egg Spaghetti," or "_____ Egg Vermicelli," as the case may be, when the units of the food comply with the requirements of paragraph (b), (c), (d), or (e), respec-

tively, the blank in each instance being filled in with the name whereby the vegetable is designated in paragraph (a) of this section.

§ 16.9 *Enriched macaroni products; identity; label statement of optional ingredients.* (a) Enriched macaroni products are the class of food each of which conforms to the definition and standard of identity, and is subject to the requirements for label statement of optional ingredients, prescribed for macaroni products by § 16.1 (a) and (f), except that:

(1) Each such food contains in each pound not less than 4 mg. and not more than 5 mg. of thiamine, not less than 1.7 mg. and not more than 2.2 mg. of riboflavin, not less than 27 mg. and not more than 34 mg. of niacin or niacinamide, and not less than 13 mg. and not more than 16.5 mg. of iron (Fe);

(2) Each such food may also contain as an optional ingredient added vitamin D in such quantity that each pound of the finished food contains not less than 250 U. S. P. units and not more than 1000 U. S. P. units of vitamin D;

(3) Each such food may also contain as an optional ingredient added calcium in such quantity that each pound of the finished food contains not less than 500 mg. and not more than 625 mg. of calcium (Ca);

(4) Each such food may also contain as an optional ingredient partly defatted wheat germ but the amount thereof does not exceed 5 percent of the weight of the finished food;

(5) Each such food may be supplied, wholly or in part, with the prescribed quantity of any substance referred to in subparagraphs (1), (2), and (3) of this paragraph through the use of dried yeast, partly defatted wheat germ, enriched farina or enriched flour, or through the direct additions of any of the substances prescribed in subparagraphs (1), and (2), and (3).

Iron and calcium may be added only in forms which are harmless and assimilable. The substances referred to in subparagraphs (1) and (2) of this paragraph may be added in a harmless carrier which does not impair the enriched macaroni product, such carrier being used only in the quantity reasonably necessary to effect an intimate and uniform distribution of such substances in the finished enriched macaroni product.

(b) Enriched macaroni is the enriched macaroni product the units of which conform to the specifications of shape and size prescribed for macaroni by § 16.1 (b).

(c) Enriched spaghetti is the enriched macaroni product the units of which conform to the specifications of shape and size prescribed for spaghetti by § 16.1 (c).

(d) Enriched vermicelli is the enriched macaroni product the units of which conform to the specifications of shape and size prescribed for vermicelli by § 16.1 (d).

(e) The name of each food for which a definition and standard of identity is prescribed by this section is "Enriched Macaroni Product"; or alternatively, the name is "Enriched Macaroni," "Enriched Spaghetti," or "Enriched Vermicelli," as the case may be, when the units of the food comply with the requirements of paragraphs (b), (c), or (d) respectively of this section.

§ 16.10 *Enriched noodle products; identity; label statement of optional ingredients.* (a) Enriched noodle products are the class of food each of which conforms to the definition and standard of identity, and is subject to the requirements for label statement of optional ingredients, prescribed for noodle products by § 16.6 (a) and (g), except that:

(1) Each such food contains in each pound not less than 4 mg. and not more than 5 mg. of thiamine, not less than 1.7 mg. and not more than 2.2 mg. of riboflavin, not less than 27 mg. and not more than 34 mg. of niacin or niacinamide, and not less than 13 mg. and not more than 16.5 mg. of iron (Fe);

(2) Each such food may also contain as an optional ingredient added vitamin D in such quantity that each pound of the finished food contains not less than 250 U. S. P. units and not more than 1000 U. S. P. units of vitamin D;

(3) Each such food may also contain as an optional ingredient added calcium in such quantity that each pound of the finished food contains not less than 500 mg. and not more than 625 mg. of calcium (Ca);

(4) Each such food may also contain as an optional ingredient partly defatted wheat germ, but the amount thereof does not exceed 5 percent of the weight of the finished food;

(5) Each such food may be supplied, wholly or in part, with the prescribed quantity of any substance referred to in subparagraphs (1), (2), and (3), of this paragraph through the use of dried yeast, partly defatted wheat germ, enriched farina or enriched flour, or through the direct additions of any of the substances prescribed in subparagraphs (1), (2), and (3).

Iron and calcium may be added only in forms which are harmless and assimilable. The substances referred to in subparagraphs (1) and (2) of this paragraph may be added in a harmless carrier which does not impair the enriched noodle product, such carrier being used only in the quantity reasonably necessary to effect an intimate and uniform distribution of such substances in the finished enriched noodle product.

(b) Enriched noodles, enriched egg noodles are the enriched noodle products the units of which conform to the specifications of shape and size prescribed for noodles in § 16.6 (b).

(c) Enriched egg macaroni is the enriched noodle product the units of which conform to the specifications of shape and size prescribed for egg macaroni in § 16.6 (c).

(d) Enriched egg spaghetti is the enriched noodle product the units of which conform to the specifications of shape and size prescribed for egg spaghetti in § 16.6 (d).

(e) Enriched egg vermicelli is the enriched noodle product the units of which conform to the specifications of shape and size prescribed for egg vermicelli in § 16.6 (e).

(f) The name of each food for which a definition and standard of identity is prescribed by this section is "Enriched Noodle Product" or "Enriched Egg Noodle Product"; or alternatively, the name is "Enriched Noodles," or "Enriched Egg Noodles," "Enriched Egg Macaroni," "Enriched Egg Spaghetti," or "Enriched Egg Vermicelli," as the case may be, when the units of the food comply with the requirements of paragraphs (b), (c), (d), or (e) respectively of this section.

PART 17—BAKERY PRODUCTS; DEFINITIONS AND STANDARDS OF IDENTITY

Sec.

17.1 Bread, white bread, and rolls, white rolls, or buns, white buns; identity; label statement of optional ingredients.
17.2 Enriched bread and enriched rolls or enriched buns; identity; label statement of optional ingredients.
17.3 Milk bread and milk rolls or milk buns; identity; label statement of optional ingredients.
17.4 Raisin bread and raisin rolls or raisin buns; identity; label statement of optional ingredients.
17.5 Whole wheat bread, graham bread, entire wheat bread, and whole wheat rolls, graham rolls, entire wheat rolls, or whole wheat buns, graham buns, entire wheat buns; identity; label statement of optional ingredients.

AUTHORITY: §§ 17.1 to 17.5 issued under 52 Stat. 1043, 1055, 68 Stat. 54; 21 U. S. C. 341, 371.

§ 17.1 *Bread, white bread, and rolls, white rolls, or buns, white buns; identity; label statement of optional ingredients.* (a) Each of the foods bread, white bread, rolls, white rolls, buns, white buns is prepared by baking a kneaded yeast-leavened dough, made by moistening flour with water or with one or more of the optional liquid ingredients specified in this section or with any mixture of water and one or more of such ingredients. The term "flour," unqualified, as used in this section, includes flour, bromated flour, and phosphated flour. The potassium bromate in any bromated flour used and the monocalcium phosphate in any phosphated flour used shall be deemed to be optional ingredients in the bread or rolls. Each of such foods is seasoned with salt, and in its preparation one or more of the optional ingredients prescribed by subparagraphs (1) to (14), inclusive, of this paragraph may be used:

(1) Shortening, in which or in conjunction with which may be used lecithin, mono- and diglycerides of fat-forming fatty acids (except lauric acid), or diacetyl tartaric acid esters of mono- and diglycerides of fat-forming fatty acids (except lauric acid), or a combination of two or more of these. The total weight of mono- and diglycerides, including diacetyl tartaric acid esters of mono- and diglycerides of fat-forming fatty acids, used does not exceed 20 percent by weight of the combination of such a preparation and the shortening, and the total amount of monoglyceride in such mixture does not exceed 8 percent by weight of the combination; but if purified or concentrated monoglyceride is used the amount of such a preparation does not exceed 10 percent by weight of the combination of such preparation and the shortening. For the purposes of this section the lecithin may include related phosphatides derived from the corn or soya-bean oil from which the lecithin was obtained.

(2) Milk, concentrated milk, evaporated milk, sweetened condensed milk, dried milk, skim milk, concentrated skim milk, evaporated skim milk, sweetened condensed partly skimmed milk, sweetened condensed skim milk, nonfat dry milk solids, or any combination of two or more of these; except that any such ingredient or combination, together with any butter and cream used, is so limited in quantity or composition as not to meet the requirements for milk or dairy ingredients prescribed for milk bread by § 17.3.

(3) Buttermilk, concentrated buttermilk, dried buttermilk, sweet cream buttermilk, concentrated sweet cream buttermilk, dried sweet cream buttermilk, cheese whey, concentrated cheese whey, dried cheese whey, milk proteins, or any combination of two or more of these.

(4) Liquid eggs, frozen eggs, dried eggs, egg yolks, frozen egg yolks, dried yolks, egg white, frozen egg white, dried egg white, or any combination of two or more of these.

(5) Sugar, invert sugar (in congealed or sirup form), light-colored brown sugar, refiner's sirup, dextrose, honey, corn sirup, glucose sirup, dried corn sirup, dried glucose sirup, nondiastatic malt sirup, nondiastatic dried malt sirup, molasses (except blackstrap molasses), or any combination of two or more of these.

(6) Malt sirup, dried malt sirup, malted barley flour, malted wheat flour, each of which is diastatically active; harmless preparations of enzymes obtained from Aspergillus oryzae, or any combination of two or more of these.

(7) Inactive dried yeast of the genus Saccharomyces cerevisiae; but the total quantity thereof is not more than 2 parts for each 100 parts by weight of flour used.

(8) Harmless lactic-acid producing bacteria.

(9) Corn flour (including finely ground corn meal), potato flour, rice flour, wheat starch, cornstarch, milo starch, potato starch, sweet potato starch (any of which may be wholly or in part dextrinized), dextrinized wheat flour, soy flour, or any combination of two or more of these; but the total quantity thereof is not more than 3 parts for each 100 parts by weight of flour used.

(10) Ground dehulled soybeans, which may be heat-treated and from which oil may be removed, but which retain enzymatic activity; but the quantity thereof is not more than 0.5 part for each 100 parts by weight of flour used.

(11) Calcium sulfate, calcium lactate, calcium carbonate, dicalcium phosphate, ammonium phosphates, ammonium sulfate, ammonium chloride, or any combination of two or more of these; but the total quantity of such ingredients is not more than 0.25 part for each 100 parts by weight of flour used.

(12) Potassium bromate, potassium iodate, calcium peroxide, or any combination of two or more of these; but the total quantity thereof (including the potassium bromate in any bromated flour used) is not more than 0.0075 part for each 100 parts by weight of flour used.

(13) (i) Monocalcium phosphate, but the total quantity thereof, including the quantity in any phosphated flour used and any quantity added, is not more than 0.75 part by weight for each 100 parts by weight of flour used.

(ii) A vinegar, in a quantity equivalent in acid strength to not more than 1 pint of 100-grain distilled vinegar for each 100 pounds of flour used; or

(iii) Calcium propionate, sodium propionate, or any mixture of these, but the total quantity thereof is not more than 0.32 part for each 100 parts by weight of flour used; or

(iv) Sodium diacetate, but the quantity thereof is not more than 0.4 part for each 100 parts by weight of flour used; or

(v) Lactic acid, in such quantity that the pH of the finished bread is not less than 4.5.

(14) Spice, with which may be included spice oil and spice extract.

Each of such foods contains not less than 62 percent of total solids, as determined by the method prescribed in "Official Methods of Analysis of the Association of Official Agricultural Chemists," Seventh Edition, 1950, page 209, section 13.70, under "Total Solids in an Entire Loaf of Bread," [Ed. note, 8th Ed., 1955, p. 222, sec. 13.72], except that if the baked unit weighs 1 pound or more one entire unit is used for the determination, and if the baked unit weighs less than 1 pound, such number of entire units as weigh 1 pound or more is used for the determination.

(b) Bread, white bread is baked in units each of which weighs one-half pound or more after cooling. Rolls, white rolls, and buns, white buns are baked in units each of which weighs less than one-half pound after cooling.

(c) (1) When any optional ingredient permitted by paragraph (a) (13) of this section is used, except a vinegar and except monocalcium phosphate, in a quantity less than 0.25 part for each 100 parts by weight of flour, the label shall bear the statement "_____ added to retard spoilage," the blank being filled in with the name by which the ingredient used is designated in such paragraph.

(2) When an optional ingredient permitted by paragraph (a) (14) of this section is used, the label shall bear the statement "spiced" or "spice added" or "with added spice"; but in lieu of the word "spice" in such statements, the common or usual name of the spice may be used.

(3) Wherever the name of the food appears on the label so conspicuously as to be easily seen under customary conditions of purchase, the words and statements specified in this paragraph shall immediately and conspicuously precede or follow such name, without intervening written, printed, or graphic matter.

§ 17.2 *Enriched bread and enriched rolls or enriched buns; identity; label statement of optional ingredients.* (a) Each of the foods enriched bread, enriched rolls, enriched buns conforms to the definition and standard of identity, and is subject to the requirements for label statement of optional ingredients, prescribed for bread by § 17.1 (a) and (c), except that:

(1) Each such food contains in each pound not less than 1.1 milligrams and not more than 1.8 milligrams of thiamine, not less than 0.7 milligram and not more than 1.6 milligrams of riboflavin, not less than 10.0 milligrams and not more than 15.0 milligrams of niacin or niacinamide, and not less than 8.0 milligrams and not more than 12.5 milligrams of iron (Fe).

(2) Each such food may also contain as an optional ingredient added vitamin D in such quantity that each pound of the finished food contains not less than 150 United States Pharmacopeia units and not more than 750 United States Pharmacopeia units of vitamin D.

(3) Each such food may also contain as an optional ingredient added harmless calcium salts in such quantity that each pound of the finished food contains not less than 300 milligrams and not more than 800 milligrams of calcium (Ca).

(4) Each such food may also contain as an optional ingredient wheat germ or partly defatted wheat germ; but the total quantity thereof, including any wheat germ or partly defatted wheat germ in any enriched flour used, is not more than 5 percent of the flour ingredient.

(5) Enriched flour may be used, in whole or in part, instead of flour.

(6) The limitation prescribed by § 17.1 (a) (2) on the quantity and composition of milk and dairy ingredients does not apply.

As used in this section, the term "flour," unqualified, includes bromated flour and phosphated flour; the term "enriched flour" includes enriched bromated flour. The prescribed quantity of any substance referred to in subparagraphs (1), (2), and (3) of this paragraph may be supplied, or partly supplied, through the use of enriched flour; through the direct addition of such substance under the conditions permitted by § 15.10 of this chapter for supplying such substance in the preparation of enriched flour; through the use of any ingredient containing such substance, which ingredient is required or permitted by § 17.1 (a) within the limits, if any, prescribed by such section, as modified by subparagraph (6) of this paragraph; through the use of wheat germ; or through any two or more of such methods.

(b) Enriched bread is baked in units each of which weighs one-half pound or more after cooling. Enriched rolls or enriched buns are baked in units each of which weighs less than one-half pound after cooling.

§ 17.3 *Milk bread and milk rolls or milk buns; identity; label statement of optional ingredients.* (a) Each of the foods milk bread, milk rolls, milk buns conforms to the definition and standard of identity, and is subject to the requirements for label statement of optional

ingredients, prescribed for bread and rolls by buns by § 17.1 (a) and (c), except that:

(1) Milk is used as the sole moistening ingredient in preparing the dough; or in lieu of milk one or more of the dairy ingredients prescribed in paragraph (c) of this section is used, with or without water, in a quantity containing not less than 8.2 parts by weight of milk solids for each 100 parts by weight of flour used (including any bromated flour or phosphated flour used).

(2) No ingredient permitted by § 17.1 (a) (3) is used.

(b) Milk bread is baked in units each of which weighs one-half pound or more after cooling. Milk rolls or milk buns are baked in units each of which weighs less than one-half pound after cooling.

(c) The dairy ingredients referred to in paragraph (a) (1) of this section are concentrated milk, evaporated milk, sweetened condensed milk, dried milk, and a mixture of butter or cream or both with skim milk, concentrated skim milk, evaporated skim milk, sweetened condensed skim milk, sweetened condensed partly skimmed milk, nonfat dry milk solids, or any two or more of these, in such proportion that the weight of nonfat milk solids in such mixture is not more than 2.3 times and not less than 1.2 times the weight of the milk fat therein.

§ 17.4 *Raisin bread and raisin rolls or raisin buns; identity; label statement of optional ingredients.* (a) Each of the foods raisin bread, raisin rolls, raisin buns conforms to the definition and standard of identity, and is subject to the requirements for label statement of optional ingredients, prescribed for bread and rolls or buns by § 17.1 (a) and (c), except that:

(1) Not less than 50 parts by weight of seeded or seedless raisins are used for each 100 parts by weight of flour used (including any bromated flour or phosphated flour used).

(2) Water extract of raisins may be used, but not to replace raisins.

(3) The baked units may bear icing or frosting.

(4) The limitation prescribed by § 17.1 (a) (2) on the quantity and composition of dairy ingredients does not apply.

(5) In determining its total solids, instead of following the direction "Grind sample just to pass 20-mesh sieve" (Official Methods of Analysis of the Association of Official Agricultural Chemists, Seventh Edition, 1950, page 209, section 13.70 [Ed. Note, 8th Ed., 1955, p. 222, sec. 13.72], under "Total Solids in an Entire Loaf of Bread") comminute the sample by passing it twice through a food chopper.

(b) Raisin bread is baked in units each of which weighs one-half pound or more after cooling. Raisin rolls or raisin buns are baked in units each of which weighs less than one-half pound after cooling.

§ 17.5 *Whole wheat bread, graham bread, entire wheat bread, and whole wheat rolls, graham rolls, entire wheat rolls, or whole wheat buns, graham buns, entire wheat buns; identity; label statement of optional ingredients.* (a) Each of the foods whole wheat bread, graham bread, entire wheat bread, whole wheat rolls, graham rolls, entire wheat rolls, whole wheat buns, graham buns, entire wheat buns conforms to the definition and standard of identity, and is subject to the requirements for label statement of optional ingredients, prescribed for bread, rolls, and buns by § 17.1 (a) and (c), except that:

(1) The dough is made with whole wheat flour, and no flour is used therein.

(2) The limitation prescribed by § 17.1 (a) (2) on the quantity and composition of dairy ingredients does not apply.

(3) The total weight of calcium propionate, sodium propionate, or mixtures of these used is not more than 0.38 part for each 100 parts by weight of the whole wheat flour used.

As used in this section, the term "flour," unqualified, includes flour, enriched flour, bromated flour, enriched bromated flour, and phosphated flour; the term "whole wheat flour" includes whole wheat flour and bromated whole wheat flour. The potassium bromate in any bromated whole wheat flour used shall be deemed to be an optional ingredient in the whole wheat bread or whole wheat rolls.

(b) Whole wheat bread, graham bread, or entire wheat bread is baked in units each of which weighs one-half pound or more after cooling. Whole wheat rolls, graham rolls, entire wheat rolls, or whole wheat buns, graham buns, entire wheat buns are baked in units each of which weighs less than one-half pound after cooling.

PART 18—MILK AND CREAM; DEFINITIONS AND STANDARDS OF IDENTITY

Sec.

18.500 Cream class of food; identity.
18.501 Light cream, coffee cream, table cream; identity.
18.510 Whipping cream class of food; identity.
18.511 Light whipping cream; identity.
18.515 Heavy cream, heavy whipping cream; identity.
18.520 Evaporated milk; identity; label statement of optional ingredients.
18.525 Concentrated milk, plain condensed milk; identity; label statement of optional ingredients.
18.530 Sweetened condensed milk; identity.
18.535 Condensed milks which contain corn sirup; identity.
18.540 Dried skim milk, powdered skim milk, skim milk powder; identity.

AUTHORITY: §§ 18.500 to 18.540 issued under sec. 701 (a), 52 Stat. 1055; 21 U. S. C. 371 (a). Interpret or apply sec. 401, 52 Stat. 1046, 68 Stat. 54; 21 U. S. C. 341.

§ 18.500 *Cream class of food; identity.* Cream is the class of food which is the sweet, fatty liquid or semi-liquid separated from milk, with or without the addition thereto and intimate admixture therewith of sweet milk or sweet skim milk. It may be pasteurized and if it contains less than 30 percent of milk fat as determined by the method referred to in this section, it may be homogenized. It contains not less than 18 percent of milk fat, as determined by the method prescribed in "Official and Tentative Methods of Analysis of the Association of Official Agriculture Chemists," Fourth Edition, 1935, page 277 [Ed. note, 8th edition, 1955, p. 261, sec. 15.61] under "Fat, Roese-Gottlieb Method—Official." The word "milk" as used in this section means cow's milk.

§ 18.501 *Light cream, coffee cream, table cream; identity.* Light cream, coffee cream, table cream, conforms to the definition and standard of identity prescribed for the cream class of food by § 18.500, except that it contains less than 30 percent of milk fat, as determined by the method referred to in such section.

§ 18.510 *Whipping cream class of food; identity.* Whipping cream is the class of food which conforms to the definition and standard of identity prescribed for the cream class of food by § 18.500, except that it contains not less than 30 percent of milk fat, as determined by the method referred to in such section.

§ 18.511 *Light whipping cream; identity.* Light whipping cream conforms to the definition and standard of identity prescribed for the whipping cream class of food by § 18.510, except that it contains less than 36 percent of milk fat, as determined by the method referred to in § 18.500.

§ 18.515 *Heavy cream, heavy whipping cream; identity.* Heavy cream, heavy whipping cream, conforms to the definition and standard of identity prescribed for the whipping cream class of food by § 18.510, except that it contains not less than 36 percent of milk fat, as determined by the method referred to in § 18.500.

§ 18.520 *Evaporated milk; identity; label statement of optional ingredients.* (a) Evaporated milk is the liquid food made by evaporating sweet milk to such point that it contains not less than 7.9 percent of milk fat and not less than 25.9 percent of total milk solids. It may contain one or both of the following optional ingredients:

(1) Disodium phosphate or sodium citrate or both, or calcium chloride, added in a total quantity of not more than 0.1 percent by weight of the finished evaporated milk.

(2) Vitamin D in such quantity as to increase the total vitamin D content to not less than 25 U. S. P. units per fluid ounce of the finished evaporated milk. It may be homogenized. It is sealed in a container and so processed by heat as to prevent spoilage.

(b) When the optional ingredient specified in paragraph (a) (2) of this section is present, the label shall bear the statement "with increased vitamin D content" or "vitamin D content increased." Such statement shall immediately and conspicuously precede or follow the name "Evaporated Milk," without intervening written, printed, or graphic matter, wherever such name appears on the label so conspicuously as to be easily seen under customary conditions of purchase.

(c) For the purpose of this section:

(1) The word "milk" means cow's milk.

(2) Such milk may be adjusted, before or after evaporation, by the addition or abstraction of cream or sweet skim milk, or by the addition of concentrated sweet skim milk.

(3) The quantity of milk fat is determined by the method prescribed under "Fat—Official" on page 249 [Ed. note, 8th edition, 1955, p. 263, sec. 15.74] and the quantity of total milk solids is determined by the method prescribed under "Total Solids—Official" on page 248 [Ed. note, 8th edition, 1955, p. 263, sec. 15.72] of "Official Methods of Analysis of the Association of Official Agricultural Chemists," Seventh Edition, 1950.

(4) Vitamin D content may be increased by the application of radiant energy or by the addition of a concentrate of vitamin D (with any accompanying vitamin A when such vitamin D in such concentrate is obtained from natural sources) dissolved in a food oil; but if such oil is not milk fat the quantity thereof added is not more than 0.01 percent of the weight of the finished evaporated milk.

(5) The quantity of vitamin D is determined by the method prescribed in "Official Methods of Analysis of the Association of Official Agricultural Chemists," Seventh Edition, 1950, page 738 et seq., [Ed. note, 8th edition, 1955, p. 839 et seq., secs. 38.64, 38.75], under the heading "Vitamin D in Milk—Official."

§ 18.525 *Concentrated milk, plain condensed milk; identity; label statement of optional ingredients.* Concentrated milk, plain condensed milk, conforms to the definition and standard of identity, and is subject to the requirements for label statement of optional ingredients, prescribed for evaporated milk by § 18.520, except that:

(a) It is not processed by heat;

(b) Its container may be unsealed; and

(c) Optional ingredient § 18.520 (a) (1) is not used.

§ 18.530 *Sweetened condensed milk; identity.* (a) Sweetened condensed milk is the liquid or semi-liquid food made by evaporating a mixture of sweet milk and refined sugar (sucrose) or any combination of refined sugar (sucrose) and refined corn sugar (dextrose) to such point that the finished sweetened condensed milk contains not less than 28.0 percent of total milk solids and not less than 8.5 percent of milk fat. The quantity of refined sugar (sucrose) or combination of such sugar and refined corn sugar (dextrose) used is sufficient to prevent spoilage.

(b) For the purpose of this section:

(1) The word "milk" means cow's milk.

(2) Such milk may be adjusted, before or after evaporation, by the addition or abstraction of cream or sweet skim milk, or the addition of concentrated sweet skim milk.

(3) Milk fat is determined by the method prescribed in "Official and Tentative Methods of Analysis of the Association of Official Agricultural Chemists," Fourth Edition, 1935, page 281 [Ed. note, 8th edition, 1955, p. 264, sec. 15.86], under "Fat—Official."

§ 18.535 *Condensed milks which contain corn sirup; identity.* (a) Condensed milks which contain corn sirup are the foods each of which conforms to the definition and standard of identity prescribed for sweetened condensed milk by § 18.530 except that corn sirup or a mixture of corn sirup and sugar is used instead of sugar or a mixture of sugar and dextrose. For the purpose of this section the term "corn sirup" means a clarified and concentrated aqueous solution of the porducts obtained by the incomplete hydrolysis of cornstarch, and includes dried corn sirup; the solids of such corn sirup contain not less than 40 percent by weight of reducing sugars, calculated as anhydrous dextrose.

(b) The name of each such food is:

(1) "Corn sirup condensed milk," "condensed milk with corn sirup," or "condensed milk prepared with corn sirup," if corn sirup alone is used; or

(2) "____% Corn sirup solids ____% sugar condensed milk," "Condensed milk with ____% corn sirup solids ____% sugar," or "Condensed milk prepared with ____% corn sirup solids ____% sugar," if a mixture of corn sirup and sugar is used, the blanks being filled in with the whole numbers nearest the actual percentages of corn sirup solids and sugar in such food; alternately "____% sugar" may precede "____% corn sirup solids" in such names.

§ 18.540 *Dried skim milk, powdered skim milk, skim milk powder; identity.* Dried skim milk, powdered skim milk, skim milk powder, is the food made by drying sweet skim milk. It contains not more than 5 percent of moisture, as determined by the method prescribed in "Official and Tentative Methods of Analysis of the Association of Official Agricultural Chemists," Fourth Edition, 1935, page 282 [Ed. note, 8th edition, 1955, p. 265, sec. 15.93], under the caption "Moisture—Tentative." The term "skim milk" as used in this section, means cow's milk from which the milk fat has been separated.

NOTE: 58 Stat. 108, 21 U. S. C. 321c, provides a statutory definition for this food under the names: "Non-fat dry milk solids" and "defatted milk solids."

PART 19—CHEESES; PROCESSED CHEESES; CHEESE FOODS; CHEESE SPREADS, AND RELATED FOODS; DEFINITIONS AND STANDARDS OF IDENTITY

Sec.

19.500 Cheddar cheese, cheese; identity.
19.502 Cheddar cheese for manufacturing; identity.
19.505 Washed curd cheese, soaked curd cheese; identity.
19.507 Washed curd cheese for manufacturing; identity.
19.510 Colby cheese; identity.
19.512 Colby cheese for manufacturing; identity.
19.515 Cream cheese; identity; label statement of optional ingredients.
19.520 Neufchatel cheese; identity; label statement of optional ingredients.
19.525 Cottage cheese; identity.
19.530 Creamed cottage cheese; identity.
19.535 Granular cheese, stirred curd cheese; identity.
19.537 Granular cheese for manufacturing; identity.
19.540 Swiss cheese, emmentaler cheese; identity.
19.542 Swiss cheese for manufacturing; identity.
19.543 Gruyere cheese; identity.
19.545 Brick cheese; identity.
19.547 Brick cheese for manufacturing; identity.
19.550 Muenster cheese, munster cheese; identity.
19.555 Edam cheese; identity.
19.560 Gouda cheese; identity.
19.565 Blue cheese; identity.
19.567 Gorgonzola cheese; identity.
19.570 Roquefort cheese, sheep's milk blue-mold cheese, blue-mold cheese from sheep's milk; identity.
19.575 Limburger cheese; identity.
19.580 Monterey cheese; Monterey jack cheese; identity.
19.585 High-moisture jack cheese; identity.
19.590 Provolone cheese, pasta filata cheese; identity.
19.591 Caciocavallo siciliano cheese; identity.
19.595 Parmesan cheese, reggiano cheese; identity.
19.610 Romano cheese; identity.
19.615 Asiago fresh cheese, asiago soft cheese; identity.
19.620 Asiago medium cheese; identity.
19.625 Asiago old cheese; identity.
19.635 Cook cheese, koch kaese; identity.
19.637 Sap sago cheese; identity.
19.639 Gammelost cheese; identity.
19.650 Hard cheeses; identity.
19.655 Semisoft cheeses; identity; label statement of optional ingredients.
19.660 Semisoft part-skim cheeses; identity; label statement of optional ingredients.
19.665 Soft ripened cheeses; identity; label statement of optional ingredients.
19.670 Spiced cheeses; identity; label statement of optional ingredients.
19.675 Part-skim spiced cheeses; identity; label statement of optional ingredients.
19.680 Hard grating cheeses; identity; label statement of optional ingredients.
19.685 Skim-milk cheese for manufacturing; identity.
19.750 Pasteurized process cheese; identity; label statement of optional ingredients.
19.751 Pasteurized blended cheese; identity; label statement of optional ingredients.
19.755 Pasteurized process cheese with fruits, vegetables, or meats; identity; label statement of optional ingredients.
19.760 Pasteurized process pimento cheese; identity.
